Raymund and Hermann Härtel left no male heir and the firm accordingly passed to their nephews, Wilhelm Volkmann (*b* Leipzig, 12 June 1837; *d* Leipzig, 24 Dec 1896) and Oskar von Hase (*b* Jena, 15 Sept 1846; *d* Leipzig, 26 Jan 1921), who considerably expanded the firm's programme in meeting the demands of contemporary political and economic conditions. Ludwig Volkmann (*b* Leipzig, 9 Jan 1870; *d* Leipzig, 10 Feb 1947) took over his father's responsibilities when the latter died. The Volkmann family dealt primarily with the technical processes of typesetting and printing. Oskar von Hase initiated the Denkmäler Deutscher Tonkunst and Denkmäler der Tonkunst in Bayern. In the years between 1850 and 1912 more than 20 complete critical editions were begun, including those of Mendelssohn, Mozart, Schumann, Schubert, Schütz, Berlioz, Schein, Liszt, Haydn and Wagner, as well as Bach and Beethoven.

Oskar von Hase systematically expanded the collection of concert material, and established libraries to house full scores, as well as orchestral, choral and chamber music. This fundamental reorganization of the firm's stock lasted for decades. Eugene d'Albert, Busoni and above all Sibelius were the contemporary composers whom the firm promoted. Its books on music, including collections of individual composers' correspondence, were unsurpassed in their range. The firm collaborated with leading

contemporary music scholars, including Eitner, Riemann, Kretzschmar, Friedrich Ludwig, Johannes Wolf, Abert and Schering. The book division also published works on theology, medicine and aesthetics. From 1883 the firm maintained branches abroad and concluded sales agreements with almost 50 foreign publishing houses.

World War I and the ensuing economic crises were a turning-point in Breitkopf & Härtel's history. Not only Ludwig Volkmann, but also Hellmuth von Hase (*b* Leipzig, 30 Jan 1891; *d* Wiesbaden, 18 Oct 1979), who entered the business in 1919, together with Martin von Hase (1901–71) and Wilhelm Volkmann (1898–1939), all recognized that only by means of far-sighted changes in publishing could they reconcile their traditional duties with modern needs in music and musical scholarship. Between 1926 and 1928 the works of Brahms were published in 26 volumes. Numerous composers, all of them in the mainstream of international musical life, were published by the firm, including Schoeck, Atterberg, Kilpinen, Zilcher, Kurt Thomas, Johann Nepomuk David, Raphael, Hugo Distler and Bräutigam. The music textbook division produced standard reference works, and Breitkopf & Härtel also devoted themselves to the publication of music journals.

The publishing works were destroyed in a bombing raid during December 1943, and valuable autographs and archive material were lost. Part of what was saved from the archives was bought by the Hessische Landes- und Hochschulbibliothek in Darmstadt in 1951; another part, including copybooks and correspondence dating from about 1895, was given to the Leipzig State Archives in 1962, and the private collection of Hermann Härtel went to the Staatsbibliothek Preussischer Kulturbesitz in Berlin (now *D-Bsb*). Reconstruction work began slowly in 1945, and the firm was in effect divided into two, with one independent section in East Germany and one in West. The technical side of the business in Leipzig was separated from the publishing house, which became nationally owned in 1952. The firm of VEB Breitkopf & Härtel Leipzig has an extensive and systematically developed publishing programme. Besides publishing the well-known classics, the firm promotes the works of such composers from the former East Germany as Eisler, Ernst Hermann Meyer, Dessau, Wilhelm Weismann, Georg Trexler, Finke, Fritz Geissler, J.P. Thilman, Otto Reinhold, Siegfried Kurz and Zechlin. Gunter Hempel (*b* Annaberg, 7 June 1932) was appointed head of the publishing division in 1974, when he took over from the music scholar and publisher Helmut Zeraschi (*b* 1911). The West German part of the firm was refounded in Wiesbaden in 1945 by Hellmuth and Martin von Hase and was later run by Lieselotte Sievers (*b* Leipzig, 18 April 1928) and Joachim Volkmann (*b* Leipzig, 30 Nov 1926). Apart from the collected edition of Reger's works, begun in 1954, the firm is responsible for the series Collegium Musicae Novae, and also publishes such contemporary composers as Driessler, Eimert, Knab, Christian Lahusen, Marx and Rohwer. The remaining archive of the Leipzig firm, containing about 3000 books and 22,000 musical works, was integrated into the Wiesbaden stocks in 1991.

HANS-MARTIN PLESSKE

Brel, Jacques (Romain Georges) (*b* Brussels, 8 April 1929; *d* Paris, 8 Oct 1978). Belgian singer and songwriter. He began writing chansons in 1950, started performing them in Paris (1953) at the the theatre Les trois baudets and became internationally known from 1957. He made his American début at Carnegie Hall in 1963, subsequently touring the USA and USSR (1965); he retired from concert appearances in 1966 in favour of recordings. Brel adapted the Broadway hit show *Man of La Mancha* for Paris (1968), taking the leading role himself, and wrote the lyrics for a musical, *Le voyage dans la lune*, which was cancelled shortly before its première at the Théâtre de la Monnaie, Brussels (1969). He made his first appearance in a major film in *Les risques du métier* (1967) and later directed *Franz* (1971). Many of his songs were included in a retrospective revue *Jacques Brel is Alive and Well and Living in Paris* that ran for three years on Broadway from 1968. Despite major surgery in 1974 he died of cancer in 1978.

Brel's lyrics, often bitingly satirical of modern and social morals, are set to rather sophisticated music, often with insistent rhythms and the cumulative effect of repetition as in *Amsterdam* (1964) and *La chanson de Jacky* (1965). His work influenced such writers and performers as Leonard Cohen, David Bowie and, most notable for his interpretations of Brel's songs, Scott Walker. Several of Brel's songs have become chart successes in translation, for example *Le moribund* (1961) as *Seasons in the Sun*, while his *Ne me quitte pas* has become a standard as *If You Go Away*, recorded by such performers as Dusty Springfield and Shirley Bassey.

WORKS
(*selective list*)

all music and lyrics by Brel; dates those of publication

Many individual popular songs, incl. Quand on n'a que l'amour, 1956; La Dame Patronesses, 1959; Les flamandes, 1959; Ne me quitte pas [If You Go Away], 1959; Seul, 1959; Le valse à mille temps, 1959; Les bourgeois, 1962; Le moribund [Seasons in the Sun], 1961; Amsterdam, 1964; Jef, 1964; La chanson de Jacky, 1965; Fille sauvage, 1966; J'arrive, 1968; La quête, 1968

Songs for films (film in parentheses): Pourquoi faut-il que les hommes s'ennuient (Un roi sans divertissement, 1964); Les coeurs tendres (Un idiot à Paris, 1967); Buvons un coup, Pour mourir, Porteurs de rapières (Mon Oncle Benjamin, 1970); La chanson de Van Horst (Le bar de la fourche, 1972); L'enfance (Far West, 1973)

Brelet, Gisèle (Jeanne Marie Noémie) (*b* Fontenay-le-Comte, Vendée, 6 March 1915; *d* Sèvres, 21 June 1973). French musicologist and pianist. She studied the piano at the conservatories of Nantes (under G. Arcouet) and Paris (under Lazare Lévy), and biology and philosophy at the Sorbonne (doctorat d'Etat in philosophy 1949). From 1950 she directed the Bibliothèque Internationale de Musicologie, and in 1952 was appointed solo pianist to the RTF for whom she also lectured and produced musical programmes. She published extensively in the aesthetics of music, with special emphasis on the status of music as the art of time and on the privileged role of the virtuoso performer.

Brelet's work elaborates the view of music borrowed from Pierre Souvtchinsky by Igor Stravinsky, to whom she assigns the central place in 20th-century music. Her three books develop a single argument. The first contrasts the traditional poetics of music, according to which a system of intervals forms the basis of harmonic and melodic structures, with an alternative poetics of temporal form. The second book elaborates this theme into an encomium on music. Since time is the form of the inner life, music must be the most perfect art, for it directly imparts formal perfection to experience itself. From this standpoint, modern non-tonal music appears as aberrant, since the absence of a tonal centre eliminates expectation and thus makes significant temporal form impossible. The third book uses this view of music to prove that the virtuoso performer is the only true musician. Music, being a form of temporal experience, can exist only as and when it is performed. The composer merely provides possibilities which he leaves to performers to actualize in various ways. It follows that performers should not strive to recreate the original effect of a work, or respect a composer's intentions: historical fidelity is not aesthetic fidelity.

In her articles of the 1960s Brelet withdrew her claim for the normality of a tonal centre, conceding that temporal structures can have their three dimensions without pre-established points of rest.

F.E. SPARSHOTT

Brema, Marie [Fehrman, Minny] (*b* Liverpool, 28 Feb 1856; *d* Manchester, 22 March 1925). English mezzo-soprano of German-American parentage. She began serious musical study only in 1890 with George Henschel, and made her début, under the name of Bremer, in 1891 singing Schubert's *Ganymed* at a London Popular Concert. The same year she made her operatic début as Lola in the first performance in England of *Cavalleria rusticana* at the Shaftesbury Theatre, London. In 1894 she was engaged by Cosima Wagner for Bayreuth, the first British-born singer to appear there, where she sang Ortrud in the first Bayreuth *Lohengrin*, and Kundry. She returned in 1896 and 1897 to sing Fricka, and was again heard as Kundry. She toured the USA with the Damrosch Opera Company (1894–5), singing Ortrud, Brangäne and the *Walküre* Brünnhilde; she joined the Metropolitan Opera, for the 1895–6 season, where, in addition to appearing in the Wagner repertory, she sang Amneris and Orpheus. She made her Covent Garden début in 1893 as Siebel in *Faust*, returning there several times between 1897 and 1907, and creating Beatrice in Stanford's *Much Ado About Nothing* (1901). She often sang in Paris, where she was the Brangäne of the first *Tristan* there under Charles Lamoureux in 1899 (in French), and the first Brünnhilde in *Götterdämmerung* under Richter in 1902; she also appeared successfully as Marcelline in Alfred Bruneau's *L'attaque du moulin*.

In 1910 she organized the first of three seasons of opera in English at the Savoy Theatre, London, singing Orpheus in her own production of Gluck's opera, and the title role in the first production in England of Emanuel Moór's *La Pompadour*. In addition to her operatic appearances she sang regularly at the important English festivals and created the part of the Angel in Elgar's *The Dream of Gerontius* at the Birmingham Festival in 1900. After leaving the stage, she was for many years director of the opera class at the RMCM. Photographs indicate that she had an imposing stage presence, and contemporary critics praised her expansive singing and committed acting.

HAROLD ROSENTHAL/R

Bremberger, Reinmar der. *See* REINMAR VON BRENNENBERG.

Bremen. Town located on the river Weser in Germany. It is the country's oldest port. It was the centre of the north-eastern bishopric established in 787 by Charlemagne against the Saxons; as the residence of the archbishops of Hamburg and Bremen it was noted at an early date for its musical connections. It became part of the Hanseatic League in 1358. The earliest example of church music associated with Bremen is probably the Willehad-Antiphon from the Vicelinus Codex of about 1050 (now in *D-MÜsa*). The teaching of singing at the cathedral school is mentioned in the second half of the 10th century, and a famous choirmaster named Guido was invited to Bremen by Archbishop Hermann (1032–5). In 1231 Pope Gregory IX confirmed the organization of a Bremen archdeaconry with Kantors, and donations show that about 1350 an organ was used for services in the cathedral and in the chapter of St Ansgarius (now the Neue St Ansgariikirche). For many years after the Reformation, bitter disputes between Lutherans and Calvinists hindered the consolidation of the new relationships and new forms of worship. The Reformed Church eventually established itself in 1568; after an interruption of almost 30 years, organ playing, choral singing and instrumental music were

accorded a secure, if limited, place in worship. Like the preachers and instructors, musicians in ecclesiastical and municipal appointments were now brought in predominantly from northern and eastern parts of Friesland: the Knop brothers from Emden, Paul as organist of St Stephani (1584) and Johannes as municipal director of music (1600); Thomas Janssen, also from Emden and probably a pupil of Sweelinck, as organist of St Ansgarius (1619); Johannes Eitzen from Appingedam as organist at St Martini (1614); and as municipal director of music (1620–27) Johann Sommer. The descendants of the Knops, Eitzen and Janssen held comparable musical positions for several generations, among them Lüder Knop (*d* 1665), Samuel and Johannes Eitzen (who left Bremen in 1668 and 1697 respectively) and Johann Janssen (*d* 1736). After the Thirty Years War there was a Pietist movement fostered by the writer of sacred songs Joachim Neander (1650–80) and the younger Kantor Christoph Knipping (1620–75) to which the preacher Marcus Steffens in 1687 contributed the polemic *Geistliche Gedanken gerichtet auf die Beschaffenheit der christlichen Gesänge und Kirchenmusik*.

The cathedral was closed by the town council from 1561 to 1638, and thereafter it was always an enclave of Lutheranism, first archiepiscopal, then Swedish and finally English, until in 1803 it was incorporated into the city of Bremen. During this period it had its own musical arrangements, independently of the municipality. Its most distinguished Kantors were Laurentius Laurenti (1684–1722), a native of Husum who was also a productive writer of sacred songs, and the versatile Thuringian Wilhelm Christian Müller, who did much to bring Bremen musical life up to date in the early 19th century; its organists included Theodor Rauschelbach (from 1790), a pupil of C.P.E. Bach and reputedly a composer and improviser in the manner of Abbé Vogler. Among the surviving organs, that of St Martini (case from 1603/4) and the Gottfried Silbermann positive organ (1734) in the cathedral are most noteworthy.

The first evidence of secular music dates from about 1300, when the Minnesinger Frauenlob is said to have visited Archbishop Giselbrecht (1275–1306). In 1303 an official regulation limited the number of musicians allowed to play at weddings to eight. The first document referring to a Ratstrompeter (civic trumpeter) is dated 1339; 50 years later three reed players accompanied the archbishop of Bremen when he travelled to Hamburg. There are no reliable accounts of music-making among the middle classes until after 1405, when the town hall was built, the city gained in prosperity and the townspeople began to assert their power in opposition to that of the archbishop. Only towards the end of the 15th century do reliable sources begin to appear, and these in general reveal an already established order of things. By the 17th century the structure of the municipal organization of music had become outmoded, and the engagement as directors of the municipal band of sound musicians such as Ernst Othmar Abel (1662) and the 60-year-old violinist Clamor Heinrich Abel (1694) could only sporadically halt the decline of music-making in the city. Opera was first given in about 1695; regular performances began a century later, first in the Komödienhaus auf dem Reithof and then in the Schauspielhaus (destroyed in the 1940s).

In the wake of the new dispositions for the town's music about 1800 the Gesellschaft für Privatkonzerte came into being in 1807; it had grown out of amateur performances in the Gewandhaus (later Gewerbehaus) built in 1674 for the use of guilds and families, and led in 1815 to the founding of the Singakademie. The founding of the Bremer Liedertafel in 1827 was followed in 1831 by that of the Bund der Nordwestdeutschen Liedertafeln. W.C. Müller, who was friendly with Beethoven, directed local interest in contemporary music towards an early and lively cultivation of Beethoven's works, to which the Bremen poet Carl Iken contributed as one of the first compilers of poetical programmatic interpretations of them. The works of the Romantics too were widely appreciated early on. A theatre was opened in 1843 and in 1856 became the city's official opera house. After the first performance in Bremen of *Tannhäuser* (1853) Wagner held a firm place in the opera's repertory, as did Brahms in the concert hall after the first performance of his *German Requiem* (1868). Meanwhile, even after the waning of the church's reservations about the theatre (which were still influential in the mid-18th century) and despite the work of Heinrich Bulthaupt (1849–1905), opera took second place to concert-giving in the city's musical life. The leading personalities of this period were Wilhelm Friedrich Riem (*d* 1857) and Karl Reinthaler (*d* 1896). After Reinthaler's retirement as director of the orchestral concerts (1887), the Singakademie (1890) and the choir of the cathedral, where he had also been the organist (1892), the link he had revived between the directorship of municipal and sacred music was not renewed.

Under Max Erdmannsdörfer (1888–95) the secular musical forces consolidated into a Philharmonische Gesellschaft, which became a vital factor in the city's concert life under Ernst Wendel (1909–35); at the same time Eduard Nössler, as conductor of the cathedral choir (1893–1930), laid the foundations of a reputation which was to spread beyond regional bounds under Richard Liesche (1930–57) and Hans Heintze (appointed in 1958), especially with its performances in the German Bach Festivals of 1934, 1939, 1951 and 1971. After a period during which Fritz Rieger had been appointed by the council to the position of general musical director for concerts and opera (1944–5), Helmut Schnackenburg, who had been engaged as Wendel's successor in 1937, took up this position, but then in 1953 became director of the Bremen Musikschule. The last general musical director, Paul van Kempen (1953–5), was followed by a series of guest conductors at the Philharmonische Gesellschaft over a number of years, and by Heinz Wallberg (1955), Hans Walter Kämpfel (1961) and Hans Wallat (1965) as directors of the opera. In 1968 Hermann Michael became principal conductor of concerts and the opera. At the Theater am Goetheplatz (opened 1950) each season usually includes at least one rarely performed work. The biennial festivals Pro Musica Antiqua and Pro Musica Nova are organized by Bremen Rundfunk. The annual Musikfest Bremen features a broad and varied repertory. Music is taught at the Hochschule für Künste, while its Akademie für Alte Musik (founded 1986) teaches the performing practice of early music.

FRITZ PIERSIG/DOROTHEA SCHRÖDER

Bremner, Robert (*b* ?Edinburgh, *c*1713; *d* London, 12 May 1789). Scottish music publisher. He established his business in Edinburgh in mid-1754, and had considerable early success: his first issues included Niccolo Pasquali's excellent *Thorough-Bass Made Easy* (1757); his own *The Rudiments of Music* (1756, 3/1763), an instruction book commissioned by the Edinburgh town council for newly formed church choirs; and reprints of the fiddle variations on Scottish tunes by the locally celebrated William McGibbon. Bremner also profited from a fashionable boom in guitar playing, publishing a guitar arrangement of *Twelve Scots Tunes* (*c*1760) and *Instructions for the Guitar* (1758, 2/1765), which was probably written by his son Robert who had been sent to London to study the guitar with Geminiani. From 1755 Bremner supplied sheet music regularly to the influential Edinburgh Musical Society, and travelled to London and Dublin to act as its agent. In 1761 he issued the Six Overtures op.1 of Lord Kelly, the first orchestral pieces in the Mannheim style ever composed in Britain.

These successes enabled Bremner to move his business to London in 1762 (the Edinburgh shop was maintained under a manager, John Brysson). His business continued to flourish; a notable venture was the *Periodical Overtures in Eight Parts*, a quarterly series of new works for amateur orchestral societies. In 1764 he bought plates from John Simpson, in 1777 most of the stock and plates of John Johnson (ii), and in 1779 some plates from the firm of Welcker. His own music was neatly engraved and printed on high-quality paper. After Bremner's death his London stock, plates and copyrights were bought by Preston & Son, who described their purchase as 'not only the most extensive, but also the most valuable list of works ever exhibited in this kingdom'.

Bremner owned the Fitzwilliam Virginal Book for some years from 1762. He bought it for ten guineas at the sale of Pepusch's library and subsequently presented it to Lord Fitzwilliam.

DAVID JOHNSON

Brémond, François (*b* Nîmes, 1 Nov 1844; *d* Houilles, nr Paris, 15 July 1925). French horn player, tenor and teacher. At an early age, he went to live with his uncle Joseph Rousselot, then solo horn at the Opéra. While in Paris he met Dauprat, whom he revered. In 1868 he entered the Conservatoire, studied the horn with Mohr, and won the *premier prix* after one year. While at the Conservatoire, he joined the Théâtre des Bouffes-Parisiens, and in 1872 joined the faculty of the Ecole de Musique at Lyons. In 1875 he returned to Paris to play first horn at the Opéra Populaire, the Concerts du Châtelet and, later, the Opéra National Lyrique (1877). In 1878 he became principal horn at the Société des Concerts and at the Opéra-Comique, remaining with both until 1898 and continuing with the latter a few years longer as second horn. He was appointed professor at the Conservatoire on 1 May 1891, and taught there until 1922. He also possessed a light tenor voice, and early in life sang leading parts in provincial theatres, including Lyons, Nîmes and Dijon.

The focus of Brémond's training was on the natural horn, but seeing that the valve horn had supplanted it everywhere else, he became the motivating force for the adoption of the modern instrument in France. For the first time since Meifred's retirement (1864), the valved horn reappeared in classes and sight-reading examinations at the Conservatoire in 1897. He phased in its adoption over five years, and by 1903 it was the official instrument. He remained prejudiced to the natural instrument, however, and in that spirit convinced Massenet to write the solo that accompanies 'Comme l'oiseau qui chante' in *Manon* for horn crooked in F♯. According to Morley-Pegge, he used an 1823 Raoux *cor solo* with a detachable set of valves, and extra valve tubes for lower crooks. He also preferred an ascending third valve which, because of his influence, remained popular in France well into the 20th century. He was left-handed and used that hand in the bell, reasoning (and teaching) that players should finger the valves with the right hand like all other valved brass instruments. Instrument makers, however, remained unconvinced. He was noted for his magnificent tone, beautiful phrasing and trills. He warned pupils against smoking, shaving the upper lip and eating fried foods, which he considered bad for the lip. These very precautions, however, did not prolong his own career; he stopped playing altogether shortly after 1900. He composed a few contest solos and compiled several books of exercises for study which included *Exercices journaliers pour cor à pistons* (Paris, 1900), and four others that borrowed from Dauprat, Mohr and Gallay.

EDITIONS

252 exercices pour le cor de Dauprat (Paris, 1894)
Exercices et études tirés de la méthode de J. Mohr (Paris, 1900) [adapted for *cor à pistons*]
Exercices et études: extraits de la méthode de Gallay . . . pour cor à pistons (Paris, 1903/*R*)

JEFFREY L. SNEDEKER

Brendel, Alfred (*b* Wiesenberg, Moravia, 5 Jan 1931). Austrian pianist, of German, Italian and Slavonic descent. He studied the piano first in Zagreb and later in Graz, where he gave his début recital in 1948. He was also a student of conducting and composition; having composed as a young man, he has remained strongly interested in new music, although it has not featured in his playing career. He completed his piano studies with Paul Baumgartner, Edward Steuermann and above all with Edwin Fischer, who, in Brendel's words, 'led two generations of young pianists "away from the piano, and to themselves"'. The award of a prize at the Busoni Competition in Bolzano in 1949 encouraged him to commit himself to a pianist's career when other options might still have claimed him.

Brendel's early recordings for Vox and Vanguard soon brought him international attention. From the wide repertory he cultivated then, they included not only Mozart and Schubert but Busoni, the Schoenberg Concerto (which he still champions), and a selection of Liszt's Hungarian Rhapsodies played with irresistible relish and verve. But it was a compendious recording for Vox of Beethoven's piano music that prompted his choice of path from then on and established him as an interpreter of the Austro-German repertory in the line of Fischer and Kempff. Undertaken between 1958 and 1964, it provided the spur for his first public cycle of all the Beethoven sonatas, given at the Wigmore Hall in London in 1962. This was the first of many. 30 years later he began another, linking it to his third complete recording of the sonatas (Philips, 1992–6), and giving it over an extended period in several European and American cities. He intends these cycles to be his last, although not his last word on some of the sonatas. He has recorded the Beethoven concertos four times, most recently with the Vienna PO and Sir Simon Rattle (1998).

The young Brendel had an easy bravura and a dash and spontaneity that perhaps came less readily to the fore later on; although that could be said of many performers. A characteristic he shares with only the greatest is that he has kept his music-making young. He has done so through a continuous renewal of his vision, either in the form of evolution or of rediscovery. He played Beethoven's Hammerklavier Sonata for more than 40 years: the concentration and power of the outer movements in his first recording (1957) are still to be admired in his last (1995, deriving from a concert performance); but the fusion of sound and sense in the later one leads the listener ineluctably on a journey through the entire work and a more profound exploration of the interior world of the slow movement. There has been a comparable growth in his interpretation of the Diabelli Variations, another late Beethoven work with which he has been much associated; the advance there has been to convey its multifariousness, and its astonishing flow of invention as seemingly improvised into life. His insights have not been confined to the late works, and he has revealed the earlier piano music as no less masterly and characteristic than the rest. A special achievement has been to bring out the moments of 'profound levity' in Beethoven, and not only in the late sets of Bagatelles. Other Beethoven interpreters may be as grand, or as adept at reaching areas of deep feeling, but in matters of wit and musical daring Brendel has often appeared in a class of his own.

While Brendel has won a place among the most admired pianists for his interpretations of Beethoven, Schubert and Mozart (whose complete piano concertos he has recorded, several more than once), the works of Haydn, Schumann and Liszt have also remained central to his repertory. In all these composers his playing is bonded to the music's expressive life. It has never been his style to push back boundaries arbitrarily. Rather his aim is to 'put life into the music without doing damage to it' (one of Edwin Fischer's precepts) and to avoid false sentiment. In pursuing it, he has continually shown the ability to surpass himself and to surprise his listeners. His playing is not detached in manner: on the contrary, it is highly eventful, essentially vocal in feeling, sometimes quite fiercely declamatory, often nervy and passionate. In Schubert, his all-seeing vision has conveyed the assaults of fever and delusion that are as menacing in some of the sonatas as in the songs. He has successfully projected, too, aspects of the last three sonatas as 'disguised' string quintets, and has helped to establish a view of Schubert as a more complex composer and a greater writer for the piano than was widespread before. In Schumann he has been a master of narrative line. In Haydn he has held up a mirror to the wit, revelled in the drama and given a sharp profile to the acuteness of expression. In a wide range of music by Liszt he has shown that there need be no 'effects without causes' and that a poetic core is everywhere paramount. At his best, Brendel conveys a sense of emotional and intellectual coherence in whatever he touches. A spirit of learning and adventure come together, and he has shown himself capable of winning through to that 'second simplicity' where the listener has the sensation of music 'not being played, but happening by itself'.

Writing has also been important to Brendel. He expresses himself with clarity and style in words as well as music and has brought to his articles, essays and occasional lectures the same intellectual power, sensibility and liveliness that distinguish his playing. He has also published two collections of humorous German prose poems, a selection of which is available in an English translation. Since the 1970s he has made his home in London.

STEPHEN PLAISTOW

Brendel, (Karl) Franz (*b* Stolberg, Harz, 26 Nov 1811; *d* Leipzig, 25 Nov 1868). German writer on music. The son of a mining engineer, he moved after several semesters at the universities of Leipzig and Berlin to the mining academy of Freiberg. Apart from some rudimentary early

instruction at Freiberg from A.F. Anacker, Brendel had little formal musical training although he was for a time a piano pupil of Friedrich Wieck in Leipzig. At Leipzig he was introduced to the fundamentals of Hegel's philosophical thought through C.H. Weisse, and further through H.G. Hotho and F.A. Gabler in Berlin. He completed his studies in Freiberg with the publication of a thesis (1840) in 'medicinal philosophy'. After that, his interests in the history and aesthetics of music took the upper hand and between 1841 and 1844 he lectured in Freiberg and Dresden on the history of music. These lectures, along with the *Grundzüge der Geschichte der Musik* (1848), formed the basis of his *Geschichte der Musik in Italien, Deutschland und Frankreich* (1852, with three revised editions in Brendel's lifetime). Brendel lectured as a professor at the University of Leipzig, throughout the 1850s and 60s. At the beginning of 1845 he took over from Schumann the editorship of the *Neue Zeitschrift für Musik*. While his editorial and critical styles were very different from Schumann's, he was able to maintain the pre-eminence of the *Neue Zeitschrift* among German musical journals throughout his tenure, which lasted up to his death. Between 1856 and 1861 he also edited the *Anregungen für Kunst, Leben und Wissenschaft*, with Richard Pohl, another critic sympathetic to the progressive tendencies of Berlioz, List and Wagner. In addition to his idealistic philosophical and aesthetic views, Brendel was concerned with practical social issues pertaining to musical life; he was founder of the Allgemeiner Deutscher Musikverein, a kind of early musicians' union, in 1861 and its first president. Its annual meetings, the Tonkünstler-Versammlungen, which began in 1859, were the occasion for important concerts of new music as well as public discussions and editorials by Brendel on the state of music and musicians in Germany and Austria. Brendel's involvement with the Musikverein also produced a series of articles on the role of city and state government in the administration of musical schools, concert organizations, theatres and other institutions (collected as *Die Organisation des Musikwesens durch die Staat*, 1865). Although Brendel neither performed nor composed, his wife (Elisabeth Tautmann) was a concert pianist who had studied with Ludwig Berger and John Field.

Brendel's most significant independent monograph is his *Geschichte der Musik*, as testified by its numerous editions up to 1906. It differs from most histories written up to that time in the emphasis given to the recent past and even the present; this reflects the author's principal vocation as journalist and critic rather than historian. Nor was he an antiquarian and collector, as most other writers on music history had been. In addition to a basic, often fairly sketchy compilation of names, dates and works, he views music as a product of historical, cultural and social developments and as a manifestation of the unfolding Hegelian 'world-spirit'. Brendel's committment to current notions of historical progress in material as well as social and spiritual domains is evident throughout, and while his methodology is far from sophisticated, the work remains an interesting early document of modernist consciousness in musical historiography and criticism.

The same can be said of Brendel's journalism. While he seldom says much about individual works, he was instrumental in framing the critical debates in the 1850s and 60s over programme music, the Lisztian symphonic poem and the Wagnerian music drama. His coining of the term 'Neudeutsche Schute' (as an alternative to the pejorative 'Musik der Zukunft') in his address to the first Tonkünstler-Versammlung in 1859 represents a signal moment. The 1854 monograph *Die Musik der Gegenwart und die Gesammtkunstwerk der Zukunft* and the 1859 pamphlet *Franz Liszt als Symphoniker* (both largely deriving from material published in the *Neue Zeitschrift*) elevate Wagner and Liszt, respectively, as figures whose music and ideas define the cultural moment in far-reaching ways. The short-lived *Anregungen* coincides with the period of Brendel's most intensive critical activity and influence in the years around 1860. The journal's broad scope is characteristic of Brendel's underlying project of integrating music into the concerns of contemporary society, politics and culture at large. In addition to promoting the cause of musical progress and the New German School, Brendel's contributions to the *Anregungen* addressed a variety of literary and social topics such as classical and contemporary drams, painting and sculpture, ballet, musical institutions, school and university curricula 'Art and Morality' (1856), 'Progress in the Area of Religion' (1856), 'The Servant Class' (1857), 'The Present and Future of the Female Sex' (1857) and of course the role of the critic. He also helped to perpetuate Schumann's posthumous reputation. The revolutionary events of 1848–9, when Brendel had just come to prominence as an editor and critic, were decisive for his sense of political engagement (in March 1848 he drafted a petition to Frankfurt Volksparlament advocating that music be emancipated from its status as a 'luxury of the educated classes').

Despite the interest of his critical and historical writings as an index of contemporary intellectual preoccupations and their bearing on musical life, they suffer from a lack of concrete musical detail or any extended engagement with specific works. Beyond that, he often demonstrates an exasperating facility for abstract speculation and a penchant for empty phrase-spinning (as his contemporaries noted), formulaic 'even-handedness' and constant deferral of substantial discussion or analysis to 'some other occasion'. For these reasons, among others, he did not always receive the full approbation of those whom he sought to champion, such as Liszt and Wagner (who in particular had harsh words for him). All the same, he did more than perhaps any other single figure to set the tone of critical debate on musical-cultural issues across the centre of the 19th century, and his conviction in the increased role of critical reflection in the production and reception of music since Beethoven makes him a characteristic ideological spokesman for the early stages of European modernism.

THOMAS S. GREY

Brendler, (Frans Fredric) Eduard (*b* Dresden, 4 Nov 1800; *d* Stockholm, 16 Aug 1831). Swedish composer. He was taught by his father, Johann Franz Brendler, a flautist in the Swedish Royal Opera in Stockholm. His first dated composition is the Serenade for 12 wind instruments (1827), though it is likely that he had already composed romances and other small piano pieces for the Harmoniska Sällskap, a society of musicians and singers associated with Crown Prince Oscar. His first printed compositions, three songs to texts by Stangelius, appeared in 1828; these were followed by a set of piano pieces, *Flores* (1830) and his best-known song, *Amanda* (1831). Brendler achieved prominence with his melodramas *Spastaras död* (1830) and *Edmund och Clara* (1831), and as a result of these successes was commissioned to write an opera, *Ryno* (to a libretto by Bernhard von Beskow), for the inauguration of the restored Royal Opera. The three acts comprise 14 numbers: Brendler composed eight and orchestrated six before his sudden death; his friend Prince Oscar completed the remaining six numbers, and J.F. Berwald the rest of the orchestration (which is preserved in *S-Skma*). It was performed at the Royal Opera, Stockholm, to great acclaim in May 1834 and was revived 20 times in the following four years. Brendler's work is unique in Swedish musical history as he was the only exponent there of central European early Romanticism. He exploited the connection between lyric intensity and dramatic characterization, most notably in the opera. In form and harmony the influence of Weber, Marschner and particularly Spohr is apparent, even in as early a work as his Serenade. He used colourful orchestration within free musical forms. His advanced musical language did not, however, leave any lasting traces in Swedish music of the 19th century.

ANDERS WIKLUND

Brendner [Brendtner], **Johann Joseph Ignaz.** *See* BRENTNER, JOHANN JOSEPH IGNAZ.

Brenes (Candanedo), Gonzalo (*b* Panama, 1906). Panamanian composer, researcher and teacher. He studied at the Leipzig Conservatory with Sigfrid Karg-Elert. On his return from Germany, Narciso Garay's *Tradiciones y cantares de Panamá* may have stimulated his interest in Panamanian folk music. He undertook research in the province of Los Santos y Herrera, where he collected *tonadas* and information on instrumental music and popular rhythms. He taught music at various schools in Panama (1933–40) and Costa Rica (1943–8) and at the request of the writer and social activist Carl Luis Saenz founded and directed a choir of Costa Rican workers and peasants. He was elected an MP and served as secretary of culture for Panama. He continued to compose and to teach at the National University of Panama into his nineties.

His research into folk music resulted in some important works, for example *La cucarachita mandinga* (with a libretto by Rogelio Sinan) and *Tondas del trópico niño* (Panama City, 1955), a collection of more than 70 songs based on texts by Latin American poets and designed for use in schools and colleges. The composer himself introduced these songs, which clearly reflect the influence of Panamanian folk music, into the repertory of the Panamanian and Costa Rican schools in which he worked, thereby transforming the way music was taught. Some of the songs have also been sung by professional singers. In 1994 Brenes attended the 6th Caribbean Composers' Forum held in San José, when his *Soliloquio* for oboe solo, *Elegía al pájaro dela* for oboe and piano, and *Romanza* for violin and piano were performed. He is the author of *Desarrollo musical de Panamá a partir de la República* (Panama City).

JORGE LUIS ACEVEDO VARGAS

Brenet, Michel [Bobillier, (Antoinette Christine) Marie] (*b* Luneville, 12 April 1858; *d* Paris, 4 Nov 1918). French music critic and writer. An only child, she lived in many places (including Strasbourg and Metz) because of her father's military career; she finally settled in Paris in 1871, where an attack of scarlet fever made her an invalid, thus influencing her early decision to devote her life to research.

Her first publication, *Histoire de la symphonie à orchestre* (1882), won a prize in a Brussels competition. From then on she achieved an increasingly high reputation among French musicologists and abroad. She gathered an immense amount of information from the most reliable sources; her working methods were extremely precise and her interests wide. Certain official connections made it possible for her to gain access to primary sources.

Brenet's publications included writings on Ockeghem, Goudimel, Palestrina, Sébastien de Brossard, Handel, Haydn, Grétry and Berlioz. The last book issued during her lifetime was *La musique militaire* (1917), but a *Dictionnaire pratique et historique de la musique*, completed by Amédée Gastoué, was published in 1926. Her *Notes sur l'histoire du luth en France* opened the way to investigators in that field. Her main works, *Les musiciens de la Sainte-Chapelle du Palais*, *Les concerts en France sous l'ancien régime* and *La librairie musicale en France de 1653 à 1790*, give evidence of her great erudition and competence as a music historian. She wrote numerous articles, historical and critical, for *Revue musicale*, *Revue de musicologie*, *Rivista musicale italiana*, *Musical Quarterly*, *Année musicale* (of which she was a founder) and many other journals. Although her interests were broad, she particularly emphasized French music and attempted to show French composers in a better perspective. Her unflagging energy was entirely devoted to musical research until her sudden death. Her remaining papers and documents were donated to the Bibliothèque Nationale (Département des manuscrits).

MARIE LOUISE PEREYRA/JEFFREY COOPER

Brenet, Thérèse (*b* Paris, 22 Oct 1935). French composer. She studied at the Paris Conservatoire, where she obtained first prizes in harmony, counterpoint, fugue and composition; among her teachers there were Rivier, Dutilleux, Duruflé and Milhaud. She won the Prix de Rome in 1965 and has since received several other international awards; she became a professor at the Conservatoire in 1970.

Her output is eclectic, relying on an atonal, non-serial musical language into which aleatory techniques are frequently incorporated. She is sensitive to instrumental timbres created by bold superimpositions, and her exploration of microtonal intervals, extended instrumental techniques (such as woodwind multiphonics), and non-standard instruments (notably the celtic harp) bears witness to a continuing desire to expand her music's range of sonority. She is particularly drawn to writing for voices: *Clamavit*, a work for narrator, chorus and orchestra commissioned by French Radio, was chosen to represent France at the UNESCO International Rostrum of Composers, and has since been widely performed abroad.

DANIEL KAWKA

Breni, Tomaso (*b* Lucca, 1603; *d c*1650). Italian composer. He became a priest and spent the later part of his life at his birthplace, taking an organist's post and teaching at the seminary of S Martino. His only surviving publication is his *Mottetti* for two, three and six voices, violin and organ continuo (Lucca, 1645). It shows that he was a talented melodist, integrating ornaments into a forceful melodic line, and capable of writing attractive triple-time sections. There is a clear distinction between the latter and his declamatory writing in 4/4 time, which is harnessed in the duet *Vide, Domine* to contrasts of mood: the opening 4/4 breathes a spirit of abasement, the ensuing 3/2 one of renewed hope. Some duets open with solo sections for one of the voices, and two are written for the rare scoring of one voice, one violin and continuo, mainly in a dialogue style. In the six-part motets Breni follows the fashion of contrasting a chordal tutti section with little movements for smaller forces – here for one, two or four voices. He was also active as an opera composer: his *La Psiche* (librettist F. di Poggi) was produced at Lucca in 1645. (*NericiS*)

Brent, Charlotte [Mrs Pinto] (*b* London, 17 Dec 1734; *d* London, 10 April 1802). English soprano. The daughter of the fencing-master Charles Brent (1692/3–1770), she was taught by Thomas Arne and made her stage début as Liberty in his *Eliza* in Dublin on 29 November 1755, appearing frequently at the Smock Alley Theatre until the following May. Arne then returned with her to London, abandoning Mrs Arne in Dublin. He tried to get his pupil taken on at Drury Lane, but Garrick refused because of her unprepossessing appearance; she joined Covent Garden where, with John Beard as Macheath, she triumphed as Polly in *The Beggar's Opera* in October 1759. Charles Dibdin remembered her at this time: 'Her power was resistless, her neatness was truly interesting and her variety was incessant'. At Covent Garden she created the roles of Sally in Arne's *Thomas and Sally*, Rosetta in his pasticcio *Love in a Village* and Mandane in his *Artaxerxes*(1762), a bravura role including 'The soldier tir'd', which became an exhibition aria for English sopranos. In 1765 she was the first Patty in *The Maid of the Mill*, with music arranged by Arnold. She sang in summer seasons at Vauxhall Gardens from 1760, appeared at Ranelagh, 1762–4, and was a soloist at the Three Choirs Meetings, 1765–7. By 1765 her popularity was such that her name was used for a collection of over 400 song lyrics, *The Brent; or, English Syren*.

In 1766, to Arne's scorn, she married the violinist Thomas Pinto, a gifted but lazy musician who took over the running of Marylebone Gardens in 1769 for one disastrous season. Four of their children, including twin boys, died between April 1769 and March 1770. To escape creditors they moved first to Edinburgh where Sylas Neville found her 'grown so ugly', and then to Dublin where 'the ruins of the once celebrated Miss Brent' (Thomas Snagg) sang Urganda in Michael Arne's *Cymon* (1773). Pinto died in December 1782 or January 1783, leaving her penniless, and she returned to London to live with her stepdaughter, whose musically gifted son, George Frederick Pinto, she taught. There were a few final stage appearances in 1785 and 1786, when she sang Polly, as well as 'The soldier tir'd' and 'Sweet echo' from Arne's *Comus*. The echo was played on the oboe by W.T. Parke, who remembered that she was loudly applauded: 'her voice possessed the remains of those qualities for which it had been so much celebrated – power, flexibility, and sweetness'.

OLIVE BALDWIN, THELMA WILSON

Brenta, Gaston (*b* Schaerbeek, Brussels, 10 June 1902; *d* Schaerbeek, 30 May 1969). Belgian composer and critic. Brenta received his musical education from Gilson and together with other disciples he founded the Synthétistes group in 1925. Having worked for Belgian radio since 1931, he was director of French music broadcasts from 1953 to 1967. He was made a member of the Belgian Royal Academy in 1966. In 1968 his Second Piano Concerto was the set work for the Queen Elisabeth International Competition. Brenta was a Romantic composer, giving pride of place to amply developed and expressive melodic line. He usually employed conventional forms, and his tonal harmony included unexpected use of dissonance. From Gilson he received a taste for the exotic, notably in evidence in his opera *Le khadi dupé*, and he owed to him a consummate mastery of orchestration. Brenta's orchestral palette developed in the direction of a finesse which embraced some astonishingly novel sonorities, notably in the *Farandole burlesque*.

HENRI VANHULST

Brentano[-von Arnim], **Bettina** [Bettine, Elisabeth] (*b* Frankfurt, 4 April 1785; *d* Berlin, 20 Jan 1859). German writer, editor, publisher, composer, singer, visual artist and patron of young artists. Although known today primarily for her writing and her illustrious associates,

Bettine was also a talented musician. She composed songs in a simple folk style, choosing texts by poets she knew and loved, including Goethe, Achim von Armin, and her brother, CLEMENS BRENTANO. She helped gather songs for Armin and Brentano's influential collection *Des Knaben Wunderhorn* (1806–8) and decades later published a fourth volume based on their notes (ed. Ludwig Erk, 1854). From 1808 to 1809 she studied singing and composition with Peter von Winter and the piano with Sebastian Bopp in Munich. Her first two songs appeared under the pseudonym 'Beans Beor' ('blessing I am blessed') with Arnim's literary works. After her crucial meeting with Beethoven in Vienna (May, 1810), she mediated between him and Goethe.

Settling in Berlin after her marriage to Arnim in 1811, Bettina sang briefly in the Berliner Singakademie and composed settings of Hellenistic poems by Amalie von Helvig, however her musical activities were curtailed by the responsibilities of raising her seven children. Widowed in 1831, she reflected on her life and revised some early letters and compositions for publication. In three autobiographical books based on her youthful correspondence with Goethe (*Goethe's Briefwechsel mit einem Kinde*, 1835), Karoline von Günderrode (*Die Günderode* [sic], 1840) and her brother (*Clemens Brentano's Frühlingskranz*, 1844), she portrayed herself as a naturally talented musician without the need for theoretical knowledge. Her writings have been collected and published in a number of editions in the 19th and 20th centuries, including *Werke und Briefe*, ed. W. Schmitz and S. von Steinsdorff (Frankfurt, 1986–95). In 1842 she published a collection of seven songs as a public sign of support for the beleaguered Prussian Music Director, Gaspare Spontini (*Dedié à Spontini* . . .). An anonymous reviewer criticized 'a certain dilettante naivety' about the songs, which remain outside the mainstream (*AMZ*, xlv (1843), 103).

The recent evaluation of Bettina's music manuscripts reveals that she conceived many more songs than were published during her lifetime. She was one of the first composers to set poems by Hölderlin. She approached composition from a literary viewpoint, allowing the text spontaneously to inspire her settings. Unconventional features, such as a wide range, large melodic leaps and unusual harmonic progressions, rhythms and phrase lengths, can be traced to the songs' literary and improvisational origins.

Young virtuosos and composers such as Franz Liszt, Joseph Joachim, Peter Cornelius, Johanna Kinkel and Robert Schumann admired her as a friend of Goethe and Beethoven. Bettina's influence on young musicians of her generation, and on the Romantic view of Beethoven remain, beside her writings and compositions, of lasting importance.

ANN WILLISON LEMKE

Brentano, Clemens (Wenzeslaus Maria) (*b* Ehrenbreitstein, 9 Sept 1778; *d* Aschaffenburg, 28 July 1842). German poet. One of the leading figures of the younger Romantic generation (which included the Grimm brothers, Fouqué, Arnim, Chamisso and Eichendorff), he was a versatile writer whose modern reputation rests on his lyric poetry, the story *Geschichte vom braven Kasperl und dem schönen Annerl* (1817), the fairy tale *Gockel, Hinkel und Gackeleia* (1811) and the collection of folk poetry which he edited with Achim von Arnim under the title *Des Knaben Wunderhorn* (i, 1805). His rich imagination was matched by great melodiousness of expression, which led Nietzsche to call him the most musical of German poets; but he could also demonstrate a purely verbal ingenuity and wit of a high order.

In 1803 Brentano wrote a Singspiel, *Die lustigen Musikanten*, which was set to music by E.T.A. Hoffmann and given its première in Warsaw in 1805, though without much success. A cantata text, *Kantate auf den Tod Ihrer Königlichen Majestät, Louise von Preussen* (1810), was set to music by Reichardt and performed in Berlin in 1811. Dissatisfied with Reichardt's setting, Brentano tried in vain to persuade Beethoven to undertake a fresh setting of the text. A second cantata, *Universitati litterariae: Kantate auf den 15ten Oktober 1810*, was likewise set to music by Reichardt. In 1814 Brentano attempted to write a libretto for Weber on the Tannhäuser theme (after Tieck); the work was never completed and remains unpublished. Then, in 1815–16, Brentano sketched a plan for a second opera *Phaon et Sappho*, the manuscript of which contains a detailed description of the overture. He is also said to have toyed with the idea of turning the story of Cinderella into an opera.

Many of Brentano's lyric poems were set to music by major composers. His primary importance to music, however, lies in his co-editorship of *Des Knaben Wunderhorn*. This anthology, which salvaged a legacy of folk poetry from old printed sources and oral tradition, exercised great influence on 19th-century lyric poets and inspired scholarly research into the *Volkslied*. Although the compilers modernized, 'improved' and sometimes even rewrote the originals (Arnim more often than Brentano), their contemporaries felt that the songs sounded authentic. Poems from the collection have frequently been set to music; Schumann, Mendelssohn, Brahms, Wolf, Strauss and even Webern and Ives wrote songs to these texts, and Mahler's orchestral settings are especially well known.

CEDRIC WILLIAMS

Brentner [Brenntner, Brendner, Brendtner, Prentner], **Johann Joseph Ignaz** (*b* Dobřany, 3 Nov 1689; *d* Dobřany, 28 June 1742). Bohemian composer. His father was mayor of Dobřany. From about 1717 to 1720 Brentner lived in Prague, where he published several of his works. He seems to have been connected with the religious brotherhood of St Nicholas in the Malá Strana, Prague, for which he wrote his German mourning motets. His *Offertoria solenniora* op.2 was dedicated to his patron Raymund Wilfert, abbot of the Premonstratensian monastery at Teplá.

Brentner's music is in late Baroque concerto style, with occasional simple songlike motifs. Many of his arias are in da capo form, and those of *Hymnodia divina* are remarkable for their concertante treatment of accompanying solo instruments, especially the violin. Brentner's works continued to be performed at the monastery at Strahov, Prague, until the 1840s.

WORKS

printed works published in Prague

Harmonica duodecatometria ecclesiastica seu [12] Ariae, op.1 (1717)

MILAN POŠTOLKA

Brero, Giulio Cesare (*b* Milan, 20 Dec 1908; *d* Milan, 18 Dec 1973). Italian composer and administrator. In Milan he studied with Anfossi (piano), Delachi and Paribeni (composition), continuing his studies with Dukas and Roussel in Paris. There he was in close contact with the circle of musicians associated with the *Revue musicale*. He graduated from the Conservatory in 1936 and also took a degree in law. In 1940 he settled in Argentina, where he organized concerts and taught at the Buenos Aires Conservatory (1944–7). After returning to Italy in 1957 he founded the Opera da Camera di Milano, which gave performances in Europe, the USA and Japan. His compositions clearly display neo-classical influences from his years in France.

ALBERTO PIRONTI/ROBERTA COSTA

Brescia. City in Lombardy, Italy. From the 13th century the cathedral had a choir with a schola cantorum, whose first known cantor was Oldofredo da Leno (1287–?1315). During the 16th and 17th centuries there was a distinguished succession of *maestri di cappella* and organists. The former included Giovanni Contino (1551–61), who began his career there as a chorister, and Lelio Bertani (1574–91), who spent much of his life in his native Brescia. Claudio Merulo was organist in 1556–7, and was succeeded by his pupil Florentio Maschera (1557–84), the composer and organ builder Costanzo Antegnati (1584–1620) and Francesco Turini (1620–56), who ended his career in Brescia. Other less important musical establishments in the city's churches were supported during the 16th century by wealthy families.

The city was ruled by the Venetian Republic from 1428 to 1797 and never experienced the musical life afforded by the patronage of an independent court. The only record of such activity relates to a group of musicians in the train of Pandolfo Malatesta, who conquered Brescia in 1406. 15th-century manuscripts contain the names of Brescian musicians such as Matheus de Brixia and Prepositus Brixiensis; both of them were active elsewhere, as were later musicians born in the city. These included Luca Marenzio; Biagio Marini, who was briefly organist to the Brescian Accademia degli Erranti in 1620; the opera composer F.G. Bertoni (1725–1813); and the violinist and instrumental composer Antonio Bazzini (1818–97). As Chamberlain (*camerlengo*) of Brescia by appointment of the Venetian Republic, Benedetto Marcello spent the last year of his life in Brescia and died there while working on the unfinished *L'universale redenzione*.

Theatrical activity was initiated by the Jesuits, who built a theatre that was active between 1658 and 1681, occasionally including musical performances. The main theatre is the Teatro Grande, a sumptuous 18th-century building, which originated in a theatre built in 1664 as the Teatro dell'illustrissima Accademia degli Erranti. The first opera performed there was Cavalli's *Eritrea* (1665) and regular opera performances were subsequently given during Carnival and the summer fair seasons up to the end of the 18th century. The theatre was renamed Teatro Nuovo and later, during the Napoleonic regime, Teatro Nazionale. In 1810 it was enlarged to 108 boxes and was reopened in 1811 as the Teatro Grande with Mayr's *Il sacrifizio di Ifigenia*. During the 19th century seasons of opera and of spoken drama alternated regularly. Besides premières (Mayr's *Egeria*, 1816) and important revivals (Ponchielli's revised *Marion Delorme*, 1885, and the three-act version of Puccini's *Madama Butterfly*, 1904), one of the first performances in Italy of *Parsifal* was given there (1914). A second theatre, the Teatro Sociale, was built of wood in 1851; it was known as the Teatro Guillaume until 1905, when it was rebuilt and reopened with a performance of Giordano's *Siberia*. In the second half of the 20th century it has been used for operetta, variety shows and spoken drama. At the end of the 1990s the theatre was restored to its original form.

Concert life began at the end of the 18th century when the Società Filarmonica Apollo gave musical evenings in the Apollo Hall of the Martinengo Palace. Concerts have been given in the hall of the Bargnani Palace and the transept of S Luca, but now the Pietro da Cemmo Hall of the conservatory, the S Carlino room and the Ridotto Hall of the Teatro Grande are more often used. 20th-century instrumental ensembles have included the Trio Bresciano (1931–40) and the Complesso del Vittoriale (1931–8), founded on the initiative of Gabriele d'Annunzio; the C. Quaranta Mandolin Society (1916); the permanent orchestra of the Venturi Concerts, instituted in 1959 for educational purposes; the Gasparo da Salò Chamber Orchestra (1963) and I Cameristi Lombardi (1972). Important choral groups have included those named after Bazzini (1911–38) and Marenzio (1919–24), the Coro del Seminario (1939–65) and that of S Gregorio Magno (founded 1923). In the last decades of the 20th century various choral groups in the city and provinces became active, among them the Città di Brescia choir and La Rocchetta choir of the Palazzolo. Concerts are promoted by various organizations: the Società dei Concerti da Camera (1868); the Società i Concerti Sinfonici S Cecilia (1938); the Gruppo Musicale G. Frescobaldi, founded in 1952 to make use of the city's early organs; and the Giovani Interpreti Associati, active from 1969. The Festival Pianistico Internazionale di Brescia e Bergamo is held annually; it was initiated in 1964 by Agostino Orizio, with the collaboration of Arturo Benedetti Michelangeli, and since 1969 has been held in conjunction with a festival known as the Rassegna Internazionale di Musica Contemporanea, which specializes in contemporary piano music. The Settimana di Musica Barocca is held biennially in the churches and palaces of Brescia. Since 1974 the Associazione Amici della Pace has promoted organ and chamber recitals.

From the 15th century Brescia was a centre of instrument manufacture; some viols were made anonymously for Isabella d'Este in the last years of the 15th century, and the violin maker GASPARO DA SALÒ (1540–1609), worked there. Other instrument makers active in Brescia were G.P. Maggini (1580–?1630–1631), Giovita Rodiani (?1568–?1624) and Matteo Benti (*c*1580–after 1661); during the 17th century there was a link between this school and the instrument makers of Cremona. The lute maker Giuseppe Scarampella (1838–1902) was also a noted craftsman. The Antegnati family had their firm in Brescia and dominated Italian organ building from the mid-15th century to the mid-17th; many of their excellent instruments are still in use in the city and province.

Brescian printers of books on music theory were active as early as the end of the 15th century; the Britannico family was particularly noted for its publications throughout the 16th century, for instance Lanfranco's *Scintille di musica* (1533). The most important music printers were the Tini brothers. The Banda Civica, instituted in 1798, has followed the history of the city. Disbanded in the fascist period it resumed its activities at the beginning of the 1950s with the name Associazione I. Capitanio and, under G. Ligasacchi, in the 1960s began a period of important development. Since the 1980s, together with intense concert activity, the Associazione has been dedicated to educational activities: composition courses, performance studies and editorial work; the publication Brescia Musica, launched in 1985, is unique in its genre of culture and musical information.

In 1971 the Istituto Musicale Antonio Venturi, founded in 1866 on the initiative of individual patrons and eminent musicians, became the Conservatorio Statale di Brescia. It was later named after Marenzio. It was considerably extended in the early 1970s and since the 1990s has promoted chamber and orchestral concerts. In 1978 the Fondazione 'Romano Romanini' inaugurated a series of competitions for string players. Composers active in Brescia in the 20th century included Franco Margola and Camillo Togni.

CARLO PERUCCHETTI

Brescianello [Bressonelli], **Giuseppe Antonio** (*b* Bologna, *c*1690; *d* Stuttgart, 4 Oct 1758). Italian violinist and composer. He first appears in documents when in 1715 the Elector of Bavaria brought him from Venice to Munich as a violinist. In October 1716, after the death of his predecessor Pez, he became *musique directeur, maître des concerts de la chambre* at the Württemberg court in Stuttgart, and in 1717 chief Kapellmeister. Between 1717 and 1718 he wrote the pastoral opera *La Tisbe*, which he dedicated to his employer Archduke Eberhard Ludwig. Hoping this opera would be produced at the Stuttgart Opera, Brescianello wrote in his *Präparationen* that he had suited its melodies to the theatre taste: but that did not gain him a performance. From 1719 to 1721 he had to face heated battles with his rival Reinhard Keiser, who sought unsuccessfully for Brescianello's position. In 1731 Brescianello became Rath und Oberkapellmeister. When the court's finances collapsed in 1737, the Stuttgart opera troupe was dissolved and Brescianello lost his post, which spurred him on to increased activity as a composer. In 1738 (according to *EitnerQ*) he wrote *12 concerti e sinphonie* op.1 and other works, and somewhat later '18 Piecen fürs Gallichone'.

When the regency of the generous artistic patron Duke Carl Eugen began in 1744, Brescianello was reinstated as Oberkapellmeister 'on account of his particular knowledge of music and excellent competence', and until his retirement he brought the opera and court music to renewed fame. He was pensioned off on 29 November 1751 according to Sittard, on St James's Day 1755 according to other sources. His successor was Ignaz Holzbauer, then Jommelli.

In his two decades as Kapellmeister, Brescianello helped to put his stamp on the musical life of Stuttgart and Ludwigsburg. His importance lies in his compositions, which mainly follow the conventions of his time (sequences and imitations, influences of the *galant* style, generally in loosened suite form). Apart from *Tisbe*, two cantatas and a mass (occasional and commissioned works), Brescianello wrote mainly chamber music using the violin, with which he was most acquainted through his training as a violinist: these works are thus among his most successful.

WORKS

VOCAL

La Tisbe (op pastorale), 1717–18, *D-Sl*

RUDOLF LÜCK

Bresgen, Cesar (*b* Florence, 16 Oct 1913; *d* Salzburg, 7 April 1988). Austrian composer of German origin. He studied composition, the organ, the piano and conducting at the Munich Akademie der Tonkunst (1930–36), where his teachers included Emmanuel Gatscher, Siegmund von Hausegger, Gottfried Rüdinger and Joseph Haas. In 1936 he was awarded the Felix Mottl Prize for composition and was subsequently employed in Bavarian Radio's music division for which he wrote several *Hörspiele*. In 1939 he moved to Salzburg where he founded a youth music school and was invited by Clemens Krauss to teach composition at the Mozarteum. He was awarded the City of Munich Music Prize in 1941 and the Salzburg Kulturpreis in 1942. After military service during the war he became a church organist and choir director at Mittersill. There he became acquainted with Webern whose death in 1945 moved him to compose his haunting *Requiem für Anton Webern* (revised into a more extended work in 1972). From 1947 Bresgen resumed his career as composition professor in Salzburg. During this period he undertook further studies with Hindemith (1947 and 1950) and also experimented with 12-note technique under the tutelage of Jelinek and Krenek. He received numerous awards during the latter part of his life including the Österreichischer Staatspreis (1954 and 1968), the Grosser Österreichischer Staatspreis (1979), the Carl Orff Medal (1981) and the Grosser Preis der Deutschen Akademie für Kinder- und Jugendtheaterschaffen.

Bresgen's compositional development was stimulated by three important influences. First, his work as a répétiteur with the Mary Wigman Dance School (1932–4) gave him an unrivalled experience in the art of theatrical improvisation, as well as a deep understanding of dance forms. Second, his folksong studies, coupled with an interest in pre-Classical German music, provided the basis for a flexible musical style. Finally, his intensive association with youth music movements, which initially included active participation in the Hitler Youth, resulted in a lifelong commitment to writing *Gebrauchsmusik*. This trend was already demonstrated in the 1930s with a sequence of politically conceived choral and orchestral works, many of which were commissioned for public occasions organized by the Nazis. During this period Bresgen also composed orchestral works which were championed by some of Germany's most distinguished conductors including Abendroth, Konwitschny and Elmendorff. His Singspiel *Dornröschen*, first performed under Rosbaud in Strasbourg, enjoyed stagings at several other German theatres, although more ambitious operatic projects such as an adaptation of the old Bavarian legend *Goggolore* remained incomplete, and the full-length *Paracelsus*, composed for the Dresden Staatsoper, was

never produced after an air raid destroyed all performance materials.

After the war Bresgen remained extremely productive in all genres of music, composing such fine works as the *Totentanz* for two pianos, inspired by the woodcuts of Holbein, and the *Requiem für Anton Webern*. It was his stage music, however, which attracted the greatest attention beyond Austria. Of particular note are the children's operas *Der Igel als Bräutigam* (1948, revised 1951) and *Der Mann im Mond* (1959). Both were written in collaboration with the publisher Ludwig Andersen and both received numerous performances in Germany. They exemplify Bresgen's ability to juxtapose various levels of scenic representation – including descriptive music, spoken text, dance and pantomime – in one composition. This polymorphous approach is also perceived in other works such as his scenic cantatas and oratorios, which were designed for performance in either concert hall or opera house (a trend influenced by Carl Orff). The major work in this genre is the *Visiones amantis (Der Wolkensteiner)*, based on the texts and melodies of the 15th-century Tyrolean Minnesinger Oswald von Wolkenstein. With its skilful exploitation of Hebrew chant, the late opera *Der Engel von Prag* (1974–7), based on Leo Perutz's story of the 16th-century Austrian Emperor Rudolf II, who neglected the government of his country in pursuit of his love for Esther, the wife of Prague's richest Jew, is also a notable manifestation of Bresgen's gifts as a musical dramatist.

Although for a time Bresgen pursued 12-note technique (Piano Concerto, 1951), the most significant musical influences on his style remained Stravinsky, Hindemith, Bartók and Orff. His pedagogical activities, which included editing several collections of folk music and writing theoretical books and articles, were much admired in the German-speaking world.

WORKS

(selective list)

STAGE

Der Goggolore (Bayerisches Spl, 5, O. Reuther), 1937–9, inc.
Die Freier (incid music, J. Eichendorff); Heidelberg, 1938

ERIK LEVI

Breslau (Ger.). *See* WROCŁAW.

Bresnick, Martin (*b* New York City, 13 Nov 1946). American composer. He studied at the University of Hartford, the Vienna Music Academy (1969–70) and Stanford University (DMA 1972). His principal teachers included Einem, Cerha, Ligeti and Chowning. After serving on the faculties of the San Francisco Conservatory (1971–2) and Stanford (1972–5), he began a long and fruitful appointment as professor of composition at Yale University (1976). His many honours and awards include the Prix de Rome (1975), three NEA awards (1975, 1979, 1980), a MacDowell Colony Fellowship (1977), the Premio Ancona (1980), Lincoln Center's Stoeger Prize for Chamber Music (1996) and the Charles Ives Living Award from the American Academy of Arts and Letters (1998). His commissions include works for the Koussevitsky and Fromm foundations.

Bresnick's early compositions are characterized by refined textures that develop through linear interplay. Dense webs of repeated and subtly varied interlocking melodic cells are manifest in such works as *Wir weben, wir weben* (1978) and the String Quartet no.2 'Bucephalus' (1984). With the Piano Trio (1988) he instilled in his increasingly lean contrapuntal writing a new harmonic discipline based on symmetrical sequences of melodic intervals. Throughout his oeuvre unmistakable intellect undergirds dark expressivity; complex inspirations lie behind frequently abstract programmatic titles. In the early 1990s, Bresnick invented the rubric *Opera della musica povera* to unite a series of pieces including *Follow Your Leader*, *Pigs and Fishes*, *The Bucket Rider* and *BE JUST!* These works, which impose severe limitations on musical material, embody longstanding trends in the composer's musical style, while hinting, from a detached perspective, at the progressive politics which have long played a role in his work.

WORKS
(*selective list*)

Dramatic: Stoneground, 1974; Ants (theatre piece, M. Bresnick, R. Myslewski), S, Mez, T, B-Bar, ww qnt, str qt, db, perc, 1976; Arthur and Lillie (film score, J. EDWARD HARSH

Bressan, P(eter) (*b* Bourg en Bresse, 27 May 1663; *d* Tournai, 21 April 1731). French wind instrument maker. He was baptized Pierre Jaillard. His father (a waggoner) and his paternal grandfather (tenant farmer and bourgeois of Châtillon-les-Dombes) died when he was four, and in 1678 he was apprenticed to a woodturner in Bourg for two years; he then left Bourg, but it is not known where he learnt instrument making, although this was most probably in Paris. His treble recorders are similar to those of his contemporary JEAN-JACQUES RIPPERT; indeed they may both have served under a common master. He came to England in 1688, and is first mentioned as Brazong or Bresong in English archives in 1691 as one of the 'hautboys' who accompanied William III to Holland. He had abandoned the name Jaillard, but even Bressan proved difficult for some English scribes. The James Talbot Manuscript (*GB-Och* Music 1187, *c*1695; see Baines) shows that he was already a leading London maker of flutes, recorders and oboes.

In 1703 he married Mary Margaret Mignon, daughter of Claude Mignon, formerly an apothecary to Queen Henrietta Maria in Paris and London. Bressan lived in the Mignon house from at least the time of his marriage. The Bressans had three children, who were baptized in the Savoy Church; for two of them the surname is given as Zillard and Jaillard, alias Bressan. Claude Mignon died in 1714 and Bressan became the ratepayer of the house, in Somerset House Yard on the east end of the palace. In the 16th and 17th centuries it had been the town house of the Chancellor of the Duchy of Lancaster, although by Bressan's day it had been divided up; this explains the use of the red rose of Lancaster in his mark (P ˇ I/Bressan/ cinquefoil rose).

By 1721 J.J. SCHUCHART was very probably working for Bressan; his mark was a direct imitation of Bressan's. Bressan was a friend of James Paisible, who in 1721 appointed him an executor of his estate in England (the other was Peter La Tour, later Bressan's principal creditor). Bressan was a Catholic and appears in papist returns of 1715 and 1716. In 1721 Bressan took his wife and her financial adviser to court; they had accumulated debts from the collapse of the South Sea Bubble. Bressan was granted letters of denization in 1723.

Bressan published violin sonatas by Castrucci (1718) and violin or flute sonatas by Barsanti (1724). He subscribed to J.C. Gillier's *Receuil d'airs françois* (1723) and to J.E. Galliard's *Hymn of Adam and Eve* (1728). His house contained a room large enough for exhibitions; in 1728 'The Grand Theatre of the Muses, just finished by Mr. Pinchbeck, musical clock maker was to be seen at Mrs. Bressan's Great Room'. In 1725 John Byrom, author of the epigram on Handel and Bononcini, bought a flute from Bressan, which cost five guineas. In 1730, aged 67, Bressan left his wife and went to live in Tournai. The London newspapers of about 6 May 1731 report his death, describing him as 'that celebrated artist in making flutes'. An inventory of his house shows that he made all the contemporary wind instruments, and indicates his interest in the fine arts, itemizing some 76 pictures, prints, portraits and busts.

As to Bressan's instruments, some three flutes and 48 recorders survive (see RECORDER, fig.5); these should be compared with Thomas Stanesby senior's surviving output (eight recorders, five oboes and most of a bassoon). STANESBY was only about five years younger than Bressan,

and the difference in the number of surviving recorders may be significant, implying that Bressan was the more successful in catering for gentleman amateurs. The evidence of his recorders, when not tampered with, disproves Hawkins's disparaging remarks about the tuning of their upper octave. Two of the flutes have the earlier-style single centre joint, and one is handsomely decorated with silver picqué (possibly the work of Peter Simon, Bressan's brother-in-law, a silversmith). The recorders consist of one 4th flute (B♭), 20 trebles (F), ten voice flutes (D), 11 tenors (C) and six basses (F). Except for the basses most are scaled in total external length in the ratios B♭: $\frac{3}{4}$; F: 1; D: $\frac{6}{5}$; and C: $\frac{4}{3}$.

MAURICE BYRNE

Bressand, Friedrich Christian (*b* Durlach, *c*1670; *d* 4 April 1699). German poet and librettist. He was the son of a cook in the household of the Margrave of Baden-Durlach. Following the early death of his parents he was sent to the court of Brunswick-Wolfenbüttel, where his literary talents were encouraged and he became a secretary to Duke Anton Ulrich. He was a prominent literary figure at the court and an important influence in the history of German opera, which was extensively developed there from 1690. From that year until his death he was overall director of festive entertainments as well as stage director. Bressand's published descriptions of several of these festivities (see Smart) document invaluable details regarding the lavish and politically orientated nature of these royal entertainments.

During his brief career Bressand wrote most of the librettos for operas performed at court, supplying texts for such distinguished composers as Kusser, Keiser, J.P. Krieger, Schürmann, Mattheson, Erlebach and Georg Bronner. Many of these operas were repeated at Hamburg; he also wrote a few librettos specifically for Hamburg. His literary taste was determined to some degree by the French dramatists, and he was among the first to introduce to Germany through his own translations the masterpieces of Corneille and Racine. His librettos show a preference for the French alexandrine, which many Hamburg librettists had already discarded as unsuitable for opera, and also for exceedingly long recitatives. Nevertheless they are fine works, with dramatic, affect-laden arias and splendid ballet scenes. Like his more famous contemporary Postel, Bressand was an imaginative craftsman of considerable sensitivity who worked within the conventions of German Baroque poetry. He contributed manifestly to the remarkable growth of Baroque opera in north Germany during its richest period, around 1700.

Bressonelli, Giuseppe Antonio. *See* BRESCIANELLO, GIUSEPPE ANTONIO.

Bretan, Nicolae (*b* Năsăud, 25 March 1887; *d* Cluj, 1 Dec 1968). Romanian composer, singer, director and conductor. He began formal studies in Năsăud and continued in 1906 at the conservatory in Cluj (then Kolozsvár). In 1908 he entered the Vienna Music Academy, where he studied singing with Gustav Geiringer and Julius Meixner. After a temporary disruption he enrolled at the National Hungarian Royal Academy of Music in Budapest, studying this time with József Sík. He graduated in 1912, having also earned his licentiate in law from the University of Cluj in 1910.

Bretan's professional career began at the Bratislava Opera in 1913, followed by a position at the Oradea Opera. In 1917 he settled permanently in Cluj, fulfilling responsibilities as singer, stage director and even briefly director-general (Romanian Opera, 1944–5) for the various resident Hungarian and Romanian opera companies there, until political circumstances forced his retirement in 1948. His compositional focus was almost exclusively vocal. His musical idiom – tuneful melodies and lush harmonies – is marked occasionally by modal incursions and folk-like characterization.

WORKS

DAVID GRIFFIOEN

Bretel, Jehan (*b* *c*1210; *d* Arras, 1272). French trouvère. His grandfather, Jacques, was 'sergent héréditaire' of the abbey of St Vaast in Arras at the turn of the 13th century, one of eight officials supervising the water rights to the river Scarpe within the abbey's domain; his father (also named Jehan) held this position at least from 1241 until

his death in 1244. The poet is cited among the 'sergens iretavles de la riviere Saint-Vaast' in a document of 1256. He and his brother were apparently well-to-do property owners.

Seven of an original series of eight *chansons courtoises* by Bretel survive in the Vatican (*I-Rvat* Reg.lat.1490), but jeux-partis form his main contribution. He was apparently a participant in 89 such works, nearly half of the surviving total. Often these are without rubrics, and the names of the participants are revealed in the poems. (The attribution to Bretel of a few poems addressed merely to 'Sire' or 'Sire Jehan', while probably correct, is not certain.) Some 40 poets active around Arras in the mid-13th century appear either as participants or judges in these jeux-partis; among the more prominent are Adam de la Halle, Jehan de Grieviler, Jehan le Cuvelier d'Arras, Lambert Ferri, Perrin d'Angicourt, Gaidifer d'Avion, Adam de Givenchi, Jehan de Renti, Robert de la Piere and Robert de Castel. The jeux-partis between Bretel and Adam de la Halle are normally grouped among Adam's works in the manuscripts even though most are initiated by Bretel, whereas some jeux-partis between Bretel and lesser trouvères are placed within sections devoted to Bretel even though in these he is only the respondent. A chanson by Bretel (*Li miens chanters*) is dedicated to Countess Beatrice of Brabant, sister of Henri III. Seven works by Jehan le Grieviler, Jehan Erart, Jaques le Vinier, Colart le Boutellier and Mahieu de Gant are dedicated to Bretel. At some time during the height of his fame he was designated 'Prince' of the Arras *puy*.

Most of the poems written solely or partly by Bretel have heterometric strophes. Five are built on three line lengths, including *Grieviler, deus dames sai*, the only known example of a *pedes*-plus-cauda construction beginning with an 11-syllable line. Most heterometric poems combine lines of seven and ten syllables; a few intermingle heptasyllabic lines with lines of one other length. With only two exceptions, isometric strophes are either heptasyllabic or decasyllabic. Normally the poems begin with two *pedes*, each rhyming *ab*, but 19 begin with an *abba* pattern. Bretel had a strong penchant for continuing with one or more sets of paired rhymes, and this characterizes four of the five unusual rhyme schemes used.

A delineation of Bretel's musical style is hampered by the fact that not only the chansons but more than half of the jeux-partis survive with music only in one source each. When multiple musical readings are available there are normally two or more unrelated melodies. Which, if any, may have been by Bretel is difficult to decide unless there is corroboration between two sources. One might speculate that each of the participants in the jeux-partis contributed his own melody, but this would not explain why six poems survive with three settings each. The origins of melodic *unica* are thus doubtful. Most melodies are in bar form, although a few are non-repetitive. Repetitions of entire phrases are generally avoided in the concluding sections, and the varied return of phrases six and seven as phrases nine and ten in *Onques nul jour* is exceptional. All the chansons and more than three-quarters of the jeux-partis with rubrics to Bretel are cast in authentic modes; in most of the exceptions there are only one, two or three notes below the sub-final. There is normally a strong sense of tonal centre in these melodies. The jeux-partis not attributed by rubrics present a more varied picture: a greater number of plagal melodies, melodies of extended ranges and melodies with either unusual or unexpected finals. None of the melodies survives in mensural notation and there are few clear hints of modal rhythms.

THEODORE KARP

Brethren of Purity. *See* IKHWĀN AL-ṢAFĀ'.

Bretón (y Hernández), Tomás (*b* Salamanca, 29 Dec 1850, *d* Madrid, 2 Dec 1923). Spanish composer and conductor. At the age of 12 he was earning his living as a violinist in his native city. He then moved to Madrid, where he studied the violin at the conservatory and took part in zarzuela and circus orchestras. While appearing as a conductor and instrumentalist in Madrid and elsewhere in Spain, he pursued composition studies under Arrieta at the Madrid Conservatory, where he took the first prize for composition in 1872. He also studied in Rome, Milan, Vienna and Paris. Back in Spain he founded and conducted the Unión Artístico-Musical, which performed a large number of new Spanish and foreign works. In 1891 his friend Albéniz took him to London and there he conducted two successful concerts of Spanish music. Later he was a teacher and director at the Madrid Conservatory and conductor of the Sociedad de Conciertos and of the Madrid SO in its early years. He was a member of the Royal Academy of S Fernando and a recipient of the crosses of Carlos III and Alfonso XII.

Bretón struggled tirelessly for the establishment of a sophisticated Spanish lyric drama, but his own operas met with little favour. *Los amantes de Teruel* was an ephemeral *succès de scandale*; it was taken as an act of youthful rebellion against Spanish music, and Bretón's music continued to be attacked for a lack of Spanish character. Nonetheless, the cheerful tunes of Aragon enrich *La Dolores*, which was the most successful of his operas and was staged in Madrid, Barcelona, Milan, Vienna and Prague. He found still greater popularity with the lively farce *La verbena de la paloma*, where the street atmosphere of Madrid is painted in vivid colours.

WORKS

STAGE

zarzuelas unless otherwise stated, in order of first performance; for more detailed list see GroveO

El alma en un hilo, 1874; Los dos caminos, 1874; El viaje de Europa, 1874, collab. Valverde *padre*; El inválido, 1875; El 93, 1875; Guzmán el bueno (ópera), 1876; Un chaparrón de maridos, 1876; Maria, 1876; Vista y sentencia, 1876 or 1886; Cuidado con los estudiantes, 1877; Los dos leones, 1877
El campanero de Begoña, 1878; El bautizo de Pepín, 1878, collab. F. Chueca and Valverde; Bonito pais, 1878; Corona contra corona, 1879; El barberillo de Orán, 1879; Los amores de un príncipe, 1881; Las señoritas de Conil, 1881; El grito en el cielo, 1886; Los amantes de Teruel (ópera), 1889; Garín, l'eremita di Montserrat (ópera), 1892
La verbena de la paloma, ó El boticario y las chulapas (sainete lírico), 1894; El domingo de Ramos, 1895; La Dolores (ópera), 1895; Al fin se casa la Nieves, 1895; El guardia del corps, 1897; El reloj de curo, 1898; El puente del diablo, 1898; El clavel rojo, 1899
Ya se van los quintos madre, 1899; La cariñosa, 1899; Raquel (ópera), 1900; Covadonga, 1901; Farinelli (ópera), spr. 1901 or June 1902; El caballo de señorita, 1901; Botín de guerra, 1902; La bien planta, 1902
El certamen de Cremona (ópera), 1906; La generosa, 1909; Piel de oso, 1909; Al alcance de la mano, 1911; Las percheleras, 1911; Tabaré (ópera), 1913; Don Gil (ópera), 1914; Los húsares del czar, 1914; Salamanca (ópera), 1916; Las cortes de amor, 1916; La guitarra del amor, 1916, collab. J. Giménez

OTHER WORKS

Orat: El apocalipsis, Madrid, 1882

CARLOS GÓMEZ AMAT, ANDREW LAMB

Brett, Charles (Michael) (*b* Maidenhead, 27 Oct 1941). English countertenor. He began his career as a choral scholar at King's College, Cambridge, and made his London concert début in 1965 in Bach's *Magnificat*. He subsequently became one of Britain's leading countertenors, admired for his clear, mellifluous tone and unmannered style. Brett's career centred on the Baroque choral repertory; his limited operatic appearances included Gluck's *La clemenza di Tito* and Britten's Oberon, which he first sang in Aachen in 1987. In 1983 he co-founded the Amaryllis Consort, of which he was director. Among his recordings are Purcell's *Fairy Queen* (under Britten) and birthday odes, Bach's B minor Mass and several Handel oratorios.

DAVID CUMMINGS/R

Brett, Philip (*b* Edwinstowe, Notts., 17 Oct 1937). English musicologist, active in the USA. He was at King's College, Cambridge, from 1955 to 1962, taking the BA in 1958 and the MusB in 1961. He then spent a year at the University of California, Berkeley, before becoming a Fellow of King's College and university assistant lecturer in 1963. He took the doctorate (Cambridge, 1965) with a dissertation on Byrd's songs. In 1966 he returned to Berkeley as assistant professor, becoming associate professor in 1971 and professor in 1978. Brett, who became a naturalized American citizen, was appointed professor of music at the University of California, Riverside, in 1991.

At Cambridge he studied with Philip Radcliffe and Thurston Dart, and collaborated with Dart in revising Fellowes's series the English Madrigalists. He also revised one volume in the Collected Works of William Byrd, and subsequently undertook new editions of a number of volumes. His thorough examination of the sources has shown many of the pieces accepted by Fellowes to be of doubtful authenticity; his presentation of the texts and scores is useful to both performer and scholar. In 1973 he became general editor of a new edition of Byrd's music. He has also specialized in the performance of Handel's music, as conductor and as harpsichordist; as conductor of the University Chorus and Chamber Chorus at the University of California at Berkeley, he took part in several recordings of Baroque and contemporary music. Brett was co-founder of the Gay and Lesbian Study Group (1989–90) of the AMS, and many of his more recent writings have discussed gender issues in music and musicology.

DAVID SCOTT/PAULA MORGAN

Breuer, János (*b* Budapest, 8 June 1932). Hungarian musicologist. He studied conducting and later musicology at the Liszt Academy of Music in Budapest (1950–58). He worked on the journal *Magyar zene* from 1961, and was its managing editor (1970–96). From 1962 he was also a music critic for the daily newspaper *Népszabadság*. He was an academic member of the Hungarian Musicians' Union (1958–9), a member and later secretary of the board of directors of the European Regional Group of the International Music Council (1983–9) and a member of the Hungarian Music Council (1990–97). He has specialized in 20th-century Hungarian music history and the pattern of international connections in Hungarian music throughout the century.

AGNES GÁDOR

Breunich [Breunig, Brauenig, Bräunich, Breuenich], **Johann Michael** (*b* early 18th century; *d* Dresden, after 1756). German composer. By 1727 Breunich was a Jesuit priest and Kapellmeister at Mainz Cathedral. By 1735 he had moved to Bohemia, probably to the Jesuit church in Prague, where an oratorio by him was performed that year. In 1745 he succeeded Zelenka as church composer to the court at Dresden, perhaps as a result of a commission he had executed for some members of the Saxon royal family who had visited Bohemia in 1737. In Dresden Breunich composed mainly church music; he wrote some secular pieces which were performed when the court visited its secondary residence at Warsaw, but could not get them performed in Dresden, where J.A. Hasse had a virtual monopoly in opera and other secular vocal music.

Breunich's published masses are more elaborate in style than most of the church music being published by German composers at the time – not unnaturally, as his musical horizons were wider than those of most of his contemporaries in this field. In his preface he expressed a wish to emulate the Italian style, which he did by writing more, and more elaborate, vocal solos, and more independent and idiomatic violin parts, than was usual in published church music of the 1720s; the technical difficulties, however, are not great. A distinctive feature of this publication is the clarino writing: the clarinos play almost continuously in many of the choral movements, and in the fugal movements their parts are often thematically integrated in a way attempted by few other church composers.

WORKS

VI Masses, 4vv, 2vn, org, op.1 (Mainz, 1727)
1 mass, 4vv, 1728, *D-WD*; 3 masses, 6 psalms, 1 Mag, 1 litany, 11 offertories, 13 Marian antiphons, 4 vesper settings, *A-KR*; 1 litany, *D-Dl*

ELIZABETH ROCHE

Breuning, Stephan von (*b* Bonn, 17 Aug 1774; *d* Vienna, 4 June 1827). German poet. Born into a prominent Bonn family, he had some musical training as a young man and went on to study law at Bonn and Göttingen. His acquaintance with Beethoven dates from about 1784, and despite several rifts the two remained lifelong friends. Settling in Vienna around 1800, he was appointed to the war council and in 1818 became a court councillor. When in 1805–6 Beethoven needed help in revising *Fidelio* he turned to von Breuning, who 'remodelled the whole book for him, quickening and enlivening the action' by reducing the opera to two acts and reordering events in Act 1. Although some of his ministrations were crude, he did much to remedy one of the major failings in the libretto: its slow, uneventful first act. Von Breuning was also the dedicatee of Beethoven's Violin Concerto op.61; Beethoven's later piano arrangement of this work was dedicated to von Breuning's first wife, Julie Vering (*d* 1809). Von Breuning was appointed an executor of Beethoven's will and guardian of his nephew; von Breuning died only a few months after Beethoven himself. His son, Gerhard (1813–92), Beethoven's constant companion during his final illness, published a memoir, *Aus dem Schwarzspanierhause* (Vienna, 1874; Eng. trans., 1992, as *Memories of Beethoven: from the House of the Black-Robed Spaniards*), which remains the best account of the composer's last months.

K.M. KNITTEL

Bréval, Jean-Baptiste Sébastien (*b* Paris, 6 Nov 1753; *d* Colligis, Aisne, 18 March 1823). French composer and cellist. He studied with Jean-Baptiste Cupis, and may also have received lessons from Berteau, one of whose sonatas is included in Bréval's tutor. By 1774 he was an active cello teacher and the following year he published his op.1, *Six quatuors concertants*. In 1776 he became a member of the Société Académique des Enfants d'Apollon. He made his début at the Concert Spirituel in 1778, playing one of his own sonatas; thereafter, solo appearances and performances of his works at this concert were frequent, and from 1781 to 1791 he was a member of its orchestra. His music was also performed by various Paris concert societies. On the temporary cessation of the Concert Spirituel, he joined the Théâtre Feydeau orchestra from 1791 to 1800. Afterwards he assumed the administration of the Concerts de la rue de Cléry and became a member of the Paris Opéra orchestra, a position from which he retired in 1814. The *Allgemeine musikalische Zeitung* (1801) and Fétis state that he taught at the Conservatoire. Although such tenure is not verified by the Conservatoire documents, examination reports indicate that Bréval's compositions were used for instruction.

Bréval's compositions, written between 1775 and 1805, consist mostly of instrumental music and reflect contemporary Parisian musical taste: graceful melodies are propelled by energetic rhythms and supported by an unobtrusive harmonic structure. The works written up to 1783 (all for strings, mainly for chamber groups) are usually either two- or three-movement compositions employing sonata and rondo form, or one-movement works using variation techniques. Works within the same opus usually follow the same procedure. Short, elegant and technically undemanding, they rely on lyrical melodic gestures and their subsequent elaboration. He was ranked among the best composers for amateur musicians by his contemporaries.

Bréval's later works, such as the superb *Symphonie concertante* for clarinet, horn and bassoon op.38 (*c*1795), are characterized by diversity and experimentation. In this middle period he wrote for many instrumental combinations and employed larger forms, such as the concerto, symphonie concertante and opera, which, through their melodic, harmonic and structural expansion, show his maturation as a composer. The chamber works of this period reveal a more complex sonata form, demand greater technical virtuosity and often have three movements. His concertos, written for his own performance, were structurally influenced by Giovanni Battista Viotti: precise thematic organization interspersed with bravura passage-work.

As a performer, Bréval was overshadowed by Jean-Louis Duport and J.-B. Janson, and later by Bernhard Heinrich Romberg. This was partly due to the fact that his technique did not progress much beyond his early training. Subsequently perceived as old-fashioned, he did not publish any works after the introduction of his *Traité du violoncelle* op.42 (1804), which was not well received (see *Correspondance des amateurs musiciens*). It overlooked technological advances to the instrument and the corresponding changes to performance technique, and was soon eclipsed by the more cohesive treatises of the Conservatoire (1805) and Duport (1806), although it still provides interesting insights into the French Classical style for modern players.

Bréval's brother, Stanislas-Laurent Bréval (*b* Paris, 1760), was a violinist in the service of the Count of Ogny and played in the orchestras of the Paris Opéra and the Concert Spirituel.

BARRY S. BROOK, RICHARD VIANO/VALERIE WALDEN

Bréval, Lucienne [née Schilling, Berthe] (*b* Mannendorf, nr Zürich, 4 Nov 1869; *d* Neuilly-sur-Seine, 15 Aug 1935). Swiss soprano. She studied the piano at Lausanne, then singing at the Conservatoire in Paris, where she made her début as Sélika in *L'Africaine* in 1892. She remained as principal soprano at the Opéra until 1919, during which time she sang in many world premières including those of Massenet's *Grisélidis*, Dukas' *Ariane et Barbe-bleu* and Février's *Monna Vanna*. She was also Kundry in the first French performance of *Parsifal*. In 1901 she made her début at the Metropolitan in *Le Cid*, singing also in *Die Walküre* and the American première of Reyer's *Salammbô*. Her only appearances at Covent Garden were as Gluck's Armide in 1906. In 1910 she sang Lady Macbeth in the première of Bloch's *Macbeth*, which he dedicated to her, at the Opéra-Comique in Paris. At Monte Carlo in 1913 she created the title role in Fauré's *Pénélope*; her other title roles there had been in Isidore De Lara's *Amy Robsart* and in *Carmen*.

Despite her great reputation in France she had limited success elsewhere: the New York critics found her acting 'semaphoric' and her singing lacking in polish. Her only recordings are the primitive cylinders made during a performance of *L'Africaine* with Jean de Reszke, where the high notes are impressive.

J.B. STEANE

Breve (Lat. *brevis*: 'short'; Fr. *carrée*, *double-ronde*; Ger. *Doppelganze-Note*). In Western notation a note half the value of a long and twice that of a semibreve. In American usage it is called a double whole note. It was the shorter of the two notes of early mensural music and theory, hence its name. It had its origins in the *punctum*, one of the two single-note neumes of pre-mensural notation, and is first found in early 13th-century sources. Before about 1600 its value was a half or a third of a long, and it was usually shown as in ex.1*a*; its rest was shown as in ex.1*b*.

Ex.1

(a) ■ or □ (b)  (c) ◘ or |◘| or ◘

The breve has survived in occasional use in the forms shown in ex.1*c*.

See also Notation, §III, 2–3 and Note values.

JOHN MOREHEN/RICHARD RASTALL

Brevi, Giovanni Battista (*b* Bergamo, *c*1650; *d* Milan, after 1725). Italian composer and organist. He was organist of S Maria Maggiore, Bergamo, by 1679 and choirmaster and organist at the cathedral there from 1680 to 1693. From 1695 he was choirmaster at S Maria del Carmine and S Francesco, Milan, and he also held a similar post at the Jesuit church of S Fedele there. In his publication of 1725 he was still described as choirmaster of many notable churches in Milan. In Novara in 1711 he took part as an organist in the ceremonies held in connection with the transfer of the relics of St Gaudentius. His music shows the influence of several of his important contemporaries, among them G.B. Vitali, Legrenzi and Bassani. His vocal works are distinguished by the noble, austere expressiveness of their ariosos and recitatives.

WORKS

ORATORIOS

Il trionfo della gloria nelle mestitie del Brenno, Bergamo, 1685
Il trionfo di S Antonio da Padoa contro il vizio, la morte e il demonio, Bergamo, 1685

SERGIO MARTINOTTI

Breviary (from Lat. *breviarium*: 'abridgment'). Liturgical book of the Western Church for the services of the Divine Office. Particularly when it includes notation, the breviary is virtually an Antiphoner augmented by the additional elements necessary for the complete recitation of the Divine Office (i.e. psalms, lessons and prayers).

1. Definition. 2. Early development of the breviary. 3. The development of the official Roman breviary. 4. Early local printed breviaries. 5. Format. 6. Notated chants.

1. Definition. The term 'breviarium' was applied in the sense of 'abridgment' before the 12th century to volumes as different as the summary of laws ascribed to Alaric (*Breviarium Alarici*) and the 11th-century summary (*Breviarium de musica*) of the *Epistola de harmonica*

institutione by REGINO OF PRÜM (*d* 915). The first liturgical breviaries appeared in the early 11th century and were books grouping together all the elements necessary for the complete recitation of the Office (whether in choir or in private), but with considerably shortened lessons. In certain breviaries for use in choir the lessons remained fairly long, but in many others, particularly breviaries for travelling clergy, the lessons were reduced to a few lines and were sometimes shorter than the responsories that followed them. The breviary was the only single book from which the Divine Office could be recited complete (even if in a shortened form), and this recitation was an obligation of travelling monks according to the Rule of St Benedict (chap.50); it was more complete than the diurnal (a book containing only the day Offices).

2. EARLY DEVELOPMENT OF THE BREVIARY. It might appear, therefore, that the breviary was designed for the needs of travelling monks. Nevertheless, nine of the 12 surviving 11th-century breviaries in French libraries, and 33 of the 39 surviving 12th-century breviaries, originated in monasteries; according to Ehrensberger's catalogue, the proportion is the same for the breviaries now in the Vatican. It seems likely, indeed, that the breviary (originally always noted with neumes) was designed for the sake of convenience in the recitation of the Office in choir. Many different liturgical books had previously been required: chant books (antiphoner, psalter, hymnary), books of lessons (homiliaries, lectionaries, passionaries, etc.), books of chapters (capitularies, collectaria) and books for the ordering of the services (ordinals). Now a single book contained the whole liturgical library for the Office.

In some early breviaries, as in some early missals, the liturgical books were juxtaposed rather than amalgamated; this occurred in certain Swiss breviaries (see Gy, 1963), and in some breviaries in Beneventan script, for example the Breviary of Oderise, Abbot of Monte Cassino (*F-Pm* 364; see M. Huglo: *Les tonaires: inventaire, analyse, comparaison*, Paris, 1971, pp.118–19). This arrangement must have been very inconvenient, and it disappeared during the 12th and 13th centuries, except in a few cases (e.g. the late 13th-century breviary of Apt, *GB-Ob* lat.lit.d.7 (33086)), in favour of the arrangement usual ever since. In this, the liturgical material, whether chanted, read or recited, is presented in the order in which it occurs in the liturgy.

Some 11th- and 12th-century manuscripts include both the breviary (with material for the Office) and the missal (with material for the Mass). These manuscripts were compiled for the sake of convenience, for use in small priories or modest parish churches. Sometimes chants from the Mass were included within the breviary proper, inserted between the Offices of Terce and Sext (see Salmon, 1967, pp.64ff).

3. THE DEVELOPMENT OF THE OFFICIAL ROMAN BREVIARY. At the papal court (i.e. the curia), the Divine Office was by the 13th century no longer sung publicly, and its private recitation had necessitated a shortening of the lessons. An abridgment or breviary known as the breviary of the curia, corresponding to the new requirements, was drawn up, apparently under the direction of Innocent III (1198–1216).

This breviary was adopted by the Franciscans after St Francis imposed it on his first followers, even for recitation in choir, in his third Rule of 1223. (Square notation – 'nota quadrata' – became compulsory after 1254 for Franciscan breviaries, although it is not always found in earlier Franciscan breviaries such as *I-Ac* 694, dating from 1224, which has central Italian neumes on staves; see illustration).

The curial breviary was revised in 1241, with the approval of Gregory IX (Cardinal Ugolino), and in 1260. In 1277 Nicholas III ordered it to be used in the Roman basilicas, although the Lateran adopted it only under Gregory XI (1370–78).

In the 13th, 14th and 15th centuries, especially while the popes were at Avignon, legends and apocryphal material were introduced into the lessons of the breviary, private devotions were magnified at the expense of the traditional service, and the Proper of the Saints became more important in it than the Proper of the Time. As early as the 15th century, in consequence, the question of the reform of the breviary was raised.

Reform was envisaged either as a radical recasting of the breviary or as a restoration in the spirit of antiquity. The former alternative was favoured for some time under humanist pressure, particularly during the papacies of Nicholas V (1447–55) and Leo X (1513–21), though not under Paul II (1464–71). Paul III (1534–49) favoured the breviary drawn up on humanist lines by Cardinal Quiñonez, titular of the Roman basilica of S Croce in Gerusalemme (which gave his breviary its alternative name of the Breviary of the Holy Cross). This breviary appeared in 1535, but its use was restricted to the private recitation of the Office. It was reprinted in 1536 at Cologne, Lyons and Paris (where there were three separate editions), and was published in 40 different places before 1544 even though Paul IV suspended it for a time. Despite the sensible redistribution of the Psalter contained in it, Quiñonez's breviary was considered too radical; it incurred the censure of the Sorbonne, and St Francis Xavier refused to read it. Nevertheless, it did not go nearly as far as Cranmer's first Book of Common Prayer of 1549 (modelled on it in numerous respects, such as the arrangement of the lessons, and the Preface) in simplifying and shortening the medieval Offices.

The second solution, a restoration of the breviary in the spirit of antiquity, was proposed by the Theatines, but it was finally achieved only under Pius V (1566–72), to whom the Council of Trent had entrusted the revision of the breviary. His breviary (the 'Pianum') was imposed in 1569.

The hymnary within the breviary continued to be revised; one such revision, by Zacharia Ferreri, Bishop of Naples, was authorized for private recitation under Clement VII (1523–34). In another, under Clement VIII (1592–1605), the text of the hymnary was 'corrected' along classical lines by four Jesuits. But the Vatican basilica at Rome, and the religious orders, retained the old hymnary.

The Roman breviary was adapted to monastic use by a commission (including the Jesuit Robert Bellarmine) under Paul V (1605–21). This Romano-Benedictine breviary, in which the hymnary remained unrevised, was approved in 1609 and imposed in 1616.

New projects of reform came to fruition under Benedict XIV (1740–58); in France, during the preceding 50 years,

First three antiphons and first responsory from the first nocturn of Matins of Christmas Day, from a Franciscan breviary notated in central Italian neumes, 1224 (I-Ac 694, f.26v)

a succession of neo-Gallican breviaries entirely recast on new lines had appeared. The last and best known of these, Vintimille's Paris breviary, appeared in 1736.

The breviary was once again thoroughly reformed by Pius X (1903–14), particularly in the distribution of the recitation of the Psalter over the week. Since the Second Vatican Council, a vernacular breviary has been granted to the clergy, with very short services and no traces of the forms of choral origin that had rendered private recitation unnecessarily cumbersome. With it, the traditional links with the past were definitely severed.

4. EARLY LOCAL PRINTED BREVIARIES. Printing of the breviary began about 1490. More than 520 different editions are known to have been printed before 1500; nearly 90 of these are of the Roman breviary, and 14 are of the Sarum breviary. The latter was very frequently printed on the Continent, at Rouen, Cologne, Paris and Venice. The first English edition was published in London in 1500, but it nevertheless continued to be printed in Paris until 1556.

Printed breviaries preserve many of the special liturgical characteristics of individual churches, such as their calendars, the special order in which they present optional pieces and so on. The canons of a chapter would have chosen one of their best manuscripts for the edition of their breviary, and would have collated and corrected it before sending it to the printer. The printed breviaries are thus excellent evidence of local practice. For some churches, the printed breviary may be the sole evidence for special chants, the ordering of antiphons and responsories, and rubrics.

After the Council of Trent (1545–63) local breviaries became progressively romanized, except in France from 1670, where neo-Gallican breviaries gradually displaced the breviaries of Paris and other French churches.

5. FORMAT. At the beginning of the 11th century the breviary, like the antiphoner, was small in format but much thicker than the antiphoner owing to the greater volume of material it contained. In consequence, it was often divided into two parts (winter and summer or, less frequently, the Proper of the Time and the Proper of the Saints). The breviary was placed in the centre of the choir for the readings: some manuscripts still bear traces of wax from the candles. The psalms, antiphons and responsories were chanted from memory: memorization ('recordatio') took place outside the choir with the assistance of the tonary, the antiphoner or the breviary.

In the 13th century and particularly in the 14th, however, all the chants began to be sung at sight from books that became increasingly large. Many 13th-and 14th-century breviaries are in folio format rather than the earlier quarto. Examples are the noted breviary from St Martial at Limoges (*F-Pn* lat.785), which is very large (40·5 cm × 29·5 cm), and two Parisian noted breviaries (*Pn* lat.10482 and 15181–2; the latter measures 49·5 cm × 34·5 cm). In folio books the staves are wider and the square notes larger than those in smaller books: often a breviary from this period has fewer musical staves on a page than a small 12th-century noted breviary.

Books of more traditional size did not disappear at this time, however: an example of a smaller book is the Sorbonne breviary (*F-Pn* lat.15613), which was chained in 1328 so that it could not be removed.

6. NOTATED CHANTS. Notated breviaries contain the antiphons and responsories for the whole liturgical repertory, and also notated lessons such as the excerpts from *Lamentations* for the end of Holy Week, the chant for the Sibylline prophecy at Christmas, and occasionally the chant for the genealogy of Christ sung at Christmas (in the version from *Matthew*) and Epiphany (in the version from *Luke*).

Another piece occasionally encountered is the *Visitatio sepulchri* or Easter play. A Parisian breviary from the mid-13th century (*F-Pn* lat.15613) contains an interesting *Representatio sepulchri* of this type which was performed at the end of the night Office for Easter. (For an edition of the text, see Leroquais, 1934, iii, pp.262–3; and of the melody, A. Gastoué: 'Les origines du chant liturgique dans l'église de Paris', *Revue du chant grégorien*, xi, 1902–3, pp.155–6.) Many further examples are to be found in the classic work by K. Young: *The Drama of the Medieval Church* (Oxford, 1933/*R*).

For further illustration, *see* ANTIPHONER, fig.2.

MICHEL HUGLO

Bréville, Pierre (Eugène Onfroy) de (*b* Bar-le-Duc, 21 Feb 1861; *d* Paris, 24 Sept 1949). French composer. Having completed preparatory schooling for a diplomatic career (Ecole Bossuet, Collège Stanislas and Faculté de Droit), he decided in favour of music. After studying briefly at the Conservatoire in the harmony class of Dubois, he left to become a pupil of Franck. He studied counterpoint, fugue and composition with Franck for only two years, but remained an ardent member of 'la bande à Franck'.

Bréville attended the première of *Parsifal*, met Bruckner and Liszt at Wahnfried, and Fauré, Debussy and other French pilgrims at the 1888 Bayreuth Festival. He visited Grieg during his Scandinavian tour in 1889 and travelled to Constantinople probably in 1894, a journey which was reflected in his music. From 1898 until 1902 Bréville taught counterpoint at the Schola Cantorum and he directed the Conservatoire chamber music class (1917–19). He devoted much time to the Société Nationale de Musique as a member, then secretary and finally president of its governing board. His critical writings are numerous, well written and occasionally witty.

Bréville considered the opera *Eros vainqueur* to be among his most important works. Commissioned by the Opéra-Comique in 1900, it was not performed there until 1932; its 1910 première was at La Monnaie, with Claire Croiza in the title role. Van den Borren and others wrote that it was one of the most significant operas of the period.

Bréville's songs also received critical acclaim. 105 are known to have been written between 1879 and 1945, of which 23 were never published. The early songs were clearly influenced by Wagner and the later ones by Fauré and Debussy. They are all skilfully written, with rhythmic inventiveness, meticulous prosody and sensitivity to the poetry. Occasionally the harmonic control weakens; at other times the harmonic-contrapuntal organization is masterly. The songs, chamber music and orchestral works were presented principally by the Société Nationale in Paris and the Libre Esthétique in Brussels. Although most of Bréville's compositions were publicly performed during his lifetime, in recent years his music has been all but forgotten.

WORKS
(selective list)

STAGE

La princesse Maleine (M. Maeterlinck), ov., 1891; Sept princesses (M. Maeterlinck), ov. and incid music, 1895; L'anneau de Çakuntalâ (comédie-héroïque, Kâlidâsa, trans. A.F. Herold), incid music, 1896; Le pays des fées (J. Lorrain), acc. to the recitation of 5 sonnets, ?1900; Eros vainqueur (conte lyrique, 3, Lorrain), 1905; St François d'Assise (op, T. de Wyzewa), unfinished

SACRED VOCAL

Mass in 3 parts, S, T, B, chorus, str qt, hp, org, 1883–6; Ave verum, Mez/Bar, org, *c*1884; Introit for nuptial mass: Deus Israel, T, chorus, hp, org, *c*1885; Ste Rose de Lima (scène mystique, F. Naquet), S, female chorus, orch, 1886; Laudate dominum, Bar, chorus, hp, org, db, 1889

Inviolata, Mez, T, org, *c*1892; Cantique de 1re Communion (H. Gauthier-Villars), S, vn, org, 1898; Salut (O Salutaris, Sancta Maria, Tantum ergo, Jubilate), female chorus, org, *c*1898; Tantum ergo, Mez, female chorus, org, *c*1898

Messe brève, solo or unison vv, org, 1925; La Noël (P. Fort), SATB chorus, 1940; Les cèdres du Liban (Lamartine), TB chorus, wordless female chorus, 1941; Cantique en l'honneur de St Louis de Gonzague (R.P.H. Couvreur), chorus, org; Latin motets

SECULAR VOCAL

L'ondine et le pêcheur (T. Gautier), S, orch, 1884; Hymne à Venus (de l'Isle Adam), 2 female vv (duo/chorus), va, fl, ob, cl, bn, hp, 1889; Médeia (A.F. Herold), S, female chorus, orch, 1892; Aimons nous (T. de Banville), Mez, T, orch/pf, 1894; Chant des divinités de la forêt, S, T, female chorus, orch, 1896 [from incid music L'anneau de Çakuntalâ]

Quatre rondels de Charles d'Orléans, 3 female vv (trio/chorus), 1930; La marelle (M. Gevers), 2vv (duo/chorus), pf, 1935; Roi-pepin (E. Vitta), 2vv (duo/chorus), pf, 1936; numerous choruses, vocal qts, duos, etc.

SONGS
† also exists with orchestration by Bréville

Harmonie du soir (C. Baudelaire), 1879

Elégie (M. Bouchor), 1883; Chanson d'amour (Bouchor), 1883; Chanson triste (Bouchor), 1883; Extase (V. Hugo), 1883

La forêt charmée (J. Moréas), 1891; Le Rhin (Moréas), 1891; Après la mort (G. Trarieux), 1892; Dormir (F. Colonna), 1893; Bernardette† (E. Pouvillon), 1894; Les lauriers sont coupés (T. Klingsor), 1895; Il ne pleut plus bergère (Klingsor), 1895; La belle au bois (J. Lorrain), 1896; La mort des lys (Lorrain), 1896; Le furet du bois joli (J. Benedict), 1896; Les fées (H. Gauthier-Villars), 1896; Petits litanies de Jésus (Klingsor), 1896; La tour, prends

garde (E. Cottinet), 1897; Nuit de jardin (C. Morice), 1897; Baiser† (Cottinet), c1898; La petite Ilse (Lorrain), 1898; Variante sur l'air: Au clair† (C. Morice), 1898; Sur le pont (Cottinet), 1898; Prières d'enfant (Le signe de la croix, Notre Père, Je vous salue Marie, Souvenez-vous), 1899; Childe Harold (H. Heine), 1899; Epitaphe sur l'anagrame de … Damoiselle Marie Dupuis (anon.), 1899

Prière pour la France† (F. Coppée), 1900; Maneh, chanson de Caïckji sur le Bosphore (vocalise), 1907

Litanies pour ceux qui ne sont plus (anon.), 1910; Sur une tombe† (V. Hugo), 1911; Venise marine (H. de Régnier), 1911; Une jeune fille parle† (J. Moréas), 1911; Berceuse (Régnier), 1912; Sous les arches de roses (C. Van Lerberghe), 1912; Choses en allées (Moréas), 1912; Le secret (Régnier), 1912; Héros, je vous salue† (Régnier), 1915; France† (Régnier), 1916; L'Ondine† (R. Vivien), 1916

La terre (F.-R. Chateaubriand), 1920; Sainte (S. Mallarmé), 1922; Cantique pour le tricentenaire de Molière (Molière), T, org/pf, 1922; La cloche fêlée† (C. Baudelaire), 1924; La terre, les eaux va buvant (P. Ronsard), 1925; Bonjour, mon coeur (Ronsard), 1925; O mon ange gardien (F. Jammes), 1925; 4 sonatines vocales (J. Moréas), 1927–8: Printemps, Fleurs, Automne, Océan; Adieu vous dy (F. Villon), 1928; Le souvenir de vous me tue (?Villon), 1928

Douze rondels de Charles d'Orléans (Je ne prise point telz baisiers; Mon seul amy; Jeunes amoureux nouveaulx; Le trouveray-je jamais; Gardez le trait de la fenestre; Chantez ce que vous pensés; Petit mercier, petit pannier; Yver, vous n'estes qu'un villain; Quant n'ont assez fait dodo; Les fourriers d'Esté sont venus; Riens ne valent ses mirlifiques; En yver, du feu, du feu), 1928–9

J'allais dans la campagne (J. Moréas), 1931; L'heure mystique (P. Fort), 1932; Les deux enfants de Roi (E. Verhaeren), 1932; Coeur ardent (Verhaeren), 1932; Tu me donnas ton coeur (J. Lahor), 1933; over 20 unpubd songs

INSTRUMENTAL

Orch: La nuit de décembre, sym. poem, 1887; Stamboul, rythmes et chansons d'Orient, 1895; Sans pardon, sym. poem, 1929 [transcr. from Poème dramatique]

Sonatas, vn, pf: no.1, c♯, 1918–19; no.2, 1927; no.3, 1942; no.4, 1943; no.5, 1947

MIMI S. DAITZ

Brewaeys, Luc (*b* Mortsel, 25 Aug 1959). Belgian composer. He studied composition with André Laporte and conducting with Ronald Zollman at the Flemish-speaking section of the Brussels Conservatory, and continued his studies with Donatoni in Siena and Ferneyhough in Darmstadt. Between 1980 and 1984 he maintained regular contact with Xenakis. After completing his studies he became Tonmeister with BRTN, the Belgian Flemish-speaking radio and television station, while continuing to be active as a pianist and conductor. Brewaeys began writing for orchestra while still very young, and won many international prizes. He was awarded third prize in the European Young Composers' Competition in 1986 for '*. . . e poi c'era . . .*', while '*Komm, hebe dich*' won him first prize in the same competition in 1989. The former work also won first prize in the Young Composers category of the UNESCO International Rostrum of Composers in 1986. His Third Symphony was awarded first prize in the Concorso Internazionale di Composizione Sinfonica di Trieste in 1991. A prolific composer, he has also explored chamber music, including the string quartet. Steeped in spectral music (in particular the music of Murail and Grisey), Brewaeys adds to it an innate sense of musical drama and expressivity. His research into sonority has led him to integrate non-musical items and sound from electronic sources into the orchestra.

WORKS
(*selective list*)

Chbr op: Antigone, 1991

Vocal-orch: Réquialm, S, orch, 1989; Non lasciate ogni speranza, S, sax, orch, 1990

Recordings: Oeuvres Symphoniques, Cyprès-Crédit, Communal

ERIC DE VISSCHER

Brewer, Sir (Alfred) Herbert (*b* Gloucester, 21 June 1865; *d* Gloucester, 1 March 1928). English organist, conductor and composer. He was a chorister at Gloucester Cathedral (1877–80), and studied with C.H. Lloyd, organist of the cathedral. After holding organ appointments in succession at two Gloucester churches he succeeded Parratt as organist of St Giles's, Oxford, in September 1882. The following April he gained the first open organ scholarship at the RCM in London, where he studied with Parratt. In December 1883 he obtained the organ scholarship of Exeter College, Oxford, which he held concurrently with the post at St Giles's. He took the MusBac at Dublin in 1897, and in 1905 the Lambeth MusDoc was conferred on him.

Brewer was elected organist of Bristol Cathedral in December 1885 but held this post for only a few weeks. He returned to Oxford until, in September 1886, he became organist of St Michael's, Coventry. In September 1892 he was appointed organist and music master at Tonbridge School; this post he held until December 1896, when he succeeded C. Lee Williams as organist and choirmaster of Gloucester Cathedral.

Brewer's most important public work was his direction of eight of the Three Choirs Festivals at Gloucester from 1898 onwards, where he introduced many new works and showed great enterprise in the drawing up of programmes. He founded the Gloucester Orchestral Society in 1905 and gave much-appreciated organ recitals for schoolchildren.

Brewer was an assiduous composer; his long list of works ranges from festival cantatas to secular songs. Among the former *Emmaus* (Gloucester, 1901) and *The Holy Innocents* (Gloucester, 1904) represent his serious aspirations, but such lighter works as *Three Elizabethan Pastorals* for voice and orchestra (Hereford, 1906), *Summer Sports*, a suite for chorus and orchestra (Gloucester, 1910), and the song cycle *Jillian of Berry* (Hereford, 1921) represent him more favourably. As a composer, indeed, he seemed happier in the concerts of the Shire Hall than in the cathedral. He was made an FRCO (1897) and an honorary RAM (1906), and was knighted in 1926.

Brewer, Thomas (*b* London, 1611; *d* ?*c*1660). English viol player and composer. He was the son of Thomas Brewer, a poulterer, and educated at Christ's Hospital. Admitted to the school at the age of three, he remained there until 1626, when he was apprenticed to one Thomas Warner. From 1638 he was 'song-schoolmaster' at Christ's Hospital, but was dismissed in 1641 for marrying (contrary to the terms of his employment) and for various misdemeanours. It was probably later that he became a musician in the household of Sir Nicholas Lestrange, who quoted the following anecdote in his *Merry passages and Jests* (*GB-Lbl* Harl.6395):

> Thom: Brewer, my Mus: servant, through his Pronenesse to good-Fellowshippe, having attaind to a very Rich and Rubicund Nose; being reproved by a Friend for his too frequent use of strong Drinkes and Sacke; as very Pernicious to that Distemper and Inflammation in his Nose – Nay, faith, says he, if it will not endure sacke, it's no Nose for me.

There is no evidence that Brewer survived beyond the Restoration. He composed two psalms of thanksgiving 'to be sung by the Children of Christ's Hospital on Monday [and Tuesday] in the Easter Holy-dayes', the melodies of which were published singly in 1641. His best-known song is probably the glee *Turn, Amaryllis, to thy swain*, but another song, *O that mine eyes* (printed, along with *Mistake me not, I am as cold as hot*, in MB, xxxiii, 1971), is extremely interesting because of the declamatory style employed and the ornamental treatment it receives in several sources. Playford chose it as an example of an English song to which his 'Directions for Singing after the Italian Manner', translated from Caccini's preface to *Le nuove musiche* (1601/2) and included in his *Introduction to the Skill of Musick* (1664), could be applied.

WORKS

28 airs a 4, *GB-Lbl* (inc.), *Ob*
6 fantasias a 4, *IRL-Dm*, *GB-Lbl* (inc.), *Ob*
7 catches, 1652[10], 1663[6], 1667[6], 1673[4]
6 songs, 1653[7], 1659[5], *Gu*, *Lbl*, *US-NYp*
2 psalms: Great God direct our tongues, Our hearts we raise (pubd singly, London, 1641) [melody only]

IAN SPINK

Brewster [Brusser, Bruster, Brusters] (*fl* mid-16th century). English composer. Brewster wrote two In Nomines (ed. in MB, xliv–xlv, 1979–88). Both seem to have been conceived in a somewhat spare four-part texture, but all sources for the first work include a filler fifth part. In the only source of the second, staves for the fifth part are blank. A pavan for lute also survives (ed. in D. Lumsden, *An Anthology of English Lute Music (16th Century)*, London, 1954).

ANDREW ASHBEE

Brewster, W(illiam) Herbert (*b* Somerville, TN, 2 July 1897/1899; *d* Memphis, 14 Oct 1987). American composer of gospel songs. He attended Roger Williams College in Nashville (BA 1922), then moved to Memphis to become dean of a proposed black seminary which, however, did not materialize, and in 1928 he accepted the pastorate of the East Trigg Baptist Church in Memphis. He also served on the Education Board of the National Baptist Convention and as dean of Shelby County General Baptist Association, and founded and directed the Brewster Theological Clinic at Memphis. Brewster is best known as a composer who made use of sophisticated biblical texts. His first song, *I'm leaning and depending on the Lord*, was written in 1939; subsequently he contributed over 200 works to the repertory. Of these, *Move on up a little higher* (1946) and *Surely, God is able* (1949), were the first black gospel recordings to sell over a million copies. Mahalia Jackson, Clara Ward, Queen C. Anderson and his own group, the Brewster Ensemble, popularized most of his songs. Brewster also composed more than 15 biblical music dramas, one of which, *Sowing in Tears, Reaping in Joy*, was presented at the Smithsonian Institution (1982).

HORACE CLARENCE BOYER

Brewster Jones, Hooper (*b* Orroroo, S. Australia, 29 June 1887; *d* Adelaide, 8 July 1949). Australian pianist and composer. A member of a notable pioneer musical family, he was taught the organ by his father and gave his first public recital at the Adelaide Town Hall at the age of seven. In 1899 he was accepted as a student by Bryceson Treharne at the Adelaide Conservatorium of Music, where he won an Elder overseas scholarship to the RCM. There he studied the piano with Franklin Taylor and composition (1905–8) with Bridge, Clutsam and Stanford. He gave piano recitals in Paris, Germany and London, specializing in the 20th-century French repertory. On his return to Adelaide, he became a private teacher, wrote music criticism (1935–40), and formed a symphony orchestra in 1918 to introduce contemporary music into the standard Adelaide concert repertory. He continued to give solo recitals through the Australian Broadcasting Commission network on its inception in 1930, occasionally performing his own works such as the *Australian Concerto* no.2 for piano and orchestra with Sir Bernard Heinze (1945). He was also a music examiner and adjudicator throughout Australia, and polemicized with his colleagues Marshall-Hall, Grainger and Tate in support of a national musical identity.

Brewster Jones was a prolific composer with almost 600 works to his credit. Keyboard music accounts for over half of this total; prominent here are five piano concertos and 73 solo piano pieces entitled *Australian Bird Call Impressions*, most of which are based on transcriptions he made of bird calls from the bushland. Principal compositions in other genres include three symphonies (1921–6), the symphonic poem *Australian Felix*, six (mainly unfinished) operas and ballets (1915–25), 170 songs, 32 pieces for various instruments and piano, and 15 chamber works. In general, Brewster Jones's music reflects some of the more forward-looking aspects of European music before World War I. Sonata form is prevalent in the outer movements of his larger instrumental compositions, with thematic material distinctive in melodic shape and well contrasted. The music is always tonal, although on occasion he dispenses with key signatures (as in the opening movements of the string quartet of 1919). Despite the evident quality of Brewster Jones's best work and his importance in the development of music in South Australia, little is heard of his music today. His manuscripts and sketches are held in the Elder Music Library, University of Adelaide.

ELIZABETH WOOD/ADRIAN A. THOMAS

Breyttengraserus, Guilielmus. *See* BREITENGRASER, WILHELM.

Brian, Albertus. *See* BRYNE, ALBERTUS.

Brian, [William] Havergal (*b* Dresden, Staffs., 29 Jan 1876; *d* Shoreham, Sussex, 28 Nov 1972). English composer. Despite his working-class origins and his lack of formal academic training, he dedicated his long life to music with the utmost tenacity of a sardonic, idiosyncratic and original mind. In his early years his larger works were balanced by many songs and partsongs; after the age of 50 he concentrated on the genres of music drama and symphony.

1. LIFE. The son of pottery workers, he was a chorister and assistant organist at St James's School, Longton, and showed early talent on the violin, cello and piano. His formal schooling, however, ceased at the age of 12; thereafter he tried a variety of trades (carpentry, office clerk, timber buyer) while essaying to become a professional musician. Christened William, he assumed the name Havergal in his teens, presumably in reference to the hymn composer W.H. Havergal. He studied theory with Theophilus Hemming and gained local celebrity as a church organist, holding positions at Holy Trinity, Meir and All Saints, Odd Rode, on the Cheshire border. He also played the piano and cello in a dance band. The 1896 Staffordshire Triennial Festival, which included performances of Beethoven's Ninth Symphony and the première of Elgar's *King Olaf*, diverted Brian's ambitions from organ playing to composition. Fortified by encouragement from Elgar and George Halford, he produced his first acknowledged works. He became an Elgar supporter and, drawing on his numerous contacts among the Potteries' choirs and instrumentalists, helped to bring about critically successful English performances of *The Dream Of Gerontius* by the North Staffordshire District Choral Society in Hanley and Westminster Cathedral (1903).

In 1907 Henry Wood gave the first performances of Brian's *English Suite* and *For Valour* overture during the Queen's Hall Prom Season, a turning-point in the young composer's career. Resident in Stoke-on-Trent, Brian was increasingly recognized as a promising figure among younger British composers. Patronage from the pottery magnate Herbert Minton Robinson relieved him of the need to teach or continue as an organist and he befriended and gained the support of Frederick Delius, Thomas Beecham, Henry Wood, Ernest Newman and Granville Bantock, who became a lifelong friend. Brian's short choral compositions soon became staple test pieces at regional competitions and his early cantatas and orchestral works were published by Breitkopf & Härtel. Also active as a critic, he wrote for *The Musical World* (1905–8), Staffordshire papers and the *Musical Times*.

In 1913, after the break-up of his first marriage, Brian moved to London. Over the next 14 years he struggled to support his growing second family, taking a succession of clerking and writing jobs and producing a stream of small compositions, especially songs and partsongs, for quick sale to publishers. On the outbreak of war he joined the Honourable Artillery Company as a private, but, after sustaining injury, was consigned to civilian desk jobs from 1915. After the war he worked as a music copyist for various publishers; apart from a single term at the RCM, he did little teaching. In 1927, he became assistant editor of *Musical Opinion*, a post he held until 1940.

Constant writing, reviewing and interviewing kept him in close contact with a wide range of music, and he expressed sometimes pioneering enthusiasm for Handel operas and the music of Bruckner, Mahler, Schoenberg and others. Although the burlesque opera *The Tigers* and the symphony *The Gothic*, the last of his major compositions published during his lifetime, appeared in the early 1930s, they remained unperformed for several decades. He continued to compose large-scale works, but was virtually forgotten as a composer.

During World War II Brian worked as a clerk for the Ministry of Supply, remaining in the Civil Service until his retirement in 1948. From that year, possibly partly in response to the publication of Reginald Nettel's *Ordeal by Music: the Strange Experience of Havergal Brian* (1945), an extraordinary period of creativity ensued. He produced, among other works, four operas and 27 symphonies. Largely due to the efforts of composer and producer Robert Simpson, Brian's works began to receive occasional broadcasts by the BBC, beginning with the première of Symphony no.8 in 1954. This revival of interest in his music was accelerated by the first professional performance of *The Gothic* at the Royal Albert Hall in 1966 in celebration of his 90th birthday. At the age of 91 he was awarded an honorary DMus from Manchester University and in 1972 he was recognized as Composer of the Year by the Composers' Guild of Great Britain. A Havergal Brian Society was founded shortly after his death.

2. WORKS. Brian's mature music is simultaneously monumental and subversive, written in a style influenced both by late-Romanticism and an Elgarian love of pageantry. His output, like Elgar's, relates directly to the Austro-German choral and symphonic tradition, but often responds to traditional large-scale genres in unconventional ways. The early orchestral and choral compositions fall into two categories: one deeply serious and grandiose (to which the choral works and *In Memoriam* belong) and the other inhabiting a world of human comedy and satire, ranging from the naturalistic depiction of carnival events and characters in *English Suite no.1* to the conceptual comedy of *Doctor Merryheart*, an overture that parodies Strauss' symphonic poems. These two streams fuse in *The Tigers*, which opens with a quasi-naturalistic depiction of a bank holiday carnival at the beginning of World War I and proceeds to chronicle the misadventures of an enlisted regiment training on the home front. Elements of parody, farce and music-hall entertainment are juxtaposed with far more serious orchestral inventions (extracted as the *Symphonic Dances*).

The most profound music in *The Tigers*, a dream sequence danced by angels and gargoyles atop a cathedral tower, contains the germ of *The Gothic*, a symphony known for its length and enormous forces. Inspired by Goethe's *Faust* and Gothic cathedral architecture, this two-part work follows three instrumental movements with a Latin setting of the *Te Deum*. This second section, itself an hour in duration, is increasingly free in form and spans a stylistic gamut from neo-Renaissance polyphony to 1920s Expressionism. Although a conscious extension of the choral symphony tradition, *The Gothic* becomes a wild critique of the form and ends in a spirit of personal anguish.

The large-scale symphonies of the 1930s and the spacious Violin Concerto continue this process of creative critique with varying success. Symphony no.4 '*Das Siegeslied*', contemporary with the rise of Nazism in Germany, is a violent setting of a Lutheran psalm text. *Prometheus Unbound*, a setting of the first two acts of Shelley's poetic drama, is on an even larger scale than *The Gothic* and requires similarly enormous forces. The loss of the full score has rendered the work unperformable; the extant vocal score, however, shows a harshly dramatic first act answered by a second act of striking lyricism.

From quite early in his career, Brian counterbalanced the harmonic opulence of his Romantic and chromatic vocabulary with a muscular polyphony inspired by Bach and Handel. By 1948 his discourse had become relentlessly contrapuntal, although still within an expanded tonal context. Many symphonies mimic traditional three- or four-movement designs, but there is often a sense that musical ideas are not contained within these boundaries and single-movement forms are common. Though sonata, rondo and ternary forms appear, his preference was for continuous development; several subjects are often pursued simultaneously by means of intercutting episodes with little or no repetition of material.

Contrast on all levels is the life-force of Brian's music. Sometimes exteriorized in instrumental drama (such as the off-stage trumpet in Symphony no.10), more commonly it exists in the music itself, activity giving way without warning to stasis, heavy tuttis suddenly reduced to small instrumental ensembles, martial percussion music interspersed with lyric string solos. Brian's polyphonic lines, fragmented by his personal species of *Klangfarbenmelodie*, engage in the continuous development of motivic cells, while unexpected interruptions in the musical flow create dramatic juxtapositions of ideas. Symphony no.8, for example, proceeds through a series of motivic, textural, tonal and rhythmic oppositions. Generally the later symphonies show an increasing concentration. Paradoxically, while they appear to remain within a broadly traditional tonal framework, their forms and thought have an obliquity and density more readily associated with serial or post-serial music. Whatever their apparent discontinuities, they are above all inventive to a remarkable degree. This quality of striking orchestral invention is shared by the late operas, whose appeal is complicated by the relentlessly unlyrical quality of their word-setting – perhaps another Brianesque critique of a chosen genre.

WORKS

OPERAS

The Maiden and the Flower-Garden (children's operetta, G. Cumberland), vv, pf, 1914, lost

The Tigers (burlesque op, prol., 3, Brian), 1917–19, orchd 1928–9, prol. reorchd 1969, unfinished; BBC, 3–8 Jan 1983

Deirdre of the Sorrows (after J.M. Synge), ?1947, projected, ?sketched

Turandot, Prinzessin von China (tragikomisches Märchen, 3, C. Gozzi, trans. F. von Schiller), 1949–51; unperf.

The Cenci (8 scenes, after P.B. Shelley), 1951–2; concert perf., London, Queen Elizabeth, 12 Dec 1997

Faust (prol., 4, after J.W. von Goethe), 1955–6; BBC, 9 March 1979 [prol. only]

Agamemnon (1, Aeschylus, trans. J.S. Blackie, addns by Brian), 1957; London, St John's, Smith Square, 28 Jan 1971

Oedipus Coloneus (Sophocles, trans. G. Young), 1967, sketches only, lost

ORCHESTRAL

Syms. (nos.1–6 reflect Brian's 1967 renumbering): A Fantastic Sym., E, 1907–8, rev. 1908–9 as Humorous Legend on Three Blind Mice

[movt 1 pubd as Fantastic Variations on an Old Rhyme, movt 3 pubd as Festal Dance]; no.2, e, 1930–31; no.3, c♯, 1931–2; no.6 'Sinfonia tragica', 1947–8; no.7, C, 1948; no.8, b♭, 1949; no.9, a, 1951; no.10, c, 1953–4; no.11, 1954; no.12, 1957; no.13, C, 1959; no.14, f, 1960; no.15, A, 1960; no.16, 1960; no.17, 1960–61; no.18, 1961; no.19, e, 1961; no.20, c♯, 1962; no.21, E♭, 1963; no.22 'Symphonia brevis', 1964–5; no.23, 1965; no.24, D, 1965; no.25, a, 1965–6; no.26, 1966; no.27, C, 1966; no.28, c, 1967; no.29, E♭, 1967; no.30, b♭, 1967; no.31, 1968; no.32, A♭, 1968; see also VOCAL ORCH [no.1 'The Gothic', no.4 'Das Siegeslied', no.5 'Wine of Summer']

Concs.: Vn Conc. no.1, 1933–4, lost [recomposed as Vn Conc., C, 1934–5]; Conc. for Orch, 1964; Vc Conc., 1964

Other orch: Tragic Prelude, c1900–02, lost; English Suite no.1, op.12, ?1902–4; Pantalon and Columbine, romance, op.2, small orch, ?1902–3, lost [rev. as movts 2 and 3 of English Suite no.1]; Burlesque Variations and Ov. on an Original Theme, op.2, 1903; Legende, op.4, ?1903–4, lost; For Valour, ov., op.7, 1904, rev. 1906; Hero and Leander, sym. poem, op.8, 1904–6, lost; In memoriam, tone poem, 1910; Dr Merryheart, comedy ov., 1911–12; 3 Dances, small orch, 1914, lost [from The Maiden and the Flower-Garden]; Red May, march, 1914, lost; English Suite no.2 'Night Portraits', 1915, lost; Legend, 1915, lost; [Title unknown], 1915, lost

3 Comedy Dances, 1916, lost [arr. of 3 Illuminations, pf]; Razamoff, sym. drama, 1916, unfinished, lost; English Suite no.3, 1919–21; Tales of Olden Times, 3 preludes, small orch, 1919, destroyed; Ov., early 1920s, unfinished, lost [inspired by B. Keaton]; Fanfare from 'The Grotesques', brass, perc, 1921; 5 Sym. Dances, 1921–2 [from The Tigers]; Sym. Variations on 'Has Anybody here seen Kelly?', 1921–2 [from The Tigers]; English Suite no.4 'Kindergarten', 1924; The Battle Song, sym. poem, brass band, 1930–31; The Tinker's Wedding, comedy ov., 1948; Prelude tragico, 1952 [ov. to The Cenci]; English Suite no.5 'Rustic Scenes', 1953; Elegy, sym. poem, 1954; The Jolly Miller, comedy ov., 1962; 3 Pieces, 1962 [from Turandot]; Sym. Movt, 1964, unfinished, destroyed; Festival, Fanfare, brass, perc, 1967

VOCAL ORCHESTRAL

Requiem, Bar, chorus, orch, c1899, lost

Psalm xxiii, op.9, T, chorus, orch, c1904; full score reconstructed 1944–5

By the Waters of Babylon, op.11, Bar, chorus, orch, 1905, rev. 1908–9; vocal score pubd, full score lost

Carmilhan (H.W. Longfellow), ballad, op.14, solo vv, chorus. orch, ?1906, lost

Let God Arise (Psalm lxviii), op.15, solo vv, chorus, orch, ?1906; ?unfinished, lost

The Vision of Cleopatra (G. Cumberland), tragic poem, op.15, solo vv, chorus, orch, 1907–8; vocal score pubd, full score lost

The Soldier's Dream (T. Campbell), vv, orch, 1908–9, lost

[Title unknown] (W. Scott), chorus, orch, 1908–9, lost

Go, Happy Rose (R. Herrick), SSAA, orch/pf, 1911, lost

Requiem for the Rose (Herrick), SSAA, orch/pf, 1911

The Hag (Herrick), SSAA, orch/pf, 1911

Pilgrimage to Kevlaar (H. Heine, trans. Todhunter), ballad, chorus, orch, ?1912–13; lost

2 Scenas (C.R. Barber), Bar, orch/pf, 1918, lost

Sym. no.1 'The Gothic' (Te Deum), d, S, A, T, B, quadruple chorus, children's chorus, brass bands, orch, 1919–27

Sym. no.4 'Das Siegeslied' (Ps lxvii, Ger. trans.), S, SSAATTBB, orch, 1932–3

Sym. no.5 'Wine of Summer' (A. Douglas), Bar, orch, 1937

Prometheus Unbound (P.B. Shelley), lyric drama, solo vv, double chorus, semichorus, orch, 1937–44; full score lost

CHORAL

With pf: A Child's Prayer (M. Betham-Edwards), SA, pf, 1914; And will he not come again? (W. Shakespeare), SSAA, pf, 1914; A Song of Willow (Shakespeare), SSA, pf, 1914; The Dream (W. Blake), SSA, pf, 1914; The Fly (Blake), unison vv, pf, 1914; Goodbye to Summer (W. Allingham), SA, pf, 1914; Grace for a Child (R. Herrick), SA, pf, 1914; If I had but two little wings (S.T. Coleridge), SA, pf, 1914; Infant Joy (Blake), SSA, pf, 1914; The Lamb (Blake), SSS/SSA, pf, 1914; Laughing Song (Blake), SSA, pf, 1914; The little boy lost, the little boy found (Blake), SA, pf, 1914

Little White Lily (G. Macdonald), SSA, pf, 1914; The Moon (G. Cumberland), SA, pf, 1914; The Mountain and the Squirrel (R.W. Emerson), SA, pf, 1914; The River (Cumberland), SA, pf, 1914; Robin Redbreast, unison vv, pf, 1914, lost; Spring – Sound the Flute (Blake), SSA, pf, 1914; Summer has Come (Cumberland), SA, pf, 1914; Violets (Herrick), SSA, pf, 1914; What does little birdie say? (A. Tennyson), unison vv, pf, 1914; The Fairy Palace (M. Drayton), SSA, pf, 1915; Ah! County Guy! (W. Scott), serenade, 2 equal vv, pf, 1919, lost; A Wish, 2vv, pf, 1919–21, lost

Fair pledges of a fruitful tree (Herrick), SA, pf, 1919; It was a lover and his lass (Shakespeare), 3/4vv, pf, 1919; Mine be a cot beside the hill (S. Rogers), SA, pf, 1919, lost; Pack, clouds away (J. Heywood), SSA, pf, 1919; Spring, the sweet spring (T. Nashe), SA, pf, 1919; To Daffodils (Herrick), SA, pf, 1919; Under the greenwood tree (Shakespeare), SSA, pf, 1919; Full Fathom Five (Shakespeare), SSAA, pf, 1921; Come away, come away, Death (Shakespeare), TBarB, pf, 1925

Unacc.: Anthem, ?1896, lost; Shall I compare thee to a summer's day? (W. Shakespeare), SATB, 1903; Stars of the Summer Night (H.W. Longfellow), op.1, SSAATTBB, ?1905; Come o'er the Sea (T. Moore), SATB, 1906; Lullaby of an Infant Chief (G. Byron), op.10, SATB, 1906; Rondel: In a Fairy Boat (B. Weller), SSAA, 1906; Soul Star (H. Bantock), SATB, 1906; Tell me, thou Soul of her I love (J. Thompson), op.13d/1, SATB, 1906; Twilight, op.13d/2, SATB, ?1906, lost; Fairies' Song (G. Cumberland), SSAA, 1908; Daybreak (Longfellow), SATB, 1910; A Gipsy Song (B. Jonson), SSAA, 1914, lost

He was a rat, SATB, 1914; Hie upon Hielands (trad.), male vv, 1914, lost; Legend of Altenahr, male vv, 1914, lost; Meg Merrilies (J. Keats), male vv, 1914, lost; O Mistress Mine (Shakespeare), ?1915, lost; The Owl, female vv, 1914, lost; Pastoral 'The Shepherd' (W. Blake), SSA, 1914; The Sands of Dee (trad.), SATB, 1914, lost; Ye spotted snakes with double tongue (Shakespeare), SSAA, 1914; The Phantom Wooer (T.L. Beddoes), SATB, 1918; Absence, SSAA, 1919; Fear no more the heat of the sun (Shakespeare), SATB, 1919; Blow, blow, thou winter wind (Shakespeare), SATB, 1925

Introit–Amen, canon, SATB, 1925; O happiness, celestial fair (H. More), canon, SSAA, ?1925; Shall I then be spared? (More), canon, SATB, 1925; Sweet Solitude, thou placid queen (More), canon, SSAA, 1925; Tell me where is fancy bred (Shakespeare), SSAA, 1925; Vital spark of heavenly flame (A. Pope), canon, SSAA, 1925; other missing titles, presumed to be partsongs, incl. Clown's Song (Shakespeare); The Curate and the Mulberry Tree; The Knight's Leap; Marching Along; The Sweetest Dream; Sympathy; Love's Remorse; Will You Buy Any Rope?

SONGS

Canadian Boat Song (anon.), c1892, lost; I shot an Arrow (H.W. Longfellow), c1899, lost; [Title unknown] (G. Hadath), c1899; Today and Tomorrow (Hadath), c1899, lost; Wanderer's Night Song (J.W. von Goethe, trans. H. Morley), c1899, lost; 3 Songs (S. Daniel, J. Donne, R. Heber), op.6, A/Bar, pf, 1904–5; A Faery Song, op.13c (W.B. Yeats), 1906; Soliloquy upon a Dead Child (G. Cumberland), op.13a, 1906 [rev. as Little Sleeper (Hāfiz, trans. R. Le Gallienne), 1972]; 4 Songs (Cumberland), 1906, 1 lost; A Night Piece (R. Herrick), 1910; The Mad Maid's Song (Herrick), 1910; Why dost thou wound, and break my heart? (Herrick), 1910; The Blossom (W. Blake), 1914

The Chimney Sweeper (Blake), 1914; The Echoing Green (Blake), 1914; The Lost Doll (C. Kingsley), 1914; Piping down the valleys wild (Blake), 1914; 2 Scenas (C.R. Barber), 1918, lost; 5 Songs (T. Keble), 1918–19; The Soul of Steel (C.M. Masterman), 1918; The Defiled Sanctuary (Blake), 1918–19; The Birds (Blake), 1919; Call for the Robin Redbreast (Webster), 1919, lost; Care-Charmer Sleep (S. Daniel), 1919; Hymn to Diana (B. Jonson), 1919, lost; The Land of Dreams (Blake), 1919; Music when soft voices die (P.B. Shelley), 1919, lost; On a Poet's Lips I Slept (Shelley), 1919, lost; The Poet's Dream, 1919, lost; Sonnet 'My Lute' (W. Drummond), 1919, lost

When icicles hang by the wall (Shakespeare), 1919; A proposal, c1922–3, lost; Far from thee (F. Taylor) c1922–3, lost; Go happy rose (Herrick), c1922–3, lost; I know, and you! (F. Bowles), c1922–3, lost; Since love is dead (Bowles), c1922–3; Stars of Destiny, c1922–3, lost; The Twilight House (Bowles), c1922–3, lost; Where shadows flee, c1922–3, lost; Take, oh take those lips away (Shakespeare), 1925; 3 Songs (Hadath), ?1926, lost

OTHER WORKS

Chbr and solo inst: Movts, str qt, ?1903–4, lost; [Untitled], vc, pf, perf. 1907, lost; 3 Illuminations, opt. spkr, pf, 1916; 4 Miniatures, pf, 1918–20; Legend, vn, pf, ?1919; Suite, pf, 1919–21, lost [arr.

of English Suite no.3]; Prelude and Fugue, d-D, pf, 1924; Prelude and Fugue, c, pf, 1924; Double Fugue, E♭, pf, 1924; Prelude 'John Dowland's Fancy', pf, 1934; Legend, vc/b cl, pf, ?1944, lost; Adagio e dolente, vc, pf, ?1947, frag.; Flourish, 4 tpt, 1952 [from The Cenci]

Many arrs./transcrs., incl. works by Arne, J.C. Bach, J.S. Bach, Berlioz, Elgar, Glinka, Gluck, Handel, Spontini, Vaughan Williams, Wagner

Principal publishers: Augener, Breitkopf & Härtel, Chester, Cranz, Curwen, Enoch Havergal Brian Society, Novello United

MALCOLM MACDONALD

Briant, Denis (*fl* 1535). French composer. His sole surviving piece is the four-voice motet *Dilexi quoniam exaudiet Dominus* (1535[1]; arr. for lute, 1558[20], anon.; ed. in A. Smijers and A.T. Merritt: *Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535*, ix, Monaco, 1962). The motet is rather undistinguished, but Attaingnant thought it worthy to open his collection. Eitner was almost certainly incorrect in assigning to Briant the works of DENIS BRUMEN.

JEFFREY DEAN

Briard, Etienne (*b* Bar-le-Duc; *fl* Avignon, 1530–35). French type designer. He designed the first music type with round note heads, used in publications by JEAN DE CHANNEY of works by CARPENTRAS. Briard's elegant notes are beautifully proportioned and teardrop-shaped, and he did not use ligatures (*see* PRINTING AND PUBLISHING OF MUSIC, fig.7).

Briccialdi, Giulio (*b* Terni, 2 March 1818; *d* Florence, 17 Dec 1881). Italian flautist and composer. Although his father, the flautist and composer Giovanbattista Briccialdi, gave him some flute lessons he was essentially self-taught. After his father's death in 1830 his family wanted him to enter the church, but Briccialdi fled to Rome, where he became a flautist in a theatre orchestra. He also took composition lessons with a singer from the Vatican chapel named Ravagli. On 1 March 1833 he was made a member of the Accademia di S Cecilia. Moving to Naples in 1836, he was chosen as flute teacher in 1837 by the king's brother, the Count of Syracuse. He gave concerts throughout Europe and in America. In the 1840s he lived in London, where he advised the firm of Rudall & Rose in constructing for him a flute with a B♭ key; this key, invented by Boehm, became known as the 'Briccialdi B♭' after its most active proponent. The invention was the target of some criticism (cf the controversy in *Gazzetta Musicale di Milano*, xxix (1874), 273–4, 290–92, 306–9, 315 and 332–3). An important figure in the development of the flute, Briccialdi had technical improvements incorporated in instruments made for him by Emilio Piana in Florence, where he was flute professor at the Istituto Musicale from 1870 and founded a workshop for the construction of flutes to his own patent. Briccialdi composed one opera, the unsuccessful *Leonora de' Medici* (Milan, Carcano, 11 August 1855, text by F. Giudi), one symphony and a large amount of flute music, including several concertos and many operatic fantasies. Several of his pedagogical works are still in print. Many autograph manuscripts and first editions are in the Istituto Musicale G. Briccialdi in Terni.

FABIO BISOGNI/MARCO BEGHELLI

Brice, Fanny [Fannie; Borach, Fannie] (*b* New York, 29 Oct 1891; Hollywood, CA, 29 May 1951). American actress and singer. She began singing in her parents' saloon, then worked on the burlesque circuit playing comic roles, where she came to the attention of Ziegfeld. He gave her a part in his *Follies of 1910*, in which her performance of Berlin's 'Good-bye Becky Cohen' and Joe Jordan's 'Lovie Joe' stopped the show. She appeared in eight more editions of the *Follies* as well as numerous other Broadway musicals. She was known particularly for her performance of comic songs with a Yiddish accent, for example 'I'm an Indian' from the *Follies of 1920*, and 'Old Wicked Willage of Wenice' in *Fioretta* (1929; libretto by Earl Carroll, music by George Bagby and G. Romilli). She was also a superb torch-singer, and became associated with such ballads as James F. Hanley's *Rose of Washington Square* and Maurice Yvain's *My Man*. Brice was less

successful in film roles, but won her widest recognition playing the brattish Baby Snooks on radio; she first presented the character on Broadway in the Ziegfeld *Follies of 1934*, performed it on the radio in the CBS programme 'Ziegfeld Follies of the Air' in 1936 and continued to play it on various programmes until her death. She was married to the producer and songwriter Billy Rose. *Funny Girl*, a highly successful musical based on her life, was first staged in 1964, with music by Styne. It was filmed in 1968, with its own film sequel, *Funny Lady*, appearing in 1975.

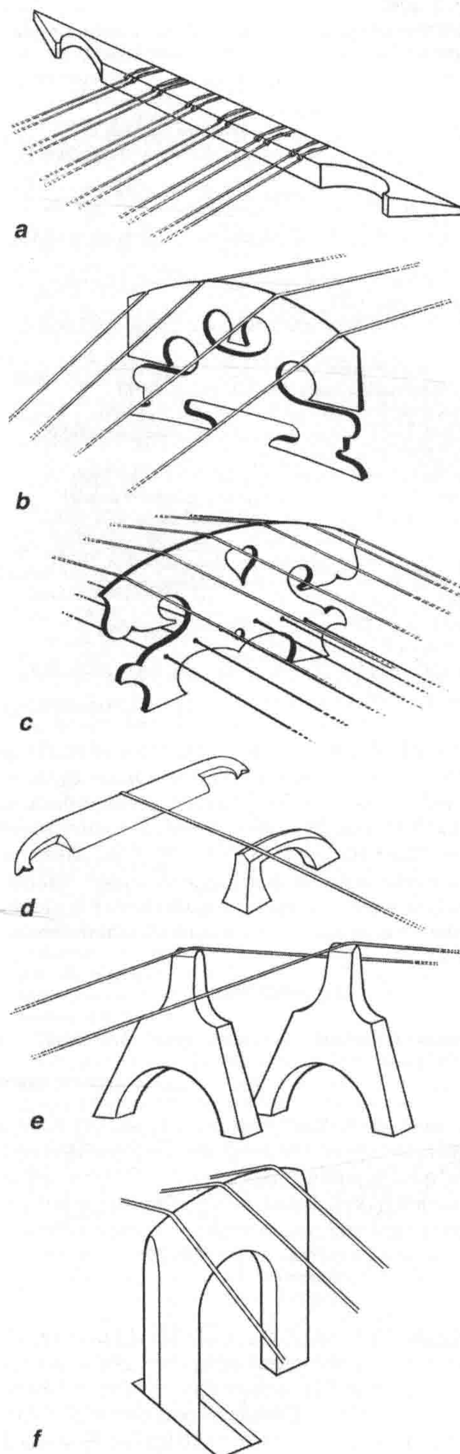
GERALD BORDMAN



Briçeño [Brizeño], **Luis de** (*fl* early 17th century). Spanish composer and guitarist. Regional word forms in his *Metodo mui facilissimo* suggest that he was of Galician origin. He was in Paris by 1614, when he contributed an introductory sonnet to Moulère's *Vida y muerte de los cortesanos* in praise of rustic life. His two sons, by his wife Anne Gaultier, were baptized in February 1627 at St Sulpice there. His *Metodo mui facilissimo para aprender a tañer la guitarra a lo español* (Paris, 1626/*R*1972) is dedicated to Madame de Chales, who was probably Denise Naturel, granddaughter of Louis XIII's counsellor, Jean Godon. The wording of the title suggests that it was intended to introduce into France the Spanish manner of playing the five-course guitar in the *rasgueado* style of strummed chords. It includes popular Spanish dances (*españoleta*, *villano*, chacona, zarabanda, *hachas*), some with Spanish verses, indicating that they were intended to be sung. There are also several romances. Vocal parts are not supplied for the texted works. The earliest known source of music using Castillian *rasgueado* notation, the chords are represented by the numbers 1 to 9, the sign + and the letter P. Briçeño added five more chords; three are transpositions of standard chords and one is an added 6th chord. Semibreves and minims are used to indicate the direction of the strummed chords but they probably have no rhythmic significance. Tuning instructions indicate the re-entrant tuning without bourdons on either the fourth or fifth courses.

BARTON HUDSON/MONICA HALL

Bridge (i) (Fr. *chevalet*; Ger. *Steg*; It. *ponticello*). In string instruments, a species of wedge, bar or other shaped object inserted between the belly or soundboard and the strings. The material used varies widely, from hardwood (as is the case with the violin family) to bone, ivory, metal, plastic, vegetable pith or even hair (as is the case with some African fiddles). A bridge serves the purpose of raising strings to the required distance above the soundtable or fingerboard and transmitts vibrations to the body of the instrument. The bridge often serves also as one of two terminal points of the vibrating length of the string, the other being either another bridge or a raised ridge next to the pegbox (this ridge is generally called the 'nut' in the case of European bowed instruments). The bridge may be solid, as in the lute bridge (fig.1*a*), or it may be open in design with cut-out portions for reasons of

1. Examples of bridges: (a) lute or early guitar, (b) violin, (c) viola d'amore, (d) trumpet marine, (e) koto, (f) Polish mazanki

flexibility or resonance, or to fit a curved belly. The violin bridge, for instance, is cut away leaving 'feet' that are fitted to the arched belly (fig.1*b*). The strings are often kept in place, and a fixed distance apart from each other, by notches along the edge of the bridge.

Bridges differ in form, function and manner of fixing in place, and these factors depend on the character of the particular instrument. In lutes and guitars, for example, where the belly is flat, the strings are in the same plane and uniformly low above the belly, and the longitudinal tension on the strings is relatively slight. Consequently, the bridge is a low, solid bar of wood (or sometimes ivory), flat on top (fig.1*a*). This type of bridge may serve also to attach the strings at the lower end because the bridge can be glued to the body strongly enough (sometimes fixed with pins as well) to bear the relatively small longitudinal tension of the strings. This type of bridge is sometimes called a 'tension bridge'.

In viols and violins, on the other hand, a thin, wedge-type bridge is used, and it must be fairly high to meet the high point of the strings, as determined by the angle of the fingerboard, above the centre of the soundholes where the bridge is customarily placed. Moreover, the top of the bridge must be arched since the player bows each string in a different plane. This type of bridge, sometimes called a 'pressure bridge', is kept in position by the considerable tension from the strings which, unlike those of the lute and guitar, pass over the bridge and are fastened to the lower end of the instrument by a tailpiece or other device. In this arrangement, the bridge bears the considerable downward pressure of the strings, transmitting the pressure to the belly. The latter is vaulted for extra strength and, in the case of instruments of the viol and violin family, may be supported additionally by the soundpost and the bass-bar. Some Asian and African instruments with soundtables of skin may be given instead the extra support of platforms under the bridge to spread the downward pressure, or, as in the case of the *sāraṅgī*, a leather strap fitted around the belly.

There are obvious difficulties in tracing the development in violin bridge design before the 19th century. Very few old bridges survive, and it is often not possible to give a precise date for those that do. In 1786 G.A. Marchi observed somewhat ruefully that he could not comment on the old masters approach to bridges because he had not seen any (he nevertheless provided some quite interesting notes on his own priorities as a maker). The late 17th-century Talbot and early 18th-century Brossard manuscripts give a few (slightly puzzling) dimensions for bridges. There are a few bridges attributed to Stradivari, including a beautiful ink-decorated viola bridge (*see* VIOLIN, fig.5). Moreover, there are numerous drawings for bridge designs among the Stradivari relics which Count Cozio di Salabue acquired. Also, a number of paintings depicting apparently carefully-observed violins show the design of the bridge. On the basis of this kind of evidence, it can be said that 17th- and 18th-century bridges were decoratively cut (with a more sculpted waist and an arch between the feet) in a way which left less wood than was later to become standard. They were also fractionally lower than modern bridges (inevitable given the alignment of the neck on early violins). These features contribute to the characteristic (less penetrating) sound of 'Baroque' and 'Classical' violins. Bridges may also have been a little thinner than the modern standard. There has been some speculation that in the early history of the violin, bridges were less curved, but this seems improbable.

Differing aesthetic preferences throughout the world have lead to a variety of modifications to the basic functions of bridges. Certain Indian instruments (notably the *sitār*, *vīṇā* and classical *sāraṅgī*) are given bridges with a wide, flat upper surface, gently curved so that the strings leave the bridge at a fine angle and remain in grazing contact when they are activated, producing a shimmering, slightly buzzing timbre rich in high harmonics. In the case of instruments such as the Viola d'amore, hardanger fiddle and some oriental instruments including the *sāraṅgī* and the Afghan *rabāb*, which are fitted with sympathetic strings, a bridge may be pierced with small holes so as to lead them in a rank below the melody strings (fig.1*c*). Some instruments with drone strings which are unfingered may be given extra bridges on either side of the main bridge (e.g. the hurdy-gurdy). The bridge of the West African *kora* is notched on both sides so as to carry two ranks of strings in a plane perpendicular to the sound table thus dividing out the scale between the two hands (*see* KORA, esp. fig.4). The bridges of the Polish *mazanki* (fiddle) and some Bulgarian *gadulkas* have one foot extended to pass through a soundhole and rest on the inner back of the soundbox (fig.1f): this is an attempt to increase sound volume while making a soundpost unnecessary. In the trumpet marine the bridge is shaped like an inverted U, and its left foot, shorter than the right, remains free to vibrate against the soundboard, from which a drumming sound results (fig.1*d*).

Bridges of densely strung zithers (e.g. dulcimers) have to allow for other strings to be stretched past them in interlocking planes, so each string may often have its own narrow free-standing bridge. In some dulcimers the bridges may be long narrow bars, perforated to allow other strings to pass through without touching (*see*DULCIMER fig.4). An important advantage of using individual bridges for each string is that they can be moved for the purpose of fine tuning. The Japanese *koto* (fig.1*e*) exemplifies this.

Bridge (ii). In popular music and jazz a term applied to a passage in which a formal transition is made. In popular music it is used of the penultimate section in the refrain of a popular song, leading to the final repeat of the opening section (section *b* in the form *aaba*); the bridge provides a contrast, often tonal as well as harmonic and melodic, with the opening section. In ragtime and early jazz the bridge is a short section, normally of four or eight bars, that links the separate strains of multithematic compositions; it often incorporates a change of key. In the modal vamps of soul jazz and funk the bridge may simply be an alternative section, typically on the subdom-

inant or dominant, without necessarily having such formal connotations. Rock musicians may call any different section that appears once within an otherwise repeating form the bridge or middle eight.

□

Bridge, Frank (*b* Brighton, 26 Feb 1879; *d* Eastbourne, 10 Jan 1941). English composer, violist and conductor. He studied the violin and composition at the RCM, where a scholarship won in 1899 enabled him to work under Stanford for four years. He quickly made a professional reputation as an outstanding conductor and chamber music player. In 1906 he took the place of the indisposed violist Wirth in the Joachim Quartet, and later joined the English String Quartet, of which he was a member until 1915. During this period he also undertook many important conducting engagements, presiding over repertory rehearsals for the newly founded New SO, conducting opera at the Savoy Theatre (1910–11) and at Covent Garden (1913), and appearing with such major orchestras as the LSO. Bridge's musicianship made it possible for him to take on the most difficult programmes at short notice, and Henry Wood called on him for Promenade Concerts when he himself was incapacitated. In 1923 Bridge visited the USA to conduct his own music in Boston, Cleveland, Detroit and New York. He was also a remarkable teacher, though Britten was his only composition pupil.

During the first decade of the century Bridge composed a large quantity of chamber music and songs; he quickly developed a masterly technique, and a flair for tailoring his music both to the taste of his audience and the capabilities of his performers. If songs like the well-known 'E'en as a lovely flower' are no more than drawing-room ballads, Bridge's true abilities are evident in such pieces as the Phantasie Quartet in F minor and the First String Quartet. Although his strong individuality still had to develop, these works are expansive in form and warm in expression, the language being a personal extension of the Brahms-Stanford idiom, then common coin, but lightened by a Gallic clarity gleaned possibly from Fauré. The finest of his early chamber pieces is the Phantasie Piano Quartet (1910). Like the other phantasies, it was written for Cobbett who wished to revive in new dress the single-movement fancy of the 16th and 17th centuries. Each of the pieces in this form seeks to embrace the variety of mood and texture of a traditional four-movement structure. For example, the Piano Trio replaces the development of a sonata by a ternary slow movement, the centrepiece of which is a scherzo; in the simpler form of the Piano Quartet, main *andante* sections flank a central Allegro whose relaxed middle section refers to the work's opening. These arch-shaped forms were to remain a preoccupation throughout the composer's career.

Bridge's chamber music is the one genre which affords a complete view of his extraordinary development, but he also composed for larger forces: during this early period he wrote a number of orchestral works, including the *Dance Poem* (a large symphonic waltz) and the brilliant and energetic *Dance Rhapsody*. The peak of his first style was attained with the exquisitely poised Suite for strings (1908) and *The Sea* (1910–11), one of his few orchestral works to have entered the British repertory. *The Sea* is a spacious four-movement suite which is typical of Bridge in combining poetic evocation with fine clarity of line and texture. It has something in common with the Bax of *Tintagel* and *November Woods*, and might even have influenced the harmony of these pieces, but Bridge's music is polyphonically cleaner and freer, the harmony less dense. Bridge does not equal the intensity of Bax at this time, but a revolution of style was to avail him of a much greater power.

The orchestral work *Summer* shows his increased maturity, and if Bridge appears to have become committed here to an almost Delian Englishness, there is still a distinctive control of form and texture. Significantly, the most ecstatically Delian moments unfold in textbook polyphony, Bridge's mastery of traditional techniques being now firmly wedded to his poetic expression. *Summer*'s haunting quality also informs the delicately beautiful Two Poems of Richard Jefferies, miniatures of refined subtlety which were completed in the following year. At this time Bridge was also engaged on the powerful two-movement Cello Sonata and the Second String Quartet, the first major chamber work of his maturity. Several traits of later Bridge characterize these pieces, particularly in turns of melody and in the increased chromaticism, but their easy-going romanticism is still far from the searing intensity of his postwar style.

In the following years he concentrated on smaller forms in songs and piano pieces, although the opera *The Christmas Rose* was also sketched at this period. Bridge's next major work, the Piano Sonata, marked a crisis in his development. The achievement of this sonata distinguishes him from most of his British contemporaries. Previously his music had been comfortable, even conservative, as he explored with increasing depth and mastery a world not far removed from that of Bax and Ireland. The Piano Sonata suggests that he felt this world to be valid no longer, a view that may well have been precipitated by a deeply disturbing experience. Like many of his contem-

Frank Bridge

poraries, he must have been emotionally affected by World War I, particularly so because of his strong pacifist convictions. The radical change ushered in by the Piano Sonata was to some extent prefigured in earlier extensions of his language, but the new style may be related to a profound change in Bridge's personality. The realist, who had formerly recognized the need to write within a convention acceptable to his potential audience, now with equal clear-mindedness saw the necessity to go beyond previous conventions.

But the Piano Sonata, and the masterly works which followed it, did not break all links with Bridge's surroundings. It contains something of Ireland's grim heroic feeling, and some chordal aggregations are not unlike those of Ireland and Bax. The great difference lies in Bridge's recognition of the inherent bitonality of these aggregates, and his harmonic development is quite individual and far more radical. Whereas the harmony of Ireland and Bax frequently sounds like a dissonant decoration of fundamentally simple chords, Bridge's harmony grows from the interval structure of his chords, as shown in ex.1, from the Piano Sonata. At the same time Bridge saw the need for a new flexibility of rhythm and form to embody his splintered tonality: moods, textures and tempos fluctuate rapidly, trains of thought are initiated by a free association, and expansive sections give the impression of continuous evolution, reinforced by Bridge's tendency to avoid exact repetition.

All of his major works after the Piano Sonata exhibit these qualities to a greater or lesser degree, and the majority are of exceptional quality. The more private field of chamber music gave most opportunity for pursuance of the new style, and in the Third and Fourth String Quartets Bridge approached the early works of the Second Viennese School. There is the same determination to keep all 12 chromatic notes in play, the same pervasiveness of motivic relationships. Yet Bridge's essential Englishness is always somehow in evidence, particularly in his sensuous use of harmony, and although his admiration for Berg is often evident, his own personality remains strongly individual. The magnificent Piano Trio no.2 and the last two quartets are among the pinnacles of 20th-century English chamber music, while the Violin Sonata is possibly the finest of his instrumental pieces, a superbly sustained single movement of characteristically ambivalent feeling.

The proportions of these works are grand, the range wide, and Bridge was concurrently writing outstanding orchestral music on a large scale. *Enter Spring* has a main Allegro of brilliant urgency and a hypnotically lovely pastoral episode; both contrast strongly with the sombre plangency of the short orchestral impression *There is a Willow Grows Aslant a Brook* (1928). Bridge's orchestral work is distinguished from his more extensive output of chamber music by the prominence of tone-painting. He clearly saw the chamber ensemble as a medium for purely abstract discourse, perceiving in the greater colouristic resources of the orchestra opportunities to use the evocative power and sensuous impact of texture. But for all its programmatic basis, the orchestral music is cogently argued, as always with Bridge. Single-movement forms predominate and the freely evolving structures move some way from the sonata matrices of the Third and Fourth Quartets. *There is a Willow* progresses through a chain of sections with very little repetition, finding a perfect close in the final threnody. *Enter Spring* displays mercurial changes of direction in a search for a definitive statement, and emphasis is thus thrown on the settled quality of the pastoral section. During the last decade of his life Bridge produced two outstanding concertante works: *Phantasm* for piano and the single-movement cello concerto *Oration*, a monumentally grand structure whose sustained contrapuntal energy and lyricism bring his preoccupation with the fantasy arch form to its culmination. His last complete work was the brilliant *Rebus Overture*, which combines the distinctive strains of energy, lyricism and emotional ambivalence within a harmonically simpler style.

The isolation of English musical life from far-reaching developments abroad was an obstacle to the recognition of Bridge's later works. After his death his music fell into almost complete neglect, though interest was subsequently revived. The poetic insight and consummate technique of his work promise it a permanent place in the repertory.

ANTHONY PAYNE (work-list with PAUL HINDMARSH, bibliography with LEWIS FOREMAN)

Bridge, Sir **(John) Frederick** (*b* Oldbury, 5 Dec 1844; *d* London, 18 March 1924). English organist, composer and writer. In 1850 the Bridge family moved from the Midlands to Rochester, the father to be a vicar-choral and the son, Frederick, a probationary chorister in the cathedral choir. At 14 the boy was articled to the cathedral organist, John Hopkins, and during the term of his articles he held successively the post of organist at two nearby churches. At the end of his apprenticeship he became organist at Holy Trinity Church, Windsor (1865–9), and also studied with John Goss, taking his FRCO and the Oxford BMus.

In 1869 Bridge was appointed organist of Manchester Cathedral. By 1872 he was teaching harmony at Owens College and in 1874 he took his Oxford DMus. An important event during his Manchester days was the installation of a four-manual organ by Thomas Hill in the cathedral. Bridge became deputy organist to James Turle at Westminster Abbey in 1875 and succeeded him as organist in 1882.

After using the Hill instrument in Manchester, it is not surprising that Bridge found the abbey organ an inconvenient and 'very old-fashioned affair', and as soon as possible he set about getting it restyled. He showed great aptitude for fund-raising and persuaded many friends to contribute new stops until in 1884 the organ was completely rebuilt by Hill & Son with 54 stops, tubular-pneumatic action and a gas-driven blower. In 1895 a fifth manual – a celestial organ – was installed in the triforium, making a total of 79 speaking stops. Apart from the ordinary abbey services, Bridge provided music for many important occasions including Queen Victoria's jubilees in 1887 and 1897 (when he received a knighthood) and the coronations of King Edward VII and King George V, when he received the MVO and CVO respectively. He also organized music festivals in honour of former Abbey organists Orlando Gibbons and Henry Purcell, whose festival raised about £1100 towards new organ cases by Pearson. Bridge retired from the abbey in 1918. He was a notoriously indifferent organist, but for 20 years he had the advantage of an outstandingly brilliant assistant, Walter G. Alcock.

Bridge taught at the National Training School of Music and then at the RCM from the inceptions of each institution, but accounts of his teaching are not complimentary. He was elected Gresham Professor of Music (1890), King Edward Professor of Music in the University of London (1903) and chairman of Trinity College of Music. His compositions were mainly choral, including church music, many works for the provincial festivals (Birmingham, Three Choirs) and some music for choral societies which he conducted (Highbury Philharmonic, 1878–86, Royal Choral Society, 1896–1922).

WORKS
(*selective list*)

all published in London

SACRED CHORAL

Mount Moriah (The Trial of Abraham's Faith) (orat) (1974); He giveth his Beloved Sleep (meditation, E.B. Browning) (1890); The Repentance of Nineveh (orat, J. Bennett) (1890); The Cradle of Christ: Stabat mater speciosa (canticle, J.M. Neale) (1894); St Star of the East (Christmas fantasy, Lady Lindsay) (1922)

SECULAR CHORAL

Boadicea, Queen of the Iceni (cant., G.E. Troutbeck), chorus, orch (1880); Callirhoë: a Legend of Calydon (cant., W.B. Squire), chorus, orch (1888); The Inchape Rock (ballad, R. Southey), chorus, orch (1891); The Flag of England (ballad, R. Kipling), S, chorus, orch (1899); The Forging of the Anchor (dramatic scene, S. Ferguson), B, chorus, orch (1901); The Lobster's Garden Party (cant., S. Wensley), vv, pf (1904); A Song of the English (ballad, R. Kipling), Bar, chorus, orch (1911)

WRITINGS

GUY WARRACK/CHRISTOPHER KENT

Bridge [Bridges], **Richard** (*b* ?London; *d* London, 7 June 1758). English builder of organs, harpsichords and spinets. He married Esther (or Hester) Brown on 29 December 1720 at St James's, Clerkenwell, London. Handel, in a letter to Jennens dated 30 September 1749, wrote, 'I very well approve of Mr. Bridge who without any Objection is a very good Organ Builder'.

Bridge's largest organ, built in 1730 for Christ Church, Spitalfields (*see* ORGAN, fig.38; specification no.23 in Sumner) had, besides two Open Diapasons, two Principals on the Great, a Larigot, four reeds on the Great, three on the Swell and four on the lower set of keys including a French Horn from *d*, a stop introduced by Renatus Harris in his design for St Dionis Backchurch in 1722. This stop, the variety of reed stops, the Larigot, the regular use of a Tierce, the chorus mixtures with from five to eight ranks, the five-rank Cornet on the Great and the use of communication derive directly from the French style of Harris and it is almost certain that Bridge was apprenticed to him. Much of the original Christ Church organ survives, despite a rebuild in the 19th century, and in 1997 a thorough restoration of the instrument was begun by William Drake. Bridge frequently used two standard contemporary designs for his cases: the beautiful 'curtain flat' design with ogee-shaped flats in plan view, as at Spitalfields, Deptford, St George-in-the-East and Enfield, and the design with two gable-shaped upper flats, as at Old Street (now St Giles Cripplegate) and Shoreditch. On a number of occasions between 1733 and 1742 he appears to have built and worked on organs in collaboration with Abraham Jordan (Old Street and Exeter Cathedral). After his death in 1758, the business was continued at the same address by his son-in-law George England.

Bridge built organs in the following locations now in the London area: St Luke's, Chelsea (1720; case now in Holsworthy Parish Church, Devon); Christ Church, Spitalfields (1730; cost £600; case, some chests, action and much pipework survive); St Paul's, Deptford (1730; case survives); St Bartholomew-the-Great (1731); St George-in-the-East (1733; destroyed 1940); St Luke's, Old Street (1733, with Jordan; the remains incorporated into the new organ at St Giles Cripplegate); Cuper's Gardens, Lambeth (1738–40); the Hall of the Worshipful Company of Parish Clerks (1737; a virtually unaltered organ until its destruction in World War II); Marylebone Gardens (1740); St Anne's, Limehouse (1741; burnt

1851); St Andrew's, Enfield (1752–3; empty case survives); St Leonard's, Shoreditch (1757; badly damaged during World War II; original console with black keys and sandwich sharps still in west gallery; case restored and organ rebuilt with electric action and detached console by Mander, 1951); Spa Fields Chapel, Clerkenwell; St James's, Clerkenwell (moved to Beccles, Suffolk, in 1796); and the parish churches of Paddington and Eltham. He also built organs at St Mary of Charity, Faversham, Kent (1754; case survives); Trinity Church, Newport, Rhode Island (1733; case survives; console survives in the Newport Historical Society collection); and the King's Chapel, Boston (1756; case survives; some pipework is found in the rebuilt organ of the Methodist church, Schuylerville, New York); and (with Jordan) he completely rebuilt the organ at Exeter Cathedral within the Loosemore cases (1742). He also did a major rebuilding of the organ at Worcester Cathedral (1752), and built an entirely new organ within the Pease cases at Canterbury Cathedral (1752–3; cost £480).

GUY OLDHAM, NICHOLAS PLUMLEY

Bridge harp. A type of harp, limited to West Africa, with four to 21 strings. Made with a calabash resonator and straight or slightly curved neck spiked through the resonator, the instrument has a profile similar to that of a lute. For this reason, bridge harps were classified by Hornbostel and Sachs as 'harp-lutes' (*see* CHORDOPHONE). The plane of the strings, however, is not parallel to the soundtable like on a lute, but perpendicular to it: one of the defining characteristics of a harp as specified by Hornbostel and Sachs (*see* HARP, §I). In performance, the neck is pointed away from the performer's body (not across it like a lute). The performer plucks the strings with fingers of both hands, one on either side of the strings, again like most harpists of the world. A rectangular, vertical bridge stands on the soundtable and is perpendicular to it. Rather than having notches on the top of the bridge, as is true of the lute family, the bridge is either notched on both sides of its length or drilled with two rows of holes, both types thus accommodating two ranks of strings. The strings, which are fastened to the neck usually via braided leather rings, run from the neck and pass over or through the bridge before being tied, usually, to a metal ring or a small metal arch nailed to the protruding end of the neck.

Because these instruments are far more harp-like than lute-like, both in structure and performing practice, they were re-classified by DeVale as a sub-class of a new category of African harp: 'harps with vertical string holders or bridges: spike harps: bridge harps'. The term 'bridge harp' was first used by Knight. The best known bridge harp, and the largest, is the KORA of the Mande people of The Gambia.

For further discussion of its organology, description and illustration, *see* HARP, §III.

SUE CAROLE DEVALE

Bridge passage. A transition section leading from one theme to another, usually applied to a passage which effects a modulation from the first subject to the second in the exposition of a movement in sonata form (*see* SONATA FORM, §3(i)). The expression is avoided by writers who view the exposition as establishing two contrasting tonalities and accordingly divisible into two parts, not three; for them, any 'bridge passage' would belong to one of these parts, called a 'subject group'. □

See also BRIDGE (ii).

Bridgetower [Bridgtower], **George (Augustus) Polgreen** (*b* Biała, Poland, 11 Oct 1778; *d* Peckham, London, 29 Feb 1860). English violinist. The son of a West Indian father and a European mother, he may have lived at Eszterháza during the 1780s and studied with Haydn. He made his début as a violinist at the Concert Spirituel in Paris at the age of ten (11 April 1789). Father and son then moved to England, where the young prodigy was marketed as the 'son of the African Prince'. He appeared at court in Windsor, and at concerts in Bath and Bristol, before making his London début at the Drury Lane Theatre oratorio on 19 February 1790. His concerto performances here attracted the notice of the Prince of Wales (later King George IV), who took him under his patronage and had him taught the violin by Barthélemon and composition by Attwood. During the next decade he played at many prestigious London concerts, appearing alongside Haydn at Salomon's series and elsewhere; his repertory was based on the concertos of Giornovichi and Viotti, though he is also known to have played the unaccompanied sonatas of Bach. From 1795 to 1809 he was first violinist in the Prince of Wales's private orchestra. Bridgetower had clearly transcended his childhood celebrity to become a respected member of London's musical community, even if his career as a soloist did not fulfil all its early promise.

In 1802 he obtained permission to visit his mother in Dresden; there he gave two concerts (24 July 1802 and 18 March 1803) that were received so enthusiastically that he was given letters of introduction to the highest aristocratic circles in Vienna. It was through Prince Lichnowsky that Bridgetower met Beethoven in the spring of 1803 and that their famous concert (in the Augarten, on 24 May) was financed. Earlier that year Beethoven had begun sketching two movements for violin and piano; and when the concert with Bridgetower was arranged, he quickly finished them and added a previously composed finale (originally intended as the last movement of the Sonata op.30 no.1) to make up a three-movement sonata in A. There was not enough time to have the violin part of the second movement copied before the performance,

and Bridgetower was obliged to read it from Beethoven's manuscript; nevertheless the work was a brilliant success, the audience unanimously calling for an encore of the second movement.

There is no question that Beethoven, who spoke highly of Bridgetower both as a soloist and as a quartet player, intended to dedicate this sonata to the young violinist; on a rough composing score of the work he entered the humorous inscription: 'Sonata mulattica composta per il mulatto Brischdauer, gran pazzo e compositore mulattico'. But the two men later fell out of favour with one another, allegedly after a quarrel over a girl, and Beethoven subsequently dedicated the sonata (published in 1805 as op.47) to the eminent French violinist Rodolphe Kreutzer.

After this Bridgetower returned to England for a number of years, taking the degree of MusB at Cambridge in 1811 and playing with the Philharmonic Society during its first season. He then went abroad, living in Rome and Paris for many years, and is known to have visited England once (in 1843) before returning to spend his last years there.

GEORGE GROVE/SIMON McVEIGH

Bridgman, Nanie (*b* Angoulême, 2 Feb 1907; *d* Paris, 2 May 1990). French librarian and musicologist. She studied arts subjects at the Sorbonne (1926–32) where she was a student of Pirro and took a degree in 1930. Then she studied singing at the Conservatoire (1932–6) in Claire Croiza's class. She obtained the Diplôme de l'Institut d'Art et d'Archéologie in 1944, the Diplôme d'Etudes Supérieures (1946, prepared at the University of Strasbourg under the direction of Rokseth), and a diploma in Serbo-Croat, after studying at the Ecole des Langues Orientales (1947–9). She became a keeper in the music department of the Bibliothèque Nationale, Paris, in 1945. As a musicologist she was interested in Italy and France during the 14th, 15th and 16th centuries, and published many valuable articles in specialist journals as well as in the major music dictionaries and encyclopedias. From 1969 to 1971 she was editor of the review *Musique de tous les temps*. A member of the council of the IMS (1972–7), she was president of the Société Française de Musicologie (1974–7).

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

Briegel, Wolfgang Carl (*b* Königsberg, nr Coburg, May 1626; *d* Darmstadt, 19 Nov 1712). German composer and organist. He attended the grammar school at Nuremberg and was a treble at the Frauenkirche there under J.A. Herbst. He was strongly influenced by Kindermann, S.T. Staden and J.M. Dilherr. After studying for four terms at Altdorf University he became organist of St Johannis, Schweinfurt, and teacher at the grammar school there. At the end of 1650 Duke Ernst the Pious summoned him to his court at Gotha as cantor and music tutor to his family, and he allowed him to rise gradually to the post of Kapellmeister. His work there made him widely known, and through it he got to know J.R. Ahle and members of the Bach family. Duke Ernst's eldest daughter, who was married to Landgrave Ludwig VI of Hessen-Darmstadt, called Briegel to Darmstadt as Kapellmeister in 1671; he held this post until his death, although in his later years he was assisted by J.C. Graupner and E.C. Hesse.

At Gotha Briegel attracted attention with the publication of his *Evangelische Gespräch*, dialogue cantatas for the liturgical year in varied forms made up of solos, choruses and chorales. His *Evangelischer Blumengarten*, on the other hand, consists of motets and meditative choral songs. Among his solo songs his settings of odes by Andreas Gryphius is the only set of German Baroque songs that might be regarded as a cycle. At Darmstadt he produced several stage works. None of the music has survived, but his dramatic dialogues and lively *Tafelkonfekt* possibly give an idea of what some of it was like. As soon as Briegel arrived at Darmstadt the landgrave and his wife gave him the task of renewing their church music, which had been allowed to lapse. He accordingly brought out cantatas for the liturgical year for the choirs of the towns and villages, which showed that he was willing to restrict himself to a simple medium. His settings of J.S. Kriegsmann, Christian Rehefeld and J.G. Braun are short, but the *Trostquelle* and *Lebensbrunn* comprise cantatas in several movements deployed in new formal groupings. Here as in other works his gift for devising clear and eloquent melodies is evident. *Das grosse Cantional*, written at the request of the landgravine, is an essentially traditional collection. Briegel's late works, such as the *Busspsalmen* and the *Concentus apostolico-musicus*, include contrapuntal choruses which are direct forerunners of those of Bach. His music enjoyed an extraordinarily wide circulation throughout Germany and in Scandinavia.

Briesger, Peter. *See* BREISIGER, PETER.

Bright, Colin (Michael) (*b* Sydney, 28 June 1949). Australian composer. Largely self-taught as a composer, he studied harmony, counterpoint and orchestration in Sydney with Mary Egan and Christopher Nicholls. In 1975 he attended seminars with Rands and Berio and the following year was assistant to Sculthorpe and the composer and pianist with the improvisatory group Axis. From 1976 to 1977 he studied at the Aboriginal Studies Institute at Canberra; he later received an international fellowship from the Performing Arts Board of the Australian Council to study with Ton de Leeuw (1982–5). In 1986 he was guest composer at the New Music Festival in Buffalo, USA. Bright has received numerous commissions from Australia's leading ensembles, and performances and broadcasts of his music have been given worldwide.

As a pianist, organist and songwriter for rock bands and cabaret, Bright has had a continued interest in many aspects of popular music, while his deep and continuing involvement in Aboriginal arts and social issues has provided the individual focus of his work. His experience as a specialist music teacher in disadvantaged primary schools in Sydney (1980–87) drew him closer to the plight of the underprivileged in society and the urban Aborigines in particular. Several dance and theatre pieces pay tribute to traditional Aboriginal singing and didgeridu playing against the persistent presence of an underlying and suggestive rhythmic murmur combined with melodic pattern weaving. These include *The Dreamtime* (1981), a work for music theatre on the subject of the Aranda Dreamtime, in support of Aboriginal land rights. *Earth Spirit* (1982) for four didjeridus and orchestra, *Red Earth* (1985) for chamber orchestra and the extended song cycle for voice and amplified instruments *Midnight Tulips* (1988) are among many other works which reflect Aboriginal and social concerns. Bright has also organized large-scale music events such as *Narabeen Lakes: Echoes Now and Then*, involving 190 musicians, writers, actors and broadcasters, and *Fire on the Lake*, a music-theatre piece for voice, electronics, didgeridu, dance and visuals for outdoor performance at three simultaneous sites.

WORKS
(*selective list*)

Stage: The Dreamtime (music theatre), 1981; Fire on the Lake (music theatre, C. and D. Bright), 1989; The Journey (op, J. Marsden), 1991; The Sinking of the Rainbow Warrior (op, 1, A. Stewart), 1994

CHRISTINE LOGAN

Bright [Knatchbull], **Dora (Estella)** (*b* Ecclesall Bierlow, York, 16 August 1862; *d* London, 16 Nov 1951). English composer, pianist and critic. She studied composition and the piano at the RAM (1881–9); together with Edward German she was a member of a group of young composers known as 'The Party', and frequently appeared at student concerts as a pianist and composer. Notable early works include the Air and Variations for string quartet, which in 1888 won the first Charles Lucas Medal to be awarded to a woman, and a Piano Concerto in A minor which she performed herself to critical acclaim at a variety of London concerts.

After leaving the RAM, Bright established herself as a pianist in Britain and Europe and promoted the music of British composers in her annual series of piano recitals and chamber concerts in London. Among the continuing high-profile performances of her works was an 1892 Philharmonic Society Concert, when her Fantasia in G minor for piano and orchestra was given. After her marriage to Wyndham Knatchbull in 1892, she gradually curtailed her public performances, though she continued to compose and hear her music played at important venues, including the Promenade Concerts. She turned increasingly to dramatic works and composed several mime dramas and ballets, developing a close working relationship with the dancer Adeline Genée. In her later years Bright worked as a music critic, producing reviews coloured by her resolute dislike of most contemporary music.

Her own distinctive musical style remained firmly rooted in clear-cut forms, appealing melodies and rich harmonies. Her published works, mostly piano pieces and songs, are accomplished and effective. Particularly drawn to variation form, her skill at extracting a range of emotions and moods from her material is displayed in works such as the Variations for piano and orchestra (1909).

WORKS
(*selective list*)

Stage: Uncle Silas (incid music, S. Hicks and L.S. Irving after S. LeFanu), 1893; Scrooge (incid music, J.C. Buckstone after C. Dickens), 1901; The Dryad (pastoral fantasy) (1909); The Portrait (dance play, Bright), 1910; The Faun (ballet), 1911; The Abbé's Garden (mimodrama), 1911; La Camargo (ballet), 1912; In Haarlem There Dwelt (music drama, Bright, after P. van der Meer), 1912; La Danse (ballet), 1912; The Princess and the Pea (ballet-pantomime), 1915; A Dancer's Adventure (ballet), 1915; The Love Song (ballet), 1932; The Dancing Girl and the Idol (ballet); Quong Lung's Shadow (op)

Orch: Concertstück, c♯, pf, orch, 1885; Pf Conc, a, 1888; Air with Variations, 1890; Suite, 1891; Fantasia, g, pf, orch, 1892; Pf Conc no.2, d, 1892; Liebeslied, 1897; Variations, pf, orch, 1909; Concertstück, 6 timp, orch, 1915; Suite Bretonne, fl, orch, 1917; Suite of Eighteenth-Century Dances, pf, orch; Suite of Russian Dances; Variations on an Original Theme; Vienna

Chbr: Air and Variations, str qt, 1888; Romance and Seguidilla, fl, pf (1891); Suite of 5 Pieces, vn, pf (1891); Qt, D, pf, vn, va, vc, 1893; 2 Pieces, vn/vc, pf (1934)

Pf: 2 Sketches, 1883; Theme and Variations, f♯, 2 pf, 1886; Suite, g, 1886; Variations on a Theme of Purcell's, 2 pf, 1887; Variations on an Original Theme of Sir G.A. Macfarren's, 2 pf (1894); Romanza and Scherzetto (1889); 3 Pieces (1895), arr. fl, pf; 4 Dances (1912) [from La Camargo, 1912]

Songs: Whither? (H.W. Longfellow) (1882); To Daffodils (R. Herrick), 1884; The Song of the Shirt (T. Hood), 1884; 12 Songs (Herrick, W. Shakespeare and others) (1889); 6 Songs from the Jungle Book (R. Kipling) (1903); The Ballad of the Red Deer (F. H.) (1903); Messmates (H. Newbolt) (1907); I know a lady sweet and kind (Herrick) (1913); The Orchard Rhymes (collab. E. Boyce) (1917); The Donkey (G.K. Chesterton) (1936)

Brighton Festival. The first event described as a festival in this seaside resort on the English south coast was in 1870, when a series of oratorio concerts at the Dome was organized on a subscription basis by Wilhelm Kuhe, a pupil of Tomášek and Thalberg, who came to England in 1847 and settled in Brighton as conductor, pianist and teacher. He organized annual choral festivals from 1871 until 1882, when mounting financial deficits caused them to be abandoned. A similar festival idea was briefly resumed in 1911 by Joseph Stainton, who engaged Elgar, Edward German and Coleridge Taylor as guest conductors, but this failed to take root.

Festivals under the artistic direction of Ian Hunter began in 1967 with a concert by the City of Warsaw PO. In the following year the range was extended by the formation of the Brighton Festival Chorus of 150 voices under László Heltay. An association was established with Alexander Goehr; new orchestral works of his were given in 1968 and 1972, and his Music Theatre Ensemble gave several experimental works by him in the years 1968–71. Classical opera has formed part of most festivals since 1971, mostly by British companies but also by visiting ones from Drottningholm, Sweden (1972 and 1987), Ludwigsburg (1976), the Warsaw Chamber Opera (1984), Poznań State Opera, who gave the British première of Penderecki's *Die schwarze Maske* in 1990, and the Moscow Chamber Opera in its UK début (1993). New Sussex Opera, formed in 1978, has contributed several ad hoc productions, including the first European performances of Weill's *Lost in the Stars* in 1991.

The scope of the festival greatly expanded under Gavin Henderson as artistic director (1983–94). Frequent appearances by leading British orchestras, performing mainly but not exclusively standard repertory, have been supplemented by others from abroad. Those making UK débuts at the festival have been the San Francisco SO (1973), the Australian Chamber Orchestra (1988), Los Angeles Baroque Orchestra (1991) and the St Paul Chamber Orchestra of Minnesota (1993). In 1995 Christopher Barron was appointed artistic director.

NOËL GOODWIN

Brihuega [Viruega], **Bernaldino de** (*fl* *c*1488–*c*1516). Iberian composer. A native of the town of Brihuega, north-east of Madrid, he was appointed a singer in the Aragonese royal chapel of Ferdinand V on 22 September 1510 and served there until the choir was disbanded following the king's death in January 1516. In 1488–9 a singer by the name of Brihuega was paid by the queen's personal treasurer for taking care of the keyboard instruments at court, and in 1492 an 'hombre de camara' called Bernaldino de Brihuega was remunerated for transporting two organs from Cordoba to Granada. It seems likely that at least the first of these payments was made to Rodrigo de Brihuega who served as a singer and organist in the Castilian royal chapel from 23 April 1464; he received many favours, and continued to serve Isabella for over 40 years, his name only disappearing from the records after her death in 1504. Whether Rodrigo and Bernaldino were related is not clear, but, given the strong family ties among musicians at court, it must be a strong possibility. It is not clear which one of them was the composer of two songs attributed to 'Brihuega' in the Cancionero Musical de Palacio. Bernaldino is perhaps the more likely candidate given the relatively late inclusion of the songs in the cancionero and given that the musical idiom displays all the hallmarks of the post-Encina villancico of the first decades of the 16th century. The bucolic dialogue *Domingo, fuese tu amiga* (ed. in MME, v, 1947, no.69), with its lively rhythms and strong characterization, is markedly in the Encinian mould; *¿Que vida terná sin vos?* (ed. in MME, v, 1947, no.222) is a conventional but nonetheless elegant setting of a courtly love poem by Quirós.

TESS KNIGHTON

Brillante (It.: 'sparkling', 'glittering'). An indication of mood found as early as Brossard's *Dictionaire* (1703) and in most subsequent dictionaries. *Allegro brillante* is found, for instance, in Boccherini; and Verdi marked the opening scene of *La traviata* with the superlative: *allegro brillantissimo e molto vivace*. In the 19th century *brillante* and its French equivalent, *brillant*, became fashionable for titles of virtuoso pieces, as in Weber's *Rondo brillante* op.62 and Chopin's *Variations brillantes* op.12.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Brille, Joachim (*fl* mid-17th century). French composer. He was *maître de musique* at Soissons Cathedral when the publisher Robert Ballard issued his only known work, *Missa . . . ad imitationem moduli Nigra sum sed formosa* (Paris, 1668). For four voices without instrumental support, it employs *chiavette* and demonstrates a skilful command of imitative counterpoint resembling that of Le Prince.

JEAN-CHARLES LÉON

Brillenbass (Ger.: 'spectacles bass'). A German term for a notational abbreviation in music; it occurs where two alternating notes (or chords) are to be repeated several times (*see* ABBREVIATIONS, ex.2).

Brillon de Jouy, Anne Louise Boyvin d'Hardancourt (*b* Paris, 13 Dec 1744; *d* Villers-sur-Mer, Calvados, 5 Dec 1824). French harpsichordist, pianist and composer. Both her father and her husband were financial officers for the crown, and her wealth allowed her to maintain salons in the Marais district of Paris and down the Seine at Passy. She was the musical star of these *soirées*, which Benjamin Franklin dubbed his 'opera' during his years in Passy (1777–85). The violinist André-Noël Pagin was a member of her entourage, and Johann Schobert, Luigi Boccherini, Ernst Eichner and Henri-Joseph Rigel all dedicated sonatas to her (opp.6, 5, 3 and 7 respectively). In 1770, Charles Burney reported that

she had not acquired her reputation in music without meriting it. She plays with great ease, taste and feeling – is an excellent sightswoman. ... She likewise composes and she was so obliging as to play several of her own pieces both on the harpsichord and piano forte accompanied with the violin by M. Pagin.

She possessed an English piano sent by J.C. Bach, a German piano and a harpsichord, and she specified this instrumentation in two keyboard trios.

The surviving library of her own music and scores by other composers is the only such collection associated with a French harpsichordist, almost all of it from the 1760s to the early 80s. In addition, Franklin preserved her voluminous correspondence. The music documents the transition from harpsichord to piano in France, demonstrating that although the differences between the two instruments were appreciated by performers and listeners, they were not yet exploited by composers. Her compositions have the charm of *galant* simplicity, and although there are occasional technical lapses, she displays both taste and originality. Her signature tune was a *Marche des insurgents*, written to celebrate the American victory at Saratoga (1777).

BRUCE GUSTAFSON

Brimle [Brameley, Bramley], **Richard** (*fl c*1558–66). English church musician and composer. He contributed 11 harmonizations to John Day's *The Whole Booke Psalmes* (1562), and may have been related to JOHN BRIMLEY, organist of Durham Cathedral before and after the Reformation.

Brimle is probably to be identified with the 'Brameley' who appears in the lists of 'singing-men' at King's College, Cambridge, for the Michaelmas quarter 1558–9 and who from 1560 to 1573 was also *instructor choristarum* there. (During the following two quarters he was paid for 'gettynge songes and pryckynge them'.) In 1562–3 he was appointed *magister choristarum* at Trinity College, Cambridge, and remained there until the end of the Lent term 1566. Presumably he held the two Cambridge posts in plurality. An incomplete five-part *Miserere* by 'Bramley' in the Royal College of Music, London (*GB-Lcm* 1882), may be by Brimle or John Brimley. (W. Shaw: *The Succession of Organists of the Chapel Royal and the Cathedrals of England and Wales from c.1538*, Oxford, 1991)

PETER LE HURAY/JOHN MOREHEN

Brimley [Bramley, Brimlei, Brymley], **John** (*b c*1502; *d* Durham, 13 Oct 1576). English organist and composer. He was the last lay cantor (and thus also organist) at Durham Priory before the liturgical Reformation of 1549; he served at Durham Cathedral until his death. He appears to have continued to adhere to the Catholic faith after the Reformation.

Brimley's liturgical works are few, and survive only in manuscripts. They comprise a *Te Deum* and *Benedictus* (of which the tenor part is found in *GB-DRc* C13) and a five-part setting of the Responses to the Commandments intended for use in conjunction with the Creed from Sheppard's Second Service (*GB-DRc* E4–E11, E11a and C13). He also composed a five-part instrumental *Miserere* (*GB-Lcm* 2049). Brimley is buried in the Galilee Chapel of Durham Cathedral, where his epitaph can still be seen. A Richard Brimle, who may have been related to John Brimley, contributed 11 harmonizations to John Day's *The Whole Psalmes in Foure Partes* (RISM 1563[8]).

JOHN MOREHEN

Brind, Richard (*d* London, March 1718). English musician. He was a chorister of St Paul's Cathedral, London, presumably under John Blow and Jeremiah Clarke. Following Clarke's death he was admitted vicar-choral (1708) and succeeded him as organist, while Charles King took over the post of Master of the Choristers. According to Hawkins, Brind was 'no very celebrated performer', and, although five anthems are listed in *Divine Harmony* (London, 1712), none of his compositions survives. He is chiefly remembered as the teacher of Maurice Greene.

WATKINS SHAW/IAN SPINK

Brindis de Salas, Claudio José Domingo (*b* Havana, 4 Aug 1852; *d* Buenos Aires, 1 June 1911). Cuban violinist. He was the son of the violinist, composer and dance orchestra conductor Claudio Brindis de Salas (1800–72) and received his early musical training from him and from another black musician, José Redondo. His talent came to light at an early age, and he became a pupil of the Belgian José Van der Gucht, who played first violin in several groups in Havana. In 1869 Brindis de Salas travelled to Paris and entered the Conservatoire, where he studied with Charles Dancla, David, Sivari and Léonard, and won a *premier prix*. He subsequently travelled to Milan, Berlin, St Petersburg and London. In 1875 he toured various cities of Central and South America, reappearing in Havana in 1877 to great critical acclaim. His success prompted the coining of such nicknames as 'the Black Paganini' and 'the King of the Octaves'. He was much in demand in European and American concert halls, and occasionally returned to Cuba. From 1880 to 1900 he lived in Berlin, where he served Emperor Wilhelm II of Prussia, who made him a baron. He wrote a few pieces for violin, including a *Barcarola*, but did not achieve recognition as a composer. His performances were noteworthy for their brilliance and subtlety, his agility in portamentos, his powerful and flexible bow and perfect rendition of virtuoso passages. In later life his performing abilities declined, and he died in poverty.

VICTORIA ELI RODRÍGUEZ

Brindisi (It., ? from Sp. *brindis*, from Ger. *bring dir's*). An invitation to a company to raise their glasses and drink; a song to this effect. Such songs, usually solos with choral response, are common in 19th-century opera; well-known examples occur in Donizetti's *Lucrezia Borgia*, Verdi's *Macbeth*, *La traviata* and *Otello* and Mascagni's *Cavalleria rusticana*.

ANDREW PORTER

Brindle, Reginald Smith. *See* SMITH BRINDLE, REGINALD.

Brindley, Charles. English organ builder. He established a business in Sheffield in 1854. A follower of Edmund Schulze, he built solid instruments with powerful choruses using Vogler's SIMPLIFICATION SYSTEM. Pipes placed in chromatic order on the soundboards allowed for a simple and reliable key action and permitted similar stops to share the same bass; this kept both space and cost to a minimum. The Swell organ was often mounted above the Great as an *Oberwerk* in the German manner. Brindley went into partnership with Foster in 1884 and began to manufacture more complex pneumatic mechanisms for stop combinations; he also concentrated on the production of orchestral effects. The business was absorbed by Willis in 1939. An unspoilt example of Brindley's work dating from 1863 survives in Christ Church, Market Drayton, Shropshire. A full discussion of the works of Charles Brindley is given in J.R. Knott: *A Study of Brindley & Foster, Organbuilders of Sheffield, 1854–1939* (Bognor Regis, 1974, 2/1985).

MICHAEL SAYER

Briner, Andres (*b* Zürich, 31 May 1923). Swiss musicologist and music critic. He studied at Zürich Conservatory and at Zürich University, where he took the doctorate with Hindemith in 1955 with a dissertation on the concept of time in music. After working for a short time at Radio Zürich, he served as assistant professor of music history and music theory at the University of Pennsylvania (1955–64). In 1964 he was appointed music critic of the *Neue Zürcher Zeitung*, and the following year succeeded Willi Schuh as its music editor. He retired in 1988. Like his predecessor, Briner based his critical judgments of the works being performed on a detailed analysis of the score. Briner is known primarily for his work on Hindemith, having written one of the first comprehensive studies on the composer ever published (1971); he has also examined 20th-century Swiss composers and the music history of Zürich. He was appointed president of the Paul Hindemith Foundation in 1985 and in 1995 Yale University awarded Briner the Certificate of Merit for his contributions to Hindemith scholarship.

JÜRG STENZL

Brinkmann, Reinhold (*b* Wildeshausen, 21 Aug 1934). German musicologist, active in the USA. After completing

studies in school music at the Musikhochschule in Hamburg (1955–61), he studied musicology at Freiburg University with Eggebrecht and German philology with Walter Rehm and Friedrich Maurer. He took the doctorate at Freiburg with a dissertation on Schoenberg's *Drei Klavierstücke* op.11 in 1967. From 1967 to 1970 he was assistant lecturer at the musicological institute of the Free University, Berlin, where in 1970 he completed the *Habilitation* and in 1971 was appointed reader. In 1972 he became professor of musicology at the University of Marburg. He was appointed chairman in 1976 of the Institut für neue Musik und Musikerziehung, Darmstadt, whose publications he also edited (1978–80), and became professor at the Hochschule der Künste, Berlin, in 1980. In 1985 he was appointed professor at Harvard, where he was named James Edward Ditson Professor of Music in 1990 and acted as department chair, 1990–94. He was made an honorary professor at the Humboldt University, Berlin, in 1996; he is also an editor for *Archiv für Musikwissenschaft* and has prepared several volumes for the Schoenberg collected edition. Brinkmann is considered an important music scholar in both Germany and the USA. He has written on a range of 19th- and 20th-century composers, including Beethoven, Schumann, Brahms, Skryabin, Varèse, Ives and those of the Second Viennese School, particularly Schoenberg. In addition to music analysis, Brinkmann is known for his writings on the social history of music and his interest in interdisciplinary studies.

HANS HEINRICH EGGEBRECHT/R

Brinsmead. English firm of piano manufacturers. John Brinsmead (*b* Weare Giffard, Devon, 13 Oct 1814; *d* London, 17 Feb 1908) founded the firm in Windmill Street, London, in 1835. His sons Thomas James Brinsmead (*d* London, 9 Nov 1906) and Edgar Brinsmead (*b* London, March 1848; *d* London, 28 Nov 1907) became partners in 1863, when the firm took new premises in Wigmore Street. The firm became a limited company in 1900, by which time annual production totalled 2000 pianos. Following John Brinsmead's death, the firm was run by his grandson Henry Billinghurst until a long strike in 1920 led the firm into receivership and Walter Saville, a director of J.B. Cramer & Co., purchased the controlling interest in the firm for £4000 in 1921. Manufacture of the Brinsmead and Cramer pianos continued until 1964, when the firm was bought out by Kemble & Co, which retains the title purely as a brand name.

Although the firm made grand pianos, John Brinsmead had built up a wide reputation for good-quality upright pianos at moderate prices. The firm won prizes at several international exhibitions, and an image of high quality was carefully developed through extensive advertising and press manipulation. Surviving instruments suggest that Brinsmead's were good medium-class pianos, but not comparable with the best of those made in Germany and the USA. John Brinsmead's major improvement to the upright piano (patented in 1885) included the use of a cast-iron frame which incorporated a flange projecting at the top, at right angles to the frame. The frame was in front of the soundboard, and the wrest pins, which were hollow so that the strings ran inside the pins, screwed into threads on the upper side of the flange. Tuning, effected by turning a nut, was simple and precise. The system demanded very accurate thread-cutting, and was used by other makers including Mason & Hamlin; it eventually became obsolete.

Brio (It.: 'vivacity', 'energy', 'fire'). A descriptive term for a playing style of brilliance and dash. The tempo designation *allegro con brio* was used particularly often by Beethoven, e.g. in the openings of the Waldstein Sonata, the Third Symphony and the Fifth Symphony, and in the finale of the Seventh Symphony. His Third Piano Concerto opens *allegro con brio* with a ¢ time signature, though needing relatively slow performace. *Con brio* appears by itself both as a tempo designation and as an indication of mood. The fugue at the end of Verdi's *Falstaff* is headed *allegro brioso*, crotchet = 120. Koch (*Musikalisches Lexikon*, 1802) translated *brioso* as 'fröhlich und männlich' ('cheerful and masculine').

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Brioschi [Briochi, Briuschi, Prioschi], **Antonio** (*fl c*1725–*c*1750). Italian composer. His name suggests that he may have come from Briosco, close to Milan. He probably worked near Milan, since some of his music was published with that of G.B. Sammartini in Paris and London, and six symphonies in Prague (*CZ-Pnm*) are in a Milanese hand. He is identified as a Milanese composer on some symphony manuscripts, and should be considered representative of the Milanese symphonic school. Ten symphonies are ascribed to both Brioschi and Sammartini, and Brioschi evidently knew Sammartini's music, as he modelled the Andante of one of his symphonies (*F-Pc* Fonds Blancheton op.2 no.61 and *US-BEm* 103) on the Largo of a Sammartini symphony (Jenkins and Churgin, no.65), dated before January 1738.

Brioschi was a popular and prolific early symphonist. Of the extant symphonies attributed to him, the authorship of at least 51 appears to be certain; 22 of these can be dated to about 1741 or earlier, and three are among the earliest of all known dated symphonies. These three works have connections with Casale Monferrato, southwest of Milan: one was incorporated into a Hebrew cantata for the holy day *Hoshana Rabbah* (ed. I. Adler, Jerusalem, 1992; overture ed. in The Symphony 1720–1840, ser. A, iii, New York, 1985), performed there in October 1733, and the other two are dated 1734 in manuscripts in Casale Monferrato (*I-CMbc*; ed. in RRMCE, li 1998). Prints and manuscripts of Brioschi's symphonies exist in about 30 European and American libraries. His music was especially popular in Paris, Prague, Stockholm and Darmstadt. 29 works are listed in the Breitkopf catalogues of 1762, 1763 and 1766 (including works listed under other names).

25 authentic symphonies in the Fonds Blancheton of the Paris Conservatoire library, compiled *c*1740–44, are among the most important in the earliest stage of the symphony, and exemplify the leading role played by Milan as the main centre of early symphonic writing. They bear such titles as 'sinfonia', 'overtura', 'sonata' and 'trio', and consist of three movements in the order fast–slow–fast. Scored for a string orchestra in three or four parts (eight and 17 works respectively), they feature a mixture of Baroque traits (a beat-marking bass, one- or two-bar modules, independent part-writing and sequential harmony) and Classical rhetoric, especially in structure and harmony. All works use major keys, favouring B♭, D, E♭ and G; slow movements are usually in relative or parallel minor keys, especially G minor, but subdominant or dominant major keys also occur. First movements, typically marked Allegro, employ common time or *alla breve* metres (though other metres, such as 3/4, 12/8 and 6/8, sometimes appear). Second movements are usually designated as Largo or Andante, seven of them being marked *sempre piano*. While Brioschi favoured 2/4 metre for these, he also exploited varied metres, such as common time and 3/4. The finale is most commonly a buffo Presto in 2/4 time; eight finales are dance types in 3/8.

The outer movements of Brioschi's symphonies have two main parts, each repeated. All the first movements and several finales display sonata-form procedures. The primary theme, which may contain a mosaic-like succession of contrasting motifs, is usually the longest unit; the remaining thematic functions are less defined. Expositions may contain extensive derivations. Developments are long and complex, featuring thematic recombination, variant forms of themes and new material. Recapitulations tend to be condensed and reformulated after an exact (or almost exact) recall of the primary theme, ideas from the development sometimes being integrated. More heterogeneous forms characterize the second movements; among 13 in sonata form, six have no development section and eight employ a special, non-modulating layout. Brioschi's music gains vitality from a highly active second violin part (a Milanese trait), wide melodic leaps, and frequent syncopations. Textures change frequently, alternating homophonic passages with independent part-writing and imitation, reduced texture, solo–tutti effects and unisons.

WORKS

published 'sonatas' are symphonies (except op.1 no.4)

XII Sonate (G, B♭, A, G, F, E♭, D, C, B♭, G, D, F), 2–3 vn, bc, op.1 (Paris, 1741–2); no.11 by Hasse

[6] Sonate (G, E♭, F, G, E♭, B♭), 2 vn, va, bc, op.2 (Paris, 1745)

4 sonatas, 2–3 vn, bc: nos.2 (B♭), 6 (B♭), 10 (E♭), 12 (B♭) in G.B. Sammartini, XII sonate op.2 (Paris, 1741–2), attrib. G. Sammartini

6 sonatas, 2 vn, bc: no.3 (E♭) in G.B. Sammartini, 6 Sonatas op.1 (London, 1744); no.5 (E♭) in G.B. Lampugnani and Sammartini, 6 Sonatas (London, 1744); nos.3 (A), 4 (B♭), 5 (G) in Sammartini, Brioschi and others, 6 Sonatas (London, 1746); no.2 (G) in Sinfonie … dei piu celebri autori d'Italia (Paris, 1747)

Sym. no.2 (E♭), in 6 simphonies a 4 e 5 parties del Sigr. Sans Martini et Briochi (Paris, *c*1750)

Sym. (A), 2 vn, va, bc, in [Joseph] Camerloher, XII sinfonie op.4 no.8 (Paris, *c*1752–60)

In MS, principal sources *CZ-Pnm*, *D-DS*, *F-Pn* Fonds Blancheton, *S-Skma*: 91 string syms., concertinos and trio sonatas, a 3–4; 51 authentic syms., concertinos and a trio; at least 25 syms. doubtful, others not yet evaluated

Lost: Violons quatuor, 2e livre (Paris, 1751); 11 syms. (2 may be trios); conc., 2 ob, orch; 2 sonatas, 2 vn, bc, listed in Leclerc, Breitkopf, Egk and Lambach catalogues

Briou, Nicolas-Antoine Bergiron de. *See* BERGIRON, NICOLAS-ANTOINE.

Briquet (*fl* early 15th century). ?French composer. His little two-voice rondeau *Ma seule amour et ma belle maistresse* (ed. in CMM, xi/2, 1959) appears in three manuscripts, two of them ascribed. He could be the Jehan de Villeroye, called 'Briquet', who was a *sommelier de corps* and diplomat at the court of Burgundy from 1388 to 1415, married in 1407, and was a member of Duke Philip the Good's court of love in 1416. A more likely candidate, however, would be the singer Briquet who came from Avignon to join the chapel of King Charles III of Navarre in 1396–7.

DAVID FALLOWS

Briquet, Jean. *See* PHILIPP, ADOLF.

Brisbane. Capital city of Queensland, Australia. The population was only 829 in 1846, but had risen to over 100,000 by 1900 (mostly owing to European migration) and 1·5 million in the 1990s. In the 1850s there were some visiting musicians; the first suitable venue for music was Mason's Concert Hall (1865). The most durable 19th-century musical societies were the choral and orchestral Brisbane Musical Union (established 1872, presenting mainly oratorios and cantatas) and the male-voice Brisbane Liedertafel (formed 1884), which merged with the Brisbane Orchestral Society in 1886. Many other choral and small orchestral groups were formed, but few survived. The first touring opera company came in 1864; from 1875 more arrived, particularly after the opening of the Theatre Royal in 1881 and the Opera House (later called Her Majesty's Theatre) in 1888.

The pioneer of band music was Andrew Seal, who arrived in 1857. Promenade concerts were popular, featuring vocal solos and ensembles from opera and instrumental arrangements. Bands represented the armed services (notably the Headquarters Band), the Salvation Army, particular occupations (e.g. police, railways or tramways) and local city or suburban areas. The activity of such groups has continued to the present.

The organist appointed to St John's Pro-Cathedral in 1873, Richard Jefferies, was outstanding in Brisbane's musical life up to 1900, promoting not only church music but also choral, orchestral and chamber music. He conducted Mendelssohn's *Elijah* at the opening of St Stephen's Roman Catholic Cathedral in 1874. He was succeeded as conductor of the Brisbane Musical Union by George Sampson in 1898. The first stage of St John's Anglican Cathedral was completed in 1910; Sampson was organist and choirmaster there, and at the Pro-Cathedral before that, for nearly 50 years (1898–1947), and conducted the Brisbane Musical Union choir to 1935. Another choral group of note was the Brisbane Austral Choir, conducted by E.R.B. Jordan. These amalgamated in 1936 as the Queensland State and Municipal Choir, still in existence as the official choir for the ABC. Other choirs were the Handel Society, which broadcast all of Handel's oratorios (many arranged by the conductor, Robert Dalley-Scarlett, from his private library of first-edition scores), the Bach Society and the Queensland University Musical Society (founded 1912).

By 1900 most middle-class homes boasted pianos, which were even being manufactured in Brisbane. Until 1930 (when the City Hall was opened), the main concert venue was the Exhibition Hall (built 1891). In the years before access to gramophone and radio, many amateur orchestral groups emerged, but most foundered because of a lack of interest in orchestral music in the community. The Brisbane Musical Union Orchestra, later called the Sampson Orchestra, was subsidized by the Queensland Government and Brisbane City Council from 1923. The ABC Orchestra joined it in 1936 to form the Brisbane SO. The first full-time professional group, the Queensland SO (55 musicians), was formed by the ABC in 1947. It offers over 100 performances each year in subscription series, mostly in the Concert Hall of the Queensland Performing Arts Trust (completed 1985). In 1995 it played Mahler's Symphony no.8 and Wagner's *Parsifal* in the Brisbane Biennial Arts Festival. The Queensland PO, with 31 full-time players, was formed in 1976, originally to provide support for local opera and ballet companies. By far the most enterprising and successful amateur orchestra is the Queensland Youth Symphony, conducted by its founder, John Curro, since 1966.

Various local opera and light opera companies performed with government support from 1948 onwards. The Lyric Opera of Queensland (formed 1982) has staged three operas each year since the opening of the Lyric Theatre (run by the Performing Arts Trust) in April 1985. Musica Viva Australia has presented concerts given by Australian and overseas chamber groups since 1956. The Australian Chamber Orchestra also has a subscription series.

The University of Queensland (established 1910) had no lectureship in music until 1934. The Foundation Professor of Music (Noël Nickson) arrived in 1966; the Faculty of Music was established in 1967, initially offering both practical and academic subjects in a BMus degree course and later postgraduate degrees. After several decades of public lobbying, the government finally established a conservatorium, with courses beginning in 1957, the first director being William Lovelock. Now part of Griffith University, the conservatorium offers both undergraduate and postgraduate degrees. There is also a degree course at Queensland University of Technology.

From the 1970s onwards Brisbane-based composers Colin Brumby and Philip Bracanin have earned national reputations; Mary Mageau and Betty Beath have also had many works performed. Younger composers include

Gerard Brophy, Stephen Cronin, Robert Davidson, Kent Farbach, Stephen Leek, Peter Rankine and Nigel Sabin.

GORDON D. SPEARRITT

Bristol. City and seaport located on the west coast of England, near the junction of the River Avon and River Frome. It was at the height of its prosperity, which was reflected in its musical life, in the mid-18th century. A festival of St Cecilia on 22 November 1727 included possibly the first performance of Handel's music outside London. The 'Utrecht' *Te Deum* and *Jubilate* were performed in the cathedral, and a concert at St Augustine's Back Theatre featured a number of other works by Handel. Simultaneously the 'Gentlemen of the Musick Society' assisted at a concert in Merchants' Hall. After festivals in 1728 and 1730 the celebrations were replaced by annual benefit concerts, which ran until about 1760. The 1758 event included the first performance in England of Handel's *Messiah* in any church apart from the chapel of the Foundling Hospital.

After the opening in 1756 of the Princes Street Rooms the popularity of the St Augustine's Back Assembly waned. Among visiting musicians at the New Rooms were Charles and Samuel Wesley in the 1770s and the nine-year-old William Crotch in 1784. Regular concerts were given in the New Rooms until the opening of the New Assembly Room in Clifton in 1811. The Victoria Rooms, completed in 1842, staged various musical events including a recital by Jenny Lind in 1848. A triennial four-day festival conducted by Charles Hallé was inaugurated in 1873 after the opening in 1867 of the Colston Hall. The festival, which ran intermittently until 1912, featured lesser-known choral works such as Macfarren's *St John the Baptist* (1873), which was specially written for the festival.

One of the earliest of Bristol's many amateur musical groups is the Bristol Madrigal Society, founded in 1837 and initially directed by John Davies Corfe, and now known as the Bristol Chamber Choir. Other groups include the Bristol Choral Society, founded by George Riseley in 1889, and the Bristol Bach Choir, founded by Alan Farnill and Adrian Beaumont in 1967.

Music has flourished in the two cathedrals at Bristol. The first organ at the Anglican cathedral was built in 1685 by Renatus Harris, who spent his last years in the city, and was rebuilt by Mander in 1989. Organists at the cathedral in the 20th century have included Hubert Hunt (1901–45), Alwyn Surplice (1946–9) and Malcolm Archer (1983–9). The Roman Catholic cathedral in Clifton (consecrated in 1973) has established an active role in Bristol's musical life under the leadership of David Ogden, director of music from 1990. St Mary Redcliffe, reportedly commended by Elizabeth I in 1574 as 'the fairest, the goodliest and the most famous Parish Church in England', also has a strong musical tradition. Its organ was built in 1912 by Harrison & Harrison, the firm who built the organ at the Colston Hall in 1956.

After being destoyed again by fire in 1945 the Colston Hall was reopened in 1951 with a seating capacity of 2180. Much praised for its acoustics, it is visited by many international ensembles and has had a long association with the Bournemouth SO. Other concert venues include the Arnolfini, where contemporary music performances are held, and St George's, Brandon Hill, a 19th-century chapel renovated and equipped for recording by the BBC. The Bristol Hippodrome, built in 1912, has been host to many touring productions of musicals and in particular has featured performances by the WNO and the Birmingham Royal Ballet. The Bristol Old Vic Company, performing at the Bristol Theatre Royal, was the originator of the highly successful musical *Salad Days* in 1954, which was tailored to the resources of the repertory company and had music by the company musical director, JULIAN SLADE. *Salad Days* transferred to London for a run of over five years and remains the only piece originated by the Bristol Old Vic Company to have maintained a prominent place in the repertory, although Slade's *Trelawny*, written as the opening show of the redeveloped Theatre Royal in 1972, did transfer to London for a brief spell in the summer of that year. The most notable other musical first seen at the Bristol Theatre Royal is *The Card*, by Tony Hatch and Jackie Trent, which opened in Bristol in June and in London in July 1973; the show is one of the earlier ventures of Cameron Mackintosh, who acted as co-manager. The university music department, founded in 1946, moved in 1996 to the Victoria Rooms, where the facilities include a concert hall and a recital room that contains a fine example of a William Drake chamber organ. The city has a specialist music library.

In popular music, Bristol came to prominence in the early 1990s with the emergence from the city's influential and innovative dance music scene of such artists as Massive Attack, Portishead and Tricky, whose collective sound came to be known as TRIP HOP. The music of the drum 'n' bass artist Roni Size is an example of the vital black contribution to the 'Bristol sound'.

BETTY MATTHEWS, IAN STEPHENS, JILL TUCKER, JOHN SNELSON

Bristow, George Frederick (*b* Brooklyn, NY, 19 Dec 1825; *d* New York, 13 Dec 1898). American composer, conductor, teacher and performer. He was the son of William Richard Bristow (1803–67), conductor and clarinettist in the New York area. After piano study with his father, his principal teachers were Henry Christian Timm for piano, George Macfarren for harmony, counterpoint and orchestration, and Ole Bull for the violin.

Bristow began his professional career as a violinist at the age of 13 with the Olympic Theatre orchestra, a group of six that performed in popular musical comedies. He joined the first violin section of the New York Philharmonic SO in its second season of 1843 (not 1842 as reported in other sources) and remained a member until 1879. In the 1850s he performed in and often led the violin section of such notable orchestras as Jullien's

(1853–4) and those that accompanied Jenny Lind (1850–51) and Marietta Alboni (1852). His versatility as a performer was also reflected in occasional public piano performances and in positions as church organist.

As a conductor, Bristow led such choral groups as the New York Harmonic Society (1851–63) and the Mendelssohn Society (1867–71) in performances of large choral and orchestral works. He also held posts as choir director in New York churches, principally St George's Chapel (1854–60). As a public school teacher from 1854 to the end of his life and an author of several pedagogical works, Bristow contributed significantly to both public and private music education in New York.

With Anthony Philip Heinrich and William H. Fry, Bristow attempted to establish a native style in American art music. However, although Bristow's works were often American in title or textual content (e.g. *Rip Van Winkle*, *Jibbenainosay*, *The Great Republic*, *Columbus* and *The Pioneer*) his music was typically European in the style of Mendelssohn. In his notable symphonies Bristow progressed from the early student work, Sinfonia in E♭ (1848), which called for Classical orchestral forces, to the proportions of late Beethoven in his *Niagara Symphony* (1893), written for vocal soloists, chorus and orchestra. The symphonic repertory with which he became acquainted as a performer greatly influenced his compositional style. Although his orchestrations and melodic-harmonic ideas exhibit solid craftsmanship, his larger forms are frequently over extended, with redundancies in thematic development. The chamber works, written during his early years, are especially unique and creditable representatives of a medium rarely explored by American composers in the 19th century.

Bristow's best-known works, including his opera *Rip Van Winkle*, oratorio *Daniel*, and symphonies in D minor, op.24, and F♯ minor, op.26, have been revived in either recordings or live performances. However, many fine unknown works, such as his two string quartets, two duos for violin and viola, *Arcadian Symphonie*, *Niagara Symphony*, violin sonata, solo song *The Abode of Music* and piano piece *Dreamland*, which are all in manuscript, reveal a talented composer. A valuable autobiographical sketch, *Life of a Musician*, shows a strong sense of humour and provides much new information about his life.

WORKS

(*selective list*)

printed works published in New York unless otherwise stated; MSS of unpublished works mainly in US-NYp; for more detailed list see Rogers

DRAMATIC

Rip Van Winkle (op, 3, J.H. Wainwright, after W. Irving), op.22, 1852–5; New York, Niblo's Garden, 27 Sept 1855; rev. 1878–82 (J.W. Shannon), vs pubd (1882/*R*)

Daniel (orat, W.A. Hardenbrook), solo vv, SATB, orch, op.42, 1866, lib. pubd (1867)

King of the Mountains (op, M.A. Cooney), op.80, 1894, inc.

SACRED VOCAL

for SATB, organ, unless otherwise stated

To the Lord our God (sentence), S, A, T, B, op.15, 1850

I will arise (sentence) [op.23], ?1853

Morning Service (TeD, Jub, Ky), E♭, op.19 (1855), TeD separately pubd (1888)

Gloria Patri, Praise to God, solo vv, SATB, orch, op.31, vs pubd as op.33 (Boston, 1860)

Evening Service (Bonum est, Benedic anima mea), op.36 (1865)

Christ our Passover (Easter Anthem), op.39, ?1866

The Lord is in his holy temple (sentence), S, A, T, B, org, op.40, ?1866; rev. 1891 (inc.)

c130 hymns, chants, ?1867

4 Offertories, op.48, ?1870

Morning Service (TeD, Bs), op.51, ?1873; TeD pubd (1873)

Easy Morning Service, F [op.58], ?1881

There is joy today, SATB, pf, in *Tonic Sol-Fa Advocate* (Nov 1882)

Holy Night, SATB, pf, in *Tonic Sol-Fa Advocate* (Nov 1884)

Evening Service, G [op.56], 1885

Mass, C, solo vv, SATB, orch, op.57, 1885

Christmas Anthem (Light flashing into the darkness) (J. Elmendorf), op.73, 1887

O bells of Easter morning, SATB, pf, in *Tonic Sol-Fa Advocate*(March 1887)

Where the holly boughs are waving, SATB, pf, in *Tonic Sol-Fa Advocate*(Nov 1887)

Easter Anthem, solo vv, SATB, org [op.77], ?1894

Except the Lord build the house, S, A, chorus, org [op.79], ?1894

Sweet is the prayer [after pf study by S. Heller], op.81, ?1894

Come ye that love the Saviour's name [after H. Praher]

I heard a voice from heaven, S, A, T, B, org

Oh that the salvation of Israel, SATB, pf/org

O Lord, thy mercy, my sure hope, SATB [op.76] (sketch)

There's rest for all in heav'n, 1v, pf

SECULAR VOCAL

choral

Ode, S, female vv, orch [op.29], ?1856

The Pioneer (H.C. Watson), cant., solo vv, SATB, orch, op.49, ?1872 [orig. intended as prol. to Arcadian Symphonie: see ORCHESTRAL]

The Great Republic, Ode to the American Union (W.O. Bourne), solo vv, SATB, orch, op.47, vs pubd (1880)

Niagara Symphony, solo vv, SATB, orch, op.62, 1893

The Bold Bad Baron, male vv, ?1896

Call John, SATB

Ode Written for G. S., 1v, SATB, kbd (kbd part inc.)

songs for 1 voice, piano, unless otherwise stated

Thine eye hath seen the spot, ?1846, inc., part quoted in W.T. Upton: *Art-Song in America* (Boston, 1930/*R*1969 with suppl. 1938); The Welcome Back (Boston, 1848); I would I were a favorite flower, in The Message Bird: a Literary and Musical Journal (1 Dec 1849); The opening day (W.H. Carew), glee, SATB, pf, in The Message Bird (15 Feb 1850); The dawn is breaking o'er us, ?1852; Spring time is coming (Wainwright) (Springfield, MA, 1852); The Abode of Music (M. Marseilles), canzonet, op.31, 1855

The Cantilena: a Collection of Songs, Duets, Trios and Quartetts (1861) [130 works]; Keep step with the music of the Union, unison vv, orch, 1862, vs in The Centennial School Singer, ed. G.H. Curtis and W.O. Bourne (1876); Lily Song (1869); A Song of the Hearth and Home (W.P. Durfee) (1869); Only a little shoe (A.D.T. Cone) (1884); Woman's Love, ?1887; The ghost came bobbing up (Shannon); When morning's bright sun, 1v, orch

ORCHESTRAL, CHAMBER

Orch: Ov., E♭, op.3, 1845; Sinfonia, E♭, op.10, 1848; Captain Raynor's Quickstep, 1849; Serenade Waltz, 1849; Waltz, ?1849; La cracovian, vn, orch, op.13, 1850 [rev. of Duetto concertante, vn, pf, op.1, 1844]; Jullien Sinfonia, d, op.24, ?1853; Winter's Tale, ov., op.30, 1856; Symphonie, f♯, op.26, 1858; Columbus, ov., op.32, 1861; Arcadian Symphonie, op.50, 1872; Fantasie cromatica con fuga [arr. of J.S. Bach], op.53, 1879; Jibbenainosay, ov., op.64, ?1889

Chbr: Duetto concertante, vn, pf, op.1, 1844 [rev. as La cracovian, vn, orch, op.13, 1850]; Fantasie Zampa, vn, pf, op.17, 1844; Duo no.2, g, vn, va, 1845; Duo no.3, G, vn, va, op.8, 1845; Quartetto, str, F, op.1, ?1849; Quartetto, str, g, op.2, 1849; Violin Sonata, G, op.12, ?1849; Friendship, vn, pf, op.25, ?1855; The Judge, march, pf, perc, op.60, ?1886

KEYBOARD

Pf: Rory O'Moore, variations (1842); Grand waltz de bravura, op.6 (1845); Grand duo . . . sur . . . La fille du régiment, pf 4 hands, op.7, 1845; Septour, pf duet, op.16, 1846; Dream of the Ocean [arr. of J. Gungl] (1849); Duo La fille du régiment, 2 pf, op.5, 1849; Andante et polonaise, op.18, ?1850 (n.d.); A Life on the Ocean Wave, op.21, ?1852; Souvenir de Mount Vernon, op.29 (1861); Eroica, op.38, ?1865; Raindrops, op.43, ?1867

La vivandière, op.51, ?1884; Dreamland, op.59, ?1885; Saltarello [op.61], ?1886; March, op.69, ?1887; Marche-caprice, op.51

(1890); School March, op.63 (Boston, 1893); Impromptu [op.76], ?1894 (inc.); Plantation Pleasures, op.82, ?1894; Plantation Memories no.2, op.83, ?1895; Plantation Memories no.3, ?1895; March Columbus (inc.); A Walk Around (inc.); arrs., transcrs.

Org: [53] Interludes, in Melodia sacra: a Complete Collection of Church Music, ed. B.F. Baker, A.N. Johnson, and J. Osgood (Boston, 1852); Pot pourri, op.28, 1856; Impromptu Voluntaries, op.45, pubd as 6 Pieces (1883); 6 Easy Voluntaries, op.72, in George F. Bristow's New and Improved Method for the Reed or Cabinet Organ (1887)

PEDAGOGICAL WORKS

with F.H. Nash: Cantata, or Teacher of Singing (1866, enlarged 2/1868)

DELMER D. ROGERS

Britain, Radie (*b* nr Silverton, TX, 17 March 1899; *d* Palm Springs, CA, 23 May 1994). American composer. After studying the piano with European-trained teachers in Clarendon, Texas, and Eureka Springs, Arkansas, she enrolled at the American Conservatory, Chicago (BM 1921), where she studied with Heniot Levy, among others. She later studied the organ with Marcel Dupré in Paris (1923), the piano with Adele aus der Ohre in Berlin (1924) and composition with Albert Noelte in Munich (1924), where her first works were performed in 1926. Later that year, she accepted a post at the Girvin Institute of Music and Allied Arts, Chicago. Her orchestral work, *Heroic Poem*, won the Juilliard National Publication Prize in 1945; other orchestral works were performed by the Illinois SO and the Chicago SO. In 1935 and 1936 Britain was resident at the MacDowell Colony. She eventually settled in Hollywood, California, where she taught the piano and composition and continued to compose.

Britain's music is romantic, colourful and often programmatic; melody plays a central role in her works and pitch material rarely strays from traditional tonal structures. One of her primary concerns was to forge an immediate connection with her audience. Nature, famous people and current events inspired many of her compositions, a number of which evoke the American West. Her autobiography is titled *Ridin' Herd to Writing Symphonies* (Lanham, MD, 1996).

WORKS
(*selective list*)

Stage: Ubiquity (musical drama, L. Luther), 1937; Carillon (op, R. Hughs), 1952; Kuthara (chbr op, 3, Luther), 1960; The Dark Lady Within (musical drama, W. Shakespeare), 1962; Western Testament (musical drama, S.L. Stadelman), 1964; 4 ballets, 2 children's operettas

Orch: Prelude to a Drama (Ov. to Pygmalion), 1928; Sym. Intermezzo, 1928; Heroic Poem, 1929; Rhapsodic Phantasie, pf, 1933; Nocturn, 1934; Light, 1935; Southern Sym., 1935; Drouth, 1939; Ontonagon Sketches, 1939; Pastorale, 1939; Saturnale, 1939; Suite, str, 1940; St Francis of Assisi, 1941; San Luis Rey, 1941; Phantasy, ob, orch, 1942; Jewels of Lake Tahoe, 1945; Red Clay, 1946; Serenata sorrentina, 1946; Umpqua Forest, 1946; Paint Horse and Saddle, 1947; Cowboy Rhapsody, 1956; This is the Place, 1958; Cosmic Mist Sym., 1962; Kambu, 1963; Little Per Cent, 1963; Texas, 1987

Vocal (1v, pf, unless otherwise stated): Had I a Cave (R. Burns), 1925; Half Rising Moon (B. Tabb), 1925; Open the Door to Me (Burns), 1926; Hail Texas (Britain), 1927; Drums of Africa (R.L. Jenkins), chorus, 1934; Elegy (L. Luther), 1937; The Earth Does Not Wish for Beauty (Luther), 1940; Lasso of Time (A. Mckenzie), 1940; Love Still Has Something of the Sea (C. Sedley), 1952; The Star and the Child (J. Lancaster), chorus, 1956; Hush My Heart (A. Halff), 1961; Nisan (K. Hammond), chorus, 1961; Translunar Cycle (Hammond), 1970; many others

WALTER B. BAILEY

British Columbia, University of. University in VANCOUVER; it has had a music department since 1946 and a music school since 1986.

British Council. Founded in 1935, the British Council promotes cultural co-operation between Britain and other countries with support from the Foreign and Commonwealth Office; it is represented in over 100 countries with offices in over 200 cities. It assists over 1500 arts events each year selected for their potential to reach key groups in individual countries, including the younger generation, and to gain recognition for British artistic achievement. In music (including jazz, traditional and rock music as well as British classical, early and contemporary music), tours are usually organized by overseas promoters. The Council has sponsored recordings and provides information and advice on British music and music education, as well as scores, to professional users overseas, including through the quarterly magazine *Soundings*, published jointly with the British Music Information Centre.

□

British Federation of Music Festivals. Association active in Britain since 1921. *See* FESTIVAL, §3.

British Forum for Ethnomusicology. A UK society that aims to further the study of music and dance from all

parts of the world from an ethnomusicological perspective. The organization was initially formed in 1973 as an affiliated national committee of the International Folk Music Council on the instigation of Peter Cooke. The first committee also included members of the Folk Song Society, for instance, Maud Karpeles. When the parent organization became the INTERNATIONAL COUNCIL FOR TRADITIONAL MUSIC (ICTM), the UK affiliated national committee became ICTM (UK Chapter). It remains the UK National Committee of the ICTM, but changed its name to the British Forum for Ethnomusicology in 1995. Two conferences are held each year, either separately or in conjunction with other academic societies and interest groups. Since 1992, the Society has published the *British Journal of Ethnomusicology*.

British Institute of Recorded Sound. *See* NATIONAL SOUND ARCHIVE.

British Library National Sound Archive. *See* NATIONAL SOUND ARCHIVE.

British Music Information Centre. Centre founded in 1967 by the COMPOSERS' GUILD OF GREAT BRITAIN. *See also* BRITISH COUNCIL and INTERNATIONAL ASSOCIATION OF MUSIC INFORMATION CENTRES.

British Music Society. Society founded in 1978 by Peter Middleton (who became its chairman). Although taking inspiration from the now defunct society of the same name founded in 1918 by Arthur Eaglefield-Hull, it has no direct connection with it. The present society's objective is to promote interest in the music of lesser-known British composers; the emphasis is on deceased composers and those without their own supporting organizations. The society's worldwide membership comprises both musicians and non-musicians. It carries out its aims through publications, recordings, research, competitions and occasional concerts. The society's opera project of 1985 resulted in performances of operas by Arthur Bliss, Stanford, Smyth, Boughton and MacCunn. Biennial competitions began in 1988 with piano awards. Later events included string (1990), song (1992), woodwind (1994) and organ (1996) awards providing opportunities for young musicians. The society became a registered charity in 1995. Its publications include works on Arnold Cooke, British song and British opera; among its recordings are works by York Bowen, Foulds, John Joubert, Moeran and Ernest Walker. It is run by a volunteer committee and has no permanent financial support.

STEPHEN TROWELL

British National Opera Company. British organization. It was set up in 1922 by leading singers and musicians of the Beecham Opera Company (*see* LONDON, §VI, 2(i)). The company first performed in Bradford on 6 February 1922 with a production of *Aida*; it gave its first Covent Garden season in May and June that year. Three further Covent Garden seasons were given until the spring of 1924, after which its London seasons were at His Majesty's Theatre. The company toured the provinces widely and performed a number of British operas. It also staged the *Ring*, *Tristan und Isolde*, *Parsifal* and a notable production in English of *Pelléas et Mélisande* with Maggie Teyte. Distinguished guest artists who appeared with the company during its London seasons included Melba, Joseph Hislop, Edward Johnson and Dinh Gilly. British singers and conductors who began their careers with the company included Heddle Nash, Dennis Noble, Barbirolli, Sargent and Clarence Raybould. The first broadcast in Europe of a complete opera was of the company's matinée performance of *Hänsel und Gretel* at Covent Garden on 6 January 1923. By the autumn of 1929 the company was in serious financial difficulties and went into voluntary liquidation. It was taken over by the Royal Opera House, and survived as the Covent Garden English Opera Company until 1938.

HAROLD ROSENTHAL/R

Brito, Estêvão de (*b* Serpa, nr Évora, *c*1575; *d* Málaga, between 25 May and 2 Dec 1641). Portuguese composer. According to Barbosa Machado he studied music with Filipe de Magalhães. On 1 June 1597 he was formally appointed *maestro de capilla* of Badajoz Cathedral, although he had performed the duties of the office since at least 8 February. Upon the recommendation of the cathedral chapter he was ordained by the Archbishop of Évora in February 1608. Each November of the following three years he was given time off to compose special Christmas villancicos. On 16 February 1613 he was elected over five other candidates to the post of *maestro de capilla* of Málaga Cathedral. There, as at Badajoz, he was allowed leave to compose villancicos for Christmas and for Corpus Christi celebrations. In January 1618 he was offered the post of *maestro de capilla* of the Madrid royal chapel, but for unknown reasons he refused the appointment. He remained at Málaga until his death, conducting, teaching the choirboys and composing festival music until he became ill in November 1640. His motets often begin with short phrases of two to four notes, imaginatively imitated in the other voices. He was fond of melodic 5ths and running passages bounded by a 5th. He used a variety of note values; running semiquavers and dotted rhythms appear at appropriate places in the text, contrasting with earlier passages in minims and semibreves. His 31 Christmas villancicos (for up to ten voices) and a *Tratado de musica* that were in King João IV's library (item 513) are lost.

WORKS

Officium defunctorum (incl. Missa pro defunctis), 4–6vv; 9 pss, 29 hymns, 4–6vv; 25 motets, 4–8vv: *E-Mba*, all ed. in PM, ser.A, xxi (1972) and xxx (1976)

31 Christmas villancicos (incl. a negro, 8vv, Hidalgos de Portugal, 6vv, and Sesu, que de cosa viuo, 8vv); lost, listed in *JoãoIL*

ROBERT STEVENSON

Brito, Manuel Carlos de (*b* Oporto, 26 April 1945). Portuguese musicologist. He obtained the MMus (1977) and the doctorate (1985) from King's College, London, and also studied at the Guildhall School of Music and Drama. Between 1979 and 1986 he taught music history successively at the Oporto Conservatory and the Lisbon

Conservatory, and in 1987 joined the musicology department of the New University of Lisbon, where from 1994 he has held the position of associate professor of Portuguese music history.

Brito has focussed mainly on the music of Portugal from the 17th century to the 19th, and most particularly 18th-century opera (the subject of his doctoral dissertation and later his groundbreaking study published in 1989, which was awarded a prize by the Conselho Português da Música). In addition to the influence of Italian opera during the 18th century, he has explored wider issues of relationships between Portuguese musical culture and that of other countries, including the musical aspects of the Portuguese overseas expansion. With regard to the 17th century, he has studied in particular the sacred villancico, especially the repertory originating at the priory of S Cruz in Coimbra. His publications include (with Luísa Cymbron) a general history of music in Portugal, and he is editor of the *Revista Portuguesa de Musicologia.*

OWEN REES

Britpop. A term first used in the British music press around 1992 to describe the indigenous talent emerging in the wake of the commercial success of American grunge and 'slacker' youth culture. These groups, such as Suede and Elastica, performed playful, indie-inspired guitar-based pop. By 1995 intense media rivalry existed between Manchester's Oasis and London's Blur, as the two groups briefly brought back a sense of competition not seen in pop since the days of the Beatles and the Rolling Stones. Indeed, nostalgia was a key element of the Britpop boom, as rock artists reasserted 'songwriterly' values and traditional rock instrumentation in the aftermath of the hegemonic influence of acid house in the late 1980s. Significantly Britpop was used almost exclusively to describe white English musicians who played guitar-based, 1960s-influenced pop: Oasis were dubbed Britpop, but the black trip hop artist Tricky was not, despite his mainstream success. By 1996 new and more derivative groups such as Kula Shaker, The Verve and Ocean Colour Scene played what their detractors dubbed 'Dad-rock', a less threatening and more complex homage to 1960s and 70s icons such as Traffic and Paul Weller, which demonstrated that the initial energy of the Britpop scene was dying out. By the late 1990s the quintessential Britpop group Blur had taken to recording grunge-inspired music which resembled the sort of American music Britpop had once united against. Significantly none of the Britpop groups really broke into the lucrative American market.

DAVID BUCKLEY

Britten, (Edward) Benjamin (*b* Lowestoft, 22 Nov 1913; *d* Aldeburgh, 4 Dec 1976). English composer, conductor and pianist. He and his contemporary Michael Tippett are among several pairs of composers who dominated English art music in the 20th century. Of their music, Britten's early on achieved, and has maintained, wider international circulation. An exceedingly practical and resourceful musician, Britten worked with increasing determination to recreate the role of leading national composer held during much of his own life by Vaughan Williams, from whom he consciously distanced himself. Notable among his musical and professional achievements are the revival of English opera, initiated by the success of *Peter Grimes* in 1945; the building of institutions to ensure the continuing viability of musical drama; and outreach to a wider audience, particularly children, in an effort to increase national musical literacy and awareness. Equally important in this was his remaining accessible as a composer, rejecting the modernist ideology of evolution towards a 'necessary' obscurity and developing a distinctive tonal language that allowed amateurs and professionals alike to love his work and to enjoy performing and listening to it. Above all, he imbued his works with his own personal concerns, some of them hidden, principally those having to do with his love of men and boys, some more public, like his fiercely held pacifist beliefs, in ways that allowed people to sense the passion and conviction behind them even if unaware of their full implication. He also performed a fascinating, as well as problematic, assimilation of (or rapprochement with) the artistic spoils of the East, attempting an unusual integration of various non-Western musical traditions with his own increasingly linear style.

1. CHILDHOOD, ADOLESCENCE, 1913–30. Britten was the youngest of four children born into a middle-class family in Lowestoft, on the Suffolk coast. The family house was a substantial villa overlooking the sea. His father, a dentist, appears to have been a bit severe, even 'hard', and not a contributor to the family's extensive musical life, though charming and supportive in letters to his son. Benjamin received encouragement from his mother Edith, herself a singer and pianist. She was determined that he should succeed and controlled his life rigorously until his death in 1937. She was clearly the centre of his emotional world. The coincidence of his birthday with St Cecilia's day must have seemed a good omen for her ambitious dream of his becoming 'the fourth B': like many aspects of the composer's childhood, it has been celebrated in Britten lore and literature. An early attempt at play writing and fervent exploration of the piano as well as a substantial number of compositions written before he was ten have been taken to suggest an almost Mozartian precocity in his otherwise standard

progress to preparatory school, a small local day school which he entered at eight.

At school, he appears to have diverted any adult disapproval and schoolboy bullying occasioned by his music and sensitive nature by proficiency at sports (he was a keen cricketer) and a certain toughness. He had piano lessons with Edith Astle, passing the Associated Board Grade 8 at 13, and began viola lessons at ten with Audrey Alston, who encouraged him to attend concerts in Norwich. It was through her he met the composer Frank Bridge. Mrs Britten had failed in attempts to draw wider attention to the prolific output of her son, who at 14 had 100 opus numbers to his credit (several have been published, mostly since his death; see Mark in Cooke, D1999). But Bridge was impressed, and persuaded Britten's parents to allow him to travel to London for composition lessons. These may have injured his ego, but they also helped Britten to introduce a certain rigour into his composition. The cardinal principles of Bridge's teaching were 'that you should find yourself and be true to what you found. The other . . . was his scrupulous attention to good technique' (Britten, *Sunday Telegraph*, 17 Nov 1963). The String Quartet in F, completed in April 1928, is among the first substantial works written under Bridge, whose influence is also evident in a song cycle with orchestra, *Quatre chansons françaises*, composed that summer for the older Brittens' 27th wedding anniversary. These settings of Hugo and Verlaine allude to Wagner filtered through Gallic gestures, but the diatonic nursery-like tune for the sad boy with the consumptive mother in *L'enfance* is entirely characteristic.

In September 1928 Britten entered Gresham's, a public school at Holt in north Norfolk. This was a difficult and belittling experience, for the music master disparaged his composition, and the bullying (of other boys, not himself) outraged his always incendiary sense of justice. He felt keenly his first separation from home. One outlet was intensely passionate letters to his mother, another talk of suicide in his diary, yet another lapsing into psychosomatic illness, an involuntary defence that continued as a safety valve throughout his life. The music master eventually came round, at least to the extent of performing his *Bagatelle* for violin, viola and piano in a school concert in March 1930. But the family allowed him to leave after two years when he unexpectedly passed his School Certificate in 1930.

The lessons with Bridge continued to stimulate and direct his need to compose. The single-movement *Rhapsody* for string quartet of March 1929 looks forward to the two Phantasy compositions of the early 1930s. The following year came the *Quartettino*, with its conscientious if garrulous motivic working out of a five-note motto; and there were several works featuring the viola, including a solo piece (published posthumously as *Elegy*), written just after Britten left Gresham's and perhaps hinting at his unhappiness there. It was followed by two sketches (published posthumously as *Two Portraits*), the first a vigorous movement for strings depicting his school friend David Layton (whom Britten described in his diary as 'clean, healthy thinking & balanced', Carpenter, C1992, p.75) and the second entitled 'E.B.B.', with solo viola playing a melancholic folklike tune, evidently a self-portrait. The well-known *Hymn to the Virgin*, composed during his last term at Gresham's, was long one of the two earliest compositions in his published catalogue of works, together with the setting of Hilaire Belloc's *The Birds* composed a year earlier.

2. College and the profession, 1930–39. *The Birds*, *A Wealden Trio* (a carol for women's voices) and several instrumental pieces had been sent off as part of a successful application for a scholarship to the RCM. Although this was an improvement over Gresham's, Britten did not in later years conceal his dismay at the 'amateurish and folksy' atmosphere he encountered among the students. Arthur Benjamin was his piano teacher, and he went to John Ireland for composition lessons, though Bridge remained more influential. Britten seems to have aroused defensiveness (and perhaps seductiveness) in the erratic Ireland, and the lessons have often been portrayed as a dismal failure. Later, Britten admitted to Joseph Cooper that 'Ireland nursed me very gently through a very, very difficult musical adolescence' (*Letters from a Life*, A1991, p.147).

Living in London, however, gave the young composer the opportunity to widen his knowledge of the repertory. Although Bridge had steered his interests in the direction of modernism (he would not have encountered Schoenberg at the RCM, as Henry Boys later noted: *Letters*, 397), the young Britten was still in love with Beethoven and Brahms during his early years there and showed little of his later hostility to the English 'pastoral school'. His diary entries from January 1931, however, chronicle a fascinating array of performances and reactions to them: he 'could not make head or tail' of Schoenberg's *Erwartung*; found Stravinsky's *Rite of Spring* 'bewildering & terrifying' but his *Petrushka* 'an inspiration from beginning to end'; and the *Symphony of Psalms* quickly became a classic for Britten. Mahler's *Lieder eines fahrenden Gesellen* was 'a lesson to all the Elgars & Strausses in the world' – Mahler was of course to become a major influence on his orchestral technique and sense of compositional irony, and in 1943 he wrote about the Fourth Symphony that 'I have almost more *affection* for that piece than for any I know'. Britten found himself 'absolutely incapable of enjoying Elgar, for more than 2 minutes'. He later told Walton that hearing his Viola Concerto and overture *Portsmouth Point* at that time 'was a great turning point in my musical life . . . you showed me the way of being relaxed and fresh, & intensely personal & yet still with the terms of reference which I had to have'. Many of the observations have to do with individual performers, not just conductors and soloists, but also players in the orchestra. After a performance by the Berlin PO under Furtwängler in 1932 he wrote: 'F's readings were exaggerated & sentimentalised (esp. so in last item [Tchaikovsky's Symphony no.6] – no wonder a member of the audience was sick!! The orch, is a magnificent body, tho' slightly off colour to-day (e.g. wind intonation, 1st clar. & 1st Horn) Strings are marvellous. Timpanist great. Marvellous ensemble and discipline'.

By 1933 his attitudes were clarifying. From 3 March dates his comment on 'two brilliant folk-song arrangements of Percy Grainger . . . knocking all the V. Williams and R.O. Morris arrangements into a cocked-hat'. Early in 1935 he complained to the composer Grace Williams about the '"pi" and artificial mysticism combined with . . . technical incompetence' in Vaughan Williams's *Five Mystical Songs*, and later in the year he lamented to Marjorie Fass, a quaint intimate of the Bridges, the news

of Berg's death: 'The real musicians are so few & far between, arn't they? Apart from the Bergs, Stravinskys, Schönbergs & Bridges one is a bit stumped for names, isn't one? Markievitch may be – but personally I feel that he's not got there yet. Shostakovitch – perhaps – possibly'. In October 1936 Britten condemned the Sibelius in Moeran's G minor Symphony: 'This is going to be almost as bad as the Brahms influence on English music I fear'. By 1952 Britten admitted that 'I play through all his [Brahms's] music every so often to see if I am right about him; I usually find that I underestimated last time how bad it was!'. That quotation comes from the frankly canonizing anthology edited by Donald Mitchell and Hans Keller in which Lord Harewood presented what is tantamount to an official lineage: Monteverdi, Purcell, Bach, Gluck, Mozart, Weber, Schubert, Verdi, Mahler, 'even Tchaikovsky, if he is played in a restrained, though vital way', Berg and Stravinsky.

At the end of the second year at the RCM Britten won the Cobbett Chamber Music Prize with his Phantasy in F minor for string quintet. It received its first professional performance at a Macnaghten-Lemare concert in 1932 together with three two-part songs on poems of de la Mare (his first published works). The Phantasy is more adventurous and focussed than the String Quartet in D of the first year and shows a tug of war between Ireland, who appears to have been pushing Britten to the vocal-pastoral version of Englishness (he wrote mainly vocal music during his first year with Ireland), and Bridge.

More remarkable is the Sinfonietta, his op.1, written in three weeks during summer 1932 and first performed at another Macnaghten-Lemare concert in January 1933, with Britten himself conducting it at the RCM in March (the Mendelssohn prize for which it was submitted went to another student, though Britten received a consolatory £50). Its opening A–B♭ dissonance and adventurous scoring aggressively advertises an allegiance to European modernism, and even when it lapses into English rhapsodic lyricism in the slow movement the tautness of the ensuing violin duo rescues it from any debility. The debt to Schoenberg's first *Kammersymphonie* (pointed out by Erwin Stein in Mitchell and Keller, D1952), ultimately extends perhaps to the manner of thematic derivation that Peter Evans has argued as central to Britten's technique. The careful working out of themes and contrasts also dominates the Phantasy Quartet for oboe and strings, also written in 1932, and first performed in August 1933 on the BBC. As remarkable as either is an ambitious Double Concerto in B minor for violin and viola begun in May 1932 and interrupted for the composition of the Sinfonietta. It shares features with op.1, such as the three-movement plan, the rhapsodic middle movement leading directly into the tarantella-like finale. Though perhaps less self-consciously modern, with its virtuoso solo writing, it is longer than the Sinfonietta and equally well sustained and argued. (It has been realized from Britten's annotated composition sketch, his customary original short score written in pencil.)

In December 1932 Britten graduated and garnered a £100 travel grant. He returned to Lowestoft after a further Macnaghten-Lemare concert which included the unfinished quartet *Alla quartetto serioso: 'Go play, boy, play'*. He intended to use the money to go to study with Berg, but his parents, to whom the RCM authorities had suggested that Berg was in some way 'immoral' and 'not a good influence', scotched the plan.

So he stayed at home, riffling through his voluminous juvenilia for material for his *Simple Symphony* and getting the first performance on the BBC of *A Boy was Born*, an ambitious set of choral variations in which his hard-won instrumental technique was problematically assigned to voices. Even here, though, the unusual juxtaposition of an accompanimental texture built on the 'snow on snow' image in Christina Rossetti's 'In the bleak midwinter' and the regular strophes of the Corpus Christi carol sung by a boys' chorus is characteristic of later Britten. In March 1934 he visited Florence for a performance of his Phantasy oboe quartet at the ISCM festival, which brought him to the notice of the international new music community. Later in the year came the *Te Deum* in C and the *Jubilate Deo* in E♭ for St Mark's, North Audley Street, London, whose choir furnished the boys for the BBC performance of *A Boy was Born*. Apart from his father's death in April 1934, things were beginning to turn out well for Britten's 21st birthday: the BBC performed the Sinfonietta; OUP decided to publish more works (Boosey & Hawkes were to step in barely a year later with an exclusive contract and, slightly later, a regular stipend); and he finally visited Vienna – though with his mother as chaperone and without meeting Berg – where he began work on the Suite for violin and piano.

At this point Britten started job hunting, and in May 1935 found ideal employment under Albert Cavalcanti in John Grierson's General Post Office Film Unit, working on the documentary *The King's Stamp*. It offered the challenge of writing to order at high speed, devising sound-effects and matching aspects of film technique that had a lasting impact on his composition. More important, it gave him entry into an artistic and intellectual world as liberating for him as the Diaghilev circle had been for Stravinsky. At its centre, and the most influential of all Britten's close friends, was the poet W.H. Auden, who quickly gave him the vacant post of composer in his 'gang' of artists and writers (Carpenter, 69). It included those associated with the GPO Film Unit, including Christopher Isherwood, and with the experimental Group Theatre, for which Britten wrote incidental music, including that to the Auden-Isherwood *The Ascent of F6*. Also involved in the GPO films was Montagu Slater, eventually the librettist of *Peter Grimes*, for several of whose plays Britten wrote the music. Films that involved an Auden-Britten collaboration, such as *Coal Face* and *Night Mail*, though celebrated, are only a small proportion of his projects, which included Lotte Reiniger's film about the Post Office Savings Bank, *The Tocher*, from which in 1935–6 was drawn material for the choral and orchestral suites based on Rossini. Britten's facility in this field led to work with other film companies and to an even longer association with the BBC (1937–47) on feature programmes and radio dramas whose music is only now beginning to reveal latent trends as well as a wide range of parody. If the clever cabaret songs (some to words by Auden) written for Hedli Andersen cause no surprise, the pseudo-Bach arias in one of R. Ellis Roberts's pretentious BBC religious features, 'The World of the Spirit', show how easily Britten could have fallen into a more conventional 'neo-classicism'.

Britten's political awakening was much accelerated by his fresh circumstances. Dazzled by his new friends, he

1. Britten (centre) with Frank Bridge and his wife Ethel, Paris, 1937

embraced their values and politics, which allowed him the 'outsider' status and rebellious stance he needed to jettison the safety of Lowestoft: he must have enjoyed, and been pained by, arguing about communism with his mother and refusing to go to Communion with her, as well as the slight disapproval of the 'Brits' (the Bridge *ménage à trois*) towards his clever new friends. Politics went hand in hand with a growing awareness of his sexuality and its social implications. He had carried off the asexual British schoolboy role rather well – for one thing, it concealed the obscure wounds also revealed in the stories, probably fictional, of early sexual abuse from a schoolmaster and his father's liking for boys, told to Eric Crozier and Myfanwy Piper (Carpenter, 19–25) – but his undoubted desire for 'his own kind' was beginning to break through. Many of his new friends, including Auden, who imparted a *carpe diem* message and undoubtedly lectured Britten on the topic, were almost openly gay, at least among themselves, and he must have realized that the left-wing, pacifist, agnostic and queer model they offered him provided a suitable identity niche in which to lodge his particular personal concerns, though few of his friends believed that he was ever entirely comfortable with it.

The immediate result of the friendship with Auden, apart from the flood of film scores, was a large orchestral song cycle on human relations to animals that would both attack the fox-hunting set at home and act as a parable for the worsening political situation abroad. Early in 1936, Auden chose three poems and wrote a prologue and an epilogue. In April Britten attended the ISCM festival in Barcelona, where he played his Suite with Antonio Brosa and heard Berg's Violin Concerto. The important new work, *Our Hunting Fathers*, went forward during the summer, and predictably met some disapproval at its first performance at the Norwich Triennial Festival in September. Later even Britten himself treated it as something of an embarrassment. Perhaps Auden's voice ventriloquizes too insistently; yet it is Britten's first major work to encapsulate a social or political issue in a way calculated to challenge received opinion because of the unusual combination of high drama and biting irony in an up-to-date eclectic score brilliantly orchestrated. If this way of thinking about music and art were all that Auden gave Britten, it was ultimately the gift that turned him into a composer of lasting impact. On this aspect of his work, Britten later wrote (in connection with *Sinfonia da Requiem*), 'I don't believe you can express social or political or economic theories in music, but by coupling new music with certain well known musical phrases, I think it's possible to get over certain ideas' (*Letters*, 705).

In January 1937, Edith Britten died unexpectedly after on illness. Britten was both devastated and, at a level just beginning to find expression in his diary, relieved to be free from her controlling influence. An immediate result was an exploration of those submerged sexual feelings that Auden, Isherwood and others had attempted to urge to the surface. On 6 March, at lunch with the conductor Trevor Harvey, he met a tenor, named in his diary as 'Peter Piers'. A year later they were sharing a London flat. For some time there was a parental element in Pears's relation to Britten preventing a complete union, which only came about as a result of happy sexual experiences early in their time in North America (1939–42). It was a fortunate match for Britten on account of his real need for protection. On a cultural level it was unusual for being between two individuals of the same race, class and age, each with commensurable and connected talents that led to their spurring one another on.

In 1937 and for some time after, Britten was still trying out potential liaisons of a similar kind. But much of his own affectional and sexual imagination he invested in people younger than himself. In summer 1938 he renewed contact with Wulff Scherchen (son of the conductor Hermann), who had made an impression four years earlier in Florence. Scherchen, now 18, responded with alacrity and an affair appears to have ensued. Piers Dunkerley, a slightly younger boy whom Britten had met in 1934 while visiting his old preparatory school, brought out a typically parental, advisory streak in the composer: 'I am very fond of him – thank heaven not sexually', he wrote, 'but I am getting to such a condition that I am lost without some children (of either sex) near me' (*Letters*, 403).

So it was prove: the ease with which he could enter into children's worlds, as well as the precipitous moments in his encounters with young boys, are outlined in some detail by Carpenter (especially 341–54). It seems that Britten was captured at many levels by the notion of return to a perfect state symbolized by childhood – it has been called 'innocence', but a more useful concept is that of the 'pre-symbolic' explored by disciples of Lacan or of 'nescience' in the words of Hardy's poem 'A time there was' (set in *Winter Words*). The entry into the 'symbolic' (language) and the patriarchal order make this state impossible to recapture, and much of Britten's music is about the difficulty and pain of separation from it, but it is arguably his principal fount of non-verbal inspiration. Lack produces desire (in the already lost adult); and the

sexual element that occasionally obtrudes, and can never satisfy or be satisfied, is a symptom of that lack. What Britten discovered – possibly aided by his constant invocation of pre-symbolic elements such as the mother's voice (many noted that Pears's voice strongly resembled his mother's) – was a way of accessing powerful messages from beyond the pre-verbal barrier, even perhaps occasionally of breaking that barrier, at a time when musical modernism was setting up barbed wire fences everywhere and driving 'art' music increasingly into the cold unfeeling camps of masculine intellect and order.

Meanwhile, the stream of film and incidental music was augmented by some important events, such as the amazingly rapid completion of a major new work, *Variations on a Theme of Frank Bridge*, for the Boyd Neel Orchestra to play at the Salzburg Festival in August 1937. With its penetrating and unexpected parodies of genres and styles, and magnificent fugue and finale containing other references to Bridge's music, this work became for a time a standard against which other Britten works were judged. His adopting the congenial variation form had been foreshadowed in the slight *Temporal Variations* for oboe and piano written and performed at the end of 1936 and abandoned – the *Times* critic's reaction was to become a standard refrain: 'It is the kind of music that is commonly called "clever"' (*Letters*, 784). The same might have been said of the Auden song collection that followed the Bridge Variations. *On this Island* open with a Baroque flourish and Purcellian melisma that no sensitive English songwriter of the previous 50 years would have countenanced, and ends with a throwaway dance-hall tune to match Auden's parody of bourgeois materialistic existence. December 1937 saw the completion of the suite of Catalan dances, *Mont Juic*, written in collaboration with Lennox Berkeley in memory of Peter Burra, a close friend of Pears's. Berkeley was to move to the Old Mill at Snape that Britten had bought using his inheritance from his mother.

The following year brought an unusual triumph when on 18 August 1938 Britten played the first performance of his Piano Concerto, a display piece dedicated to Berkeley, at the BBC Promenade Concerts under Sir Henry Wood. An eloquent passacaglia-style Impromptu supplanted the weakest movement, the cheekier Recitative and Aria, in a 1945 revision. But the original slow movement belongs more fully to a work that is as much a milestone as the Bridge variations. After the responsible, serious instrumental pieces of the 1930s, this display of high spirits touched with sentimentality indicates a willingness to abandon a too-limiting decorum and give in to sensuality. The reference in this simply joyous, often almost campy work is Poulenc rather than Shostakovich, Prokofiev or any more approved master. No wonder Britten's friends and chief defenders, as well as the avuncular journalistic critics, deplored it: according to Marjorie Fass, the Brits 'all utterly agree with the drastic criticisms of The Times & Sunday Times & Observer & Telegraph' (*Letters*, 577), and even Peter Evans refers to 'the irritatingly smart vulgarity of the final march' (D1979, p.47). Britten himself could not 'see anything problematic about the work. I should have thought that it is the kind of music that either one liked or disliked – it is so simple' (*Letters*, 576).

After this, apart from incidental music for a big Basil Dean production (J.B. Priestley's *Johnson over Jordan*) opening in February 1939, there were several parting salutes to Britten's radical affiliations: incidental music for the Group Theatre production of the Auden-Isherwood play *On the Frontier*, and a partsong *Advance Democracy*, written for the Co-operative movement to words by the editor of *Left Review*, Randall Swingler (both in November, 1938); and in February–March 1939 an orchestral cantata, *Ballad of Heroes*, to words by Swingler and Auden in commemoration of the British members of the International Brigade who fell fighting the fascists in Spain.

3. North America, 1939–42. Britten left for North America in April 1939. There were many reasons for him to try his hand abroad: the growing cloud of fascism over Europe; the plight of pacifists in the war that seemed inevitable; the departure of Auden and Isherwood in January; the frantic pace of his career and the need to determine his own direction; discouragement from patronizing or hostile reviews (to which the thin-skinned composer had already begun to show sensitivity); the opening up of new opportunities; and the curtailing of difficult emotional and sexual situations from which, from his letters, he appears to be trying to rescue himself – with Scherchen, Berkeley and perhaps others. The way was now clear for a commitment to Pears, and the union of the two men took place early in the visit, which began in Canada. After a trip to New York, they visited Copland at Woodstock in the Catskills and rented accommodation there for part of the summer. They then went to Amityville on Long Island to visit Pears's friend Elizabeth Mayer, who accommodated them and also provided a surrogate mother for Britten.

The music of Britten's American years reflects his emotional turmoil. *Young Apollo*, written in summer 1939 for a CBC broadcast with the composer as piano soloist, was inspired not only by the last lines of Keats's *Hyperion* but also by Scherchen; originally designated op.16, it was withdrawn and not heard again until after Britten died, either because of the personal association, or (more likely) because of its dependence, musically, on an elaboration of the A major triad, a kind of musical minimalism that was not the order of the day. *Les illuminations*, completed in October, presents a fuller and more complicated picture of (homo)eroticism, focussed on the inevitably confused subject who 'alone holds the key to this savage parade'. It incorporates a typical double focus on the major triads on B♭ and E which is used not only to sustain ambiguity over long musical stretches but also (as in the opening fanfare) to express simultaneously exhilaration and confusion. Whatever one makes of the dedication of *Antique* to Scherchen and *Being Beauteous* to Pears, or of the direct sexual imagery with which the latter ends, or indeed the cruising depicted in *Parade* (its theme taken from the abortive *Go play, boy, play* suite), it is difficult to avoid the conclusion that the piece as a whole encapsulates a certain hard-won victory over the distancing effect from the purely corporeal to which British middle-class education was dedicated. It joyously and unashamedly reclaims music as an immediate, physical act. It is ironic that the decade of technical struggle towards professionalism should have led to the moment at the end of *Phrase*, after the transfigured exclamation 'et je danse' on a top B♭, where the string orchestra turns into a giant guitar to accompany a delirious diatonic melody supported by root position

major chords. Copland – surely the 'older American composer' who said of *Antique* that he 'did not know how Britten dared to write the melody' – was shocked; even Pears labelled this incandescent work 'a trifle too pat' (Mitchell and Keller, D1952, pp.65–6): it is difficult to trust erotic joy on hearing it (at least, when it is unclouded by chromaticism), and musical solutions of personal problems are suspect. It is for reasons like this that one can see the Britten of this period castigated by friends and enemies alike for being too 'clever' and why even Copland 'picked certain things in Ben to pieces', as Colin McPhee put it, adding that 'he must search deeper for a more personal, more *interesting* idiom . . . good craftsmanship is *not* enough' (Brett, E1994, p.237).

The *Seven Sonnets of Michelangelo*, completed almost exactly a year later and written for and dedicated to Pears, can be taken as a further gesture towards this reclamation of the physical (as before, through another language and culture) and the official inception of their partnership. Among the other works, *Sinfonia da Requiem*, 'combining my ideas on war & a memorial for Mum & Pop' (*Letters*, 803), is a culmination of much of the earlier symphonically conceived music and is characteristic of later works in combining personal and social concerns. The Japanese government, who paid for it, would not perform it at the festival celebrating their empire's 2600th anniversary; one can only wonder at Britten's naivety in accepting the commission.

1939–42 was a prolific period, for Britten also completed the Violin Concerto in the summer and autumn of 1939 when Britain declared war. The work opens in a suitably foreboding manner and ends in melancholy and nostalgia – so different from the ebullient Piano Concerto of little more than a year earlier. There was also the rather homespun *Canadian Carnival*, a *Sonatina romantica* to wean a keen amateur pianist host from Weber, *Diversions* for piano (left hand) and orchestra, two two-piano works, a second Rossini suite, to be used by Balanchine in a work for Lincoln Kirstein's American Ballet Company, String Quartet no.1 and the eccentric-sounding *Scottish Ballad* for two pianos and orchestra. Among works completed early in the visit, besides the Violin Concerto and incidental music for a further BBC play, was a setting of seven poems of Gerard Manley Hopkins, intended for Pears's Round Table Singers, but abandoned. In late 1941 came another occasional piece (now called *An American Overture*) heavily indebted to Copland and written for Rodzinski and the Cleveland Orchestra; when it came to light in the early 1970s, Britten commented that his 'recollection of that time was of complete incapacity to work; my only achievements being a few Folk-song arrangements and some realisations of Henry Purcell' (*Letters*, 985).

One important project of the American period, *Paul Bunyan*, was also one of its most problematic, a patronizing attempt by W.H. Auden to evoke the spirit of a nation not his own in which Britten was a somewhat dazzled accomplice – he was vague about the nature of the title role's manifestation and staging only six months before it opened. A bruising response from 'old stinker Virgil Thompson' [*sic*] and the other New York critics did not help matters. The work was withdrawn and reinstated as op.17 only when Britten took it up near the end of his life (a good overture, wisely abandoned as too long, was subsequently orchestrated and published). The composition and production of *Bunyan* involved Britten and Pears in exchanging the luxury of the Mayer Long Island household for Auden's louche and alcoholic lifestyle in a Brooklyn Heights villa; from this bohemian atmosphere they fled soon after the production of *Bunyan* at Columbia University in May 1941. They took up an invitation to stay with the duo pianists Rae Robertson and his wife Ethel Bartlett at Escondido in California (where the *Scottish Ballad*, dedicated to them, was mostly written); there they came across the radio talk by E.M. Forster printed in *The Listener* that began: 'To talk about Crabbe is to talk about England'. Dissatisfaction with American life had already surfaced in Britten's letters ('the country has all the faults of Europe and none of its attractions', he wrote to a friend: *Letters*, 797), as well as in one of those illnesses that often signalled his dissociation from his surroundings. Forster's article served as a catalyst to initiate the next stage in Britten's progress.

The flight to North America had enabled Britten to find out more about himself in general, to mature as an artist and person, and to find a certain level of acceptance among others and, more important, in himself about his sexual orientation (although many people recall continuing signs of shame). It had also given him an opportunity to reflect on his direction. The epiphany brought about by Forster's article not only sent him and Pears to Crabbe for the extraordinary subject of his first real opera but also may have given him the idea that if he did return it should be with the intention of becoming the central 'classical music' figure in Britain (as Copland was struggling to do in the far more diffuse culture of the USA).

Whether or not this was a fully conscious process, Britten began to define his relation to the British musical

2. Benjamin Britten with W.H. Auden at Tanglewood, 1946

tradition during the American years. There was, for example, the need to release aggression towards it, palpable in the 1941 essay 'England and the Folk-Art Problem', a statement so angry that it studiously avoids mentioning Vaughan Williams or Holst; Parry and Elgar are projected as the binary opposition haunting English composition, the one favouring 'the amateur idea and . . . folk-art', the other somewhat surprisingly seen as emphasizing 'the importance of technical efficiency and [welcoming] any foreign influences that can be profitably assimilated'. The authenticity of folksong is intelligently attacked, and composers' dependence on it as raw material is deemed either unsatisfactory or the sign of a need for discipline which the second rate cannot find in themselves. Actual English folktunes are allowed a certain 'quiet, uneventful charm' but 'seldom have any striking rhythms or memorable melodic features'. Yet the ambivalence, reflected in so many aspects of his life, did not prevent Britten from making a considerable investment in arranging them – ostensibly for himself and Pears to perform, though as time went on and volume after volume succeeded the first (printed in 1943) ulterior motives might be suspected. They gave Britten the chance, for example, to declare his independence from the 'Pastoral School' by conceiving the exercise of arrangement very differently. Unlike Cecil Sharp and Vaughan Williams, who assigned an idealized, essential artistic quality to the melodies which their accompaniments were thought to reflect, Britten recognized that the venue changed the genre and turned them in effect into lieder or art-song, and proceeded brilliantly on that premise. To see how far he got one should turn from the easy seductiveness of *The Salley Gardens* and the psychological perceptiveness of *The Ash Grove* to the exquisite and exhilarating settings of *Moore's Irish Melodies* published in 1957.

Equally important in this redefinition of himself are Britten's 'realizations' of the music of Purcell and his contemporaries – the Tudor composers (except for Dowland) were out of bounds because of their adoption by Vaughan Williams and the pastoralists. Two song arrangements date from at least 1939, several were done in the USA, and a much larger number were prompted by the 1945 celebrations of the 250th anniversary of Purcell's death. The choice was in tune with Britten's aesthetic as an aspiring dramatic composer: he had already adopted a rhetorical style far beyond the parameters of contemporary English songwriters with their devotion to speech-rhythm, and was later in the booklet accompanying *Peter Grimes* to make a manifesto-like statement about restoring 'to the musical setting of the English language a brilliance, freedom and vitality that have been curiously rare since the death of Purcell' (Brett, E1983, p.149).

The results are not so easy to assess as the folksong arrangements. Partly it is a matter of culture and epoch: 'realization', prevalent up to the 1950s, became extinct in the light of understanding of the appropriate delivery of 17th-century song. To historically informed taste, Britten's contribution appears to vie for attention with Purcell's melodies or declamatory gestures, and the bifocal effect inevitably becomes distracting. Britten is at his best when Purcell's music is at its strangest: *Saul and the Witch at Endor*, for instance, is inspired in its use of piano sonorities to re-compose the work. The character and extent of these pieces (which number 40, far greater than the demand for mere recital fodder) raise another issue, however, about whether the process is more to do with appropriation or competition than homage, not a simple musical act enabling Purcell to be 'heard' but rather another Oedipal episode in Britten's complicated trajectory.

With a relation to indigenous and historical music more clearly defined, one further element of the British tradition demanded attention. As if to think of England were to think of choral music, on the journey home Britten wrote two substantial pieces, the unaccompanied *Hymn to Saint Cecilia* and *A Ceremony of Carols* for boys' voices and harp. These pieces combine a secure technique and an exquisite sound palette, a modernistic coolness in expression with a plentiful supply of emotional intensity, a musical language distinguished at once by its pronounced character as well as its restraint: all the marks of a classicism that cannot easily be discerned in earlier British music of the century.

4. Return to England, 1942–50. Any bid for pre-eminence, as Britten must have realized on arriving back in England in April 1942, was a matter not simply of matching Vaughan Williams's achievement but of contributing something new and powerful to British musical life. The choice was opera. Vaughan Williams had been unsuccessful in this sphere and, further, no English opera had made its way into the standard repertory. But the risk of failure was greater, as Britten was aware. He still played childlike superstitious games to bolster his confidence as a composer (Carpenter, 239–40), and made comments like the one remembered by Tippett, with whom Britten and Pears struck up a close friendship: 'I am possibly an anachronism. I am a composer of opera, and that is what I am going to be, throughout' (Carpenter, 193–4).

Pears had worked on the scenario of *Peter Grimes*, the story that the two had culled from Crabbe's *The Borough* after reading Forster's article. It was an unlikely and unpromising tale of a rough fisherman who beat and lost his apprentices, went mad and died. Isherwood, who turned down the job of librettist, was 'absolutely convinced that it wouldn't work' (Brett, E1983, p.36). But they persevered, turning Grimes into a more sympathetic figure of 'difference', a misunderstood dreamer. Montagu Slater, whom they now contacted, further shaped the libretto in a way that uncannily connected the private concerns of a couple of left-wing, pacifist lovers to public concerns to which almost anyone could relate.

The author Colin MacInnes confided to his private diary in the late 1940s that 'Grimes is the homosexual hero. The melancholy of the opera is the melancholy of homosexuality' (Tony Gould, *Inside Outsider: the Life and Times of Colin MacInnes*, London, 1983, p.82). Its theme of the individual persecuted by the community for no other reason than his difference cried out to be interpreted in this way, but could not then be publicly articulated. A more remarkable aspect of the allegory, however, had to do with 'internalization', the classic form of oppression. Those who do not have full status in society come to believe the low opinion others have of them: Grimes's fate is ultimately determined not simply by his isolation but by his capitulation to Borough opinion at the climax of Act 2 scene i, a much delayed, extremely powerful cadence on to B♭, the Borough's own key. On striking his friend Ellen in response to her 'We've failed!', Grimes takes up the offstage church congregation's

3. Benjamin Britten (right) and Peter Pears at The Old Mill, Snape, c1944

'Amen' in his 'So be it', proceeding to the long-awaited full cadence with 'and God have mercy upon on me' set to a motif that dominates the rest of the opera; the four triadic chords that define its limits and the angry brass canon it prompts both indicate that there can be no escape. Here Grimes internalizes society's judgment of him and enters the self-destructive cycle that inevitably concludes with his suicide. The two terrifying manhunts may have served as catharsis for Britten's own fear of persecution on returning to England as homosexual and pacifist and intensified the social message about internalization. The remaining problem, which apparently held up the opera for almost a year, was how to combat society's tendency to pathologize deviant behaviour such as Grimes's. To emphasize the social theme of the individual's tragic internalization of community values, the references to a domineering father in earlier versions of the libretto, for instance, had to be erased. The result was a brilliant appeal, made more palpable and convincing through music, to the alienation of every member of the audience: 'In each of us there is something of a Grimes' (Keller, in Brett, E1983, p.105).

It was a feat to get the audience to identify with an allegorical figure (easily interpreted as 'the homosexual') and to locate the problem as one of society's vicious treatment of difference. The opera also laid bare the paranoid nature of society's scapegoating someone wrongly felt to be threatening, and it questioned the operation of violence in which everyone is brutalized, not merely aggressor and victim. It also raised the issue of responsibility in the relation of individual and state in modern democracies, brought to the fore by the focus on the deviant as an ordinary working man. The authors' passionately held views on these topics, realized in music of enormous persuasiveness, led to success from the moment of the opera's first performance at Sadler's Wells Theatre, London, on 7 June 1945 (*see* OPERA , fig.27). It was quickly taken up by other companies in Europe and the USA, and in due course became one of the rare 20th-century operas to enter the repertory.

Britten's actual return to England had been anticlimactic. Although the tribunal he faced, as a conscientious objector, called him up for non-combatant duties, he was allowed on appeal to go free. This was also true of Pears. Their giving recitals all over the country for CEMA probably counted in their favour, as did Britten's continuing work for the BBC. Pears meanwhile branched out into opera and was taken into the Sadler's Wells Opera Company; seeing him in this new context evidently persuaded Britten that he should take the part of Grimes, originally planned for a baritone. Through Pears, Britten met such people as Eric Crozier, the staff producer who was to direct *Grimes*, and Joan Cross, artistic director of Sadler's Wells, which led to the company's giving the first performance.

There was a lull in Britten's flow of composition around this time, owing partly to a serious attack of measles for which he was in hospital and then off work in March and April 1943. Several projects were abandoned, but during the months he was resting he composed, at Snape, the *Serenade* for tenor, horn and strings. In this work he invented his own kind of shadowed pastoralism, not the ideal England of the folksong composers but a place in which the worm finds the bud and a darker side of medieval experience is explored (in the Lyke Wake Dirge); the high ostinato that is also the strophic vocal line enabled a particularly fruitful orchestral dialogue to suggest deeper levels to this poem. The *Serenade* was followed by the Prelude and Fugue for strings, written for the tenth anniversary of the Boyd Neel Orchestra, with a part for each of the 18 players in the fugue. More important was a commission from a clerical visionary in the arts, Walter Hussey, which afforded Britten the opportunity to set lines from *Jubilate Agno* by the 18th-century poet Christopher Smart, who himself had a persecution complex. At the heart of *Rejoice in the Lamb*, framed by a Purcellian prelude and postlude and cheerful choruses and solos, lies a chilling choral recitative rehearsing the theme of oppression that was to boil over in *Peter Grimes*, and a spiritual resolution ('But he that was born of a Virgin shall deliver me') that looks forward to the very different scenario of *The Rape of Lucretia*. The *Serenade* was dedicated to Edward Sackville-West, an elegant new gay admirer who had helped with the choice of poems. He was working on a radio version of *The Odyssey* called *The Rescue* (broadcast in November 1943) for which Britten wrote extensive incidental music. The year ended with a setting of *The Ballad of Little Musgrave and Lady Barnard* for a music festival organized by a British soldier in a German prison camp. The delayed composition of *Peter Grimes* began in 1944, which otherwise produced only a *Festival Te Deum* and two carols for Sackville-West's BBC programme 'A Poet's Christmas', one of them a setting of Auden's 'Shepherd's Carol'.

The success of *Peter Grimes* led to a fresh outburst of compositional activity. *The Holy Sonnets of John Donne*, another cycle written for Pears, much of it during illness, is among Britten's darkest works, couched in a severely

modernist musical language incorporating what he had learnt from Purcell's declamatory style and (in the last song) ground bass technique. He himself attributed its despairing and angry mood to a visit to the Belsen camp where he and Yehudi Menuhin played for survivors during a ten-day tour of Germany in July 1945 immediately preceding composition. Purcell is also a presence in two other major non-operatic works: the third, final movement of the String Quartet no.2, entitled 'Chacony', is built on statements of a ground bass grouped in sets and separated by solo cadenzas for three of the instruments. The first movement is among Britten's most radical experiments with sonata form, both in the enormously extended exposition and the condensed recapitulation, in which the three successive phrases of the first theme are superimposed. He wrote to Mary Behrend, who commissioned it, that 'to my mind it is the greatest advance I have yet made'. The third work, a set of variations on a very good dance-tune by Purcell, came about as the result of a film commission from Basil Wright (now with the Crown Film Unit, the successor to the original GPO unit) for the Ministry of Education. The film, with a commentary (by Slater) spoken stiffly by Malcolm Sargent, now seems dated, but the clarity and directness of Britten's score shines through in the concert version, entitled *The Young Person's Guide to the Orchestra*.

A revolt within Sadler's Wells (several singers refused to take part in a recording of *Peter Grimes*) might have impeded further success in opera. But Britten had already begun planning, in summer 1945, a season at Dartington with an independent company giving opera on a small scale. In the event, Crozier and Cross broke away from Sadler's Wells, and Glyndebourne took over from Dartington. Crozier's enthusiasm for a French troupe, La Compagnie des Quinze, provided a model for the new Glyndebourne English Opera Company and led to his translating one of their plays, André Obey's *Le viol de Lucrèce*. Meanwhile, Britten had been in touch with the Rhodesian poet Ronald Duncan – they had collaborated over a *Pacifist March* in 1936–7, he had helped Britten change Slater's mad scene in Act 3 of *Peter Grimes*, and Britten was writing music for his play *This Way to the Tomb* in late 1945. Duncan put aside his planned libretto on Chaucer's *Canterbury Tales* and set to work on Obey's play, preserving his narrators as Male and Female Chorus, to be sung by Pears and Cross. The result is not without problems. Instead of Slater's relatively workmanlike language, Britten was faced with an overwritten verse drama of the kind that T.S. Eliot had made fashionable. But the opera works well as a treatment of oppression, with gender as the mark of difference. Like Grimes, Lucretia is a victim. Roman society is also portrayed as corrupt and oppressive, and she is raped by an Etruscan prince, Tarquinius, who embodies its worst features. But there is nothing alienated about her. Whereas Grimes, implicated in his apprentice's deaths, is musically represented as a tarnished yet innocent victim of society, Lucretia is truly innocent, a victim of a vicious patriarchal order. Equally a victim of internalization, she is forced (in a manner familiar to rape victims) to create her own guilt out of the aggressor's crime. This cruel act is accomplished musically by the recall of his 'Yet the linnet in your eyes / Lifts with desire' during her 'confession'. The introduction of a specifically Christian perspective, especially in the conclusion, leads to difficulties because, although a religion fully addressed to victimization and sacrifice, it sees suicide as sin, not noble sacrifice. It is easy enough to dispel these doubts, however, while listening to the E major finale, another brilliant passacaglia; and the opera also develops a distinctly Purcellian recitative style that matches the Baroque quality of Duncan's lines. Its scoring and pacing, too, mark a distinct advance over *Peter Grimes*.

In spite of a double cast of fine singers (one included as Lucretia the radiant Kathleen Ferrier in her operatic début), *The Rape of Lucretia* played to poor houses on tour after its Glyndebourne performance in July 1946. Britten and his supporters now founded the English Opera Group, independent of Glyndebourne. After Duncan's idea of a version of *Mansfield Park* was rejected, Crozier wrote a libretto for *Albert Herring*, moving Maupassant's short story *Le rosier de Madame Husson* from the French provinces to an imaginary Suffolk town, 'Loxford'. Among its weaknesses are pert caricatures of, and condescending attitude towards, provincial working-class people. But the Oedipal subject matter touched an English nerve: the point of Maupassant's story lies in the subsequent ruin and degradation of the hero, not his mother-domination. One reason why the opera disturbs, why it can have the effect of Mozartian or Shakespearean tears behind laughter, is that it presents an intensified version of a complicated situation between mothers and sons. The sinister, obsessive nature of the music for Mrs Herring – one of the best of Britten's many predatory women – and the true musical pathos of Albert, as well as his rising anger in the important aria in Act 1 scene iii, create a viable central comic situation, close enough to the truth to hurt.

It is also notable that Albert does not 'become a man'. He becomes himself, in his own way, without having subscribed to society's pattern of initiation: he returns without any trophy (the crumpled lost wreath thrown into the audience at the end a suitable symbol of his virginity). What Albert does sing in dismissing his mother and the rest of those arrayed against him is a splendid new integration of 'light music' into Britten's style, not simply the enjoyable pastiche of *Paul Bunyan* and the cabaret songs. Those whom he confronts and confounds on his return have just sung the Threnody, one of the most striking of Britten's many vocal passacaglias, one that invokes Verdi more obviously than Purcell, and that earlier critics often felt overbalanced the work. It is easy to see why they might from purely burlesque productions (like Frederick Ashton's original, from all accounts) without suggesting the sinister potential in characters like Lady Billows and Mrs Herring as well as their absurdity. It should also be noted that once again the physical plays an important part. Sid and Nancy's sexual appetites, portrayed in music of extraordinary excitement and allure, are as powerful as their spiked lemonade (and the Wagnerian reference that accompanies it) in enabling Albert to find himself.

During the English Opera Group's 1947 summer tour of *Albert Herring* and *The Rape of Lucretia*, Pears proposed the idea of an Aldeburgh Festival. It was an inspired response to Britten's vulnerability, personally as well as musically, to the kind of hostility he had experienced in his early operatic ventures. The festival also had the advantage of institutionally personifying him and what he stood for when he and Pears were about to

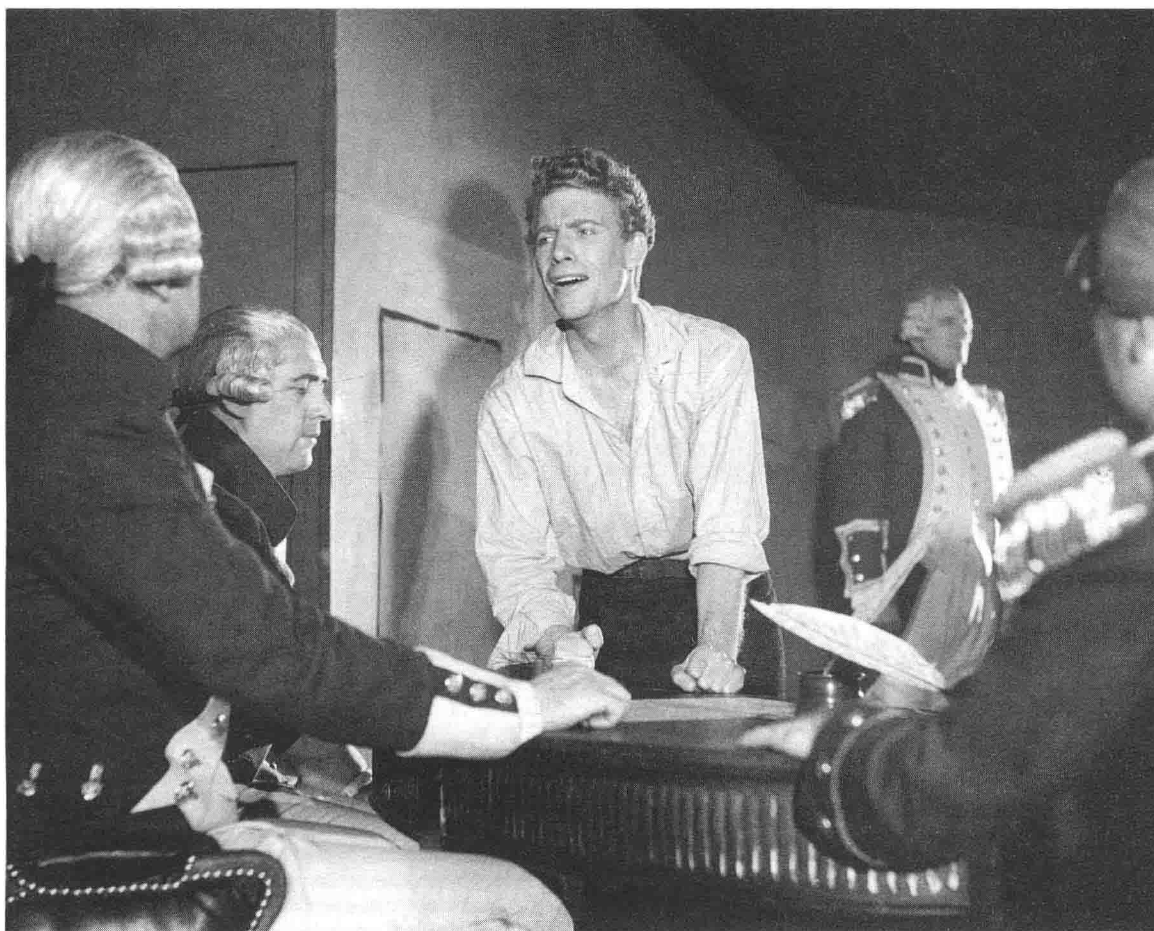
4. Britten with (from left to right) Peter Pears, E.M. Forster, Robin ('Nipper') Long and Billy Burrell, Aldeburgh, 1949

move into Crag House, in the centre of the town. Moreover, besides benefiting from Britten's abilities as an accompanist of the highest rank, it offered a further outlet and focus for his other performing abilities (not to mention his astute grasp of finances). With *Albert Herring*, he had for the first time conducted one of his own operas. Apparently he never fully enjoyed the role, yet he won the devotion of almost every musician who performed under his direction and became a notable interpreter of other composers' works. The London critics were pointedly not invited to the opening, and many of them suspected its potential for cliquishness and provinciality. But by virtue of his abilities and his principles Britten drew to Aldeburgh the foremost international musicians of the age, whether composers or performers, after forming partnerships with them (such as his Schubert duet performances with Richter or his recitals with Rostropovich) in such a way as figuratively to invert the relation of country town to capital. The closeness of the Aldeburgh family (or clique) was often, and sometimes brutally, disturbed when members were suspected of giving less than their best. To have a literal family to whom to attach himself was always a prerequisite for Britten; having colleagues whom he trusted in a place that he knew was an extension of that. Like all unhappy families, it became increasingly unhappy in its own particular way and for a variety of reasons (explored particularly by Carpenter, 319–21, 368–70, 376–7, 520–29 and passim), including Britten's continuing insecurity. But, it was a positive force in British music, and encouraged Britten's work immensely.

A trio of joyful works followed in 1947, the first such outpouring since the lull before the composition of *Peter Grimes* (1946 had seen merely the *Occasional Overture*, commissioned to celebrate the opening of the BBC Third Programme and later withdrawn by Britten, and a slight organ work). The 17th-century cantata form exemplified in Purcell's longer songs impressed Britten into adopting it for Canticle I, a setting of Francis Quarles's poem 'My beloved is mine', inspired by passages from *The Song of Solomon*. In contrast to this serious and full-hearted work for his tenor, *A Charm of Lullabies* was a pleasant cycle written for a favourite mezzo-soprano, Nancy Evans, recently married to Eric Crozier. The third was a cantata for the opening of the first Aldeburgh Festival on 5 June 1948, with an official première a few weeks later (24 July) to celebrate the centenary of Lancing College (Pears's old school). Britten must have been by this time secure enough in his underlying convictions as a composer to ignore the undoubted disapproval of modernist taste for any endeavour involving a large number of amateur musicians. Apart from Peter Pears as the adult saint, *Saint Nicolas* required only a professional string quartet and percussionist, with a proficient organist and duo pianists. The school choir was supplemented at Lancing by parts for choirs of other linked schools, and the work included two hymns for the audience. This was not among Britten's most adventurous or even most accomplished works, and would have appeared ludicrous to the postwar avant garde. But from the lilting A major-Lydian waltz to which the story of Nicolas's birth and growth to adolescence is told to the broader issues of both involvement in Christian history and shared experience, it seems now as courageous and adventurous as the experimental music of the time. Forster, who had met and admired Britten and Pears, and was attending the first Aldeburgh Festival as lecturer, called it 'one of those triumphs outside the rules of art' (*The Listener*, 24 June 1948) and reported with enormous enthusiasm about the entire festival.

Meanwhile, the English Opera Group needed new material to keep going, and Britten had promised a version of *The Beggar's Opera* for their 1948 season, to be directed by Tyrone Guthrie (who had recently produced *Peter Grimes* at Covent Garden). Fortunately, Britten worked from an early edition of the original in which the tunes lack Pepusch's bass lines. He could therefore abandon the constraints of the Purcell realizations and construct both harmony and orchestration; he even brought numbers together in interesting cumulative sequences. The project signifies the culmination of a process of selfconscious rapprochement with history and national identity, part of what Britten thought necessary, as a newly connected and 'located' artist, to fulfil his role. Today, the work seems over-elaborate, trading immediacy for musical invention: the music goes upscale, like the accents of the opera singers who generally take the roles, and compared with the Brecht-Weill *Die Dreigroschen-*

oper it sounds musically tame and lacking in bite. The drama is in line with the critique of society, religion, the law, family and social order that Britten's works notably encompass. But the tone, as in *Albert Herring*, often veers towards cosiness in a way that undercuts the portrayal of brutality and mendaciousness that Britten would earlier have condemned more roundly in musical terms. The process is best understood with reference to Britten's own ambivalent position as a 'discreet homosexual' (Alan Sinfield's term), which encouraged both protest or subversion but also accommodation to the status quo. The particular consistency of that mix at any given time is a key to a deeper understanding of his career.



For the 1949 season, Crozier again worked on a project involving audience participation, the 'entertainment for young people' *Let's Make an Opera*, which included four audience songs. The opera that formed the second half of the event was *The Little Sweep*, a scaled-down version of the oppression theme in which the middle-class audience can identify with the stage children, who help poor mistreated working-class Sam, the chimney-sweep, to freedom. This constituted genuine release and fulfilment for Britten even if Carpenter (p.176) is right to comment on its regressive psychology.

Britten was deliriously happy while writing the opera in spring 1949; less so with the project it interrupted, the *Spring Symphony*. He described his 'doubts and miseries' over it to Serge Koussevitzky, who commissioned it. The doubts must have been largely about projecting an orchestral song cycle as a symphony. He explained the symphony as 'not only dealing with the Spring itself but with the progress of Winter to Spring and the reawakening of the earth and of life', and its form as 'in the traditional four-movement shape of a symphony, but with the movements divided into shorter sections bound together by a similar mood or point of view' (Britten, 1949–50, p.237); he saw no need to produce a traditional symphonic 'argument' but rather wanted to project a series of controlled gestures in four distinct parts, the second and third analogous to the slow movement and scherzo of a symphony, and with a single poem for the more extended, joyous finale. The separate settings have an effect comparable to the series of discrete numbers through which Britten had learnt in his operas to generate cumulative feeling and climactic structures. The first invocatory movement is in ritornello form, and a fairly strict thematics of instrumentation persists, suggesting Baroque 'affects' rather than Romantic arguments. In the finale, a celebratory episode complete with rude blasts on the cowhorn, things are kept in motion by a rousing waltz tune upon which is projected, in a climactic peroration, the famous *Sumer is icumen in* cast in duple time. The emotional centre of the work, however, lies in the final section of the second part, a setting of W.H. Auden's *Out on the Lawn*. Britten would have known the significance of this poem (from which he selected four of the 16 stanzas) as a description of an actual spiritual experience of June 1933 which the poet called a 'Vision of Agape' and which prefigured his later conversion to Christianity. Britten's setting, which incorporates some of his most distinctive orchestral and vocal effects, recalls for an anguished moment in its last stanza the mood of the more radical *Our Hunting Fathers*, again providing a reminder of the darker reality of life, a touch that balances and therefore validates the 'retrogressive' search for 'innocent' states of mind in other parts of the score.

In late 1949 Britten found time to write a wedding anthem, *Amo ergo sum*, for his friends Lord Harewood and Marion Stein on a text by Ronald Duncan, and in early 1950 a charming and classic set of choral songs, the *Five Flower Songs*, for the Elmhirsts of Dartington Hall.

5. SUCCESS AND AUTHORITY, 1951–5. It was natural, in the light of Britten's success as a composer, especially in opera and its performance, for the Arts Council to commission a major opera from him for the 1951 Festival of Britain. For his part, he must have realized that his first substantial work written specifically for Covent Garden ought also to break new ground, and in the event *Billy Budd*, besides representing a considerable musical advance, also marks a distinct transition in Britten's operatic output from a focus on oppression and its internalization to an exploration of authority and its ramifications. The issue of authority is of particular importance and also confusion to homosexual people. Pertinent in Britten's case is the conflict over parents, who are loved and adored on the one hand as encouraging protectors and mistrusted on the other as figures of authority, as uncomprehending as the rest of society in assuming universal heterosexuality and censuring homoeroticism. A crisis on this issue would predictably be generated as the composer moved into the 'establishment' (symbolized by his being created a Companion of Honour in 1953).

Inviting a major literary figure like E.M. Forster to become his librettist was possibly to risk a recurrence of the difficulties with Auden, but Forster was a master of prose, not poetry, and the author of *Howard's End* and *A Passage to India* held the promise of helping Britten move beyond his preoccupations with the innocent and the oppressed. After some discussion, the two settled unshakably on Melville's *Billy Budd* (see P.N. Furbank, *E.M. Forster: a Life*, London, 1977–8, ii, 283–6). In adapting the story, Forster wanted to 'rescue Vere from Melville' (that is, from the excessive respect for authority and discipline implicit in Melville's account of him), to 'make Billy, rather than Vere, the hero', and to suggest redemption through love, or at least eternal hope, through the image of the 'white sail', mitigating and limiting Melville's belief in Fate. But the Prelude–Epilogue frame in which the aging Vere recalls the action places the dramatic emphasis firmly on his moral choice and predicament. In this respect, one of Britten's main achievements was to develop the ambiguity and uncertainty implicit in Vere's actions and words through purely musical means. Notable is the way the stratified texture at the opening of the Prologue projects the conflict between B♭ and B♮, which then persists as a musical 'problem' reflecting what attracted Britten to the topic, 'the quality of conflict in Vere's mind' (see Rupprecht, E1996). The famous 'interview' interlude in which, with triadic chords each harmonizing the notes F, A or C but contrasted by dynamics, orchestration and tessitura, Britten suggests the indeterminate nature of the private moment in which Vere tells Billy that he has been condemned has also been shown to promote an uneasy, unstable tonal dialectic expressing an essentially equivocal mental state rather than any firm triumph of F major (Whittall, E1990). Near the end of the Epilogue, Britten appears to dissolve and dispel the forces of both good and evil (the melody of Billy's farewell, a reference to the

5. Act 2 scene ii of the original production of Britten's 'Billy Budd', Covent Garden, London, 1951, with Theodor Uppman in the title role and (in the background) Peter Pears as Vere

interview chords, and the ominous brass motif associated with Claggart as evil) in a final, radiant B♭ chord. But that very epiphanic moment sets off once again the hefty drum-beat motif that underpins the trial and ultimately derives from the sea chase earlier in Act 2. The implication that Vere is hopelessly contaminated by his role in killing men – as leader in battle as well as naval disciplinarian – is powerful on the social as well as personal level. The advance of *Billy Budd* on *Peter Grimes* in both dramatic and musical terms is nowhere so telling as in this culminating moment, but is also readily apparent in almost every other aspect of the score.

The music of *Billy Budd* took over a year to write and months to score, leaving time only for two small-scale instrumental pieces written for individual soloists, *Lachrymae*, for viola (William Primrose) and piano, and *Six Metamorphoses after Ovid*, for oboe solo (Joy Boughton); the dedicatees played them at successive Aldeburgh festivals in 1950 and 1951. In addition, there was the 'realization' of Purcell's *Dido and Aeneas* for the English Opera Group's 1951 season. In the aftermath of *Billy Budd* Britten wrote the extraordinary Canticle II, on the Chester Miracle Play version of the story of Abraham and Isaac – a footnote to the theme of the opera, perhaps, but arresting in its own right for the opening, in which the alto and tenor voices combine to invoke the voice of God, punctuated by wide piano arpeggios reminiscent of the opening of the first quartet.

The death of George VI in 1952 catapulted Britten into another large-scale opera for Covent Garden. That year, Imogen Holst arrived at Aldeburgh as amanuensis and devoted disciple: her presence at festival concerts with Britten and Pears added status to Britten's English lineage – her father's work was also admitted into the local canon. Britten had been exploring various libretto ideas for some time with Forster's friend, William Plomer, an able literary figure personally less demanding than the novelist, when Lord Harewood began negotiations that led to the commission of an opera on the coronation of Elizabeth II in 1953. Elizabeth's Tudor predecessor seemed the appropriate subject for what was intended as a quintessentially 'national' opera with a Verdian sweep about it. To base it on Lytton Strachey's *Elizabeth and Essex*, however, was to put the image of the Virgin Queen to as tough a test as Vere had undergone. His portrait deploys Freudian psychology to underpin an anti-authoritarian view of monarchy. Britten no doubt intended to create a portrait of monarchy, warts and all, in which a cultured homosexual man could believe: the brilliance of the celebratory style he devised (avoiding Elgarian imperialistic overtones) as well as the subtlety of his response to Elizabethan music in the songs and dances show that

6. Closing scene (Act 2 scene viii) of Britten's 'The Turn of the Screw', La Fenice, Venice, 1954, with Peter Pears (Peter Quint), Jennifer Vyvyan (the Governess) and David Hemmings (Miles)

he was as inspired by this project as by the challenge of *Billy Budd*. Plomer had him read, as an antidote to Strachey, J.E. Neale's biography. Elizabeth's own speeches lie behind the debated Norwich episode that enshrines her ideal concept of authority rooted in humanity, intelligence and generosity. To invoke the 'conflict between public and private' to explain *Gloriana*, however, fails to get at the ultimate confusion that is part of homosexual social experience, and undermines the opera: if Britten imagined he was creating an *Aida*, or more pertinently a *Boris Godunov*, in which the private, human and vulnerable side of monarchy could be displayed in a healing manner, the downbeat ending, in which the aging, bald heroine muses on her mortality, only raised in the minds of a contemporary audience a spectre of empty and meaningless authority. *Gloriana* touched a national nerve-ending, and prompted not only its insecure dismissal by the first-night gala audience but also intensified the increasingly hostile response to Britten of the musical cognoscenti, disturbed by the cult status accorded him in the Mitchell and Keller *Commentary* of 1952.

All the more remarkable, then, that the next opera, begun during the preparations for *Gloriana*, should directly explore child sexuality and homoeroticism through Henry James's *The Turn of the Screw*. The horror of this gothic tale turns on the harrowing dilemma into which the reader is forced between experiencing the children, Miles and Flora, either as objects of depraved desires on the part of their dead servant and governess, Peter Quint and Miss Jessel, or as the victims of the hysterical fantasies of their new Governess, whose instability is hinted at by her frustrated desire for their distant guardian. The topic was suggested to Britten by Myfanwy Piper, a member of his 'extended family' through her husband John, designer of most of the opera productions after *Peter Grimes*. In her Britten found an ideal librettist for the adaptation of literary works; her work is seen at its best in the verbal images she produced for James's silent Quint, suggesting the man's imaginative allure to a child rather than any 'evil'. Making the ghosts palpable militated against James; but Britten, aided by Piper, found other ways to reinforce the ambiguities and claustrophobic atmosphere, such as the division into short scenes separated by 'variation' interludes and a tonal scheme that mirrors the title. The theme of these variations is moreover the upbeat opening gesture of a bipartite theme, its first element comprising all 12 notes through which, at its second plain statement, the ghosts voice their power. The 'downbeat' second element – ingeniously derived by inversion from the original series (Evans, D1979, p.214) – quickly evaporates into the coach-ride of the opening interlude, but emerges climatically at the beginning of Act 2 as the music for the ghosts' inspired quotation from Yeats's *The Second Coming*, 'the ceremony of innocence is drowned'. Throughout the opera, it provides the thematic material from which significant statements of both the Governess and Quint are derived. No more powerful or appropriate musical way could be found to match the dilemma of the original story. Critical approaches, which differ widely, reflect the success of this and other ambivalent musical symbols (such as the orchestration). One feature of the opera is the development of Miles, Britten's first extended role for boy treble. It was hauntingly sung in the first production (and Britten's recording) by the young David Hemmings (fig.6), whom the composer fell for. The evocative mnemonic rhyme, 'Malo', set by Britten to curiously self-revolving, abject music, managed acutely to symbolize the sexually active, precocious and yet guilty child and provide a focus for the Governess's final lament while undercutting her drive to resolution. *The Turn of the Screw* is arguably Britten's aesthetically and musically most satisfying work in the genre as well as the richest in dramatic tension and personal allusion.

The composition of three operas in so short a time had left little time for other music. What came between *Gloriana* and *The Turn of the Screw*, however, was among the most important of the song cycles, *Winter*

Words, on lyrics and ballads of Thomas Hardy. A nostalgic mood is set by the first song, with its evocation of November twilight in the fused dominant and tonic chords resolving on to D (minor). It is captured differently in the cantata-like account of *The Choirmaster's Burial*, with its miraculous setting of an old hymn tune and evocation of honest country musicianship. And finally, in *Before Life and After*, accompanied by low-lying triads in the left hand that conflict increasingly with the voice and piano right-hand's lyrical dialogue, the lost world of nescience is hymned as the final D major is reached – though the conflict has been intense enough to disturb any notion of soothing resolution or fulfilment of any such goal.

What came after *The Turn of the Screw* was directly affected by its schematic design. The vocal stanzas of Canticle III, *Still Falls the Rain*, completed in November 1954, interact with the interspersed variations for horn and piano in a manner recognizable from the scenes and interludes in the opera. An allegory of Christ's passion linked by the poet, Edith Sitwell, to the air raids of 1940, it was an opportunity for the composer to test again the possibility of Christian salvation on a conclusive B♭, this time purging the almost serial-style chromaticism of the opening in expressive two-part counterpoint, and finally resolving onto a vocal monotone both the airiness of the refrain ('Still falls the rain') and the recitative-like stanzas (one of them with a Sprechstimme interjection, unusual in Britten, to mark the quotation from Marlowe's *Dr Faustus* in the poem).

6. Transition and triumph, 1955–62. Having concluded a series of operas that offer as solid a claim to the attention of operagoers as any other 20th-century works, Britten must have been dimly aware of a need to fill in gaps in his total output as well as to try out new things – he wrote to Edith Sitwell that 'I am on the threshold of a new musical world (for me, I am not pretentious about it!)' (Cooke, D1999, p.167). For the moment, however, exhaustion set in, and the composition of a major work, the full-length ballet *The Prince of the Pagodas*, a project with the choreographer John Cranko for Covent Garden, was set aside for an extensive tour with Pears from November 1955 to March 1956, much of it in Asia (where they had as travelling companions their friends Prince Ludwig and Princess Margaret of Hesse and the Rhine; fig.7). They appear to have sought out indigenous, traditional dance, music and drama, such as that of Japan (to bear fruit in the church parables). In Indonesia, first Java and then, during a free two-week period, Bali, Britten made a more detailed study of local musical styles. The brassy, brilliant sound of the Balinese gamelan was predictably more arresting to him than the less demonstrative Javanese. From Ubud, where he heard the Peliatan gamelan, he wrote to Imogen Holst extolling the music as '*fantastically* rich – melodically, rhythmically, texture (such *orchestration*!!) & above all *formally*. . . . At last I'm beginning to catch on to the technique, but it's about as complicated as Schönberg' (Cooke, D1998, p.70).

Gamelan music was not new to him; he had been introduced to it in America by Colin McPhee, who spent much of the 1930s in Bali, becoming an authority on its music, which he incorporated into his own works. The sonorities received confirmation from a European source when Britten played Poulenc's Concerto for two pianos with its composer early in 1945 – the work contains

7. Benjamin Britten (right) and Peter Pears (left), Bali, 1956, with Prince Ludwig and Princess Margaret of Hesse and the Rhine

substantial 'gamelan' passages in its mixture of styles (Brett, E1994, pp.238–9). Furthermore, although McPhee's comments indicate Britten's initial ambivalence, he soon latched on, using a heterophonic pseudo-gamelan sound to characterize the moon turning blue in *Paul Bunyan* and deriving the deep bell sounds in the 'Sunday Morning' interlude in *Peter Grimes* from the representation of the gong in McPhee's two-piano transcriptions of *Balinese Ceremonial Music*. Heterophonic passages and pentatonic scales can be traced in many Britten contexts (Cooke, D1998), but it was in *The Turn of the Screw* (see Palmer, in Howard, E1985) that gamelan-like sounds seeped into the colour of Britten's instrumentation to suggest not simply the ghosts but also Quint's allure for Miles and the attendant danger.

The visit to Bali provided the material (in the form of sketches and recordings) for a more literal reference to the gamelan in *The Prince of the Pagodas* (which opened on New Year's Day 1957), although the idea of employing such music may have occurred earlier in 1955 as the result of another performance of the Poulenc concerto. There is a corresponding shift of dramatic emphasis. Cranko's scenario is a Lear-inflected fairy tale. On being passed over in favour of her haughty sister by their foolish father, the emperor, the beautiful princess Belle Rose is carried off to Pagoda Land, where, to gamelan music, the pagodas revolve or swell at her touch, offering her food and finally blindfolding her. To another gamelan piece a green salamander enters who turns into a handsome prince as the trumpet plays a melody of Siegfried-like heroism and phallic intensity. Since the princess is blindfolded, and the gamelan music is attached to the pagodas (their captives are ultimately liberated) as well as to the disguised prince, sexuality, if suggested at all, is literally polymorphous. These are latent beings, waiting for the liberation that Rose's love will effect, but surely connected through their music to a vision that is either utopian or regressive: innocence or nescience, pre-verbal, even pre-visual, depending only on touch. The score, shot through with

echoes of Tchaikovsky, Prokofiev and Stravinsky, gloriously opulent and uninhibited, might serve as a model of Britten's orchestral brilliance. Ears now used to 'world music' swallow the gamelan episodes without finding them extraneous; yet, like the exotic references in *The Turn of the Screw*, they belong to the phenomenon of 'orientalism', that is, Western projections onto peoples thereby made Other.

Britten was to travel further in that direction: during summer 1957 Plomer suggested a libretto derived from the *nō* play *Sumidagawa* that had so impressed the composer in Japan. Its gestation took some time. Meanwhile, because of increasingly burdensome public exposure, Britten and Pears moved out of Crag House, which they exchanged in November 1957 for the Red House with the artist Mary Potter (a member of their recorder group, for whom *Alpine Suite* was written in 1955). Near a golf course on the road to Leiston, it now houses the Britten-Pears Library. Britten was working at the time on *Songs from the Chinese*, settings of translations by Arthur Waley for Pears to sing to the accompaniment of Julian Bream. Although the texts, which are largely about the transient nature of beauty and youth, provide a basis for exoticism, Britten avoids it in favour of a musical language that not only exploits the guitar's capabilities but also suggests the spare, thematically orientated manner that was to occupy him after 1961.

Meanwhile, the next large work, begun in late 1957 and given at the 1958 Aldeburgh Festival, claims a special place in Britten's output. Begun as the result of a television commission that failed to materialize, *Noye's Fludde* became the centrepiece of Britten's investment in what has eventually become known as 'outreach', for it involves children of all ages in its performance and includes the audience who join in the hymns around which it is built. Brilliantly managed is the physical involvement of the children, as violinists in first position, buglers playing simple school-derived fanfares, recorder players galore, a variety of percussionists (including the innovation of the 'slung mugs' signifying the first raindrops; fig.8) and as a chorus of child-animals with cries of 'Kyrie eleison' and 'Alleluia': everyone can be included along with the few professionals, Britten appears to be saying, in a score that is uncompromisingly interesting on all levels and therefore with no patronizing air. As if to reinforce the point, the storm is an extended passacaglia on a theme, like that of *The Turn of the Screw*, both tonally anchored and comprising all 12 notes: this ambivalent device is not surprisingly attached to the destruction and abjection caused by the deity. Towards the end a handbell choir, slightly reminiscent of Balinese metallophones, epitomizes the rainbow, an image that melts into that of a newly recovered universe signified by Tallis's canon, which is disturbed briefly by an organ interlude that has not unreasonably been interpreted as a moment of residual hostility to the church as an institution. The impression most listener-participants carry away from this freshly conceived music-theatre event, however, is one of great spiritual and musical satisfaction.

If the *Serenade* can be seen as preparatory to *Peter Grimes*, the *Nocturne* of August–September 1958 is even more closely linked with *A Midsummer Night's Dream*, completed in 1960. In place of the *Serenade*'s virtuoso painting of atmosphere, the *Nocturne* explores the dreaming state of mind to be conjured up so powerfully in the opera. The cycle is continuous – here the poems tend to be fragments of larger works rather than discrete lyrics – and it is held together by a gossamer thread of recall, the soft breathing motif of the opening string accompaniment and the rapturous melisma set to 'nurslings of immortality' in the opening song. This latter motif not only signifies the poetic vision but points to the eventual outcome of the work on a D♭ chord. Dream-like, too, is the way the piece keeps aspiring to a blissful, clear C major (as in the Keats poem at the mention of 'Sleep') while continually being forced into stranger worlds of experience symbolized on the one hand by the obbligato instruments that join the basic string accompaniment (and in the Keats setting take over from it) and on the other by the constant flux of the harmony which explores areas scarcely imagined in the *Serenade*. The cycle closes with a Shakespeare setting in which the dichotomy of the self and the loved one is mirrored by the flux between and eventual fusion of the worlds of C and D♭ that have

8. Britten teaching the players of the 'slung mugs' for 'Noye's Fludde', 1958

inhabited the earlier songs. The orchestration, reminiscent of Mahler (to whose widow Britten dedicated the work as if to acknowledge the earlier composer's influence), signals the seriousness and passionate nature of this dialogue of the soul, an exploration in miniature of the predicaments that were to extract such a rich response from Britten in his opera.

The same summer saw the completion (as a 50th birthday offering to Prince Ludwig, who drew Britten's attention to the poems) of *Sechs Hölderlin-Fragmente*, which take up again the themes of the *Songs from the Chinese* in a fairly severe lieder-like style. At the heart of the cycle lies a radiant answer to the unbelieving questioner of the nature of Socrates' love for Alcibiades in which the singer takes up the chromatic piano melody now 'naturalized' by the plain triads of the accompaniment. The concluding two songs, however, return to the autumnal atmosphere of the earlier cycle. The rigorous motivic and canonic workings of these songs prepare for the heterophonic yet tonally centred procedures of the final decade. A more jesting 'academic' approach to Schoenbergian procedures is to be found in the subsequent *Cantata Academica*, written in 1959 for the quincentenary of Basle University. With its 'Tema seriale con fuga' and other academic trappings lightly worn, a ponderous Latin text, and fairly unbuttoned manner (occasionally recalling Stravinsky's *Oedipus Rex* quite strongly), it is an occasional piece well calculated for the average university music group. A more spectacular piece of the same year, the *Missa brevis*, was written for George Malcolm and the boys of Westminster Cathedral Choir, and well calculated for the notably reedy tone of that group compared to the more usual white-toned English boys' choir. In the Sanctus the boys magically project 12-note collections over D major triads in the organ to exciting effect, but Britten follows Bach in making the Agnus Dei a moment of personal tension that disturbs the otherwise lofty atmosphere of this tiny masterpiece.

A culminating work for the operatic stage of this period is *A Midsummer Night's Dream*, written to celebrate the enlargement of the Jubilee Hall at Aldeburgh. The idea occurred barely a year ahead of the first performance (in the 1960 festival), and Britten and Pears together cut and rearranged Shakespeare's play as a libretto. Britten (*The Observer*, 5 June 1960) said that the play appealed to him as the work of a very young man and as a story that involved three distinct groups, the Lovers, the Rustics (as he called the mechanicals) and the Fairies, which interact. More likely, after exploring the ambiguity of relationships in a realistic setting in *Billy Budd* and the fantasy of the unthinkable in the context of James's ghost story, he found in this play, which literary critics were just beginning to read as saturnalian rather than romantic, an ideal vehicle for pursuing his interests in the difficulties and dangers in human relationships. A crucial difference from Shakespeare occurs as the curtain rises: it is plain from the heavy breathing in the orchestra that we are already, in more senses than one, in the woods. Britten dispenses with the social context of Athens and the background of reality as an initiating device in favour of the darker world of the *Nocturne*, and moves here the furthest distance from the realistic borough of *Peter Grimes* into a private world, one of possibilities rather than limitations. The folk-festival or May-games aspect of Shakespeare's play, then, is matched by a contemporary notion of misrule, the world of the libido.

As if to reinforce the unreality, operatic convention itself is part of the subject, most obviously in the broad comedy of the mechanicals' play, a wicked send-up of 19th-century styles. The chorus that opens the opera is one of unbroken boys' voices singing one of Britten's spiky unison tunes, as different from the romantic notion of fairies (and opera choruses) as could be imagined. On cue comes the expected entry of the prima donna and male lead, but in this case he is far from the ardent tenor of the Romantic era and as close as one can get to the primo uomo of 18th-century *opera seria*, the castrato. Along with the historical reference goes the association of unmanliness, and thus of gender liminality, that haunts the modern image of the homosexual, and the impression is enhanced by the Baroque style of his set pieces and the pseudo-gamelan sounds that attend his magic herb. A distant relation of Quint, he already has his Miles in Puck, not the hero's baritone friend of grand opera but a lithe tumbler with an adolescent voice who speaks rather than sings. The lovers sing lines that are eternally syllabic, in even notes, a sure sign in Britten's musical language that, though conventionally 'good', they are limited; their litany-like set piece after waking from their dream fails to separate their personalities, so that what is often seen as Shakespeare's own gloomy prognosis for love and marriage in patriarchal society finds an echo in Britten's pessimism. The only really tender relationship, and the only one that crosses social boundaries, is between the bewitched Tytania and the grotesque Bottom: the latter even usurps Oberon's falsetto voice in recalling it. But Bottom ends up back with his pals, and Tytania's radiant coloratura is silenced. The one truly romantic moment, as we might guess, is a regressive (and irresistible) transformation at the end of Act 2: Puck's 'Jack shall have Jill / Naught shall go ill' rhyme, sung by the fairy boys in 3rds against the 'motto' chords in a lush D♭ major context that bleeds Shakespeare's verse of every drop of its irony.

In summer 1960 Britten revised *Billy Budd*, compressing its four acts into two. In September an invitation to a Shostakovich première led to his meeting the Russian cellist Mstislav Rostropovich, who highly admired him, and with whom he immediately struck up a rich musical friendship and partnership (engagingly described by Carpenter, especially 397–404). This quickly led to a reawakening of abstract instrumental composition, abandoned since 1951 but for a few pieces for the Aldeburgh recorder group, a variation on *Sellenger's Round* for a composite coronation-year composition and a Fanfare for a pageant at Bury St Edmunds (1959). Too much has often been made of this 'lapse'; Britten had no need of the ideology that demanded mastery in absolute instrumental forms. His adopting the Vaughan Williams model of national pre-eminence ruled out direct competition in symphonic music but not writing for outstanding, friendly and admiring performers – the impetus behind the ebullient Sonata in C for cello and piano, as it was behind the solo works of a decade earlier. 1961 and 1962 were otherwise dedicated to choral music, where it was necessary to stake a claim. *A Hymn of St Columba* (1962) is a slightly dark piece emanating from a bizarre anniversary, while *Psalm 150* is the simplest of school songs written the same year for South Lodge (now renamed Old Buckenham Hall).

Britten's crowning choral work, and for some possibly the pinnacle of his entire output, is the *War Requiem*, begun in the second half of 1961 as the result of a 1958 commission for the festival marking the consecration of the new cathedral at Coventry (*see* ENGLAND, fig.14). Arguably, Britten became a victim of his own success, drowning his authentic 'private voice' as a result of inscribing himself into the English oratorio tradition with a grandiloquent work for soloists, massed choral forces and orchestra. An ingenious medievalism was evoked by troping the Latin text with a vernacular commentary. The historical resonance, combined with an evocation of the sublime in the form of a bombed cathedral in Britain's industrial midlands and of the metaphysical in the notion of reconciliation beyond the grave, gave the piece a portentous and grandiose character which seems oddly more of the age of Elgar than that of post-World War II. Some listeners have wondered whether the evocation of the end of Elgar's *Dream of Gerontius* in the concluding chorus is sufficiently undermined by the interruptions of boys and bells sounding the ominous augmented 4th that underpins the work. In terms of politics, too, questions have arisen about the application of a World War I pacifist message in a post-World War II context, as though the holocaust were not a factor to be reckoned with, as well as the silence on the topic of nuclear disarmament so germane to the early 1960s. The integrity of Britten's homosexual politics explains a great deal here, particularly the use of fellow pacifist and homosexual Wilfred Owen's poetry to transmit his anger about the fate of young men sent to their deaths by an unfeeling patriarchal system as well as his critique of empty religious forms in collusion with that system; possibly a metaphorical extension can be made to all innocent victims. But the choice of a major establishment genre in which to couch the powerful message of pacifism can only be explained as part of a strategy, perhaps unconscious, to gain acceptance for the artist while maintaining the subversion of his message. 'All a poet can do is warn' (in the words of Owen); but if the medium overwhelms the message, the warning loses urgency, irony is overwhelmed, and reception tends to become complacent.

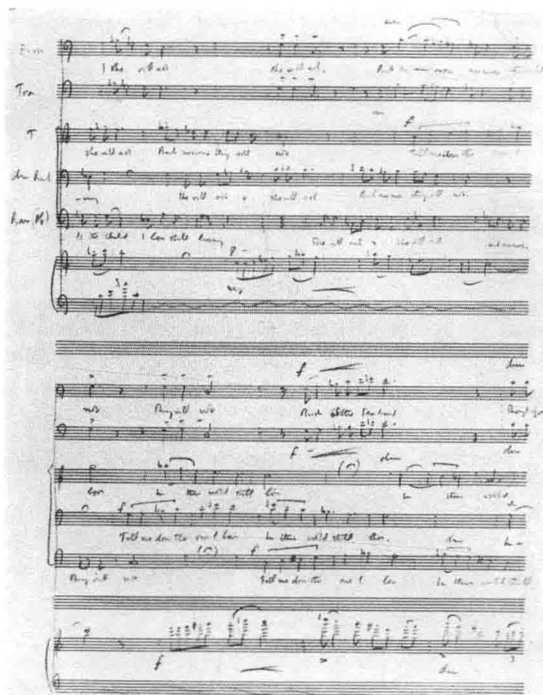
A return to the more typical and more modest occasional style of Britten's choral music came a year later in *Cantata misericordium*, commissioned for the centenary of the International Red Cross. The string quartet component, the bass-tenor duo (Pears and Fischer-Dieskau in the early performances and recording) and the Latin text recall the grander work. But the scale is more suited to the swift telling of the simple and relevant tale of the Good Samaritan. A mixture of harp and piano brilliantly characterizes the spine-chilling anxiety of the baritone Traveller before he is attacked, and the subsequent focus on the Samaritan (the priest and Levite are chorally described rather than vocally personified) is dramatically apt for the moral ('you now know who your neighbour is: go and do likewise') without the point being laboured.

7. FURTHER TRAVELS, 1963–9. Britten's 50th birthday year was marked by a number of events, including a visit to Moscow, a book of tributes from friends (Gishford, C1963), a Prom concert (12 September 1963) at which he conducted the *Sinfonia da Requiem*, the *Spring Symphony* and the first performance in Britain of *Cantata misericordium*, and on the birthday itself a concert performance of *Gloriana*. In a public tribute Hans Keller proclaimed him 'the greatest composer alive', greater even than Stravinsky (*Music and Musicians*, xii/3, 1963–4, p.13). There was another side to this institutionalization. Musical taste in Britain, long starved of avant-garde stimulation, insulated even from modernism, was now

9. Britten rehearsing his Cello Sonata with Mstislav Rostropovich, July 1961

10. Benjamin Britten playing the shō, Tokyo, February 1956

moving on owing to radical changes by the new BBC Controller of Music, William Glock, and a new generation of composers such as Peter Maxwell Davies, Harrison Birtwistle and Cornelius Cardew. The general audience was as usual accepting of merely a few pieces that had crept into the repertory, a situation exacerbated rather than relieved by the success of the *War Requiem*. Having worked to gain the position that Vaughan Williams had held, Britten was made doubly insecure by the isolation of preeminence. Accordingly he set out on new paths somewhat unheralded.



First came a return to the grand, purely orchestral statement not heard from him since *Sinfonia da Requiem*. The Symphony for Cello and Orchestra, completed early in May 1963, was part of the series of works for Rostropovich. Referred to by its composer during composition as a sinfonia concertante, it proceeds, in spite of the opening dark flourishes that appear to herald a conventional concerto arrangement, as a discourse between equal forces, the soloist democratically exchanging roles with the orchestral basses at the recapitulation of the extensive and regularly proportioned sonata-form first movement. The dark, furtive-sounding Scherzo is followed by an Adagio that connects to the last movement and is strongly related to it. The year closed with a more intimate instrumental work, *Nocturnal after John Dowland*, for Julian Bream, whose interpretations of Dowland songs with Pears had become justly celebrated. Writing for the virtuoso guitar rather than the accompanimental lute, and adopting the strategy of the earlier *Lachrymae*, Britten allows the theme, the song *Come, heavy sleep*, to emerge in Dowland's own accompaniment only after eight insomniac variations (the last a ground-bass treatment of a detail from Dowland's accompaniment) have succeeded each other without ever achieving the final repetition of the second strain, whose curtailed presentation lends a witty and moving air to the conclusion.

Meanwhile, there was the long-postponed *Sumidagawa* to face. For the purpose, Britten, Pears and entourage (Graham as stage director and Holst as amanuensis) took an unusual six-week working vacation in Venice. The conception belonged to the visit to Japan eight years earlier, when Plomer had recommended that Britten see all forms of Japanese theatre, but particularly the *nō*. Although his initial reaction was of embarrassed amusement at the stylized acting, he soon became entranced by the story of a distraught mother searching for her lost child, went to see it again, and procured a translation of the *Sumidagawa* of the early 15th-century dramatist Jūrō Motomasa. He later visited the ***kabuki*** theatre, enjoyed *shamisen* songs at a geisha evening and heard the ***gagaku*** orchestra whose sounds were to reverberate in *Curlew River*. The principal *nō* characteristic of limiting expressivity in acting and presentation in search of a more profound underlying truth that springs from its stylization resonated with Britten's own training, and its all-male cast appealed to a gender identification intensified by upbringing and sexual orientation. Plomer and Britten initially planned an operatic translation of the original, presumably with musical imitation ('oh, to find some equivalent to those extraordinary noises the Japanese musicians made!': Cooke, D1998, p.141). In April 1959, however, came a change of heart: not a *nō* pastiche ('which, however well done, would seem false and thin') but a medieval church drama set in pre-conquest East Anglia. It was to be a Christian work, with 'Kyrie eleison' replacing 'Amida Buddha': in 1963 Britten finally identified himself as 'a dedicated Christian' (see Carpenter, 421)

In *Curlew River* Britten made a radical attempt to return Western music to its melodic origins (before the disease of harmony germed, as it were). A plainchant hymn, *Te lucis ante terminum*, provides the melodic fount (and, typically, the outer frame), its intervals extended to include the augmented 4th for the cry of the curlew and of the protesting Madwoman. The resonant acoustic works with the plainchant-inspired lines, already blurred by the heterophonic technique, emphasized here to a new degree, to create a new kind of 'harmony' more like the bright but kaleidoscopic hues of stained glass, with similar iridescence. Characterization is by single instrumental colours – the Ferryman his active horn, the Traveller a double-stopped double bass, the Madwoman a flute, imitating her extraordinary vocal line with its heavy portamento. The organ (imitating the *shō*) pours cold water on the ensemble; the harp injects its prismatic detail; and the percussion suggests otherness, whether exotic or historical. A disciplined ensemble of actor-singers and instrumentalists in monks' habits – three of them assuming the masks of the main characters in a ritual robing – performs, without conductor, from a score with special notational features to promote synchronization. The audience is mesmerized by an hour's-worth of radical renovation which opens out into time unaccounted for or differently measured. It is a 'parable' about various Christian themes – charity, the afterlife – but the focus is on the visionary Madwoman, one of Britten's few really

sympathetic portrayals of women, sung by Pears in the original.

1964 was marked by other innovations in Britten's life. He parted company with his longtime publishers, Boosey & Hawkes; the literary publishers Faber & Faber founded Faber Music for him, with Donald Mitchell its head. Rosamund Strode entered the Aldeburgh household as Britten's music assistant, replacing her friend and mentor Imogen Holst (who continued to be involved with the festival). In July Britten flew to Colorado to receive the first Aspen Award for an outstanding contribution to 'the advancement of the humanities'. In his acceptance speech, later published, he encapsulated his views about the relation of the composer to society, and about his own needs. 'I want my music to be of use to people, to please them ... my music now has its roots, in where I live and work. And I only came to realise that in California in 1941' (Britten, 1964, pp.21–2). Later in the year, Britten reported to Plomer that his doctors had ordered rest, and that he and Pears would take 1965 off, beginning with a lengthy trip to India with the Hesses. He nevertheless composed the first of the three cello suites before the New Year (having earlier written cadenzas to Haydn's Cello Concerto in C for Rostropovich). Soon after his return from India, in March, he was awarded the Order of Merit (in place of T.S. Eliot who had recently died); this was the highest possible British honour (Vaughan Williams was the last musician to belong among the 24 most eminent living citizens personally appointed by the queen).

11. Autograph sketch ('On the river bank') from Britten's church parable 'Curlew River', composed 1964

Composition continued in the 'sabbatical' year. The Indian holiday saw the completion of *Gemini Variations*, 12 variations and a fugue on a theme by Kodály written for Hungarian prodigy twins, Zoltán and Gabriel Jeney, who between them covered the flute, violin and piano and could accordingly change instruments between variations and during the final fugue. The following month produced a work in complete contrast – the bleak *Songs and Proverbs of William Blake*, inspired by Fischer-Dieskau's darkly coloured voice and extraordinary musicianship as well as Britten's most personal concerns. The cycle, a continuous one, interleaves a ritornello-like setting of the seven proverbs with seven songs that paint an increasingly sombre picture of human existence. Musically, the construction depends on a 12-note series arranged in three four-note segments, and only achieved as a melodic statement by the voice in Proverb VII to suitable words: 'To see the World in a grain of sand'. Most remarkable is the powerful setting of Blake's insight into the processing of anger, *A Poison Tree*. Britten, who must surely have known the truth of Blake's words while spectacularly failing to act on them, at least in the Aldeburgh situation, uses a 12-note vocal melody closely related to the original set. It comes readily enough round to a cadence on E♭ minor on its return to the first note in the initial 'healthy' statement ('I told my wrath, my wrath did end'), but then develops, with the help of inversion in the bass line (symbolizing the internalization process), into a terrifyingly effective and highly dissonant contrapuntal build-up ending in the hollow chordal triumph (over the inevitable E♭ pedal) of the death of the foe. There is no mild consolation of the kind offered in *Winter Words* in the prospect of, or longing for, nescience. The all-too-knowing subject is revealed in full frailty – a portrait (from a composer so often connected merely with 'innocence') all the more remarkable for its unblinking honesty and bleak integrity.

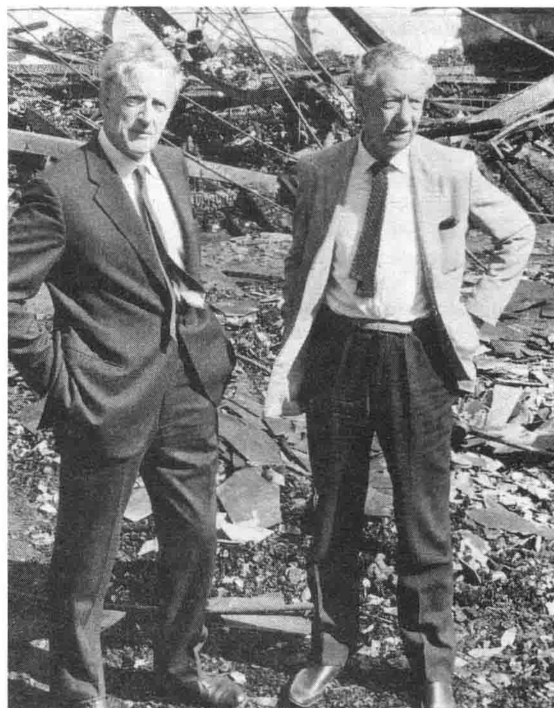
12. Benjamin Britten conducting, 1964

At another point in the 'sabbatical', Britten was tempted by a commission into writing a didactic work celebrating

the 20th anniversary of the United Nations – it was performed in New York, Paris and London on the very day, 24 October 1965. *Voices for Today* is an unaccompanied choral work (with ad libitum organ part) for large mixed chorus with a smaller chorus of boys, or boys and girls. It begins sententiously though quietly with an anthology of positive thoughts from the world's great thinkers and poets – all of them noticeably male – before opening out into a setting of Virgil's fourth Eclogue. Shorn of its pagan specifics this becomes an address to a Christ-like boy figure, the harbinger of a new pastoral life of plenty and peace. So much high-mindedness somehow dampened the musical response. A more robust expression of Britten's musical character comes out in the Pushkin cycle, *The Poet's Echo*, written for the excitingly dramatic voice of Galina Vishnevskaya and first performed by her on 2 December 1965 with Rostropovich accompanying.

Britten had written to Plomer about an idea for 'another opera in the same style' less than a month after *Curlew River's* first performance. *The Burning Fiery Furnace* predictably replaced Japanese sources with story from the book of *Daniel*. Three young Israelites, Ananias, Misael and Azarias, attempt to deal with the favours and demands of Nebuchadnezzar and the jealousy of his astrologer and people. A crisis around naming (the trio are forced to accept the Babylonian names Shadrach, Meshach and Abednego) makes this a parable of identity and difference. The luxury of Babylon, indicated by the dancing boys' 'cabaret' as well as the increased opulence of the scoring, can be understood as a reflection of the 'never-had-it-so-good' Britain of the Macmillan era and its anti-Semitism related to the growing anti-immigrant racism of the time. The identity politics may obliquely refer to the 'coming out' process for the homosexual (Hindley, E1992), but it is quite likely that Britten himself supported the literal Christian parable of faith. He devised a charmingly literal pun by emphasizing the interval of the 4th to mirror the appearance of the fourth figure in the furnace, the Angel (many such felicities are detailed by Evans, C1979, pp.480–89). The score is a little slow to get off the ground but reaches a cold and sinister brilliance with the march and hymn in praise of the heathen idol, answered by the four cool voices from the furnace. The extra brass and percussion, with more extrovert musical gestures (the alto trombone's brazen portamentos), effect the move to the Middle East from the Far East of the dramatic form, a collapsing of distinctions characteristic of orientalism.

Two fairly slight works intervened before the third and final church parable. *The Golden Vanity*, a 'vaudeville' with a libretto by Colin Graham, the dedicated stage director of the church operas, takes a folksong (one Vaughan Williams himself had set) as the basis for what has been described as a children's *Billy Budd* owing to the relation between the perfidious sea captain and his gallant cabin boy. It was written (in August 1966) for the Vienna Boys' Choir, who performed it at the 1967 Aldeburgh Festival. *Hankin Booby* is a salty little folk dance for wind and drums, originally written for the opening concert of the Queen Elizabeth Hall, London, and later incorporated into the Suite on English Folk Tunes. But a concert hall closer to home occupied much energy during this period. The Maltings at Snape had been discovered by Stephen Reiss, manager of the festival, as an available space to improve on the now-outgrown Aldeburgh facilities. The way Britten threw himself into this project, cajoling and demanding by turns, shows not only how much he wanted to be able to mount his larger works, both instrumental and operatic, at the festival but also how very seriously he took himself and his position in British culture by this time (Carpenter, 454–8, 468–70, 472–5). The Maltings concert hall was opened on 2 June 1967 by the Queen, and the initial concert included Britten's arrangement of the national anthem and his specially composed overture, *The Building of the House*, with its (optional) choral setting of the Elizabethan metrical version of Psalm cxxvii, 'Except the Lord the house doth make'. The Cello Suite no.2 occupied Britten during the summer.



The Prodigal Son is the least immediately appealing of the church parable triptych, but inside its purposely reticent interior is a significant return to the issues of patriarchy and authority. By assigning the viola to the title figure, moreover, the composer indicated his personal identification. A warm baritone Father, lyrically extolling the virtues of husbandry with Britten's favourite alto flute as accompaniment, signals a reconciliation with the patriarchy that is as unexpected dramatically as the rooted B♭ triads are musically unusual in the melodically orientated music of the church parables. But an interpretation at one level leads to a contradiction at the next. The frame is broken by the Abbot's being in mufti and notably failing to present his religious credentials ('you people . . . do not think I bid you kneel and pray'); he is a home wrecker ('see how I break it up') who insinuates himself as the *alter ego* of the younger son. The similarity with Quint has often been noted. The temptations (of wine, the flesh and gambling) are cleverly presented by a distant boys' choir – Britten's own idea – so that the Tempter can mediate them in extraordinary Sprechstimme with glissando harmonics on the double bass. That these temptations are not too musically alluring should not be surprising: Britten's idea of sin can never have involved bars, bath-houses, casinos or other material delights. No wonder they are overshadowed by the accelerating march home, in which the various instrumental strands suggest the coming together of a fragmented existence, ending in the radiant B♭ of the father's acceptance. But the listener is also left to wonder if those B♭ chords are not too restricting and binding, as alien as the Tempter himself. Auden's warning to Britten about the dangers of building a warm nest of love for himself seems appropriate to invoke.

On returning in February 1968 from Venice, where much of the opera was completed, Britten contracted infective endocarditis, which postponed its completion until April. The Maltings enabled the festival to be extended, and after the summer performances Britten settled down to recording projects there, including Schubert songs with Pears, the Brandenburg concertos, English string music and two LPs of Percy Grainger, culminating in early 1969 with a televised *Peter Grimes*. During the same period he wrote *Children's Crusade* for the 50th anniversary of the Save the Children Fund. The down-to-earth style and impersonal tone of Brecht's *Kinderkreuzzug*, a ballad about the death of a wandering band of children in the war-torn Poland of 1939, allowed Britten's anger to surface. The manipulations of a 12-note row appear to symbolize, here as elsewhere, the dying civilization of Europe, reflected through the fate of the children and their dog, whose death ends 'a very grisly

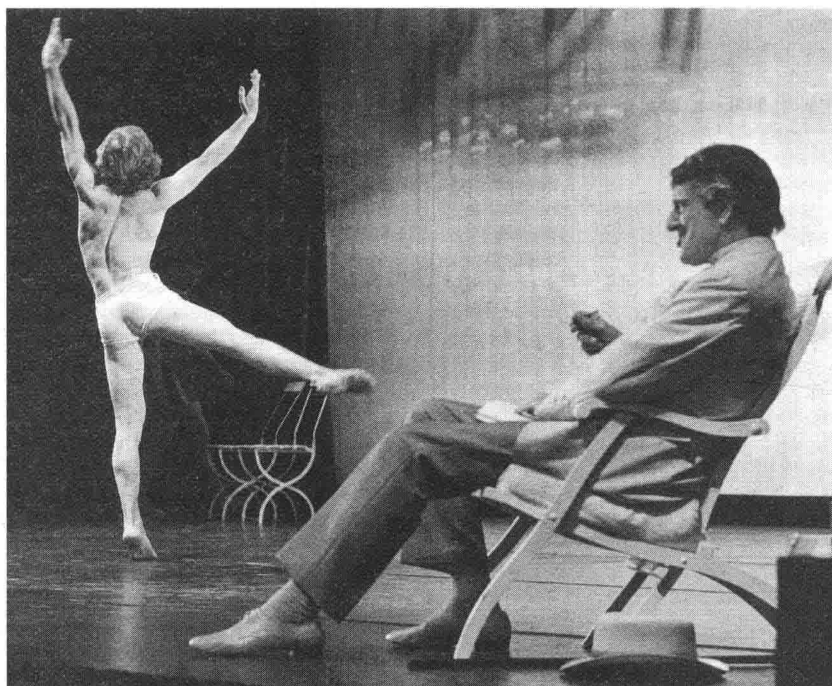
piece' (as Britten himself called it) on an unsentimental note. This was shortly succeeded by one of the grimmest of the song cycles, *Who are these Children?*. The 12 songs are settings of 'lyrics, rhymes and riddles' by William Soutar (1898–1943), the caustic Scottish invalid poet. The riddles and rhymes in Scottish dialect, portraying the relatively carefree life of the 'natural' boy, as it were, are interleaved with settings of English poems depicting the cruelty of modern civilization in terms of irony and sheer pain. Commentators have invoked the Donne Sonnets to characterize the relentless accompanimental figuration of *Slaughter*; the background to the title song is a 1941 photograph of children in a bombed village staring uncomprehendingly at a fox-hunting party riding through; and the actual pitches of the wartime air-raid siren are used as an ostinato in *The Children*, a poem written in response to bombing in the Spanish Civil War (Johnson, in Palmer, D1984, p.305). The last song, to a dialect poem about the feeling of an oak, brings to reality in the 'natural' cycle the foreboding of the first 'English' poem, 'Nightmare'. It is an uncompromising vision ending with the much-repeated word 'doun' (signifying 'the end of everything', Britten told Johnson). Some relief came between these works in the lucid C major music Britten composed for one of his favourite instruments and performers: the Suite for Harp was the first of a number of pieces for Osian Ellis, a valued collaborator and alternative accompanist for Pears, and its final variations on the Welsh hymn tune 'Saint Denio' constitute a special compliment to his and the harp's nationality.

The decade ended in flames with the dramatic conflagration of the Maltings concert hall on the first night of the festival, Saturday 7 June 1969. Britten's calm and practical nature excelled in such circumstances, and his leadership ensured that the festival programme continued. Served by an able administration and local builders, rebuilding with improvements forged ahead in time for the 1970 festival. There were other less flammable but perhaps more indicative disappointments about the decade. Two shelved opera projects that came to a head between 1963 and 1965, *King Lear* and *Anna Karenina*, both scotched because of premature press reports, show that Britten was beginning to accept his limitations. In returning to social protest in connection with boyhood at the end of the 1960s, he was all but announcing that his obsessions were what made him function. He could not entirely adopt the 'universal' voice expected of the 'classical music' composer, however much he had tried in the *War Requiem* to do so. To his credit he knew that, but could not be absolutely explicit about his private obsessions to the extent of their losing resonance for other human beings of his class and culture.

8. Final testaments, 1970–76. Britten was no fan of television: he did not own a set until Decca gave him one for his 60th birthday. But with the Maltings available, he determined around 1968 to go ahead with a television opera on a more obscure Henry James ghost story which for him had 'much the same quality as the *Screw*' (Carpenter, 508). *Owen Wingrave*, completed in August 1970, recorded in November and broadcast simultaneously in Europe and America in May 1971, is at one level a final testament on pacifism. The hero, scion of a military family, determines not to embark on an army career; disinherited as a result, he is goaded by his financée's taunt of cowardice into being locked into the haunted

13. Benjamin Britten and Peter Pears at the Maltings, Snape, 8 June 1969, the day after the concert hall had been destroyed by fire

room of the family mansion. On unlocking the door in remorse, she discovers him dead. The opera places great condemnatory weight on tradition and the family, the power of which is maintained in the almost complete absence of male authority (an old general totters through his expected gestures) by three women portrayed with unmitigated hostility in both music and television image as shoring up the patriarchy; we are barely invited to sympathize with any of them. 'The massive audience was a wonderful opportunity for Britten to make his personal statement about war and the empty glory of heroism, in the context of the Vietnam War and the shooting of students . . . on Kent [State University] campus' (Graham, in Herbert, E1979, p.54). Given McClatchie's successful attempt (E1996) to show at another level how the discourse of homosexuality is displaced on to that of pacifism, the work may equally represent Britten's pessimism about gay militancy, which had been recently energized by the New York Stonewall Riots of 1969. Owen's determination to be true to himself in the face of the enemy – tradition and the family – leads to a classic 'coming out' scene that Britten, schooled in a discretionary age, could never have contemplated for himself. James cannot resist the irony of Owen's embracing peace only to die 'all the young soldier on the gained field', a point that Britten and Piper underscore (Owen's reaction to past military heroes, like his own ancestors, is to want to 'hang the lot'). Similarly, Britten and James send Owen literally back into his closet at the end of the opera, and kill him off as well: at least he has found 'peace'. Musically this happens in one of Britten's most celebrated arias not only accompanied by diatonic triads (like the 'interview' scene in *Billy Budd*) but also given an overlay of gamelan music – the kind that in *The Prince of the Pagodas* signifies at best utopianism or nescience, at worst polymorphous



perversity, definitely not erotic allure. Britten's musical irony, in which each level peeled away reveals a further one beyond, extends to a critique of his own exoticism. The Wingrave family portraits are heralded by a pseudo-gamelan flourish with a militaristic tattoo on the drums; it opens the opera and recurs whenever they loom. The almost inaudible pitches, however, consist of one of the several 12-note collections of the opera, one that notably provides the diminished intervals that consign the Wingraves to the obsolescent and evil European past. Britten once compared Balinese music to Schoenberg in terms of complication, but mapping the one onto the other was to commit a meaningful kind of sacrilege: it undermines any attempt to think of signs as stable in his music and supports a pessimistic reading. Self-determination is a chimera, the opera seems to say, for there is always some ghost to disturb the perfect dénouement. Just as the pacifist can fight militarism only in its own terms (and lose in those terms), so the problem of the homosexual is to escape the history of sexuality into a new life without replicating the old 'straight' order, something understandably inconceivable to Britten. As in *Peter Grimes*, Britten appears instinctively to have anticipated an argument that would take queer theorists a decade or more to articulate. This opera may seem to preach, but it repays study as the testament of a man resigned to the way things are but nevertheless continuing to protest.

The 1970 Aldeburgh Festival was marked not only by the attendance of the Queen for the reopening of the Maltings but also by an article in *The Observer* (7 June), 'At the Court of Benjamin Britten'. This put a name to the atmosphere typified architecturally by the extraordinary aperture on the side of the auditorium in which Britten, Pears and Imogen Holst would appear as icons to be worshipped and as judges of all that took place. Britten seemed to be losing his draw, his music gleefully seen as increasingly 'thin' by cognoscenti, the working conditions alienating performers, Aldeburgh politics becoming extra-Byzantine and the Russians failing to turn up because of political problems of their own. The pointless game of Tippett versus Britten seemed to be going in Tippett's favour. Not unexpectedly, Britten retired further into the Suffolk countryside, taking a house at Horham to escape Aldeburgh's increasing aircraft noise. In the following summer, Britten and Pears, full of ambitious ideas for the expansion of the Maltings into a full-scale arts centre and music school, clashed with the long-suffering festival manager, Stephen Reiss, in a deplorable manner that led to his resignation. The first three months of 1971 nevertheless saw the completion of two new works. Canticle IV, *Journey of the Magi*, a slightly detached and interior setting of the uneasy T.S. Eliot poem about death-in-birth and the difficulty of change, was written for the three singers, James Bowman, Pears and John Shirley-Quirk, who were to be principals in the next opera, already then in the planning stage. The third and most passionate Cello Suite incorporates four Russian themes, three folksongs arranged by Tchaikovsky and the moving *Kontakion* (Hymn for the Dead) which, as in earlier Britten solo works, are offered in their plain forms only at the end. It marks the culmination of a body of work inspired by Rostropovich's rich and romantic performance of the Bach unaccompanied suites.

In September 1970 Britten asked Myfanwy Piper to write a libretto for an opera on Thomas Mann's novella *Death in Venice*, an idea he had entertained for some time. The project moved forward at an unusually deliberate pace for Britten, and was not thrown off the rails by advance publicity, or even by the need to do something about the cardiac deterioration his doctor diagnosed in August 1972. The composer was both determined and 'desperately keen to make it the best thing I have ever done' (Carpenter, 534). The composition sketch was finished by Christmas 1972, the scoring early the following spring. Britten's need to complete the work is understandable because it views the great themes of his music, from a fundamentally different and freshly revealing viewpoint. Aschenbach the writer's relation to a handsome young boy, Tadzio, is created entirely in his imagination through the play of bodily form, motion, gesture and sound. His obsession is reflected by dense motivic allusion and serial manipulation in the music, and the beauty of Tadzio appropriately represented by dance and the bright ring of Balinese-inspired sounds. A particularly brilliant decision was the assignment to a single singer of the seven Hermes-like characters who stage Aschenbach's journey towards death – or is it transfiguration? This has led critics into interpreting the work as a parable of artistic endeavour, hinging on the need for balance between Dionysian urges and Apollonian regulation along the lines of Mann's response to Nietzsche's theory of art.

But two facts have to be recognized before the critic can dispense with sex in favour of metaphysics: one is the cry wrung from Aschenbach at the end of Act 1 ('I – love you'), the other (elegantly outlined by Travis, E1987, pp.132–3) that the notes accompanying the tortured 12-note monologue in which Aschenbach laments his creative impotence at the opening of the opera resolve into the 'Tristan chord', with a two-octave upward displacement of its tenor note B. The E–F tensions of Act 1 can also be seen to be derived from Wagner's opening melodic gesture. Sex and sexuality cannot, then, be spirited away but are presented along Nietzsche's inclusive model as reaching to the highest peaks of the intellect, not opposed to it. Further, the discourse Mann presents and Britten develops with Hellenic references – the Games of Apollo and The Dream – belongs to an older order of same-sex relations than 19th-century homosexuality, that of Greek pederasty, which embraces the entire history and condition of culture in the West. Imbuing the image of Tadzio with the sounds of Bali, moreover, took Mann's discourse a stage further, elaborating on his suggestion of the Asiatic origins of the libidinous cult of Dionysus, and also of the cholera carried by the sirocco. This was dramatically apt, since the mind-driven Aschenbach through whom we perceive both Venice and Tadzio would be culturally conditioned to project them both in terms of the exotic, that which is Other. This Asian-derived music, then, opens up the meanings of the opera to embrace the European philosophical discourse of Self and Other, and in turn to invoke the West's insatiable appetite for colonization – the same patterns of domination being apparent here as in classical pederasty. These are some of the themes of this multifarious and magnificient work, at one level a 'musical autobiography' (Carpenter, 554), at another an engagement with postwar, post-colonial Britain and the culture of the West.

After the completion of the opera, and celebrations of events with personal friends, Britten went into hospital

14. Scene from the original production of Britten's 'Death in Venice' at the Maltings, Snape, 1973, with Peter Pears as Aschenbach and Robert Huguenin as Tadzio

on 6 April 1973, and underwent an operation on 7 May to replace a failing heart valve. The operation was successful, but he suffered a slight stroke which affected his right hand, and the results were ultimately disappointing. Convalescence did not go smoothly and Britten felt unable to compose, perhaps for the first time. 60th birthday celebrations in November were held without his participation. Rostropovich visited in January 1974 to play the Cello Suite no.3 to Britten, who made some revisions. A little later Donald Mitchell interested him in revising the String Quartet in D (1931) for publication by Faber Music. At the National Heart Hospital where the operation was done, Britten became friendly with a senior sister, Rita Thomson, who went to Aldeburgh that Easter to look after him and stayed for the rest of his life. He improved notably under her care and began slowly to face serious work again, revising *Paul Bunyan*, some numbers of which had been given at the 1974 Aldeburgh Festival.

The first new work, completed in July that year, was Canticle V, *The Death of Saint Narcissus*. The setting of a dense and complicated early poem of T.S. Eliot, it was written for Pears to the accompaniment of Ellis's harp, a poignant reminder that the composer's accompanying days were past – but not the imagination that could create the beautiful, damaged 'dancer before God' in so few and eloquent strokes, faintly recalling the erotic intensity of *Les illuminations*. A projected Christmas opera along the lines of *Noye's Fludde* never progressed beyond sketches, but while staying with Margaret Hesse at Wolfsgarten, he began the Suite on English Folk Tunes, and completed it in November. Its subtitle, 'A time there was. . .' comes from the Hardy poem, 'Before Life and After', that closes *Winter Words*, and the work, undertaken as a frame for *Hankin Booby* (1966), provides an elegant and nostalgic farewell to the folk and traditional music from which Britten had drawn so much; it was 'lovingly and reverently dedicated to the memory of Percy Grainger', with whom he identified as against the other English folksong composer-collectors. Another work recalling the brilliance of Britten's writing for unaccompanied chorus followed almost immediately. *Sacred and Profane*, written for Pears's Wilbye Consort and completed in January 1975, takes eight medieval lyrics and sets them with a breathtaking directness and artful simplicity. Most moving in their intensity are the two laments for Christ on the cross, but good humour is not lacking, especially in the final song, which not only catalogues the attributes of death and decay with verve but ends on a suitably defiant note. The delight that Britten took in modifying simple strophic shapes in setting these medieval poems also provides enormous pleasure in *A Birthday Hansel*, a short cycle of Burns poems for high voice and harp written at the request of Queen Elizabeth for her mother's 75th birthday (4 August 1975); completed in March, they were performed for the Queen Mother by Pears and Ellis the following January.

These three works were in a sense a final tribute to the musicianship and voice of Peter Pears, who was kept away from Aldeburgh for extended periods during Britten's illness. In autumn 1974 he was in New York for the Metropolitan Opera production of *Death in Venice* and during this period Britten, after hearing a broadcast of their last British recital in 1972, put down in writing all that Pears's voice, personality and artistry had meant to him: their exchange of letters is deeply expressive of their remarkable partnership, unparalleled in 20th-century music (for the texts, see Carpenter, 568–9).

At the 1975 festival, Janet Baker sang Berlioz's cycle *Nuits d'été*, and Britten decided to compose something for her on verse from Robert Lowell's free translation of Racine's *Phèdre*. An opera being now beyond his physical powers, he wrote a dramatic cantata in Handelian form, in which Phaedra addresses other characters (Aphrodite, Hippolytus, Oenone, Theseus) in discrete arias and recitatives, the latter accompanied by the traditional

continuo instruments, harpsichord and cello. There is no glorification of Hippolytus in *Phaedra*, merely a 'thin' *presto* depiction of Phaedra's obsession, with Racinian irony (see Palmer, D1984, p.410). Theseus is more beautifully outlined in a sweeping Apollonian A major theme (in key and opening gesture it recalls Theseus's celebratory theme in Act 3 of *A Midsummer Night's Dream*). But more glorious still is the dénouement, in steadily rising ten-part string chords, an unusual sonority for Britten, in which the sexual outlaw, having made her forthright confession, finds nobility, peace and purity in an almost unsullied C major; sweet, fleeting, reminiscences of her life flicker as she dies and her spirit ascends in an apotheosis of muted string diatonic chord clusters rising through two octaves over the expiring pedal C.

Hans Keller, to whom Britten dedicated his last major work, the String Quartet no.3, wrote that here the composer had taken 'that decisive step beyond – into the Mozartian realm of the instrumental purification of opera' (Herbert, E1979, p.xv). Another way of putting that without endorsing the genre over the substance is to say that there is really no music of Britten's that fails to render meanings. Owing to his eternal seeking and questioning and the ambiguity with which he managed to imbue the common musical symbols of his tradition, those meanings are rarely simple. Quotations from *Death in Venice* occur in the recitative introduction to the passacaglia finale, appropriately sketched on a last visit to Venice in November 1975, and allusions to the opera are made in various ways throughout. The agenda probably includes the redemption or transfiguration of Aschenbach, with whom the composer clearly identified, to whose E major both first and last movements reach. But the most complete tonal resolution, on Britten's 'own' C major, occurs in the enigmatic central movement of the five, 'Solo'; and the end, when it arrives, not only comes 'with a question', as Britten put it, but draws attention both to the arbitrary nature of closure (in art as in life) and in retrospect to the more complete closures earlier on (see Rupprecht, in Cooke, D1999, p.258). Whatever the interpretation, few listeners will doubt that this is as profound a work as anything Britten wrote.

It is nevertheless appropriate that his last complete work, finished in August 1976, was the unpretentious and cheerful *Welcome Ode*, written for a local occasion – a visit of the Queen Mother to Ipswich – and designed for 'young people's chorus and orchestra'. As Evans pointed out (D1979, p.292), the development of instrumental teaching and growth of youth orchestras in Britain made it possible for Britten to demand a good deal, and it is fitting that his mission as a composer should have ended not with the high-flown quartet but this straightforward and unpatronizing gesture to the children he loved so much. In fact, work had become increasingly difficult during 1976, and was made up largely of what he might at other times have called 'chores' – a *Tema 'Sacher'* that Rostropovich could play for the 70th birthday of Paul Sacher, an arrangement for viola and string orchestra of *Lachrymae* and some folksong arrangements for Pears and Ellis. In July he started on a project to mark Rostropovich's first season with the National SO in Washington, DC, a cantata setting of the poem Edith Sitwell had dedicated to him, 'Praise we Great Men'. The work remained incomplete, reaching a performable state only through the efforts of Colin Matthews, the young composer who had assisted with the scoring of *Death in Venice* and had become more intimately involved in Britten's composing as the older composer became increasingly infirm.

During the 1976 Aldeburgh Festival, in which the revised *Paul Bunyan* was staged and *Phaedra* made a deeply emotional impact, Britten was awarded a life peerage. Plenty of musicians had received knighthoods but none a peerage; according to Rosamund Strode, 'Ben didn't mind about himself in the least. He just felt it was marvellous for music' (Carpenter, 580). Others have viewed his acceptance with puzzlement or irony: but it seems entirely characteristic of the man who wanted so much to belong to the society he thought he didn't fit into. By this time he was desperately ill, and even took communion from a bishop who visited. On his birthday in November he took leave of his closest friends, and during the night of 3–4 December he died in the arms of Peter Pears.

9. Reception, influence, significance. After Britten's death there was no appreciable lapse of interest in his music; its audience rather increased during the last quarter of the 20th century. Perhaps the tide that swept away serialism, atonality and most forms of musical modernism and brought in neo-Romanticism, minimalism and other modes of expression involved with tonality carried with it renewed interest in composers who had been out of step with the times. Britten's 12-note manipulations could now be seen as retaliatory and subversive rather than as conciliatory and accommodating. His instinct for success, some would observe, had put him ultimately on the winning side. A simpler idea would be that his music is very good, and quality is irresistible. To maintain this as true (difficult in a postmodern environment) leads to the question 'how good?' and to unseemly comparisons. It is enough to note that Britten turned out to be more than the 'local Shostakovich' of Thomson's 1940s taunt – accurate to the extent that Britten was indeed to the UK what Shostakovich was to the USSR, and that he made an increasing issue out of locality. But to set Britten against the modernist 'giants' of the previous generation is as pointless as comparing him with innovatory popular musicians of a younger generation who reached a far wider audience still. Like most remarkable composers he was inimitable, possessed of a distinctive voice which renovated every aspect of the classical tonal tradition in which he worked, a voice and sound too dangerous to imitate.

The extent of his influence might nevertheless be taken up as an indication of his stature. Probably no subsequent British composer can have been entirely unaffected by his life and work, if not at a musical then at an organizational and operational level. He is a key figure in the growth of British musical culture in the second half of the 20th century, and his effect on everything from opera to the revitalization of music education is hard to overestimate. More formal homage came from composers everywhere as Britten's life drew on.

Britten reception, scholarship and criticism provides an avenue for exploring signs of his ultimate valuation. His financial success made possible the founding of several monuments to him and Pears in the Aldeburgh area, including a well-staffed library at the Red House where the autographs, sketches and papers are kept. A team of scholars headed by Donald Mitchell (Britten's musical

executor) has produced an enormous amount of documentary and musical material as well as critical insight in a very short time. In some cases, as in Mitchell's sensitive musico-biographical sketch accompanying *Letters from a Life*, the level of critical thought has been high; but on the whole the tone has (almost inevitably) been both laudatory and protective. Into this world the arrival of the professional biographer, Humphrey Carpenter, came as a cold shower. His unfettered account of Britten's life produced a recognizable human being with a psychological profile in which anger, cruelty and evasion figured large (and in which Pears often appears as Svengalian); he also revealed details about Britten's love of adolescent boys which some had thought unmentionable. Possibly his concern to reveal Britten's pathology meant that he rarely looked beyond the psychological traits towards their grounding in social causes and conditioning; and Auden's famous diagnosis and prescription (*Letters*, 1015–16) figured large in his interpretation, especially in dealing with the music. At a polar opposite to this approach, musical analysis had been prominent in Britten criticism from the start (as represented by the distinguished work of Stein and Keller, for example). Peter Evans's analytical study (D1979) was the first major, single-author book on Britten's entire output to appear. Arnold Whittall, whose earlier work focussed heavily on 'extended tonality' but later took a broader view of analysis and ventured beyond its pure application into genre criticism, has continued this tradition, and in the 1990s North American theorists began to engage interestingly with Britten's music. An encouraging sign is the appearance of a younger generation of writers with new and sometimes interesting viewpoints (several are represented in Cooke, D1999).

Britten's canonical status has never been unassailable, and there have always been resistances to the personal nature of his achievement. As he grew older he became on the one hand more 'English' and on the other more committed to Asian musics, neither of which has won him praise from British music critics anxious for wider European viability for the national artistic product, scornful of the thinness of his melody-orientated music and perhaps uneasy about its religious overtones, strange brand of exoticism and political affiliations. Criticism by Paul Griffiths (D1991) and Robin Holloway (D1992) points in the one case regretfully to Britten's retreat from European eclecticism into cosy provincialism and in the other to a failure of musical nerve at important moments. Those unconcerned with questions of national identity may recognize what was gained in the move that disturbs Griffiths; the Wagnerian model conjured up usefully by Holloway to highlight Britten's institutional success, moreover, is hardly apt for a selfconscious figure of the mid-20th century, and many will share the feeling about both Britten and the Stravinsky of the 1920–50 period that the powerful emotional effect depends on the musical restraint. Dangerous enough was the Mahler connection, apparent in everything except the desire for totalization of the artistic experience, which Britten almost always successfully avoided.

He was in most respects an exceptionally aware composer; the areas in which that awareness failed are therefore all the more telling. Homosexual artists and thinkers have often shown great sensitivity to the oppression of women in patriarchal society. Britten made a gesture in this direction in Act 2 scene i of *Peter Grimes*, when Ellen is united musically with Auntie and her loose-living nieces in gender solidarity. The scene is an exception in Britten's output. Lucretia's sacrifice is overshadowed by reference to Christ's. A full half of the dramatic works (those in Herbert, E1979), include no women's voices or (like *Paul Bunyan* and *Death in Venice*) no significant female roles. *Gloriana* movingly portrays a woman's struggle with a traditionally male role; the Madwoman in *Curlew River*, arguably Britten's most touching female character, is sung by a man. This leaves the purposely ambivalent portrayal of the Governess in *The Turn of the Screw* as the chief contribution to gender variation in the operas (the fearsome group of female characters in *Owen Wingrave* would need special pleading under any circumstances). The musical depiction of Phaedra as ennobled rather than mad may be a last-minute reprieve, yet it is hard to avoid the conclusion that 'for the most part [Britten] confines his women to traditional roles and stereotypes, often identifying them with the society that restricts or even destroys his main characters' (McDonald, E1986, p.83). This limitation is perhaps the chief reason why claims for Britten's greatness need to be qualified. Compounding this limitation is the failure of 'such a champion of the oppressed ... to see the underlying connections among different kinds of oppression' (ibid., p.100).

An un-Forsterian lack of connection can also be discerned in Britten's appropriation of Asian music and drama. He did not identify with his sources (towards the Japanese he adopted a distinctly patronizing attitude); nor did he limit the uses to which they were put, which included traditionally exotic colouring, the projection of aberrant sexual desire and even the utopian portrayal of such things as 'peace', the Platonic perfection of Beauty and, inevitably, nescience. His status as a homosexual oppressed in his own culture can be argued as a mitigating circumstance: his 'Orientalism' – to apply Edward Said's critique, and his terminology, to this phenomenon – was not of the same kind as Durrell's or Flaubert's (see Brett, E1994). Britten's enclosing of his own meanings in the protective borrowed frame, and in *Curlew River* his appropriating aspects of Japanese *nō* that appealed to him while discarding the Buddhist elements that did not, may argue the opposite (Sheppard, in *Revealing Masks*, E. forthcoming). Such examples, rather than distancing Britten from the 'colonizing impulse', put him in collusion with it, placing him in line with the Elgar he would have despised as the inheritor of limited and unthinking attitudes to other peoples of the world even while he was admiring of, as well as benefiting financially and artistically from, their artistic prowess.

Issues of gender and race are the more important because Britten shines out as one of the few composers of the 20th century with claims to effective political and social engagement in other areas. His political commitment, begun under the tutelage of Auden and Isherwood and developed through contact with Forster and others, stems from a complicated sense of himself as a homosexual. Sensing the difficulties surrounding the place of the homosexual in society, and positioning himself so that his partnership with Pears, projected as 'normal', masked his paedophilia, Britten pursued a political agenda far removed from the liberal socialism of his predecessor Vaughan Williams. It was similarly rooted in the past, and involved 'a sense of disengagement from immediate

politics' that increased as Britten grew older (Carpenter, 486). Along the lines of interwar homosexual pacifist ideals, it placed personal relations above allegiance to institutions; it put the individual before society; it tended to show institutions such as the law, the military and the church as hypocritical, unjust or simply evil; it favoured erotic relations over marriage; it portrayed the patriarchal family as shallow and oppressive; it passionately argued justice for the victim and the victimized; and it presented the difficulty of homoerotic relations as a legacy of this society. Britten's assimilation into the British establishment, and his silence on contemporary issues, effectively camouflaged the devastating extent of this social and political critique in his works.

Two critical responses to the Other, or the marginal, have been discerned (see Champagne, *The Ethics of Marginality*, Minneapolis, 1995): the liberal humanist response, granting it greater subjectivity by trying to remake it in the image of the dominant or centre; and valorizing or privileging the marginality of the Other by making a resistant and transgressive use of the very lack at the centre that caused the construction of the margin. As a person compromised by his position in society, Britten nevertheless managed to cling to some semblance of the second view. 'All a poet can do is to warn', reads the *War Requiem* epigraph: but to warn, or do anything else, the poet has to be heard. It may be that North America taught Britten that to work for centrality at home would ultimately be more artistically and therefore politically effective than marginality abroad – as a means of articulating a message to society from that margin where Britten, at least, always imagined he lived. His old left friends like Slater and Auden were irritated to see him as a 'courtier', and gay politics, from which he distanced himself, have moved far beyond his nervous position. Yet one still needs to acknowledge his consistency and integrity in pursuing, sometimes to his friends' acute discomfort, a fairly incisive and certainly passionate line on pacifism and homosexuality in relation to subjectivity, nationality and the institutions of the capitalist democracy in which he lived. This line he maintained in his work rather than his life, where he acted out a role of charm and compliance laced with occasional brutality. The political stance is all the more remarkable because it barely exists anywhere else in art music outside avant-garde circles already too self-marginalized to offer any hope of serious intervention in the status quo. Further, it scores over the credo of the many later composers who, though openly gay, vow that homosexuality has nothing whatsoever to do with their music; they do not see it as a site from which to disrupt present notions of subjectivity and the organization of power and pleasure, as Britten demonstrably did.

Britten's artistic effort was an attempt to disrupt the centre that it occupied with the marginality that it expressed. If in life he was less discerning than Forster, his achievement as an artist makes interesting counterpoint with that of the novelist who, though he contributed a great deal in *A Passage to India* to the eventual downfall of the British Empire, never specifically addressed the persecution of his own kind until *Maurice*, which appeared posthumously. 'We are after all queer & left & conshies which is enough to put us, or make us put ourselves, outside the pale, apart from being artists as well', wrote Pears in 1963 to Britten, who in his public life predictably 'wanted to be just an absolutely normal person' (as reported by Reiss to Carpenter, 419–20, 445). It was Britten's achievement (reinforced rather than contradicted by Tippett) that British art music during his years of ascendancy came to embrace what was indelibly 'queer & left & conshie': and, instead of being instantly marginalized, it has travelled all over the world. There is no need to argue that in the process of assimilation Britten's music may have had some transformative effect; it is enough to note that, for anyone inclined to explore beyond its deceptively 'conservative' and desperately inviting surface, it offers not only a rigorous critique of the past but possibly also the vision of a differently organized reality for the future.

WORKS

STAGE

original works

dates are of first publication; earlier printed rehearsal editions are in GB-ALb and Lbl

Op.	*Title*	*Genre, acts*	*Composition*	*Libretto*	*First performance*	*Publication; autograph*
17	Paul Bunyan	operetta, prol, 2	1939–41	W.H. Auden	cond. H. Ross, New York, Columbia U., 5 May 1941	
	rev. version		1974–5		cond. S. Bedford, BBC, 1 Feb 1976; stage, cond. Bedford, Snape Maltings, 4 June 1976	vs 1978, fs 1993
33	Peter Grimes	op, prol, 3	1944–5	M. Slater, after G. Crabbe: *The Borough*	cond. Goodall, London, Sadler's Wells, 7 June 1945	vs 1945, study score 1963; *US-Wc*
37	The Rape of Lucretia	op, 2	1946; rev. 1947	R. Duncan, after A. Obey: *Le viol de Lucrèce*	cond. Ansermet, Glyndebourne, 12 July 1946	vs 1946, vs 1947 (rev. edn), study score 1958
39	Albert Herring	comic op, 3	1946–7	E. Crozier, after G. de Maupassant: *Le rosier de Madame Husson*	cond. Britten, Glyndebourne, 20 June 1947	vs 1948, study score 1970
45	The Little Sweep [Act 3 of Let's Make an Opera, op.45]	'an entertainment for young people'	1949	Crozier	cond. N. Del Mar, Aldeburgh, Jubilee Hall, 14 June 1949	vs 1950, study score 1965

Op.	*Title*	*Genre, acts*	*Composition*	*Libretto*	*First performance*	*Publication; autograph*
50	Billy Budd	op,4	1950–51	E.M. Forster and Crozier, after H. Melville	cond. Britten, London, CG, 1 Dec 1951	vs 1952
	rev. version	op, 2	1960		cond. Britten, BBC, 13 Nov 1960; stage, cond. Solti,. London, CG, 9 Jan 1964	vs 1961, study score 1985
53	Gloriana	op, 3	1952–3; rev. 1966	W. Plomer, after L. Strachey: *Elizabeth and Essex*	cond. Pritchard, London, CG, 8 June 1953	vs 1953, vs 1968 (rev. edn), study score 1990; *GB-Lbl*
54	The Turn of the Screw	op, prol, 2	1954	M. Piper, after H. James	cond. Britten, Venice, Fenice, 14 Sept 1954	vs 1955, study score 1966
57	The Prince of the Pagodas	ballet, 3	1955–6	J. Cranko	cond. Britten, London, CG, 1 Jan 1957	study score 1989
59	Noye's Fludde	1	1957–8	Chester miracle play	cond. Mackerras, Orford Church, 18 June 1958	vs 1958, fs 1959
64	A Midsummer Night's Dream	op, 3	1959–60	Britten and Pears, after W. Shakespeare	cond. Britten, Aldeburgh, Juilee Hall, 11 June 1960	vs 1960, study score 1962
71	Curlew River	church parable, 1	1964	Plomer, after J. Motomasa: *Sumidagawa*	dir. Britten, Orford Church, 12 June 1964	rehearsal score 1965, fs 1983
77	The Burning Fiery Furnace	church parable, 1	1965–6	Plomer, after Bible: *Daniel* i–iii	dir. Britten, Orford Church, 9 June 1966	rehearsal score 1968, fs 1983
78	The Golden Vanity	vaudeville for boys and pf	1966	C. Graham, after old Eng. ballad	Vienna Boys' Choir, dir. A. Neyder, Snape Maltings, 3 June 1967	1967
81	The Prodigal Son	church parable, 1	1967–8	Plomer, after Bible *Luke* xv.11–32	dir. Britten, Orford Church, 10 June 1968	rehearsal score 1971, fs 1986
85	Owen Wingrave	op, 2	1969–70	Piper, after James	cond. Britten, BBC TV, 16 May 1971; stage, cond. Bedford, London, CG, 10 May 1973	vs 1973, fs 1995
88	Death in Venice	op, 2	1971–3; rev. 1973–4	Piper, after T. Mann	cond. Bedford, Snape Maltings, 16 June 1973	vs 1975, fs 1979

realizations and completions

J. Gay: The Beggar's Opera, realized Britten (ballad op, 3, Gay, T. Guthrie), op.43, 1947–8; cond. Britten, Cambridge, Arts Theatre, 24 May 1948; vs (1949), study score (1997)

H. Purcell: Dido and Aeneas, z626, ed. Britten and I. Holst (op, 3, N. Tate), 1950–51, rev. 1958–9; cond. Britten, Hammersmith, Lyric, 1 May 1951; rev. version, cond. Britten, Drottningholm, 16 May 1962; vs (1960), fs (1961)

Purcell: The Fairy Queen, z629, ed. Pears, Britten and I. Holst (masque, after Shakespeare: *A Midsummer Night's Dream*), 1967; cond. Britten, Snape Maltings, 25 June 1967; vs (1970)

G. Holst: The Wandering Scholar, op.50, ed. Britten and I. Holst (chbr op, 1, C. Bax), ?1948–51; cond. I. Clayton, BBC, 5 Jan 1949; vs (1968)

INCIDENTAL MUSIC

film

recording sessions were in year of composition unless otherwise stated

GPO – *produced by General Post Office Film Unit*

BCGA – *produced by British Commercial Gas Association*

The King's Stamp, fl + pic, cl, perc, 2 pf, April–May 1935 [rec. 17 May]; GPO, dir. W. Coldstream, 1935

Coal Face (verse: W.H. Auden, M. Slater), spkr, whistler, SATB, perc, pf, May–June 1935 [rec. 19, 26 June]; GPO producer J. Grierson, dir. A. Cavalcanti, 1935

CTO: the Story of the Central Telegraph Office, fl, ob, cl, perc, pf, July 1935 [rec. 20 July]; GPO, producer S. Legg, 1935

Telegrams, boys' vv, fl, ob, cl, perc, pf, July 1935 [1st recording session 20 July]; GPO [film unidentified]

The Tocher (film ballet), boys' vv, fl + pic, ob, cl, perc, pf, July 1935 [rec. 20 July]; GPO producer Cavalcanti, animator L. Reiniger, 1938 [see also CHORAL, Rossini Suite]

Gas Abstract, fl, cl, bn, perc, pf, Aug–Sept 1935 [rec. 3 Sept]; ?BCGA [film unidentified]

Dinner Hour, fl, cl, perc, pf, vn, vc, Sept 1935 [rec. 16 Sept]; BCGA, dir. A. Elton, 1936

Title Music III, fl, cl, perc, pf, vn, vc, Sept 1935 [rec. 16 Sept]; BCGA, dir. A. Elton, ?1936 [film unidentified]

Men behind the Meters, fl, ob, cl, perc, glock, pf, vn, vc, Sept–Oct 1935 [rec. 16 Sept, 2 Oct]; ARFP for BCGA, dir. A. Elton, 1936

Conquering Space: the Story of Modern Communications, fl, ob, cl, bn, perc, pf, Sept 1935 [rec. 1 Oct]; GPO, dir. Legg, 1935

How the Dial Works, fl, ob, cl, perc, pf, Sept 1935 [rec. 1 Oct]; GPO, producer R. Elton, R. Morrison, 1937

The New Operator, fl, ob, cl, bn, perc, pf, Sept 1935 [rec. 1 Oct]; GPO, producer J. Grierson, dir. Legg [soundtrack for silent film; never released]

The Savings Bank, fl, ob, cl, bn, perc, pf, Sept 1935 [rec. 1 Oct]; GPO, dir. Legg, 1935

Sorting Office, fl, ob, cl, bn, perc, pf, Sept 1935 [rec. 1 Oct]; GPO, dir. H. Watt [soundtrack for silent film; never released]

Negroes/God's Chillun (Auden), Sept–Nov 1935, rev. Jan 1938 [rec. 8 Jan]; S, T, B, TB chorus, ob + eng hn + tambourine, perc, hp, pf + b drum; GPO, 1938

GPO Title Music 1 and 2, fl, ob, bn, tpt, perc, hp, vn, va, vc, db, ?Nov 1935; GPO [film unidentified]

Night Mail (J. Grierson, Watt, B. Wright; verse: Auden), spkr, fl, ob, bn, tpt, perc, vn, va, vc, db, Nov 1935–Jan 1936 [rec. Dec 1935–Jan 1936] (2000); GPO, producer Grierson, dir. Watt, Wright, sound dir. Cavalcanti, 1936 [see INSTRUMENTAL ENSEMBLE]

Peace of Britain, fl, cl, tpt, perc, pf, str, March 1936 [rec. 21 March]; Freenat Films and Strand Films, dir. P. Rotha, 1936

Around the Village Green, 2 fl, ob, cl, tpt, trbn, timp, perc, hp, str, April, Sept–Oct 1936 [rec. 19, 21 Oct]; Travel and Industrial Development Association, dir. Spice, M. Grierson, 1937 [see ORCHESTRAL, Irish Reel]

Men of the Alps, fl + pic, cl, tpt, trbn, perc, hp, str; Sept–Oct 1936 [rec. 20 Oct]; GPO and Pro Telephon, Zürich, producer, Watt, dir. Cavalcanti, 1937

The Saving of Bill Blewitt, fl, cl, tpt, trbn, perc, hp, str, Oct 1936 [rec. 20 Oct]; GPO, producer J. Grierson, dir. Watt, 1937; music lost
Calendar of the Year, March, Sept–Nov 1936 [rec. 9, 20 Oct, 3 Nov]; GPO, produced Cavalcanti, dir. E. Spice, 1937; most music lost
Line to the Tschierva Hut, fl + pic, cl, tpt, trbn, perc, hp, str, Sept–Nov 1936 [rec. 20 Oct, 3 Nov]; GPO and Pro Telephon, Zürich, producer, J. Grierson, dir. Cavalcanti, 1937
Four Barriers, ?Sept–Nov 1936; GPO and Pro Telephon, Zürich, producer Watt, dir. Cavalcanti, 1937; music lost
Message from Geneva, ?Sept 1936; GPO and Pro Telephon, Zürich, dir. Cavalcanti, 1937; music lost
Love from a Stranger (F. Marion, adapted from play by F. Vosper, after A. Christie: *Philomel Cottage*), orch, Nov 1936 [rec. 25, 27 Nov] (2000, transcr. C. Matthews); Capitol (Trafalgar) Films/Max Schach Productions, produced Schach, dir. R.V. Lee, 1937 [feature film; for pubd version, see Arrangements by others of Britten works]
The Way to the Sea (verse: Auden), spkr, fl + pic, ob + eng hn, cl, a sax, bn, tpt, trbn, perc, hp, pf, Dec 1936 [rec. 14, 16 Dec]; Strand Films for Southern Railway, producer Rotha, dir. J.B. Holmes, 1937
Book Bargain, ?1936–7; GPO, dir. N. McLaren, 1937
Advance Democracy (R. Bond), SATB, perc, 1938; Realist Film Unit, dir. Bond, Wright, 1938
Mony a Pickle, ?1938; GPO, dir. Cavalcanti, R. Massingham, 1938 [music taken from The King's Stamp, probably without Britten's knowledge]
Instruments of the Orchestra (Slater), orch, 1945 [rec. 28 March 1946] (1947); Crown Film Unit, producer A. Shaw, dir. M. Mathieson, 1946 [see ORCHESTRAL, The Young Person's Guide to the Orchestra, 1945]

radio

King Arthur (D.G. Bridson), SATB, orch, March–April 1937; BBC, 23 April 1937 [for pubd Suite, see Arrangements by others of Britten works]
The Company of Heaven (compiled R.E. Roberts), S, T, SATB, timp, org, str, Aug–Sept 1937 (1990); BBC, 29 Sept 1937 [see VOCAL: solo voices and chorus with orchestra]
Hadrian's Wall (W.H. Auden), solo male v, SATB, perc, str qt, Nov 1937; BBC, 25 Nov 1937; music lost
Lines on the Map (4 programmes: S. Potter, J. Miller, D.F. Aitken and E.J. Alway, Potter), 2 tpt, 2 trbn, perc, Jan 1938; BBC, Jan–April 1938
The Chartists' March (J.H. Miller), TB, perc, April–May 1938; BBC, 13 May 1938; music lost
The World of the Spirit (compiled Roberts), S, A, T, B, SATB, orch, April–May 1938 (2000); BBC, 5 June 1938 [see VOCAL: solo voices and chorus with orchestra]
The Sword in the Stone (6 pts, M. Helweg, after T.H. White), solo female v, 2 solo male vv, TB, fl + pic, cl, bn, tpt, trbn, perc, hp, April–May 1939; BBC, 11 June – 16 July 1939 [for pubd Suite, see Arrangements by others of Britten works]
The Dark Valley (Auden), solo female v, fl, eng hn, cl, tpt, perc, May 1940; CBS (New York), 2 June 1940
The Dynasts (after T. Hardy), brass, perc, str, 1940; CBS (New York), 24 Nov 1940; music lost
The Rocking-Horse Winner (Auden and J. Stern, after D.H. Lawrence), male vv, fl, cl, perc, hp, 1941; CBS (New York), 6 April 1941; music lost
Appointment (N. Corwin), orch, 1942; BBC, 20 July 1942
An American in England (6 programmes: Corwin), orch, July 1942; CBS (London), July–Sept 1942
Lumberjacks of America (R. MacDougall), fl, cl, bn, 2 tpt, trbn, perc, pf, hp, db, July–Aug 1942; BBC, 24 Aug 1942
The Man Born to be King, play 10: The Princes of this World (D.L. Sayers), solo male v, pf, 1942; BBC, 23 Aug 1942 [song: Bring me garlands, bring me wine]
The Man Born to be King, play 11: King of Sorrows (Sayers), S/Mez, male chorus, hp/pf, Sept 1942; BBC, 20 Sept 1942 [song: Soldier, soldier, why will you roam]
Britain to America (programmes i/9, ii/4, ii/13: L. MacNeice), orch, 1942; BBC North American Service, Sept, Nov 1942, Jan 1943
The Four Freedoms, programme 1: Pericles (MacNeice), 1943; BBC, 21 Feb 1943; music lost
The Rescue (E. Sackville-West, after Homer: *Odyssey*), S, Mez, T, B, orch, 1943; BBC, 25–6 Nov 1943 [for concert version, see Arrangements by others of Britten works]
A Poet's Christmas (Auden), SATB, 1944; BBC, 24 Dec 1944 [music for: 1 A Shepherd's Carol, 2 Chorale after an Old French Carol]
The Dark Tower (MacNeice), tpt, perc, str, 1945; BBC, 21 Jan 1946
Men of Goodwill (compiled L. Gilliam and L. Cottrell), orch, 1947; BBC, 25 Dec 1947

theatre

Timon of Athens (W. Shakespeare), 2 ob, perc, hpd, Oct–Nov 1935; producer N. Monck, London, Westminster Theatre, 19 Nov 1935
Easter 1916 (M. Slater), mixed vv, perc, accdn, Dec 1935; producer A. van Gyseghem, London, Phoenix, 8 Dec 1935; music lost
Stay down Miner (Slater), T/Bar, TB chorus, cl, perc, vn, vc, May 1936; producer W. Walter, London, Westminster Theatre, 10 May 1936
The Agamemnon of Aeschylus (trans. L. MacNeice), SATB, 2 fl, eng hn, cl, perc, Oct 1936; producer R. Doone, London, Westminster Theatre, 1 Nov 1936
The Ascent of F6 (W.H. Auden, C. Isherwood), solo female v, 2 solo male vv, SATB, perc, ukelele, 2 pf, Feb 1937; producer Doone, London, Mercury, 26 Feb 1937
Pageant of Empire (Slater), mixed vv, cl, a sax, tpt, perc, pf, vn, vc, db, Feb 1937; London, Collins' Music Hall, 28 Feb 1937
Out of the Picture (MacNeice), S, solo male v, SATB, tpt, perc, pf, Dec 1937; producer Doone, London, Westminster Theatre, 5 Dec 1937
Spain (Slater), mixed vv, cl, vn, pf, June 1938; London, Mercury, 22 June 1938; music lost
On the Frontier (Auden, Isherwood), male v, chorus, 2 tpt, perc, accdn, pf, Oct–Nov 1938; producer Doone, Cambridge, Arts, 14 Nov 1938
They Walk Alone (M. Catto), org, Nov 1938; producer B. Viertel, London, Q Theatre, 21 Nov 1938
The Seven Ages of Man (Slater), 1938; London, Mercury, 1938; music lost
Johnson over Jordan (J.B. Priestley), S, fl + pic, orch, Jan–Feb 1939; producer B. Dean, London, New, 22 Feb 1939 [for pubd Suite, see Arrangements by others of Britten works]
This Way to the Tomb (R. Duncan), S, A, T, B, SATB, perc, pf 4 hands, 1945; producer E.M. Browne, London, Mercury, 11 Oct 1945
The Eagle has Two Heads (J. Cocteau, trans. Duncan), brass, perc, 1946; producer M. MacDonald, Hammersmith, Lyric, 4 Sept 1946

PHILIP BRETT (text), JENNIFER DOCTOR, JUDITH LEGROVE, PAUL BANKS (works), JUDITH LEGROVE(bibliography)

Britton, Thomas (*b* Rushden, Northants., 14 Jan 1644; *d* London, 27 Sept 1714). English patron of music and amateur musician. He served a seven-year apprenticeship with a London coal dealer and, after returning to Northamptonshire for a while, set up in business in London, where by 1677 he was dealing in small-coal in Aylesbury Street, Clerkenwell. He amassed a large

collection of books, from which he acquired a wide knowledge of chemistry, astrology and both theoretical and practical music. In 1678, according to Hawkins, he established with the encouragement of Sir Roger L'Estrange the music meetings which were held every Thursday in a long narrow room over his shop. It was approached by stairs outside the house and was lit by a window 'no bigger than the bung-hole of a cask' according to an entertaining account by his neighbour Ned Ward.

Despite their mean surroundings the meetings were attended by such leaders of fashion as the Duchess of Queensberry. The performers included professionals like John Banister (ii) and Philip Hart and, in Britton's later years, Handel, Pepusch (who wrote a trio sonata entitled 'smalcoal') and Matthew Dubourg. Britton and L'Estrange played the viola da gamba, and other amateurs included Henry Needler, the poet John Hughes and the painter Woolaston. At first the concerts were free, Britton providing his guests with coffee at a penny a dish; later the visitors apparently paid ten shillings a year each, though the Yorkshire diarist Ralph Thoresby paid nothing when he attended a meeting in 1712.

Britton knew the Earls of Oxford, Pembroke and Sunderland and other eminent book collectors of the time. He is thought to have brought together the Somers tracts and was partly responsible for the formation of the Harleian library (now in *GB-Lbl*). His connections with these noblemen led some to believe that his music meetings were only a cover for seditious purposes, and he was variously and wrongly suspected of being a magician, atheist, Presbyterian and Jesuit. His death was brought about by the practical joke of a ventriloquist who so frightened him that he never recovered. Woolaston's portrait of him is in the National Portrait Gallery, London.

Britton sold part of his library in 1694, possibly so as to enlarge his music collection. The catalogue of this early sale (in *GB-Lbl*) lists over 1000 items – prints, manuscripts, tracts, pamphlets and books on 'English Divinity, Magick, and Chymistry'. His music and fine collection of instruments were sold on his death for the benefit of his widow (Hawkins reproduced the sale catalogue). Understandably, English 17th- and 18th-century chamber music is well represented, but there are also works by Walther and Biber, music in editions by Roger of Amsterdam and a wide range of Italian music from Domenico Gabrielli and Cazzati to Albinoni and Vivaldi, as well as many vocal works. With such resources the programmes of Britton's concerts must have been impressively wide-ranging. Several manuscripts from the collection have been preserved, including *GB-Lbl* Add.22098 ('Tho. Britton His Book July ye 12 1697') and Add.24889 (transcriptions of theatre music by Purcell and others); *Lcm* 2087; *Ob* Mus. Sch.C.75 (Corelli's op.1 in Britton's hand, inscribed 'used at his Assembly for many years'); *US-NYp* Drexel 3849 ('Thomas Britton his Book 1680'); and probably *Pu* Fi 9–12.

MICHAEL TILMOUTH/SIMON McVEIGH

Briuschi, Antonio. *See* BRIOSCHI, ANTONIO.

Brivio, Giuseppe Ferdinando (*b* Milan, ? end of the 17th century; *d* Milan, ?*c*1758). Italian composer, possibly an impresario, singing teacher and violinist. 18th-century sources (e.g. *BurneyH*; *GerberL*; *GerberNL* and *La BordeE*) blur the distinction between two or more musicians active in Milan by failing to give first names. Only the revised edition of Mancini (1777) supplies Giuseppe Ferdinando as the composer's first names and describes him as a prominent Milanese singing teacher without identifying him with the violinist, composer and impresario also active in Milan. In fact a family of Brivios could be involved, including an older singing teacher, Carlo Francesco Brivio, who appeared in Milanese operas of 1696, *Teodolinda* and *L'Etna festante*, the librettos for which call him 'musico di S.E. il Castellano' (the castle commander's musician). Suggested as Giuseppe Ferdinando's father (Martinotti in *DBI*), this Carlo Francesco may have been the bass employed in the ducal court chapel until 1737 and then as a substitute singer until 1749. Recent sources (relying on *GerberNL* but based on *La BordeE*) credit Carlo Francesco with having taught Giuseppe Appiani and Felice Salimbeni. Since Mancini (1777) stated that Giuseppe Ferdinando taught Caterina Visconti and Giovanna Astrua, both Brivios may have taught singing at about the same time.

In 1720 the orchestra of the ducal theatre in Milan included two performers named Giuseppe Ferdinando Brivio, a first violinist and a trumpeter; only the latter, however, was cited in a list of June 1711 naming the Milanese players in Novara for the festival of S Gaudenzio. Although the ducal theatre orchestra did not include any player named Giuseppe Ferdinando Brivio in 1748 or 1765, a Gaetano Brivio played second violin in both years. It is generally assumed that the violinist Giuseppe Ferdinando Brivio also composed operas and symphonies and served as impresario in Milan. Archival documents indicate that he was in charge of the ducal theatre for a relatively long time: 26 February 1727 to 13 October 1732. Contrary to reports in modern encyclopedias, Brivio did not assist Giuseppe Milesio or any other of his predecessors, and his successor, G.A. Rozio, was forbidden to use him as partner.

Perhaps because some of Brivio's arias were used in pasticcios at the King's Theatre or because Brivio's pupils Giulia Frasi (according to Burney) and Visconti sang in these pasticcios, Loewenberg and others have supposed that Brivio was in London about 1742–5; no document proving a visit has come to light, however. Even though certain arias were published by Walsh, the pasticcios *Gianguir*, *Mandane* (both 1742) and *L'incostanza delusa* (1745; with music from Brivio's earlier opera of that name) were not especially popular with London audiences.

Archival papers of the ducal theatre at Milan indicate that Giuseppe Ferdinando Brivio was reimbursed for lodging Leonardo Leo (1740), the choreographer François Sauveterre (1748) and the prima donnas A. Conti (1753)

and Columba Mattei (1754) at his residence in Milan. No known documents, however, verify his death in 1758, and no evidence has been found to link unequivocally some of the instrumental music published at Paris and London (1730–63) under the name Brivio with Giuseppe Ferdinando.

WORKS

DRAMATIC

operas unless otherwise indicated

Ipermestra (3, A. Salvi), Milan, Regio Ducal, 26 Dec 1727, probably a pasticcio arr. Brivio
Olimpiade (3, P. Metastasio), Turin, Regio, 5 March 1737, for wedding of King Carlo Emanuele III of Savoy and Princess Elisabetta Teresa of Lorraine
Demofoonte (3, Metastasio), Turin, Regio, carn. 1738, *A-Wgm* (attrib. Carlo Francesco Brivio), arias, *F-Pc*
Artaserse (3, Metastasio), Padua, Obizzi, 2 June 1738, for visit of Maria Amalia, Queen of the Two Sicilies
Merope (3, A. Zeno), Milan, Regio Ducal, 26 Dec 1738
Didone abbandonata (3, Metastasio), Milan, Regio Ducal, Jan 1739, sometimes attrib. A. Bernasconi
La Germania trionfante in Arminio, Milan, Regio Ducal, 2 May 1739, for visit of Maria Teresa as Archduchess of Austria
L'incostanza delusa (2), Milan, Regio Ducal, ? sum. 1739, 2 arias (London, 1745/*R*)
Alessandro nell'Indie (3, Metastasio), Milan, Regio Ducal, Jan 1742, aria, *Pc*
Music in: Gianguir, 1742; Mandane, 1742; L'incostanza delusa, 1745
Unidentified arias and duet in *A-Wn*, *I-Gl*

INSTRUMENTAL

some may be by other Brivios

Sonata, fl/vn, bc, in 6 Solos . . . by Mr Handel, sigr Geminiani, sigr Somis, sigr Brivio (London, 1730)

SVEN HANSELL

Brixi. Czech family of musicians. Of the family's three branches the first, which settled at the beginning of the 17th century in Skalsko, Bohemia, included Dorota Brixi (1686–1762), the mother of František and Jiří Antonín Benda, and (5) Viktorin (Ignác) Brixi. To the second branch, which settled at Vlkava near Nymburk, belonged the organist and composer (1) Šimon Brixi and his son (2) František Xaver Brixi. The third branch, originating from Mělník, included (3) Jan Josef Brixi and his son (4) Václav Norbert Brixi.

(1) **Šimon Brixi** (*b* Vlkava, 28 Oct 1693; *d* Prague, 2 Nov 1735). Organist and composer. He received his musical education at the Jesuit Gymnasium Jičín (1711–17). He became a law student at Prague University, but abandoned these studies to devote himself to music and became organist at the Týn Church. In 1720 the success of his works for the *musica navalis*, the annual St John's Eve festivities on the river Vltava, earned him a commission for the festal music for each year from 1722 to 1729. His wedding in 1724 was celebrated by Bohuslav Matěj Černohorský, a composer and priest at the Franciscan monastery in Prague. In 1725 Brixi became a music teacher at the school of St Martín and organist at the church, and from 1727 was choirmaster at St Martín.

Brixi's compositions are in the Venetian style represented by Fux and Caldara, with some elements of Czech folk music. His style is marked by full instrumentation and a preference for brass. He handled contrapuntal texture skilfully, and in homophonic passages often made use of concertato interplay between soloists and chorus. The tunefulness of his melodic lines is reminiscent of folk music, and his use of Czech texts is unique in 18th-century Czech music.

Of Brixi's extensive output only 34 works survive. The majority of his autographs are in the collection of (3) Jan Josef Brixi, now in the National Museum, Prague. His other compositions, mostly in manuscript, are in the National Museum, Prague, the Moravian Museum at Brno and the archives of Czech and Moravian churches. He wrote principally church music, including several masses, settings of the *Te Deum* and the *Magnificat* (including one in MAB, 2nd ser., ii, 1967, 2/1982), litanies, offertories and motets; one school comedy is known, *Cancet preambulans*.

(2) **František** [Franz] **Xaver Brixi** (*b* Prague, bap. 2 Jan 1732; *d* Prague, 14 Oct 1771). Organist and composer, son of (1) Šimon Brixi. He received his musical education at the Piarist Gymnasium, Kosmonosy (1744–9), where in 1748 he was classified 'felicissimus ingenii'. In his last year at the Gymnasium his teacher was Václav Kalous (1715–86), a composer who was also choirmaster at the monastery church. In 1749 Brixi left for Prague where he became organist first at St Havel, and later at the churches of St Martín, St Mikuláš and St Mary na Louži. He soon became one of the best-known composers in Prague, evidence of which can be seen in that from 1757 to his death he was consistently chosen to write the *musica navalis* for St John's Eve. On 1 January 1759 he was appointed Kapellmeister of St Vít Cathedral, thus attaining at the age of 27 the highest musical position in the city. At the same time he is said to have become choirmaster of the Benedictine monastery of St Jiří at Hradčany in Prague. He died 12 years later of tuberculosis in the hospital of the Brothers of Charity.

Brixi was one of the leading musical figures of mid-18th-century Bohemia. His tremendous output of about 500 works was rooted in the Neapolitan style, particularly that of Alessandro Scarlatti, Francesco Feo and Francesco Durante, and he was also influenced by the Viennese school of Mancini, Reuter and Bonno. Brixi's style is distinguished from that of his contemporaries by its fresh melodic writing, vivacious rhythm and lively bass lines, and from that of his predecessors by its simple yet effective instrumentation. He often made use of folk music in his works. During his lifetime his music was widely dissemi-

nated in Bohemia and Moravia, as well as in other countries, especially Austria, Bavaria and Silesia. He had a profound effect on Bohemian musical taste, and Mozart's favourable reception in Prague in the 1780s was at least partly due to Brixi's lasting influence. The easy appeal of his musical style left an impression on Czech composers for the rest of the 18th century.

WORKS

most MSS in CZ-Pnm, Bm, Czech, Bavarian, Austrian and Polish church and monastery archives

VOCAL

*c*350 sacred works: 65 masses, mostly 1–4 solo vv, 4vv, acc., and 11 requiem settings, incl. Missa, C, 4vv, vs (Bonn, *c*1855); Missa pastoralis, D, 4vv, orch, ed. E. Trolda (Prague, 1947), ed. R. Walter (Zürich, 1977); Missa integra, D, 4 solo vv, 4vv, orch, in MAB, 2nd ser., vi (1971), ed. K. Pojar (Adliswil, 1992)

Messe, C, vs (Speyer, 1980); Missa Dominicalis, C, 4 solo vv, 4vv, orch, ed. M. Franěk (Prague, 1991); offs, incl. Offertorium, C (Kutná Hora, 1936); Motetto pastorale, G, 4vv, orch, ed. D. Geist and M. Kampelsheimer (Prague, 1997)

Suites, partitas, hpd, incl. 2 movts ed. in MAB, 1st ser., xiv (1953/*R*); Partita, G, ed. in *Bertramka*, xii (1982)

(3) **Jan Josef Brixi** (*b* ?1712; *d* Mělník, 27 April 1762). Organist and composer. He became organist at St Petr and St Pavel in Mělník and teacher at the municipal school, but in 1738 moved to Manětín, where his son (4) Václav Norbert Brixi was born. From 1748 to his death he lived again in Mělník, where he held the position of choirmaster at the cathedral and raised the standard of its music to the highest level. He left a large collection of music (now in the National Museum of Prague), much of it copied in his own hand, containing works by the most prominent composers of his time. Of his own compositions only a single mass for mixed choir, orchestra and organ is known.

(4) **Václav Norbert** [Jeroným] **Brixi** (*b* Manětín, 20 Sept 1738; *d* Planá, 15 April 1803). Organist and composer, son of (3) Jan Josef Brixi. He entered the Cistercian monastery at Plasy near Plzeň in 1758, and took his vows the following year; in 1766 he was ordained a priest under the name Jeroným, with which he signed all his compositions. He became organist and later choirmaster of the monastery church, and from 1781 he was parish priest in Planá. His church music is Neapolitan in style, but fails to rise above the average level of its time.

(5) **Viktorin (Ignác) Brixi** (*b* Plzeň, 26 June 1716; *d* Poděbrady, 30 March 1803). Organist and composer. He received his basic musical education from his uncle Viktorin Zádolský, who was the parish priest at Skalsko. Later he studied at Čelákovice with the organist Josef Hojer, and completed his studies at the Piarist Gymnasium at Kosmonosy, where he is entered in the register for 1731 with the remark: 'In musica et literis pari pasu ambulat'. His musical talent was already evident during his time at the Gymnasium. He took part in school plays as an actor and singer, and composed music for several of them. After a short stay in Liberec, he became a schoolmaster in Poděbrady and was later an organist and choirmaster at the church there. According to his autobiographical note written for Dlabač's *Künstler-Lexikon*, he was offered a position at the imperial court in Vienna by Maria Theresa's husband, Francis of Lorraine, who had heard him play in Poděbrady, and received a similar offer from the Prussian court through his half-brother Franz Benda who was at that time in the service of Frederick the Great. In declining the opportunity to leave his native country Brixi was exceptional among his Czech contemporaries, and he remained in Poděbrady until his death.

Brixi's works are typical of the music composed by Czech cantors and organists for village choirlofts. Like those of (2) František Xaver Brixi, they are rooted in the Neapolitan style, but in comparison they are simpler and less ambitious. His use of folk idioms occurs mainly in his Christmas music. A *Missa pastoralis* in D is at St Gilet's Church in Nymburk; his other works include cantatas, offertories, arias, a Latin oratorio *Jephta* written in 1769 and a piano sonata. (Principal sources, *CZ-Bm*, *Pnm*.)

VLADIMIR NOVÁK

Brixides, Jan (*b* Brno, *c*1712; *d* Brno, ?1772). Czech organist and composer. As a boy he sang in St Jakub's church in Brno (1720–26) and learnt to play the organ from Jakub Wachter (*d* 1741). He became organist at the Benedictine monastery at Rajhrad, near Brno (1726–35), and at the Augustinian church of St Tomáš in Brno (from 1735 to his death), where he was noted for his improvisation at the keyboard. In 1742 he married Terezie Schulzová. Brixides had a reputation as an outstanding composer, though he was 29 when he began to compose. His works, all sacred, were written for his own choir; stylistically they are indebted to Fux and Caldara, with the Baroque effects of virtuoso clarino parts and loud timpani, but with simplified counterpoint. His earliest extant work is *Veni Sancte Spiritus* (1755), written for the first Mass celebrated by Anselm Hackenwälder, the choirmaster at St Tomáš. Brixides's works, which survive in manuscript at the Moravian Regional Museum, Brno, include six masses, one requiem in E♭ dated 1772 (with a note that it was composed shortly before his death for his own funeral), four settings of *Veni Sancte Spiritus* and 20 smaller sacred works using liturgical and non-liturgical Latin texts.

Brkanović, Ivan (*b* Škaljari, Boka Kotorska, 27 Dec 1906; *d* Zagreb, 20 Feb 1987). Croatian composer. He studied at the Zagreb Academy with Fran Lhotka and Blagoje Bersa (composition), graduating in 1935, and then at the Schola Cantorum in Paris with J. Léfebre. Between 1935 and 1951 he taught in Zagreb schools. He was made music adviser to the Croatian National Theatre, Zagreb, in 1951 and director of the Zagreb PO in 1954. He was president of the composers' unions of Bosnia and Hercegovina (1950–51) and of Croatia (1953–5), and a visiting professor at Sarajevo Music Academy (1957–62). He was also a prolific writer on music (see Majer-Bobetko, and Supičić, 1989), particularly in the period 1932–41.

Brkanović was one of the most prominent representatives of the so-called national style in Croatian music. Using traditional musical means, he blended elements of Croatian folk music with his own strong artistic ideas, and in an attempt to evoke folk art in all its aspects, he drew on traditional rites, particularly on their most primitive features. His musical style is characterized by innovative formal and harmonic procedures, and dense polyphonic textures. Brkanović's feeling for dramatic tension and powerful emotions made him an ideal operatic composer. His first opera, *Ekvinocij* ('Equinox'), is a realistic musical drama, while the opera-oratorio *Škrinja svetog Šimuna* ('St Simon's Shrine'), inspired by scenes from a 14th-century shrine in Zadar, is strongly archaic. Brkanović's best-known work is the *Triptihon* ('Triptych') of 1936, a requiem setting of epic folk poetry. This intensely emotional work contrasts restrained choral settings, striking for their Slavonic melodic inflections, with passages of blazing passion and intensity, reinforced by a sharp-edged orchestration. The five symphonies are dramatically conceived; outstanding among them is the traditionally-planned, tragic Second Symphony. Its freely tonal, and sometimes harsh, harmonic structure shows Brkanović's great contrapuntal skill with simple melodic lines, often reminiscent of folksong. The accumulation of motifs and the magnificent handling of the brass are equally noteworthy. Unlike many of his contemporaries, Brkanović has chosen not to investigate new techniques, but has aimed to draw the best from traditional means.

NIALL O'LOUGHLIN

Brnčić (Isaza), Gabriel (*b* Santiago, 16 Feb 1942). Chilean composer, active in Spain. He received his early musical training at the Conservatorio Nacional de Música in Santiago. After studying engineering and chemistry (1961–4), he pursued the Título Superior de Licenciado in composition at the Facultad de Ciencias y Artes Musicales of the Universidad de Chile, where his teachers included Becerra-Schmidt. His first work, *Oda a la energía* for orchestra, was given its première in 1963. In 1965 a stipend from the Buenos Aires Instituto Di Tella enabled him to study in Argentina, where he continued his training at the Centro Latinoamericano de Altos Estudios Musicales (CLAEM) with Ginastera, Gandini, Sessions, Maurice La Roy, Xenakis, Francisco Kröpfl (in 1966) and Nono (in 1967). From 1967 to 1970 he lectured at the Instituto Di Tella, where, in collaboration with Fernando von Reichenbach, he tested the Convertidor Gráfico-Analógico (CGA), a conversion system similar to the UPIC prototype developed by Xenakis in France.

From 1971 to 1974 Brnčić directed the electronic studio of the Centro de Investigaciones en Comunicación Masiva, Arte y Tecnología (CICMAT) in Buenos Aires. When the political situation in Argentina caused him to leave the country in 1974, he moved with his family to Spain, where he settled in Barcelona. Active as a lecturer at the recently founded electro-acoustic studio of the Fundación Phonos from 1975, he served as its director from 1983 to 1992. During the 1980s and 90s his reputation as an expert in electro-acoustics brought him a series of invitations to lecture throughout Spain. In 1994 he was appointed to a post at the Universidad Pompeu Fabra, Barcelona. His honours include first prize at the Concurso Casa de las Américas of Cuba (1966), first prize at the Bourges International Competition for Electro-Acoustic Music (1984; for *Chile fértil provincia . . .*, 1975–83), the Premio Ciudad de Barcelona (1986; for the Viola Concerto, 1967) and election to the Academia Chilena de Bellas Artes del Instituto de Chile (1999). He has completed commissions from SWF Baden-Baden, Radio Nacional de España, the Associació Catalana de Compositors, the Groupe de Musique Expérimentale of Bourges and the Centro para la Difusión de la Música Contemporánea, among others.

Brnčić's experiences at the Instituto Di Tella inspired him to investigate new musical systems, combining techniques of sound generation and manipulation with modern compositional theories. His research into musical structure, form, instrumentation and notation are reflected in the extensive series of works *Quodlibet* (1966–88), pieces that typify an analogue depiction of music. Brnčić is also recognized for his integration of artificial sounds with traditional orchestral timbres. Almost half of his catalogue of works are scores in which natural musical instruments are combined with electro-acoustic elements. Purely instrumental music also occupies a prominent place in his output. His solo instrumental works take an experimental approach to the technical possibilities of various instruments. His unpublished *Catálogo de sonidos no convencionales en el oboe y el corno inglés* is the outcome of systematic study of the sounds of the oboe and the english horn, instruments which he plays himself.

CHRISTIANE HEINE

Brno (Ger. Brünn). Second largest city in the Czech Republic and the cultural centre of Moravia. From the 13th century onwards the original Slavonic inhabitants were augmented by German colonists and by a large number of Romance/Norman and Jewish immigrants. A systematic Germanization of Brno took place, especially after the Battle of the White Mountain (1620), so that by the end of the 19th century under half the inhabitants claimed Czech nationality. A reversal in the relative proportion of Czechs and Germans took place after 1919, but until 1945 there was still a sizeable German minority in Brno. As a result of this ethnic dichotomy, from the 18th to the 20th centuries the city's cultural life developed along parallel lines, Czech and German.

1. Churches and monasteries. 2. Civic and concert music. 3. Opera and ballet. 4. Education and musicology.

1. CHURCHES AND MONASTERIES. Medieval musical relics preserved in the city include 13th-century neumatic missals, 14th-century antiphoners belonging to Queen Eliška Rejčka, and 14th- and 15th-century liturgical volumes from the church of St Jakub. In the 13th century schools were founded at the churches of St Petr and St Jakub; at the time of the Reformation (16th century and early 17th) Protestant hymn-singing was also taught at private schools. The large Jewish community preserved Hebrew chanting, and this was used to give a festive welcome to King John of Luxembourg during his entry into the city in 1311.

One noted choirmaster active at St Petr was Matěj František Altmann (late 17th century to 1718), who later moved to St Jakub, where he compiled a collection of Italian Baroque music and kept in touch with Roman and Viennese composers. A number of works by the St Petr choirmaster Gotthard Pokorný (1733–1805), revealing the influence of Viennese and Italian Classicism, have also survived. The choirmaster Josef Dvořák (1807–69) also held several posts in the city, from chorister at the Augustinian monastery in old Brno to solo bass at the municipal theatre and director of German choral societies. Under his direction the organist Josef Neruda (1807–75), founder of a well-known musical family, worked with the choir of St Petr from 1832 to 1845. In 1714 Jakub Wachter (*d* 1741) became the first of a long line of remarkable organists active at St Jakub; his Requiem, performed at his own funeral, displays elements of the mature Viennese Baroque style. From 1762 the musical tradition of St Jakub was fostered by the choirmaster Peregrino Gravani (1732–1815), an ardent admirer of Haydn and Mozart, who left behind a large number of works composed in the Viennese Classical style and an extensive thematic catalogue.

The archives of the Brno monasteries contain evidence of an intensive cultivation of music, both within the liturgy and in the monks' refectories and at public academies, and also allude to the choristers' participation in opera performances. The Premonstratensians at Brno-Zábrdovice were visited by Jacobus Gallus around 1579. The library of the Augustinians includes 16th- and 17th-century publications by masters of the Dutch, Roman and Venetian schools, as well as a collection of manuscripts including works by native organists and members of the Augustinian order, such as Jeronym Haura (1704–50), composer of the Czech pastoral song *Hej, chval každý duch*, Jan Brixides (*c*1712–*c*1772) and Pavel Křížkovský (1820–85). The collection also contains a number of symphonic, chamber and dramatic works, among them a musical play on a Czech text, *Opera bohemica de camino* (*c*1772), ascribed to the composer Karel Loos.

The Augustinian foundation, established in 1653, had a far-reaching effect on the training of young musicians right up to the 19th century. In the mid-19th century, when the young Leoš Janáček (1854–1928) arrived at the choir school, the Augustinian monastery was the centre of intellectual life in the city and its systematic musical training provided the basis for Brno's musical education. The atmosphere of national revival prompted the priest František Sušil to compile and publish his collection *Moravské národní písně* ('Moravian Folksongs', 1835), which during the course of further editions grew into a monumental work (comprising 2361 texts and 2091 melodies), which provided the basis and the model for later studies of folk music. It was also a source of inspiration for many Czech composers, including Křížkovský, Dvořák, Janáček, Novák and Martinů.

2. CIVIC AND CONCERT MUSIC. Secular music was cultivated in medieval Brno at the court of the margrave. The brother of the Emperor Charles IV, Jan Jindřich (Margrave of Moravia 1349–75), had at his court two pipers; his successor Jošt (margrave 1375–1411) appears to have added two trumpeters to these. In the following century information about secular music is restricted to references to the participation of trumpeters and drummers in ceremonial welcomes given to important personages. In 1674 the municipal council commissioned Jan Jiří Janczi to retain a group of tower musicians; alongside these there existed in 18th-century Brno the trumpeters of

the Regional Estates, whose function was to lend brilliance to meetings of the regional assembly and other administrative bodies. The municipal trumpeters took part on 30 December 1767 in a performance given by the 11-year-old Mozart and his sister in the hall of the Brno Reduta (Redoutensaale).

Concerts were given in the Reduta as early as the 1730s, at a time when music could also be heard in the town residences of the music-loving nobility. The orientation of the Moravian nobility towards Vienna had a decisive effect on musical taste. During the first half of the 18th century, on the recommendation of Cardinal Wolfgang Hannibal Schrattenbach of Olomouc, choral works by composers of the Venetian and Neapolitan schools (Caldara, Porpora, Leo) were performed in Brno, as well as oratorios by the cardinal's court composer Václav Matyáš Gurecký (in service from 1731 to 1736).

The Philharmonische Gesellschaft, founded in 1808, took over the organization of concerts, and the age of the virtuoso brought Hummel, Spohr and Nikolaus Kraft to Brno. In the 1840s performances by Liszt, Anton Rubinstein, Clara Schumann and Heinrich Wilhelm Ernst attracted attention; Ernst returned to his native city for several appearances. In 1848 the Male Choral Society was founded, whose mixed Czech and German repertory was directed alternately by Czech and German conductors (Křížkovský and Gottfried Rieger). In the 1860s two competing organizations were founded almost simultaneously, the Czech Beseda Brněnská (Brno Club) (1861) and the German Brünner Musikverein (1862), which later found homes in two newly built cultural and educational centres: the Czechs in the Besední Dům (meeting house, 1872) and the Germans in the Deutsches Haus (1891). The latter provided a base for other musical institutions: the Brünner Kammermusikverein (founded in 1886) and the ambitious Brünner Philharmoniker, the first Brno symphony orchestra, founded in 1902 on the model of the Vienna PO. The rich German concert societies continued to invite famous virtuosos (Henri Marteau, Anton Schnabel, Eugen d'Albert) and conductors; in 1906 Mahler conducted his First Symphony in the city, and in 1911 Richard Strauss conducted his *Don Juan*. During the second half of the 19th century an important contribution was made by the pianist-composer Agnes Tyrrell (1846–83), whose *Zwölf grosse Studien*, op.48 received a favourable verdict from Liszt.

Music in the Besední Dům was principally provided by the Philharmonic Society of the Brno Beseda (originally known simply as the Brno Beseda), founded in 1861, whose first choirmaster was Křížkovský. The Beseda's artistic stature was enhanced after 1876, when Janáček became its musical director, a function he performed until 1888. Janáček expanded the original male-voice choir into a mixed choir and raised the artistic level of the Beseda's programmes, in which he took part as both choirmaster and pianist. Other noted choirmasters of the Brno Beseda included Rudolf Reissig (1874–1939) and Jaroslav Kvapil (1892–1958).

Smetana gave a piano recital in Brno under the auspices of the Brno Beseda (1873), and Dvořák appeared several times as conductor of his own works. As the Brno Czech community did not have its own symphony orchestra, the Czech PO was invited to give concerts, and the Czech Quartet and other chamber ensembles and soloists (e.g. Jan Kubelík and František Ondříček) often took part in chamber concerts. The choirs of D.A. Slavjanský and N. Slavjanská also gave performances in Brno. Janáček's efforts to create a permanent Czech orchestra came to fruition only in 1940, when the Brno RSO was set up; in 1956 it merged with the Brno Regional SO to form the Brno State PO, whose first chief conductor was Janáček's pupil Břetislav Bakala. Regular symphony concerts had, however, already been initiated by František Neumann with the opera orchestra of the Czech Theatre. Between the wars the Moravian Quartet (founded in 1923), the Moravian Wind Quintet (1927), the Vachův Sbor Moravských Učitelek (Moravian Women Teachers' Choir) conducted by Ferdinand Vach (formally constituted 1917) and the Academic Male-Voice Choir Moravan (1931) all flourished. After World War II further chamber ensembles were formed, notably the Janáček Quartet (1947), as well as three chamber orchestras and several high-class choruses. The political changes of 1989 brought an end to many of these ensembles but brought too the triumphal return of Rudolf Firkušný, who had begun his studies in Brno with Janáček.

3. OPERA AND BALLET. In the 1730s companies run by various Italian impresarios (Angelo and Pietro Mingotti, Filippo Neri del Fantasia, Francesco Ferrari) performed Italian opera (Galuppi, Bambini, Porpora, Lucchini, Orlandini) in the Reduta. In the second half of the 18th century the Italians alternated with German companies performing Gluck, Mozart, Dittersdorf and Wenzel Müller. The first operatic performance in Czech was of Jan Tuček's *Zamilovaný ponocný* (The Lovelorn Nightwatchman) by a German touring company in 1767. In 1783 a new German opera by the local composer Ignaz Holzbauer, *Günther von Schwarzburg*, scored a great success, and three years later Josef II granted the city a theatrical privilege.

The initially bilingual municipal theatre company in 1840 staged Škroup's *Dráteník* ('The Tinker') alongside a German *Hamlet* by the Brno native and later successful operatic impresario Max Maretzek, and in 1841 put on *Žižkův dub* ('Žižka's Oak') by another local composer, František Bedřich Kott. From the 1860s onwards the company gradually became biassed in favour of German productions, and after the 1870 fire in the Reduta performed exclusively in German, at first in the hastily constructed Interimstheater and from 1882 onwards in the Stadttheater later known as the Divadlo na Hradbách (Theatre on the Ramparts). The repertory of this theatre was grounded in the standard Classical and Romantic repertory, with a definite emphasis on German opera and especially the operas of Wagner. Later, audiences at the German opera were introduced to the contemporary works of Strauss, the Brno-born Korngold and others. Singers from the Viennese Hofoper often made guest appearances, among them another Brno native, Maria Jeritza, and her compatriot Leo Slezak.

Opera in Czech for a while found refuge in the Besední Dům (1874–81). From 1884 Czech performances were given in a makeshift converted dance hall; against all expectations, these continued for 35 years. In 1894 Janáček's *The Beginning of a Romance* was performed here, followed on 21 January 1904 by the world première of *Jenůfa*, and several Czech artists made their débuts in the theatre, including the tenor Karel Burian and the conductor Karel Kovařovic.

Czech opera in Brno enjoyed a real flowering after 1919, when the company moved into the Stadttheater, thereafter known as the Národní Divadlo (National Theatre), and František Neumann (1874–1929) took charge. He created and maintained an artistically superior ensemble, and with the world premières of *Kát'a Kabanová* (1921), *The Cunning Little Vixen* (1924), *Šárka* (1925) and *The Makropulos Affair* (1926) laid the foundations for a Janáček tradition that was to be continued by Bakala (who led the première of *From the House of the Dead* in 1930), Milan Sachs (1884–1968) and František Jílek (1913–93). Other works introduced here included a whole series of operas and ballets by Martinů, as well as Prokofiev's *Romeo and Juliet* (1938) and Rafael Kubelík's opera *Veronika* (1947). In 1965 the opera company acquired a new building known as the Janáček Theatre.

4. EDUCATION AND MUSICOLOGY. Brno is home to a conservatory which grew out of Janáček's organ school in 1919, the Janáček Academy of Musical Arts (JAMU, founded in 1947), and the institute of musicology at the philosophical faculty of Masaryk University. Extensive archives, including Janáček's manuscripts, are preserved by the music history division of the Moravian regional museum. Valuable folk music collections are compiled by the Brno-based Institute of Ethnographical and Folklore Studies of the Czech Academy of Sciences. Every year Brno hosts an autumn music festival (latterly known as the Moravian Autumn) in connection with the musicological conferences that have taken place since 1966. The periodical *Opus musicum* (founded in 1969) is published in Brno. The Leoš Janáček Foundation was set up in 1991 to promote the works of Janáček.

ALENA NĚMCOVÁ

Broadcast Music Inc [BMI]. *See* COPYRIGHT, §V, 14(ii).

Broadstock, Brenton (Thomas) (*b* Melbourne, 12 Dec 1952). Australian composer. Raised in a Salvation Army family where he played band instruments, he took an arts course at Monash University before studying composition with Donald Freund at Memphis State University and with Sculthorpe at the University of Sydney. In 1982 he began teaching at the University of Melbourne, becoming head of composition in 1990. His *Tuba Concerto* (1985) won the 1987 Hambacher Preis, and after his 1988 residency with the Melbourne SO he steadily emerged as one of Australia's most recorded and performed composers. A gently expressive voice, richly coloured in his orchestral works with a sure ear for brass and percussion sonority, his music stems from themes of personal anguish (Symphony no.1 'Towards the Shining Light'), concern with the environment (*Deserts Bloom … Lakes Die*), or vivid literary images (Symphony no.5 'Born from Good Angel's Tears'); in recent years his style has become increasingly lyrical.

WORKS

Stage: Fahrenheit 451 (chbr op, 1, Broadstock after R. Bradbury), 5vv, elec, 1990, 22 Oct 1992, Sydney, Belvoir Street Theatre
Orch: Festive Overture, 1981; The Mountain, small orch, 1984; Tuba Conc., 1985; Battlements, 1986; Pf Conc., 1987; Sym. no.1

'Towards the Shining Light', 1988; Sym. no.2 'Stars in a Dark Night', 1989; Sym. no.3 'Voices from the Fire', 1991; In a Brilliant Blaze, small orch, 1993; Sym. no.5 'Born from Good Angel's Tears', 1995; Sax Concertino, sax, wind ens, 1995; Dancing on a Volcano, 1996; Catch the Joy, ov., 1998

Brass band: Aurora Australis, trbn ens; St Aelred, rhapsody, 1981; Click: Festival March, 1982; Fantasia, 1984; Fanfare and Processional, 1985; Festival Prelude, 1986; My Shepherd, 1988; Meditation on Rapture, 1990; Rutherford Variations, 1990; Songs of the Pilgrim, 1991

Vocal: Eheu fugaces, S, fl, cl, vn, vc, pf, perc, 1981; Valiant, 1994; Bright Tracks, song cycle, S, vn, va, vc, 1994; Via Crucis, SATB, 1994–7

WARREN A. BEBBINGTON

Broadway, Richard (*d* Dublin, 1760). Irish organist and composer. His father was Edward Broadway, organist of St Finbarr's Cathedral in Cork, 1711–12. He acted as deputy to Ralph Roseingrave at St Patrick's Cathedral, Dublin, from 1744 until Roseingrave's death in 1747. On 12 December 1747 he was appointed organist to that cathedral at a yearly salary of £5, which had been reduced from the usual £30 'on account of an expensive lawsuit then pending'.

From 1747 he performed at a number of Dublin concerts, introducing new organ concertos of his own composition, and was recitalist at the opening of new organs at Christ Church Cathedral in July 1752 and at St Audoen's in May 1756. On 13 April 1749 his *New Ode to Peace* was performed at the Philharmonic Room in Fishamble Street, and his oratorio *Solomon's Temple* was given at the same venue on 15 May 1753 'for the benefit of sick and distressed Free Masons'. The book of words by J.E. Weekes was published in Dublin in the same year, and several times reprinted in masonic collections. Fétis mentioned this oratorio as having been performed in London in 1745. No trace of his music has been found.

BRIAN BOYDELL

Broadwood. English firm of piano makers. John Broadwood (*b* Cockburnspath, Scotland, 6 Oct 1732; *d* London, 1812) was a joiner and cabinetmaker who went to London in 1761 and worked with the harpsichord maker BURKAT SHUDI. He married Shudi's daughter in 1769 and became his partner in 1770. After Shudi's death (1773) the partnership was continued with Shudi's son, but Broadwood was the senior partner and from 1782 onwards he managed the firm alone from Shudi's house in Great Pulteney Street. Broadwood continued to make harpsichords until at least 1793, but by this time the market had shifted almost completely towards pianos.

Broadwood's early square pianos were modelled on those of JOHANNES ZUMPE, but within a decade he completely reconstructed the design. Wrest plank and pins were shifted from the right, as in the clavichord, to the back of the case (distributing evenly the pressure on the bridge); the keys were straightened, dampers improved and Zumpe's hand stops replaced by pedals. In 1783 a patent was granted for this 'new modelling'. He had by then begun the manufacture of grand pianos, a return to earlier interests, for during the late 1760s he had worked with Americus Backers and Robert Stodart on the invention of the English grand action. Broadwood's first grands (earliest surviving instrument, 1786) were based on the Backers model; the cases were in the style of contemporary English harpsichords (*see* PIANOFORTE, fig.13), with leather-covered hammers in place of jacks and quills. Three unison strings to a note were provided throughout the compass and there was a true una corda pedal, but the crucial questions of string scaling and striking point were decided arbitrarily; there was considerable scope for improvement. Acting on the advice of his friend Muzio Clementi, Broadwood consulted the botanist Dr Edward Whitaker Gray and the acoustician Tiberius Cavallo, and by 1788 was able to produce a greatly improved instrument, louder, more even throughout its compass and, above all, with increased dynamic flexibility. Such were the instruments that impressed Haydn when he visited Broadwood's workshop in 1794; his instruments were used by leading musicians from the 1790s until well into the 19th century.

James Shudi Broadwood (1772–1851), John Broadwood's eldest son, entered the business in 1785 and was made a full partner in 1795. The name of the firm then became John Broadwood & Son. Thomas Broadwood (1786–1861), John Broadwood's third son by his second wife, entered the firm in 1803 and was taken into partnership in 1808. The name was changed once again to John Broadwood & Sons. After their father's death in 1812, the brothers expanded production vigorously to meet the burgeoning English market. During the 1790s they were probably making about 400 squares and over 100 grands a year. By the 1820s annual output exceeded 1000 squares and 400 grands. These levels were achieved by a large labour force efficiently organized with a high degree of specialization. Nevertheless, comparisons with contemporary factories of the industrial revolution are misleading, for machinery was not employed and productivity, as distinct from production, was not high.

After the early decades of innovation the firm concentrated mainly on increasing the power, compass and durability of its instruments without changing the approach to design in any fundamental way. The most important development was the introduction of iron bracing to grand pianos about 1820 (*see* PIANOFORTE; fig.20). Devised to improve the tuning stability of the treble, it was further developed by James Shudi Broadwood's son Henry Fowler Broadwood (1811–93) into the 'iron grand' of 1846. The high string-tension was resisted by a full iron frame having various components bolted together rather than the single casting of the 'American' system.

At this time Broadwood attained a pinnacle of distinction, output and prosperity which it never again achieved. At the Great Exhibition of 1851 Broadwood failed to obtain the Gold Medal for piano manufacture, which went instead to Pierre Erard. Sales fell due to French and other direct competition and were further undermined by Broadwood's concentration on the production of square

pianos, then rapidly going out of favour. Prestige and high standards of workmanship allowed the firm to maintain production at some 2500 instruments a year for another generation, but refusal to embrace the new technology led to a precipitous decline by the 1890s. Neither the barless grand of 1888, nor the belated introduction of over-stringing in 1897, were sufficient to regain Broadwood's former eminence as one of the great piano makers, though the firm has continued.

For detailed descriptions of Broadwood's inventions, *see* PIANOFORTE, §I, 4, 6.

DEREK ADLAM, CYRIL EHRLICH

Broadwood, Lucy E(theldred) (*b* Melrose, 8 Aug 1858; *d* Dropmore, nr Canterbury, 22 Aug 1929). English folk-song collector and scholar. The great-granddaughter of John Broadwood (1732–1812), founder of the piano firm, and daughter of Henry Fowler Broadwood (1811–93), she spent her youth at the family home at Lyne, Sussex, where she developed an interest in local folksong. Inspired by her uncle, John Broadwood (1798–1864), she reissued his collection of folksongs, *Old English Songs* (1843) with H.F. Birch Reynardson as *Sussex Songs* (1890). She also travelled with Baring-Gould to Cornwall, to collect folksongs, and collaborated with J.A. Fuller Maitland to publish *English County Songs* (1893), thus establishing herself as a key figure in the folksong revival.

Her arrival in London (1894) precipitated a greater involvement with musical life, especially early music for which her voice was well suited. She also flourished as an amateur singer in charitable concerts. She continued her work on folksong, both arranging songs for performance by singers such as Plunket Greene, and composing some of her own in a similar style, with encouragement from Liza Lehmann and Arthur Somervell. In 1898 she was a founder member of the Folk-Song Society, becoming its honorary secretary (1904) and editor (1908), applying high standards of scholarship with colleagues Frank Kidson, Anne Gilchrist, Fuller Maitland and Cecil Sharp. Her own account of her experiences as a collector inspired Percy Grainger to join the society in 1905.

Although devoted to folksong, Broadwood maintained close contact with the musical establishment. She was much in demand as an adjudicator of singing from 1896, having previously met the music festival pioneer Mary Wakefield (1853–1910), and was later involved with Vaughan Williams's Leith Hill Music Festival. She remained an active musician and scholar to the end of her life, succeeding Tennyson as President of the Folk-Song Society in December 1928.

DOROTHY DE VAL

Brocarte, Antonio de la Cruz (*d* after 1716). Spanish theorist and organist. He was first organist with a benefice at the principal church in Zamora in 1707 and was still in that position in 1716. He also wrote a treatise, *Medula de la música theorica* (Salamanca, 1707), which discusses the fundamentals of music, plainchant, polyphony, counterpoint and composition. He was regarded highly enough to be cited as an authority: he approved for publication theoretical treatises by Francisco Valls and Pablo Nassarre.

Antonio de la Cruz Brocarte is not identifiable with Antonio Brocarte (*d* 21 Aug 1696), who was second organist at Palencia Cathedral and held a position at Santo Domingo de la Calzada before he was named organist at Segovia Cathedral on 15 June 1655. He remained there until 2 Dec 1676, when he became first organist at Salamanca Cathedral, a position he held until his death. Four tientos by him survive (*P-Pm* 1577, Loc. B, 5).

BARTON HUDSON

Brocco, Giovanni (*fl* early 16th century). Italian composer. It is not known whether he was related to Nicolo Brocco. The ascription to *Ayme che doglia* calls him Ioannes Brocchus Vero. It has been assumed that he was a priest from Verona. He composed mainly frottolas; one or two were apparently popular, but they are in no way distinctive.

WORKS

for 4 voices unless otherwise stated

Alma svegliate hormai, 1504[4], ed. in Publikationen älterer Musik, Jg.viii (1935), and in IMa, 1st ser., i (1954); Ayme che doglia e questa, 1504[4], ed. in Publikationen älterer Musik, Jg.viii (1935), and in IMa, 1st ser., i (1954); Io mi voglio lamentare, 1505[4]; Ite caldi sospiri, 1505[4]; La mia se non vene ameno, 1505[4]; Lieta e lalma, 1505[4]; Mai piu sera, 3vv, *I-MOe* α.F.9.9, ed. in La Face Bianconi; Oyme che io sento al core, 1505[4]; Se me abandoni, *MOe* α.F.9.9, ed in La Face Bianconi; Se non son degno donna, 1505[4]; [textless frottola], *MOe* α.F.9.9, ed. in La Face Bianconi

STANLEY BOORMAN

Brocco, Nicolo (*fl* early 16th century). Italian composer. It is not known whether he was related to Giovanni Brocco. His frottola *Poi che in te* is a *risposta* to Josquin's *In te Domine speravi*. *Me levava* may use a popular tune of the period; the melody and words appear in other settings. *Se mia trista* is more likely to be by Nicolo Brocco than by Giovanni Brocco, but there is not enough evidence to make a definitive ascription.

WORKS
all for 4vv

Me levava una mattina, 1517[2]; O tiente a lora, 1507[4]; Per servirte perdo i passi, 1507[4]; Poi che in te donna speravi, 1507[4]; Se ben fatto o del mio resto, 1517[2]; Se mia trista e dura sorte, 1517[2] (doubtful)

STANLEY BOORMAN

Broche, Charles (*b* Rouen, 20 Feb 1752; *d* Rouen, 30 Sept 1803). French organist and composer. A pupil of Desmazures, the organist of Rouen Cathedral, he began his career at the age of 14. In 1771–2 he was organist at the Académie des Beaux-Arts at Lyons, succeeding Jean-Jacques Beauvarlet-Charpentier. Thence he went to Bologna to study with Padre Martini. In 1777 he returned to Rouen as successor of his teacher at the cathedral, where he remained until his death. One of his pupils at the cathedral choir school was Adrien Boieldieu, with whom he played concert duets in 1793. Many of Broche's works are known only through reports: a mass, Revolutionary hymns and songs, cantatas, canons, concertos, quartets, trios and piano duets. Three sets of keyboard sonatas with violin accompaniment ad libitum survive: op.1 (1782), op.2 (1783) and op.3 (1787). The interest is concentrated in the pianist's right hand while the left accompanies with stock figures, and the violin, though treated with some care at least in op.3, generally doubles the melody or fills in the harmony. The music often has a dark and stormy colouring, owing partly to the minor keys chosen.

DAVID FULLER

Brockes, Barthold Heinrich (*b* Hamburg, 22 Sept 1680; *d* Hamburg, 16 Jan 1747). German poet. The son of Margaretha Elmhoff and Bernard Brockes, a businessman, he received his education at the Johanneum and Gymnasium in Hamburg and studied law at Halle University (1700–02) and in Leyden. In addition to his regular academic studies he cultivated riding, fencing, dancing, art and music; while at Halle he organized weekly concerts in his room. He continued his education with a European tour (1703–4), studying art in Nuremberg, Italian in Venice, antiquities in Rome and botany in Lausanne, returning to Hamburg in 1704 through Paris and Amsterdam. He considered practising law but decided instead to devote his time to art collecting, music (he once again gave weekly concerts), literature and good company. His acknowledged search for a wealthy bride resulted in his marriage in 1714 to Anna Ilsabe Lehman: she bore him 12 children, of whom seven survived him, including his eldest son, Barthold Heinrich (*b* 1715), a minor literary figure. He was a founder in 1715 of the Teutschübenden Gesellschaft, a group of literati concerned with purifying the German language. In 1720 he was chosen a member of the Hamburg Senate, and he was active in government affairs for the rest of his life.

Brockes's literary activity began with translations from French and Italian, and he published his first original poem in 1708. His chief importance for music history rests on a Passion oratorio libretto which he published in 1712, *Der für die Sünden der Welt gemarterte und sterbende Jesus* (repr. in W. Flemming, ed.: *Oratorium-Festspiel*, Leipzig, 1933). It was set by Keiser (1712), Telemann (1716), Handel (1716), Mattheson (1718), Stölzel (1725), Fasch (1723) and five lesser composers. Bach and his sister copied Handel's score and used parts of the text in his *St John Passion*. It is a poetic paraphrase of the biblical account compiled from all four gospels, retaining the role of the Evangelist but adding many contemplative recitative and aria texts. The allegorical figures of the daughter of Zion and the faithful soul figure prominently; the chorale is relatively unimportant. Apart from its musical settings, the text itself was extremely popular as devotional poetry, and ran to more than 30 editions between 1712 and 1727. Its wide appeal for both composers and the general public lay in its infusion of dramatic elements of a more personal nature into the biblical story, thus finding a middle ground between orthodoxy and pietism.

Brockes is remembered in the history of literature as an Enlightenment figure who was the first German to cultivate nature poetry. His nine-volume collection, *Irdisches Vergnügen in Gott* (Hamburg, 1721–48/*R*), extols the virtues of the observation and enjoyment of nature through all the senses. The poems bring together ideas from diverse sources, including Thomas Burnet's *Telluris theoria sacra* (1681) from which Brockes developed his concept of the sublime (see Kimber). Handel drew the texts for his *Neun deutsche Arien* (1724–7) from the 1724 edition of the first volume, and Telemann used it for cantatas and songs. These settings stimulated a debate on aesthetics and the relationship between the arts; Mattheson and Fabricins felt that the poems which expressed violent movements and used onomatopoeia were not suitable for musical setting. Brockes's 1745 translation of James Thomson's *The Seasons* (1726–30) was the model for both F.W. Zachariä's poem *Die Tageszeiten*, set by Telemann in 1757, and Gottfried van Swieten's text for Haydn's oratorio.

KERALA J. SNYDER/IDA M. KIMBER

Brockhaus, Heinz Alfred (*b* Krefeld, 12 Aug 1930). German musicologist. He studied musicology in Berlin at the Weimar Hochschule für Musik and under Ernst Hermann Meyer and Walther Vetter at the Humboldt University, where he took the doctorate in 1962 with a dissertation on Shostakovich's symphonies and completed his *Habilitation* in 1966 with a study of Hermann Abert's concept of musical historiography. He also worked at the university as a research assistant (1956–68) before being appointed lecturer (1968–9) and professor (1969–90) in musicology. Most of his research has been on the music history of the late 19th century and the 20th, and includes biographical studies of Shostakovich, Eisler and Prokofiev. In the late 1950s he became interested in the theory and history of musical aesthetics, particularly intonation theory and aspects of axiology. He became a director of the East German Verband Deutscher Komponisten und Musikwissenschaftler in 1967, and a member of the IMS council and the editorial board of *Acta musicologica* in 1972.

HORST SEEGER/MATTHIAS BRZOSKA

Brockhaus, Max (*b* Leipzig, 13 April 1867; *d* Lörrach, 9 May 1957). German music publisher. He purchased several companies which formed the basis for his music publishing firm founded in 1893 in Leipzig. From 1906 he belonged to the Gewandhaus-Direktorium and was its chairman from 1920 to 1936. He provided 30 years of valuable stimulus for the development of Leipzig's concert life. The publishing firm was especially concerned with the promotion of contemporary opera (Humperdinck, Leoncavallo, d'Albert), and by 1918 had published 30 music dramas. From 1898 Brockhaus promoted Hans Pfitzner's work, publishing his operas and some orchestral, choral and chamber works, as well as 53 lieder and songs; he also published numerous compositions by Siegfried Wagner (Brockhaus considered himself a friend of both composers). The firm's publications have consistently achieved a high artistic standard. In 1940 Brockhaus's daughter Elisabeth Gruner took over the business, which suffered considerable war damage in 1943; reconstruction began in Lörrach in 1949. (A. Hübscher: *Hundertfünfzig Jahre F.A. Brockhaus 1805 bis 1955*, Wiesbaden, 1955)

HANS-MARTIN PLESSKE

Brockshorn, Samuel Friedrich. *See* CAPRICORNUS, SAMUEL FRIEDRICH.

Brockton, Lester. *See* LAKE, MAYHEW LESTER.

Brockway, Howard (*b* Brooklyn, NY, 22 Nov 1870; *d* New York, 20 Feb 1951). American composer, pianist and teacher. He studied piano with H.O.C. Kortheuer and in 1890 went to Berlin, where he remained for five years, studying composition with Otis Boise and piano with Heinrich Barth. A successful concert of his chamber and orchestral pieces was given by the Berlin PO on 23 February 1895. Returning to the USA, he gave many concerts and taught at the Peabody Institute (1903–9), Mannes College and, from 1910 to 1940, the Institute of Musical Art (which was taken over by the Juilliard Musical Foundation in 1926). He produced few original works after 1911, but his arrangements of Kentucky folksongs, collected with Loraine Wyman, enjoyed popularity in the USA and England. Brockway was a gifted composer, whose works display a rare sensibility and warmth of melody and harmony, best expressed in his numerous song settings. Notable among his larger-scale works are the Violin Sonata and the Cello Suite.

WORKS
(*selective list*)

Orch: Ballad, op.11, 1894; Sym., op.12, 1894; Cavatina, op.13, vn, orch (1895); Sylvan Suite, op.19 (1900); Scherzo (Scherzino), lost; Pf Conc., inc., lost
Chbr: Sonata, op.9, vn, pf (1894); Moment musical, op.16, vn, pf (1897); Romance, op.18, vn, pf (1897); 3 Compositions: Aria, The Coquette, Romance, op.31, vn, pf (1906); Suite, op.35, vc, pf (1908); Pf Qnt, ?op.38, lost; Fugue, 2 vn, pf
Choral: Cantate Domino, op.6, 1892; 2 Choruses: Wings of a Dove, Hey Nonino, op.24 (1899); Des Saengers Fluch, op.27 (1902); Herr Oluf (J. Herder), op.37 (1913); Matin Song (T. Heywood), op.40 (1911)
Pf: 2 Preludes, 1925, unpubd; other pieces incl. Dreaming, Unrest, At Twilight, An Idyl of Murmuring Water
Songs incl. Would thy faith were mine, Intimations, The Mocking Bird, An Answer
Folksong arrs. incl. Lonesome Tunes (New York, 1916), 20 Kentucky Mountain Songs (Boston, 1920)

BARTON CANTRELL/MICHAEL MECKNA

Brod, Henri (*b* Paris, 13 June 1799; *d* Paris, 5/6 April 1839). French oboist, wind instrument maker and composer. He studied at the Paris Conservatoire from 1812 under Gustave Vogt, who shared Brod's Protestant Alsatian background. Having received the *premier prix* in 1818, the following year Brod was appointed second oboist in the Opéra orchestra alongside his teacher. During Vogt's absences in 1826 and 1828 Brod filled Vogt's place as first oboist. The abilities of the two players were often compared; Fétis found Brod's tone sweeter than that of his teacher. A statuette by Dantan *jeune* (Paris, Musée Carnavalet) caricatures Brod playing a musette. He died just 3 months before he would have been eligible for a pension to support his wife and young son. His widow petitioned repeatedly for support from the administration of both the Conservatoire and Opéra.

Oboes by Brod, some made in collaboration with his brother Jean-Godefroy (*b* ?1801) were held in high regard. Brod had acquired tools and plans from Christophe Delusse (*fl* 1781–89), and his earliest oboes were modelled on those of Delusse. Brod quickly gained a reputation for innovation and did much to influence the oboe's development. He was probably the first oboe maker in France to add octave keys, to extend the range to *b* (and on some instruments to *a*) and to design a pierced plate to half close the first hole. Brod promoted a straight english horn (*cor anglais moderne*), conceived an *hautbois baritone*, pitched an octave below the treble oboe, and made a *petit hautbois*, pitched above the treble oboe. It was reported that he was developing an oboe with Boehm keywork. Other inventions include a gouging machine used in oboe and bassoon reed making. His two-part *Méthode pour le hautbois* (Paris, 1825–35), includes important technical information and explains the rationale for these innovations.

In addition to *pièces de salon*, romances and operatic fantasies for oboe, including Variations on *Lucia di Lammermoor* and *Siège de Corinthe*, Brod composed an opera on Quinault's libretto *Thesée* which was rejected by the audition panel of the Opéra in 1826. The only known performance of excerpts of this score (now lost) took place in 1837 under the direction of F.-A. Habeneck. A definitive list of Brod's compositions has yet to be established.

See also OBOE, §II, 3.

GEOFFREY BURGESS

Brod, Max (*b* Prague, 27 May 1884; *d* Tel-Aviv, 20 Dec 1968). German-Israeli writer, translator, composer and librettist of Czech birth. He began piano studies at the age of six, and was then a pupil of Adolf Schreiber; later, after Schreiber's suicide, Brod had some of his songs published and wrote his biography. He studied law and worked in Prague for a time as a state employee. He was a fine pianist and a composer (mostly of songs); his first published volume of verse (1907) earned the approval of Rilke, his first novel (1909) brought him notoriety. Thoughts on music are woven into his novels and poetry: his final book (1962) was a novelistic defence of Karel Sabina, librettist of Smetana's *The Bartered Bride*, who was discovered to be a police informer. Brod was a friend of other German-Jewish writers in Prague such as Kafka and Werfel, and did much to promote their careers, becoming Kafka's biographer and literary executor. His own talents and wide sympathies enabled him to become a prominent music and theatre critic (for the *Prager Abendblatt*, *Prager Tagblatt* and various foreign German-language publications), the translator of some of Novák's operas into German and the author of original librettos for Gurlitt (*Nana*), W. Kaufman (after Gogol's story *Nos*) and Lavry (*Dan Hashomer*).

Alerted by Josef Suk to the Prague production of *Jenůfa*, Brod wrote an enthusiastic review in *Die Schaubühne* (1916), on the basis of which Janáček begged him to translate the opera into German. Brod did so, initiating a friendship with the composer and a series of translations of most of the subsequent operas. Brod's suggestions as he translated resulted in some additions to *Kát'a Kabanová* and a free reinterpretation of *The Cunning Little Vixen*, but Janáček made Brod withdraw most of his changes to *The Makropulos Affair*. Brod also wrote the first substantial biography of Janáček, a valuable source relying on information drawn directly from the composer. Other Czech opera texts which Brod translated included that of Weinberger's *Švanda dudák* ('Švanda the Bagpiper'), where he rewrote the first act and made Weinberger change the music accordingly.

In 1939 he went into exile on the last train to leave Czechoslovakia before the arrival of the Germans and settled in Palestine, where he was artistic adviser to the Habimah Theatre until his death. He continued his activities as a music critic, writing a column 'Klang und Schatten' for the daily paper *Jedioth Chadashoth*, and wrote *Die Musik Israels* (1951), which deals with the early development of Israeli music and demonstrates Jewish elements in the work of Mendelssohn and Mahler; the latter was the subject of a further pamphlet.

Brod began composing in 1900, and grouped his output non-chronologically in 38 opus numbers. The music is lyrical, openly expressive and predominantly vocal. In some works written in Europe (particularly the piano pieces) there is a Czech influence, but after his move to Palestine, Brod, like several of his colleagues, searched for a harmonic blend of oriental and European traditions in the evolution of the 'Mediterranean' style. This matter prevails in the *Mittelmeersuite* for piano and the *Zwei israelische Bauerntänze*, which were frequently played by the Israel PO, whereas the *Requiem hebraicum*, written

in memory of his wife, draws partly on Hebrew cantillation. In the two songs *Tod und Paradies* (1951–2) Brod's style became more individual, while retaining the 'Mediterranean' character.

WORKS
(selective list)

VOCAL

Requiem hebraicum (Shin Shalom), op.20, Bar, pf/orch
Songs: Tagebuch in Liedern (Frühe Klänge), 19 Songs, op.2, 1900–10; 11 Goethe Lieder, op.4, 1901–10; 4 Lieder (W. Shakespeare), op.5; 4 Lieder (J.W. von Goethe, G. Flaubert, F. von Schiller, Ps cxxvi), op.10, 1908–21, Psalm rev. 1953; 8 Lieder, op.32 (Goethe: *Chinesisch-Deutsche Jahres- und Tageszeiten*), op.32; Tod und Paradies (F. Kafka: *Diary*), op.35, 1951, orchd 1952; 46 other songs

INSTRUMENTAL

Sonata, op.11, vn, pf; 2 Israelische Bauerntänze, op.30, pf/orch; Pf Qnt, op.33
Pf: Hradčanské hodiny [The Clocks of Hradčany], op.12, 1916; Elegie auf den Tod eines Freundes, op.13, 1908; Aphorismen, op.17, 1938–9; Sonatine, op.18; Sonata no.2, op.23; Mittelmeersuite, op.28; Unseren Toten, op.29; Hayishuv [The People in Their Land], suite, op.34
Incid music to Brod's plays: Die Höhe des Gefühls, op.14, 1912; Die Fälscher, op.15a, 1922; Eine Königin Ester, op.15b, 1918
Principal publishers: Israeli Music Publications, Universal

WRITINGS

Adolf Schreiber: ein Musikerschicksal (Berlin, 1921)

YEHUDA WALTER COHEN, JOHN TYRRELL

Broda, Paulus de. *See* PAULUS DE RODA.

Broder, Nathan (*b* New York, 1 Dec 1905; *d* New York, 16 Dec 1967). American editor and musicologist. He attended City College, New York, and studied music privately, but as a music scholar he was largely self-educated. His career in editing and music publishing began with his appointment as associate editor of the *Musical Quarterly* (1945–67) and manager of the publications department at G. Schirmer (1945–54); he subsequently became chairman of the publication committee of the American Musicological Society (1952–4), executive director of the American Section of *RISM* (1961–5) and music editor at W.W. Norton & Co., New York (1963–7). He also taught at Columbia University (lecturer 1946–52, associate professor 1959–62) and served as president of the American Musicological Society (1963–4). He received a Guggenheim Fellowship (1956) and a Ford Foundation Grant (1961).

Although Broder's career was devoted largely to guiding and publishing the work of others, he was himself a productive scholar. He published a book of essays, *The Great Operas of Mozart* (which includes the librettos translated by W.H. Auden and others), several articles on Mozart, and a standard edition of Mozart's piano sonatas and fantasias. His main interest was the 18th century, but he was not restricted to it: he wrote on contemporary Americans, among them Samuel Barber and William Schuman, he assisted Reese in writing *Music in the Middle Ages* (New York, 1940) and at his death he was working on a long-planned history of orchestral music. He was an energetic reviewer, and his contributions to dictionaries include 70 articles in *MGG1*.

JON NEWSOM

Broderie (Fr.). *See* AUXILIARY NOTE.

Broderip. English family of musicians. They were descended from Richard Broderip (*b* 1555).

(1) William Broderip (*b* 10 July 1683; *d* Wells, 31 Jan 1727). Organist and composer. His father Adrian was a great-grandson of Richard. He became a vicar-choral of Wells Cathedral on 1 April 1701 and organist in 1713. In that year he composed an anthem, *God is our hope and strength* (*GB-Lbl*), to celebrate the Peace of Utrecht. He also wrote a verse Morning Service and Evening Service in D (*Lbl*) and a Chant in G minor (*Och*). He had ten children by his wife Martha (*d* 1773). A later William

Broderip (1744–70), organist of Leominster, 1766–9, may have been his grandson.

(2) **John Broderip** (*b* Wells, 2 Feb 1719; *d* Wells, bur. 30 Dec 1770). Organist and composer, son of (1) William Broderip. On 2 September 1740, during a brief period as organist of Minehead, he advertised for subscribers to his *New Set of Anthems* (Wells, *c*1747). On 2 December he was admitted vicar-choral of Wells Cathedral and from 1 April 1741 until his death he was organist. He may also have been organist at Shepton Mallet, a post that was advertised as vacant in January 1771. A second book of anthems was published in London in about 1750, and *Psalms, Hymns and Spiritual Songs* in 1769.

(3) **Edmund Broderip** (*b* Wells, bap. 4 April 1727; *d* Bristol, 9 Sept 1779). Organist, son of (1) William Broderip. A pupil of Geminiani and Kelway, he was probably the Mr Broderip who played at many West Country festivals in the mid-18th century. He was appointed organist of St James's, Bristol, in 1746, where he was associated with the infant Samuel Wesley, and organist of the Mayor's Chapel in 1764. He performed regularly at the Prince Street Assembly. He is the Broderip castigated by Chatterton in *Kew Gardens*.

(4) **Robert Broderip** (*b* ?Wells, *c*1758; *d* Bristol, 14 May 1808). Organist and composer, son of (2) John Broderip. He was organist of the Mayor's Chapel, Bristol, from 1780 and of St Michael's from 1793. His publications include *Portions of Psalms Selected from the Version of Brady and Tate*, by 'The late John Broderip and Robert Broderip' (Bath, 1798), many songs and works for keyboard, among them organ voluntaries (op.5, London, *c*1785), a harpsichord or piano concerto (op.7, London, *c*1785), a set of sonatas for keyboard and violin (London, *c*1790), a collection of vocal works (op.9, London, *c*1790), and *Plain and Easy Instructions for Young Performers on the Piano-forte* (London, *c*1788).

(5) **Francis Fane Broderip** (*b* ?Wells, *c*1750; *d* London, 18 Feb 1807). Music publisher, probably son of (2) John Broderip. He was associated with the firms of Longman & Lukey, LONGMAN & BRODERIP and Broderip & Wilkinson. He is described (*Salisbury Journal*, 2 March 1807) as a brother of Edmund Broderip of Wells (1752–18), a son of (2) John. He is probably the music dealer who, according to Burney, was advised by Haydn to buy a Mozart manuscript.

BETTY MATTHEWS

Broderip & Wilkinson. *See* LONGMAN & BRODERIP.

Brodsky, Adolph (*b* Taganrog, 21 March/2 April 1851; *d* Manchester, 22 Jan 1929). Russian violinist. He studied under Joseph Hellmesberger at the Vienna Conservatory, 1860–63, thereafter combining solo appearances with academic work, and becoming senior professor at Leipzig in 1880. In 1881 he gave the first performance of Tchaikovsky's concerto, which had been declared unplayable by Leopold Auer, at a Vienna PO concert under Hans Richter. From 1891 to 1894 Brodsky led Walter Damrosch's New York Symphony Society Orchestra. In 1895 he was invited to Manchester as leader of Hallé's orchestra and as senior violin professor at the newly founded Royal Manchester College of Music. Brodsky played only one concert under Hallé before Sir Charles died in October 1895. He succeeded him as principal of the RMCM and resigned the Hallé leadership after the 1895–6 season. Among Brodsky's best-known pupils were Anton Maaskoff, Arthur Catterall, Philip Hecht and Alfred Barker. He also attracted many distinguished musicians to the staff, notably Wilhelm Backhaus, Egon Petri, Max Mayer, Carl Fuchs and later Arthur Catterall. The Brodsky Quartet played a major part in Manchester's musical life for nearly 30 years. (A new, unrelated, Brodsky Quartet was founded in 1972.) Brodsky received the honorary degree of MusD from Manchester University in 1902. He retired from the concert platform as a soloist in 1921 but returned in 1927 to play Elgar's concerto as a tribute for the composer's 70th birthday.

MICHAEL KENNEDY

Brodsky Quartet. English string quartet. It was founded in 1972 by Michael Thomas, Ian Belton, A. Robertson and Jacqueline Thomas, who at the time were aged 11 to 13 and at school in north-east England. They studied at the RNCM in Manchester and named their ensemble after Adolph Brodsky. Their teachers included the cellist Terence Weil, members of the Vermeer and Amadeus Quartets, Zoltan Székely and Andras Mihály. The group won prizes at the Portsmouth competition in 1979 and at Evian in 1980 and 1981. With Paul Cassidy replacing Robertson as the viola player, it made its London début in 1982 and in 1985 became the first resident quartet at Cambridge University, remaining there for three years. In 1989 it played a Shostakovich cycle at the Queen Elizabeth Hall in London. Its début at Carnegie Hall, New York, followed two years later. It has been resident at the Dartington Summer School since 1982 and at Trinity College, London, since 1996. Works have been written for it by Peter Sculthorpe, Morton Feldman, Dave Brubeck, David Matthews and Dmitri Smirnov, among others. Its recordings include a Shostakovich cycle and works by Crumb, Brubeck, Stravinsky and Weill as well as *The Juliet Letters* (1993), on which the quartet collaborated with the rock musician Elvis Costello. It has taken part in 'crossover' ventures with such popular artists as Björk and Paul McCartney, has made videos and television programmes – in 1994 it became the first quartet to appear on the 'Tonight' show in the USA – and has experimented with concert presentation in order to bring string quartet music to new audiences. In 1999, in collaboration with Eurovision, the ensemble began a project of performing and recording the Beethoven cycle, alongside a series of works commissioned from contemporary composers, each based on one of the Beethoven Quartets.

TULLY POTTER

Brodszky, Nicholas [Miklós; Nikolaus] (*b* Odessa, Ukraine, 7/20 April 1905; *d* Hollywood, CA, 24 Dec 1958). Hungarian composer, active in England and the USA. He learnt the piano as a child, later studying in Rome, Vienna and Budapest. By the late 1920s he had contributed songs to long-forgotten and newly-arranged Viennese operettas.

He mainly specialized in film music, writing his first score in Vienna for a film starring Richard Tauber and Gitta Alpar. He continued to write numerous European popular song hits during this period. His reputation took him to England in 1937, where he wrote the songs for C.B. Cochran's revue *Home and Beauty*.

Although he is credited with the scores to 14 British films over the next ten years, he was solely a songwriter and incapable of scoring incidental music for dramatic situations. Collaborators were employed, often uncredited, and he is known to have relied upon the skills of Charles Williams and Philip Green, and probably also worked with Mischa Spoliansky, Clive Richardson and Sidney Torch.

In his later Hollywood career Brodszky, who became a naturalized American citizen, composed many hit songs, including several that perfectly suited the voice of Mario Lanza, such as *Be my love* (*The Toast of New Orleans*, 1950).

WORKS
(*selective list*)

Operetta: Szökik az assozny [The Runaway Girl], 1929; Az első tavasz [The First Spring], 1930; Die verliebte Königin, 1934

Revue: Home and Beauty, 1937

Film (Germany): Der brave Sünder, 1931; Gitta entdeckt ihr Herz, 1932

Film (Austria): Peter, 1933; Csibi, der Fratz, 1934; Die 4½ Musketiere, 1935; Ende schleht, alles gut, 1935; Katharina die Lezte, 1935; Kleine Mutti, 1935; Peter, 1935; Bubi, 1936

Film (England): French Without Tears, 1939; Spy for a Day, 1940; Freedom Radio, 1941; Unpublished Copy, 1942; Tomorrow we Live, 1943; The Demi-Paradise, 1944; English Without Tears, 1944; The Way to the Stars, 1945; Beware of Pity, 1946; Carnival, 1946; While the Sun Shines, 1946; A Man About the House, 1947; The Turners of Prospect Road, 1947

Film (USA): The Toast of New Orleans, 1950 [incl. Be my Love]; Because You're Mine, 1952 [incl. Because You're Mine]; Latin Lovers, 1953; Small Town Girl, 1953; The Flame and the Flesh, 1954; Love Me or Leave Me, 1955 [incl. I'll never stop loving you]; The Opposite Sex, 1956; Serenade, 1956

THOMAS L. GAYDA

Brody, Martin (*b* Chicago, 8 July 1949). American composer, theorist and teacher. The son of a jazz musician, he first studied the piano and cello, and later worked as a jazz and rock musician. He began composing while a student of Lewis Spratlan and Donald Wheelock at Amherst College. After further study in composition at Brandeis University with Seymour Shifrin, and in computer music with Barry Vercoe at MIT, he was awarded a doctorate (1981) at Yale University, where his main teachers were Yehudi Wyner and Robert Morris. Brody has taught at MIT, Bowdoin College, Mount Holyoke College and Brandeis, and was appointed Catherine Mills Davis Professor of Music at Wellesley College in 1992.

Brody's compositional work encompasses music for the popular media in, for example, numerous productions for the Public Broadcasting System and the film *The Brother from Another Planet* (dir. J. Sayles, 1980), as well as the concert hall. As his focus has shifted from densely woven atonal chamber music in such works as *What the Dead Know* (1987) to the more transparent textures of large narrative theatrical works, his musical language has remained essentially harmonic: contrapuntal surfaces emerge from the prolongation of jazz-derived chords. *Heart of a Dog* (1990–92), which sets an early 20th-century Russian tale in an idiom which incorporates both operatic and rap styles, and *Earth Studies* (1993–5), which integrates dance and opera, both exemplify the power and flexibility of such a harmonic language. His theoretical work ranges from technical articles for a professional readership to general cultural criticism directed towards a broader audience. In 'Music for the Masses: Milton Babbitt's Cold War Music Theory' (1993) he argues that the antecedents of late 20th-century American music theory can be found in the mid-century literary and political culture of the 'New York intellectuals'.

STEPHEN DEMBSKI

Broeckx, Jan L(ea) (*b* Antwerp, 17 Oct 1920). Belgian musicologist. Son of the composer Jan Pieter Karel Broeckx, he undertook his musical studies at the Koninklijk Vlaemsch Conservatorium, Antwerp, where he obtained in 1938 the high diploma for the keyboard. He also studied counterpoint and fugue with Poot and Absil at the Brussels Conservatory. He later studied the history of art at the University of Ghent, gaining the doctorate in 1943; in the same year he received an award from the Belgian Royal Academy for his study of the composer Lodewijk Mortelmans. He was professor of the history of music at the conservatories of Ghent (1944–8) and Antwerp (from 1948). Concurrently he worked at the Antwerp Royal Museum of Fine Arts, writing publications on Belgian and foreign painters. In 1962 he was appointed to teach in the department of musicology at the University of Ghent, where he later became director of the Seminary of Musicology and the Institute for Psychoacoustics and Electronic Music.

Broeckx specializes in music of the Romantic period, Impressionism, Expressionism and aesthetics, especially semiotics. His interest in pedagogy is also evident from

his educational books on the history of music. He is editor of the journal *Interface*, which is devoted to the study of contemporary musicological problems and methods.

MARIE CORNAZ

Brognonico [Brognoligo], **Orazio** (*b* Verona, *c*1576; *d* Verona, Jan 1623). Italian composer. He came of a noble, cultivated Veronese family; he should not be confused with a member of another branch of the family who bore the same name, was contemporary with him and was a doctor of law. He spent his life in Verona. He entered the Accademia Filarmonica on 1 June 1611, after proving his musical ability by composing a mass which was sung in the previous month in S Sebastiano to celebrate the anniversary of the academy's foundation. He was asked to write works for the same occasion in some subsequent years. During his last years he was seriously ill; he sought to withdraw from the academy, but in recognition of his qualities he was supported by the members and relieved of duties and the need to make payments.

Brognonico himself probably wrote the separate poems dedicated to symbolic figures and related to the texts of the madrigals that appear in *La bocca* and *Gli occhi*. His music lends affective colouring to the images and states of mind explored in the texts, the declamatory writing making the words stand out in expressive relief. Harmonic writing, which is generally innocent of chromaticism, dominates both the contrapuntal textures and also the recurring rhythmic patterns that make up homophonic passages sung by all or some of the voices. Although he still worked within the traditional framework of the madrigal, Brognonico was not unaffected by the general tendency at the time towards a change in the musical language.

WORKS

all published in Venice

ENRICO PAGANUZZI

Brogue (Henning), Roslyn (*b* Chicago, 16 Feb 1919; *d* Beverly, MA, Aug 1981). American composer and harpsichordist. She studied at Drake University, the University of Chicago (BA 1937) and Radcliffe College (MA 1943, PhD 1947), where her teachers included Piston. Among her teaching appointments were positions at the Harvard Summer School (1951–61), Boston University (1959–60) and Tufts University (1962–75); she also taught privately. Earle Brown was her best-known pupil. A versatile performer, she played the piano, organ, violin and viola proficiently and also sang and conducted. Active in harpsichord building and restoration, she worked in the studio of Frank Hubbard and William Dowd for one year. Her other interests included classical paleography, poetry, sculpture, ceramics and photography.

MARK DEVOTO

Brohn, William David (*b* Flint, MI, 30 March 1933). American orchestrator, conductor and composer. He studied music at Michigan State University and then at the New England Conservatory, which included conducting with Neel and Stokowski, and the double bass. The latter led to performing engagements with numerous orchestras; from 1961 to 1967 he also conducted, particularly ballet orchestras. At this time he began conducting tours and concerts of musicals, and in the 1970s his orchestrations for musicals were first heard. These included orchestrations reconciling a variety of sources with the requirements for modern revivals or compilations (as with *Jerome Robbins' Broadway*, *Carousel*, *Show Boat*, and his contributions to the restoration of the Gershwins' *Strike up the Band*). He has composed incidental music, arranged for television and film, provided arrangements for recording (for Mandy Patinkin, Plácido Domingo, Marilyn Horne, Frederica von Stade), and written songs and musicals, as well as concert and dance works. Additionally he has provided re-creations of Prokofiev's film music (*Alexander Nevsky*, *Ivan the Terrible*), and concert extracts like his *Suite of Dances from 'Pacific Overtures'*.

Brohn's orchestration is characterized by a sensitivity to colour in support of drama, and by skill over a wide stylistic range, as shown by his orchestration of the very different *The Secret Garden* and *Miss Saigon*. The former stands as one of the most notable of theatre orchestrations, with its reconciliation of folk influences (even delicate hints of a rock beat) with the period of the story and the subtlety of its characterization, as well as its chamber textures, exposing the timbres of dulcimer, guitar, harp and recorder. His orchestration of *Ragtime* evokes the specific milieu of that story with its blues, piano rags, parlour song and other genres, both intimate and public. See also W.D. Brohn: 'An Arranger Evens the Score', *The Instrumentalist*, xlii/6 (1988), 20–26.

Theatre orchs (composer in parentheses): Timbuktu (R. Wright and G. Forrest; after Borodin), 1978; King of Hearts (P. Link), 1978; Marilyn, 1983; The Wind in the Willows (W. Perry), 1985; Jerome Robbins' Broadway, collab. 1989; Miss Saigon (C.-M. Schonberg), 1989; The Secret Garden (L. Simon), 1991; Carousel (R. Rodgers), rev. 1992; Crazy for You (G. Gershwin), rev. 1992; The Red Shoes (J. Styne), collab., 1993; Show Boat (J. Kern), rev. 1993; Ragtime (S. Flaherty and L. Ahrens), 1996

JON ALAN CONRAD

Broken chord. The effect produced by performing the notes of a chord successively, rather than simultaneously, in any order: thus, a species of melodic figuration related to ARPEGGIO, and further discussed under ORNAMENTS, §6. *See also* ALBERTI BASS, §II.

ROBERT DONINGTON

Broken consort. A term generally taken to mean a consort of instruments of different kinds. *See* CONSORT.

Broken octave (i). A term used to designate a variation of the SHORT OCTAVE in which the lowest 'sharps' on keyboard instruments are divided in order to permit sounding of some of the missing accidentals. The front portion of each divided key sounds the pitch that would be expected in a normal short octave, whereas the back portion sounds the accidental that would be expected in a chromatic bass octave. Thus in a *C/E* broken octave the front portions of the two lowest sharps sound *D* and *E*, respectively, while the back portions sound *F*♯ and *G*♯; and in a *G'/B'* broken octave the front portions of the two lowest sharps sound *A'* and *B'* (or *B*♭'), while the back portions sound *C*♯ and *E*♭. Occasionally in the latter arrangement only the second sharp is divided, so that the *C*♯ remains unavailable. Keys divided for this purpose should not be confused with those divided to permit sounding additional chromatic degrees in non-equal temperaments.

EDWIN M. RIPIN

Broken octave (ii). A term analogous to BROKEN CHORD, usually used in the plural to designate the sounding of the notes of a series of octave leaps successively rather than simultaneously. (*See also* MURKY).

EDWIN M. RIPIN

Brollo [Brolo, Bruolo, Bruollo, de Brolis, de Bruolis], **Bartolomeo** [Bartholus] (*fl* *c*1420–35). Italian composer. He was apparently from Venice, to judge from the ascription to 'Bartholomeus de bruollis venetus' in *I-TRmn* 90 for a Gloria that is perplexingly English in its style. Apart from *J'ay grant desir*, his songs all appear in the third and fourth gatherings of the Veneto manuscript *GB-Ob* Can.misc.213, grouped and ascribed in a way that suggests he was close to that manuscript's compiler. The manuscript contains revisions and notational adjustments, and nearly all the texts are in some respects thoroughly confusing. *Viveve et recte* opens with a very strange rebus; the only song with a clear form is his most successful work, *Entrepris suis*, which is found in sources as late as the 1480s (quite exceptionally for such an early piece) and with at least three later alternative contratenors. Even this work, however, is odd in its texting: normally five lines of equal length would have roughly equal musical settings, but here they occupy 12, 15, 5, 9 and 12 breves respectively. He uses imitation more than any of his contemporaries except Hugo de Lantins and Johannes Franchois de Gemblaco.

WORKS

Edition: *Early Fifteenth-Century Music*, ed. G. Reaney, CMM, xi/5 (1975) [complete edn]

MASS MOVEMENT

Gloria, 3vv

FRENCH SONGS

Entrepris suis par grant lyesse, 3vv [rondeau; texted 'Congratulamini michi omnes' in *CZ-Ps* D.G.IV.47; used for a mass by Vincenet]

J'ay grant desir de vostre amour, 2vv [music for 2 equal vv over a tenor; text a single quatrain rhyming ABAB]

Ma belle amour a qui je suy servant, 3vv [1 stanza of evidently corrupt text]

Nulx ne poroit ymaginer, 3vv [apparently a rondeau stanza, though text and underlay seem badly corrupt]

ITALIAN SONGS

O celestial lume agli ochi mei, 2vv [music for 2 equal vv, apparently in rondeau form]

Pulchra speciosa et decora, 2vv [text partly Latin; devotional; form unclear]

Viveve et recte reminiscere, 3vv [text partly Latin; devotional; form unclear]

DAVID FALLOWS

Broman, Sten (*b* Uppsala, 25 March 1902; *d* Lund, 29 Oct 1983). Swedish composer, conductor, violist and critic. After private studies in Lund he was accepted by Henri Marteau for the latter's violin masterclass at the German Conservatory in Prague, where he also studied composition with Finke and conducting with Zemlinsky for two years. He then studied musicology with Norlind in Stockholm, with Peter Wagner in Fribourg, Switzerland, and with Sachs in Berlin, taking a licentiate in philosophy at Lund in 1926. He was chief critic of the *Sydsvenska dagbladet* of Malmö (1930–66, having contributed from Lund from 1923) and co-founder of the Swedish section of the ISCM, serving as its president (1930–62) and as second chairman of the ISCM presidium (1956–9); he was appointed to honorary membership of the ISCM in 1963. He was founder-violist of the Skånekvartetten (1937–48) and the Pianokvartetten av 1948 (1948–51), also appearing as a soloist; and he conducted the South Swedish Philharmonic Society choir (1945–66) as well as

various Swedish and Danish orchestras. From 1945 to 1966 he was programme director of the Salomon Smiths Chamber Music Society of Malmö and Lund, and he also worked as a lecturer and broadcaster, his televised music quiz reaching millions throughout Scandinavia.

Broman's compositional output divides into two distinct periods: before and after 1962. The earlier style, developed in the 1920s, combined a free atonality based on Hindemithian harmonic relationships (e.g. Canon for piano, 1929) with the use of church modes (e.g. *Gotisk svit* for string orchestra, 1932) and contrapuntal severity. After a time of diminished productivity he began with the First Symphony to attempt to bring serialism and 'point' technique into contrapuntal forms. Eight more symphonies quickly followed, developing Broman's serial procedures and incorporating newer resources such as clusters and tape music.

HANS ÅSTRAND

Brombaugh, John (*b* Dayton, OH, 1 March 1937). American organ builder. A graduate of the University of Cincinnati, he was apprenticed to Charles Fisk, Fritz Noack, and Rudolph von Beckerath before establishing his own business in Middletown, Ohio, in 1968. Unlike many small builders, he felt it important to maintain a complete operation in which pipes, keyboards, and other components were made in his own workshop rather than by subcontractors. After several small but distinguished instruments, he built his first sizable organ in 1970, for the First Lutheran Church of Lorain, Ohio. Brombaugh's engineering skills are complemented by a scholarly interest in historic instruments, and he has been a pioneer in creating organs incorporating historic visual, tonal and mechanical principles, mainly derived from north European Renaissance and Baroque practices. One of the first of his organs to be built exclusively according to these principles is in the Ashland Avenue Baptist Church, Toledo, Ohio (1972; see illustration). In 1977 Brombaugh moved his firm to larger quarters in Eugene, Oregon, having completed an important instrument for the Lutheran Church there in 1976. His practice organs and positives have been popular with educational institutions. Some of his larger instruments incorporate features such as Swell divisions that permit historically faithful performances of the Romantic repertory. One of Brombaugh's mechanical innovations is a drawknob with three positions that regulates the level and amplitude of wind pressure by controlling the concussion bellows and the Tremulant. Notable instruments can be found in the USA, in the United Methodist Church, Oberlin, Ohio (1974), Grace Church, Ellensburg, Washington (1974), St Mark's Church, Storrs, Connecticut (1978), Fairchild Chapel, Oberlin College (1981), Southern Missionary College, Collegedale, Tennessee (1985), Iowa State University (1987) and Lawrence University (1995) and in Europe in Güteborg Organ Academy, Sweden (1992).

BARBARA OWEN

Brommel, Antoine. *See* BRUMEL, ANTOINE.

Brondino-Vegezzi-Bossi. *See* BOSSI family.

Bronhill, June [Gough, June Mary] (*b* Broken Hill, 26 Feb 1929). Australian soprano. She won a singing competition in Australia and in 1952 moved to England to further her career, first studying with Dino Borgioli, then joining the Sadler's Wells Opera company in 1954. She worked with the company through the early 1960s, singing roles that included Norina, the Queen of Night, Papagena, Leïla and Gilda. In 1960 she appeared at Covent Garden in the title role of *Lucia di Lammermoor*. She is, however, best known as Hannah Glawari in *Die lustige Witwe*, and called her autobiography *The Merry Bronhill* (London, 1987); her voice can be heard in its prime on recordings of this role, in *The King and I* and *Lilac Time*, and especially as Sombra in *The Arcadians*.

She created the major role of Elizabeth Moulton-Barrett in Ronald Millar and Ron Grainer's *Robert and Elizabeth* (1964), whose vocal part, atypical for a musical, particularly suited her through its high tessitura, wide vocal range and lyricism. Other roles included Maria and later the Mother Superior in *The Sound of Music*, as well as many further appearances in *Die lustige Witwe*. On returning to Australia her versatility was demonstrated by appearances in shows ranging from *Women Behind Bars* through *A Little Night Music* to *My Fair Lady*.

PAUL WEBB

Bronnemüller [Bronmuller, Brunnemüller, Brunnenmüller etc.], **Elias** (*fl c*1690–1712). German composer, active in the northern Netherlands. He is said to have been a pupil of Corelli, Alessandro Scarlatti and C.A. Lonati, and, about 1690, he taught Johann Mattheson. In 1703 he visited Arnhem from Kleve, where he may have been employed. Shortly afterwards he went to The Hague, and then settled in Amsterdam, where, on 21 June 1709, he was granted a privilege to publish his own works. Three volumes, mainly of instrumental music, appeared in Amsterdam and Leeuwarden in 1709–12. 1762 is often given as the year of his death, but this is not confirmed by contemporary documents.

Bronnemüller's compositions are all in the international, italianate idiom of the time, with something of a German flavour, being less polished than, for example, Corelli's or Albinoni's. His sonatas are all of the *da chiesa* type, but sometimes deviate from the standard slow–fast–slow–fast sequence and include the occasional dance movement. The keyboard suites contain an introductory toccatina and a number of dance movements, not following any standard scheme. A figure often employed, almost as a musical 'signature', is the chromatically descending 4th in the bass. (*MathesonGEP*; *WalterML*, 'Brunnmüller')

WORKS

RUDOLF A. RASCH

Bronner, Georg [Jürgen] (*b* Hamburg, bap. 17 Feb 1667; *d* Hamburg, bur. 8 March 1720). German composer and organist. In 1688 and 1689 respectively he succeeded his father, Christoph Bronner, as sacristan and organist of the Heilig Geist hospital, Hamburg, and held these positions until 1719. Although his name was put forward for the post of organist of the cathedral and although he also acted as deputy at the Nikolaikirche between 1696 and 1701, he was never appointed to a more important position. This is the more noteworthy in that he was obviously not inferior to other musicians in Hamburg. He was also the only organist there to have connections with the Hamburg opera, of which he was co-director in 1699 and for which he composed a series of works (some in collaboration with Mattheson and Schiefferdecker) between 1693 and 1702. These operas, which received Mattheson's critical approval, are lost, as are two oratorios by him that provoked a protest from the Hamburg city council. In his book of chorales (1715) each melody is set in three different ways – with figured and unfigured basses and as vocal trios, which are notable for their effective part-writing and interesting harmonies. Of Bronner's other music, all of it sacred, the manuscript chorale cantatas show that the strict cantus firmus tradition was beginning to relax its grip: the outer movements, based on the chorale melody, employ simple, traditional techniques, while the inner movements, freed from the chorale, are in up-to-date aria forms. The six sacred concertos (1696) are more important and occupy a special place in north German music of about 1700 in that they survive in print. The collection contains three works for soprano and three for soprano and bass and relies mainly on the psalms for its texts. In illustrating the transformation of the sacred concerto for few voices into cantata-like forms these works also typify the final stage of the genre before madrigal texts began to be used. In them a sound compositional technique, richly ornamented lines and colourful harmony are allied to expressive word-setting.

WORKS

DRAMATIC

all lost, all performed in Hamburg

Echo und Narcissus, op, 1693
Venus oder Die siegende Liebe, op, 1694
Procris und Cephalus, op, 1701

FRIEDHELM KRUMMACHER

Bronner, Mikhail Borisovich (*b* Moscow, 25 Feb 1952). Russian composer. He graduated from the Moscow Conservatory where he studied composition with Khrennikov; he completed his postgraduate studies in 1981 and had become a member of the Composers' Union in 1979. Notable landmarks in his career were the premières of his ballets *Optimistichskaya tragediya* ('An Optimistic Tragedy') and *Ukroshcheniye stropivoy* ('The Taming of the Shrew') at the Stanislavsky–Nemirovich-Danchenko Theatre in Moscow (1985, 1996) and the performance of the *Yevreyskiy rekviem* ('Jewish Requiem') in Germany in 1994.

Bronner writes music predominantly for the theatre and makes extensive use of theatrical elements in other genres: the monumental examples of this can be found in *Yevreyskiy rekviem* for soloists, chorus and orchestra in which he sets a poem by Chaim Byalik in Yiddish alongside prayers, the address of Maimonid in Tvrit, lines from the diary of Anne Frank, lyric poetry from the *Song of Songs* and psalms nos.53, 55 and 148. The choral concerto *Vereskovïy myod* ('Honey from Heather') revealed new perspectives for the choral theatre.

An expert choral composer, Bronner makes use of a range of contemporary expressive techniques. He has set a large number of sacred texts: besides the *Yevreyskiy rekviem* he has set the *Dona nobis pacem*, *Stabat mater* and *Ave Maria* and has written a *Psaltïr'* ('Book of Psalms') for children's choir. He has given much attention to the philosophical and metaphysical poetry of Akhmatova, Brodsky, Mandelstam and Tsvetayeva.

Bronner has written several works which reflect upon the tragedy of Jewish history; along with the *Yevreyskiy rekviem*, *Yevrey: zhizn' i smert'*, ('The Jew: Life and Death') for cello and piano and *Lesnitsa Iakova: Angel lyubvi, Angel pechali* ('Jacob's Ladder: the Angel of Love, the Angel of Sorrow') for four cellos are of note. His chamber works are characterized by subtle differentiation of timbre, complex rhythmic polyphony and metrical and rhythmic mobility, while his music for children is regarded as being particularly effective.

WORKS
(*selective list*)

Stage: Optimisticheskaya tragediya [An Optimistic Tragedy] (ballet, D.Bryantsev and G. Myatskyavichyus, after V. Vishnevsky), Moscow, Stanislavsky–Nemirovich-Danchenko, 23 Dec 1985; Kholodnoye serdtse [The Cold Heart] (op, S. Mitin, after W. Hauff), 1991; Zolotoy ostrov [The Golden Island] (op, S. Kozlov), 1992, Moscow, Nataliya Sats State Academic Children's Music Theatre, 3 Oct 1993; Ukroshcheniye stroptivoy [The Taming of the Shrew] (ballet, Bryantsev, after W. Shakespeare), Moscow, Stanislavsky–Nemirovich-Danchenko, 8 May 1996

Choral: Dvesti desyat' shagov [210 Steps] (orat, R. Rozhdestvensky), chorus, orch, 1980; Krest'yanskiye pesni [Peasant Songs] (A. Kol'tsov), chorus, orch, 1981; Klyuch ot korolevstva/Chudesa v reshete [Key to the Kingdom/Miracles in a Sieve] (cant., Eng. and Scottish folk songs), children's chorus, orch, 1982; Gori-gori yasno [Burn, Burn Brightly] (cant.), children's chorus, orch, 1986; Goryachiy kamen' [The Burning Stone] (cant.-fairy tale, after A. Gaydar), B, children's chorus, orch, 1987; Pesni lyubvi, smerti i vechnosti bïtiya 'Missa Humanis' [Songs of Love, Death and the Eternity of Existence] (Ger. 17th-century poems), chorus, orch, 1988; Yevreyskiy rekviem [A Jewish Requiem] (after Ch. Byalik: *Gorod Rezni* [The City of Carnage]), solo vv, chorus, children's chorus, orch, 1992; Stabat mater, B, children's chorus, orch, 1993; many a cappella choral works; pieces for chorus and solo insts

Other vocal: Simfonicheskiye pesni [Sym. Songs] (cant., R. Burns), S, T, orch, 1978; Pridanoye [The Dowry] (dramatic legend, D. Kedrin), S, T, Bar, inst ens, 1981; Pechal'nïye uzorï [Sad Patterns] (song collection, Faiza Akhmad Faiza), B, inst ens, 1984; Ten' derev'yev [The Shadow of the Trees] (chbr cant.), S, hpd, perc ens, 1989; Seraya ptitsa pechali [The Grey Bird of Sorrow] (O. Mandel'shtam), S, chbr orch, 1990; Ave Maria, conc., S, ob,org, 1991; 4 vremeni goda [The 4 Seasons of the Year] (after Ch. Ketszyu), 1v, perc, 1994; many song cycles, 1v, pf

Inst: Ov., orch, 1984; Qnt, fl, ob, cl, bn, hn, 1984; Trio barbaro, cl, vn, vc, 1988; Odinokiy golos [A Lonely Voice], cl, 1989; Vn Conc., 1989; Conc., hn, sax, orch, 1990; Pf Sonata, 1990; Vremena goda 'Venok Chaykovskomu' [The Seasons 'A Wreath for Chaykovsky'], fl, cl, vn, vc, pf, 1992; Snï Don Kikhota [The Dreams of Don Quixote], sym., orch, 1993; Conc., 2 cl, chbr orch, 1995; Yevrey: zhizn' i smert' [The Jew: Life and Death], vc, pf, 1995; Lestnitsa Iakova: Angel lyubvi, Angel pechali [Jacob's Ladder: the Angel of Love, the Angel of Sorrow], 4 vc, 1996; Sad snov [The Garden of Dreams], vc, bayan, 1997

ALLA VLADIMIROVNA GRIGOR'YEVA

Bronsart [née Starck], **Ingeborg (Lena) von** (*b* St Petersburg, 12/24 Aug 1840; *d* Munich, 17 June 1913). German composer and pianist of Swedish parentage. She already showed remarkable pianistic and compositional talent before the age of eight. After studies with Henselt in St Petersburg (1855–7), she moved in early 1858 to Weimar to complete her training with Liszt, who came to esteem her as both pianist and composer. In the winter of 1858 she embarked upon a successful career as a travelling virtuoso. She was often accompanied by Hans Bronsart von Schellendorf, whom she had married in 1861. Ingeborg was required to forsake her career as a pianist in 1867 as a result of her husband's appointments as Intendant at Hanover and Weimar. She then devoted herself to composition, primarily of songs and operas.

She achieved her greatest successes with the *Kaiser-Wilhelm-Marsch* of 1871 (performed at the opening of the Women's Exhibit at the 1893 Columbian Exposition in Chicago) and the Singspiel *Jery und Bätely* (1873), which was performed with acclaim in more than ten German cities. The opera *Hiarne* was also favourably received at its première in Berlin in 1891. After the couple's retirement to Munich in 1895, Ingeborg composed the opera *Die Sühne*, which was produced in Dessau in 1909.

Bronsart's compositional output embraces the major genres of the time, except for the symphony and oratorio. Regardless of genre, her music displays vocally derived melodies, traditional forms and mildly chromatic harmonies; it is generally characterized by technical mastery. For the piano music and some of the songs, Liszt served as the model, whereas Wagner's works exerted an influence upon her last two operas (she herself vehemently denied any indebtedness to Wagner's musical style). Her more successful works, including the opera *Jery und Bätely* and the *Zwölf Kinderreime* op.17, incorporate elements derived from folk music. The other operas suffer from poor librettos. The sensitive declamation of Bronsart's vocal music anticipates the style of Richard Strauss's songs and operas. Unfortunately, much of the early piano music and more than 30 songs were never published.

WORKS

STAGE

Die Göttin von Sais, oder Linas und Liane (idyllische Oper, 3, Meyer), Berlin, Kronprinzliches Palais, 1867, lost; lib (Berlin, 1867)

Jery und Bätely (operetta, 1, J.W. von Goethe), Weimar, Hoftheater, 26 April 1873, *D-Bsb*, *Mbn*, *WRdn*, *US-NYp**; (Leipzig, 1876)

Hiarne (prol, 3, H. von Bronsart and F. von Bodenstedt), *c*1870–90; Berlin, Königliches Theater, 14 Feb 1891, *D-WRdn**; lib (Weimar, 1896)

Die Sühne (Tragödie, 1, after T. Körner), Dessau, Hoftheater, 12 April 1909, *DEl**; vs (Berlin, 1910)

OTHER WORKS

Orch: Pf Conc., f, before 1863; Kaiser-Wilhelm-Marsch (Berlin, 1872)

Chbr: Romanze, a, vn, pf (Weimar, 1873); Notturno, a, vc, pf, op.13 (Leipzig, 1879); Elegie, C, vc, pf, op.14 (Leipzig, 1879); Romanze, B♭, vc, pf, op.15 (Leipzig, 1879); Phantasie, vn, pf, op.21 (Leipzig, 1891)

Pf: 3 études, Nocturne, Tarantella, all pubd (St Petersburg, 1855); Fuge über die Namen Maria und Martha, Sonata, Variations on themes by Bach, toccatas, other fugues and variations, all before 1859; Kaiser-Wilhelm-Marsch (Berlin, 1871); 4 Clavierstücke (Mainz, 1874): Valse-Caprice, Impromptu, 2 Wiegenlieder; Phantasie, g♯, op.18 (Leipzig, 1891)

Vocal (for 1v, pf, unless otherwise stated): Die Loreley (H. Heine) (Mainz, 1865); Und ob der holde Tag vergangen (Sturm), 1870, *Mbn**; 3 Lieder (Dunker, Neubauer, Zeise) (Mainz, 1871); Hurrah Germania! (F. Freiligrath), male vv (Hanover, 1871); 3 Lieder (Heine, O. Roquette) (Hanover, 1872); Kennst du die rothe Rose?, solo v, male vv, mixed vv (Weimar, 1873); 5 Lieder (Goethe, A. Platen, F. Rückert) (Oldenburg, 1878); 6 Lieder (from *Lieder des Mirza Schaffy*), op.8 (Leipzig, 1879); Hafisa, 3 Lieder (from *Lieder des Mirza Schaffy*), op.9 (Leipzig, 1879); 6 Gedichte (Bodenstedt), op.10 (Leipzig, 1879); 5 Weihnachtslieder (Jacobi), op.11 (Oldenburg, 1880); 5 Gedichte (Bodenstedt), op.12 (Oldenburg, 1880); 5 Gedichte (E. von Wildenbruch), op.16 (Breslau [Wrocław], 1882); 12 Kinderreime (after K. Groth: *Vaer de Gaern*), op.17 (Leipzig, 1882); 6 Gedichte (Lørmontov), op.20 (Leipzig, 1891); 3 Gedichte (P. Cornelius), op.22 (Leipzig, 1891); 3 Lieder (Goethe, N. Lenau), op.23 (Berlin, 1892); Im Lenz (P. Heyse), 1898, *Mbn**; Rappelle-toi! (A. de Musset), op.24 (Leipzig, 1902); 3 Lieder (Bodenstedt, Goethe, Heine), op.25 (Leipzig, 1902); Abschied (F. Dahn), op.26 (Leipzig, 1902); Osterlied (Platen), mixed vv (Leipzig, 1903); Lieder (ded. to La Mara), 1910; Verwandlung (Heyse), 1910, *Mbn**

JAMES A. DEAVILLE

Bronsart von Schellendorf, Hans (August Alexander) [Hans von Bronsart] (*b* Berlin, 11 Feb 1830; *d* Munich, 3 Nov 1913). German composer, pianist and conductor. He studied in Berlin with Siegfried Dehn and Kullak (1849–52) and in Weimar with Liszt (1853–7), forming a close association with the 'New German School'. He toured as a pianist and was Intendant at Hanover (1867) and Weimar (1887–95). He was a co-founder of the Neu-Weimar-Verein (1854) and was influential in the Allgemeiner Deutscher Musikverein, serving as its president from 1888 to 1898. The many references to his qualities include some from Liszt: 'I value him as a character and a musician' (letter to Draeseke, 10 January 1858). Liszt also praised his Piano Trio in G minor (op.1, 1856; published in 1877) as a 'successful and very respectable work' (letter to Raff, February 1857) and dedicated his own Second Piano Concerto to Bronsart, who gave the first performance. Bronsart was also closely associated with Bülow, who played the Trio and the Piano Concerto in F♯ minor (op.10), a work that reflects some Wagnerian influence but also suggests an individual vein of lyricism in its Adagio and a virtuosity that is musical as well as pianistic. Bronsart accepted with good grace some bad behaviour by Wagner (who admitted it in *Mein Leben*) and greatly admired his music, though his loyalties to Bülow led him to refuse to join in public tribute to Wagner. On 14 September 1861 Bronsart married the Swedish pianist and composer Ingeborg Starck. He exacted high standards in his work as an Intendant, engaging distinguished artists; and his personal and artistic qualities are reflected in the correspondence of Liszt, Bülow, Brahms, Wagner and others. His compositions also include two symphonies (1889, 1897; both lost), *Frühlings-Fantasie* for orchestra op.11 (published *c*1889), his Piano Concerto in F♯ minor op.10 (published in 1873) and many pieces for piano solo. He wrote *Musikalische Pflichten* (Leipzig, 1858).

JOHN WARRACK, BRUCE CARR

Bronskaya, Eugenia (*b* St Petersburg, 20 Jan/1 Feb 1882; *d* Leningrad, 12 Dec 1953). Russian soprano. She studied

first with her mother in Russia and later with Teresa Arkel in Milan. After her début at Tbilisi in 1901 she sang for three years in Kiev and from 1905 to 1907 in Moscow. Returning to Italy she performed Tatyana in the Venice première of *Yevgeny Onegin*. She toured widely until 1909, when she joined the Boston Opera Company, making her début there as Micaëla in *Carmen*. Other roles included Marguerite de Valois in *Les Huguenots*, Gilda in *Rigoletto* and on one occasion the title role in *Lucia di Lammermoor*, which she undertook for an indisposed colleague as the curtain was about to rise, knowing no more than the Sextet and Mad Scene. At this period she also became well known as a recording artist, and on her return to Russia in 1911 was engaged at the Mariinsky and Bol′shoy theatres. From 1923 to 1950 she taught at the Leningrad Conservatory. Recordings show a bright voice, sometimes hardening on the high notes but used with exceptional skill, especially in staccato passages.

J.B. STEANE

Bronson, Bertrand Harris (*b* Lawrenceville, NJ, 22 June 1902; *d* Berkeley, 14 March 1986). American ballad scholar and musicologist. Like other ballad scholars such as Phillips Barry and S.P. Bayard, he studied English literature (Harvard University, MA 1922; Yale University, PhD 1927; Oxford University, MA 1929) and was able to use his expertise in literary studies in his scholarship on folksong. After teaching at the University of Michigan (1925–6), he joined the English department of the University of California, Berkeley, in 1927, and was appointed professor there in 1945; he retired in 1969.

While recognizing the achievement of F.J. Child in compiling ballad texts, Bronson insisted on the need to study the tunes and their variant forms. He conceived of the ballad as a structural unit within which text and tune were firmly wedded, and his major work, the four-volume *The Traditional Tunes of the Child Ballads* (1959–72), was important both for its research on tunes and the supplementary ballad texts. In his later writings, Bronson combed through different source material, including plainchant, collections of traditional ballads and live recordings, to demonstrate that the ballad was a sung genre. He criticized literary scholars such as Kittredge for privileging text over tunes (*The Singing Tradition of Child Popular Ballads*, 1976), and in a series of essays spanning 30 years (published as a collection, 1969), he explored the identity of ballad tunes and how they are affected by features such as mode, contour and final. Influenced by G.P. Jackson's theories on the 'tune family', he classified tune variants for each ballad with a Child number not by mode but by melodic typology, showing how the 'same basic tune may pass from mode to mode almost imperceptibly'. Although he defended the use of church mode designations when this method was becoming unpopular, his perception of the structural dependence of the text and tune in the ballad remains an important contribution to the field.

JAMES PORTER

Bronteron. *See* THUNDER MACHINE, THUNDER SHEET.

Bronze drum. A bronze idiophone (sometimes called bronze kettledrum) but with a bronze tympanum instead of a skin head.

1. General. 2. China.

1. GENERAL. It dates from about 400 BCE or earlier and has had wide distribution in South-east Asia and Southern China beginning with the spread of Dongson Culture in 300 BCE. The first known bronze drum to reach Europe was sent to the Grand Duke of Tuscany in 1682 by G.E. Rumphius, who also first described the famous 'Moon of Pedjeng' drum on the island of Bali (1705). This, the largest bronze drum ever found (1·86 metres high with a tympanum 1·6 metres in diameter), is kept in a small pavilion of a temple in the village of Pejeng and is still revered as the former wheel of the 'moon carriage'. Bronze drums were exhibited in Vienna and Amsterdam in 1883. In 1884 a study of 52 bronze drums (mostly in museums or private collections) was published by the ethnologist A.B. Meyer, and in 1902 Franz Heger established a classification of four types of bronze drum (Heger I–IV) based on the study of 165 instruments.

Six large stone moulds are required to cast the upper, middle and lower zones of the shell of the bronze drum (each zone being made in two halves and then brazed to form a longitudinal seam); another is needed to form the tympanum, which is later joined to the shell. Such moulds (needed to cast a Heger I bronze drum) have never been found in Java. Fragments of small stone moulds unearthed in Bali were apparently used locally to make bronze drums of the *mokko* type (the same form as the 'Moon of Pedjeng'); these are distinct from the Heger types because of their hourglass shape and because the diameter of the tympanum is less than the height of the drum (whereas in

Bronze drum found at Semarang, Java, c300 BCE *(Museum Pusat, Jakarta)*

all Heger drums this relationship is reversed). Small *mokko* drums were probably cast in Bali, but large stone moulds of this type have not been recovered, so there is some doubt whether the great 'Moon of Pedjeng' drum was made locally.

Bronze drums have been widely studied by Western historians and archaeologists since they provide probably the richest single source of information about the period of Dongson Culture. The tympanum usually has a raised star in its centre, and the drums are decorated with a variety of abstract designs and representations of the soul-ship or ship-of-the-dead, houses, animals, birds, fish, men, women, children, warriors etc. The Karen of Myanmar still use bronze drums called *hpà-si* ('frog drums'; *see* MYANMAR, §1) decorated around the circumference of the drumhead with figures of small frogs, which are thought to symbolize the drum's rain-making powers, and some places in south-east Asia also distinguish the 'male' drum from the 'female' drum without frogs.

The bronze drum has been little studied as a musical instrument; that they were carried in battle suggests they were used as signalling instruments.

2. CHINA. The Chinese bronze drum (*tong gu*) can be found among many tribal peoples living in southern-central China (especially in Guizhou and Guangxi provinces), such as Miao, Zhuang, Yao and the eastern Yi. *Tong gu* is a Chinese name (literally, 'bronze drum', not to be confused with the Shang dynasty barrel-shaped drum of the same name, CHINA, §III); local names differ from one culture to another (Yuan, 1986, p.324).

In terms of structure the instrument is essentially a gong. Constructed of a tubular shell with concave sides, it is covered at one end with a flat disc-shaped plate or 'drumhead' of bronze (its rim extending out beyond the shell), its other end open. Diameters of 'drumheads' usually vary between about 50 and 100 cm, though some instruments are considerably larger. Attached to opposite sides of the shell are two pairs of loops (called 'ears') through which stout ropes are inserted for suspension. The striking plate is often (but not always) decorated with a central star-shaped design (12 points are most common), concentric circles, various geometric patterns and four or six bronze figures in the shape of small frogs (though sometimes of bats or birds) attached to the surface around the outer rim. Two size groups are generally differentiated, small male gongs which sound a high pitch, and large female gongs which sound a low pitch.

While performance practice differs from area to area, the *tong gu* is usually suspended by its loops, striking plate sideways, and hit with either a padded beater or hand of the performer; the rim or side of the shell are often struck as well. Sometimes a large wooden tub is positioned opposite the *tong gu* to increase the resonance, or a barrel partially filled with water is placed underneath and shaken for special acoustical effects.

Many 'bronze drums' have been found in south-central China. The oldest instrument, uncovered at a site in central Yunnan province, has been dated to about the 6th century BCE. This gong is relatively plain, with an eight-point star in the centre but without the raised figures found on later instruments. Gongs dating to about the 4th century BCE and later have been found in extraordinary numbers (many presently in the collection of the Yunnan Provincial Museum in Kunming). Some are decorated with stars and geometric patterns only; others are more highly decorated with raised figures surrounding the striking plate. The *tong gu* is cited in Chinese literature and poetry from the Han dynasty (206 BCE–200 CE) onward for its usage in various tribal contexts. Sources suggest it was also considered a status symbol. While sometimes thought to be a relic of the past, the instrument is still in use among many Chinese tribal cultures, especially in accompaniment of dances associated with wedding ceremonies, agricultural festivals, lunar New Year celebrations and other contexts.

MANTLE HOOD (1), ALAN R. THRASHER (2)

Brook, Barry S(helley) (*b* New York, 1 Nov 1918; *d* New York, 7 Dec 1997). American musicologist. He took the BS at the City College of New York in 1939 and the MA at Columbia University in 1942. At Columbia his professors included Lang and Hertzmann, and he also studied with Hugh Ross and Roger Sessions. He received the doctorate from the Sorbonne in 1959. From 1945 he taught at Queens College, New York; he was a visiting professor at New York University (1964–5) and the University of Paris (1967–8). In 1967 he founded and was appointed executive officer of the PhD programme at the Graduate School, CUNY and he taught the doctoral seminar and advised doctoral students at the Juilliard School, 1977–88. From 1974 he was responsible for assembling at CUNY a facsimile archive of 18th- and early 19th-century autographs, manuscripts and prints (a thematic catalogue of this archive was published as *Symphonic and Chamber Music Score and Parts Bank*, ed. R.H. Rowen, Stuyvesant, NY, 1996). He instigated a new doctoral programme in 1983 at the Ecole Normale Supérieure and in 1986 he founded the DMA programme at the Graduate School. He was also general editor of the historical series The Symphony, 1720–1840 (New York, 1979–85), for which he prepared the reference volume (New York, 1986). He became professor emeritus in 1989, after which he served as director of the Center for Music Research and Documentation, New York. At the time of his death he was editor-in-chief of the projected 75-volume historical series French Opera in the Seventeenth and Eighteenth Centuries; he was also president and editor of the planned 17-volume reference work Universe of Music, which seeks to write an international history of music by employing teams of scholars from each region.

Brook made a study of Renaissance secular music, musical iconography, the sociology of music, and music and aesthetics of the 18th and 19th centuries. His doctoral dissertation is an exemplary study of the development of

the French symphony in the second part of the 18th century and provides extensive documentation, a thematic catalogue of more than 1,200 symphonies and an edition of eight representative works. As editor of a facsimile edition of the Breitkopf Thematic Catalogues (New York, 1966) he assembled into a single volume the many parts of the earliest and largest printed thematic catalogue of music, an important source for the identification and dating of 18th-century compositions. Brook was also interested in musical bibliography and its history, and he was founder (1966) and general editor of RILM, the first international bibliography of music scholarship. A pioneer in computer applications for music documentation, he developed the 'Plaine and Easie Code System' for notating music.

PAULA MORGAN

Brook, Peter (Stephan Paul) (*b* London, 21 March 1925). English director. He studied at Oxford, where his theatrical skills first became apparent. His main work has been in the spoken theatre, but between 1948 and 1950 he caused several sensations at Covent Garden with his avant-garde stagings. These included a highly idiosyncratic *Boris Godunov* designed by Georges Wakhévitch (1948), and an outrageous (for its time) *Salome* (1949), with decor by Dali, which was abandoned after six controversial performances. He also staged the première of Bliss's *The Olympians* at Covent Garden (1949). Brook was regarded as an *enfant terrible*: he was determined to rehearse operas as he would plays, and was not prepared to tolerate good singers who were bad actors. In 1953 he filmed Gay's *The Beggar's Opera* with Laurence Olivier. His *Faust* at the Metropolitan in 1953 caused something of a furore, but his *Yevgeny Onegin* there in 1957 was by comparison more conventional. After that Brook gave up directing opera, concluding that the public for that art was not yet ready for his advanced ideas. He returned to the fray with his own company, producing *La tragédie de Carmen* at the Bouffes du Nord in Paris in the 1981–2 season. This was a reduction of the piece, both dramatically and musically, to fit into a tiny venue. The results were arresting and typically unconventional yet faithful to the Mérimée-Bizet ethos. The staging travelled to various centres and was filmed for television. He repeated the experiment, again at the Bouffes du Nord, with *Impressions de Pelléas* in 1993, and in 1998 directed *Don Giovanni* at the Aix-en-Provence Festival with Claudio Abbado conducting. He was made a CBE in 1965.

ALAN BLYTH

Brooklyn Philharmonia. New York orchestra founded in 1955. *See* NEW YORK, §3.

Brooks, (Troyal) Garth (*b* Tulsa, 7 Feb 1962). American country singer and songwriter. Like others of his generation, Brooks was influenced by the country-rock movement of the 1970s and by rock songwriters such as Billy Joel, whose *Shameless* he recorded. Singing in a pleasant, unaccented but warm tenor, he managed to combine these influences with more conventional country music narrative concerns in such songs as the sentimental *If Tomorrow Never Comes*, the poetic *The Dance*, and such comic honky-tonk pieces as *Friends in Low Places* and *American*

Honky-Tonk Bar Association. He was also prepared to take on the contemporary social issues of domestic violence in *The Thunder Rolls* (1991) and AIDS in *The Fever* (1996).

Brooks was the most commercially successful of all country music performers in the 1990s, selling over 60 million albums between 1989 and 1996. His appeal was built equally on the energetic character of his concert performances, where he used a portable microphone hooked to his trademark ten-gallon hat. Although his stage shows have brought comparisons with rock music concerts, the hat symbolized his skill in appealing to traditional country music audiences while broadening his constituency.

DAVE LAING

Brooks, James (*b* Bath, 1757/1760; *d* London, before 7 Jan 1810). English violinist and composer. He played in major concerts in Bath as early as 1771, and was leading the city orchestra five years later. Apart from one short period, he subsequently led most of the major performances in Bath until just after the turn of the century. However, he was well known as a performer and concert director throughout the west of England, appearing in Bristol in 1791, 1792 and 1798. He also played in London, taking part in the Handel Commemoration performances in 1784, performing at St Paul's Cathedral in 1792 and 1794, at Vauxhall Gardens in 1800 and, possibly, at the Theatre Royal, Drury Lane, during the 1807–8 season.

It was in the Bath theatre, nevertheless, that much of Brooks's success arose. In addition to directing the band and performing concertos, he provided original music for popular operas and incidental music for plays, and also arranged the scores for other stage productions. Many of these were performed in London and elsewhere. His vocal writing is mostly lightweight, and many ballads and glees were first heard in concerts he directed in the Bath pleasure gardens or at the city's Catch Club, of which he became the secretary in 1794. Some of his works were also performed in Rauzzini's subscription concerts.

Though most of Brooks's instrumental works are now lost, it was for these that he received most praise. He composed many of his own solos, and the surviving Concerto for the Violin 'in nine parts', published in 1792, reveals much charm. Apart from some excessive note-spinning in the last movement, it has melodic and harmonic qualities which well account for the general popularity of his music. Other works performed in the concerts include duets for violin and cello, and sonatas for harpsichord or pianoforte with violin accompaniment. The 36 pieces for military band were probably composed for the Bath Volunteers, who sometimes performed their 'exercises' in the theatre, and, in April 1794, 'Several Select Pieces arranged for a Military Band' were played between the acts of his benefit performance there.

Life in Bath was far from easy for Brooks. He seems to have had an abrasive side to his character, and financial disaster was always close at hand. His benefit performances at times attracted 'all the leading Fashion [and] Royalty itself', but rarely did one produce an adequate profit for the needs of his large family. He became increasingly active in Bristol and London and, early in the 19th century, his 'last Benefit' in Bath was announced. Thereafter, he spent most of his remaining years performing in the London theatres.

WORKS

published in London unless otherwise stated

INSTRUMENTAL

Concerto for the Violin in 9 Parts, pts (1792); arr. vn, pf (Bath, 1985)
Favourite Sonata, hpd/pf, vn (*c*1795)
36 Select Pieces for a Military Band, cl, hn, bn (1796)
2 Duets for 1 Performer, vn, op.4 (?1802)
12 English Ballads, pf, hp, op.5 (?1805)
Sonata, pf, vn (?1805)
Nocturne, pf, vc (1828)

VOCAL

Glees: 12 Glees, 3–4vv (Bath, *c*1796); A Second Sett of 12 Glees (*c*1798); The Shepherd's Daughter, Sally, arr. W. Hawes (1820)
Pastoral dialogues: Damon and Phillis, 2vv (*c*1800)
Songs and ballads, incl. Louisa (*c*1788); As when some maiden in her teens (*c*1790) [in The Lover's Device]; Fragrant garlands love shall strew (*c*1790) [in The Vicissitudes of Harlequin]; Now home again from foreign climes, 2vv (*c*1790) [in The Lover's Device]; William and Ann (*c*1795); Ere my dear laddie gade to sea (*c*1800); How sweetly did the moments pass (*c*1800); The Tambourine (Dublin, *c*1800) [with tambourine acc.]; Young Damon was a shepherd boy (*c*1800)

KENNETH E. JAMES

Brooks, William (Fordyce) (*b* New York, 17 Dec 1943). American musicologist and composer. He studied music and mathematics at Wesleyan University (BA 1965) and then attended the University of Illinois, receiving degrees in musicology (MM 1971) and composition and theory (DMA 1976). His instructors included Hamm in musicology and Johnston, Gaburo, Brün and Cage in composition. He taught at the University of Illinois (1969–73) and the University of California, Santa Cruz (1973–7). He was active as a freelance composer, scholar and performer (1977–87), before returning to Illinois as associate professor of composition and theory (1987); he was visiting lecturer at the University of Keele (1977–8), Middlebury College (1982), the Institute for Studies in American Music, Brooklyn College (1983), and Goldsmiths' College, London (1995–6). As a musicologist he has written extensively on American music, particularly on Ives and Cage, and was adviser on 19th-century music for *The New Grove Dictionary of American Music*. As a composer he has received commissions from the British Arts Council (1978), the Gulbenkian Foundation (1981) and the Kronos Quartet (1986). His compositions frequently refer to aspects of American music history, but challenge the listener (sometimes humorously) to hear familiar material in unexpected ways by recasting, juxtaposing and transforming it.

WORKS

Stage: Untitled (J.L. Borges), 8 solo vv, 2 spkr, 1972; The Legacy (chbr op, Brooks), 4 solo vv, live elecs, actor, 1982–3

KATHERINE K. PRESTON

Broonzy, Big Bill [William Lee Conley] (*b* Scott, MS, 26 June 1893; *d* Chicago, 14 Aug 1958). American blues singer and guitarist. He grew up in Arkansas, where he lived on a farm until he was in his late 20s. After working as a fiddle player in the rural South, he settled in Chicago in 1920. There he learnt to play the guitar, on which he was already an outstanding performer when he began to record ten years later. In the late 1930s and the 1940s he was sympathetically supported by Joshua Altheimer or Black Bob Hudson on the piano in a manner reminiscent of Leroy Carr and Scrapper Blackwell.

One of the most prolifically recorded of black American blues singers, Broonzy formed a link between the country and urban blues traditions, playing with a light, lilting style. Some of his recorded blues are poetic statements, complemented by moaning notes on the guitar, such as *Big Bill Blues* (1932, Charnpion) and *Friendless Blues* (1934, Bb), while others are of a ribald or 'hokum' character, including *Keep your hands off her* (1935, Bb) and *Good Jelly* (1935, Bb). He was later one of the first blues singers to use the trumpet and saxophone in small-band accompaniments, but the several recordings he made in this form were less successful than his earlier work. He sang in France in 1951 and subsequently made several visits to Europe, where he recovered the old country songs he had played in his early years. He also recorded more than 200 titles, including several versions of *John Henry* and the protest song *Black, Brown and White* (both 1951, Vogue). Broonzy's generosity, his considerable talents and his support of younger singers, combined with a homely wit, made him one of the most popular of all blues musicians.

PAUL OLIVER

Brophy, Gerard (*b* Sydney, 7 Jan 1953). Australian composer. He initially trained as a pharmacist, his first serious musical studies, as a guitarist, beginning in 1975. Attending Kagel's composition seminar in Basel in 1977 stimulated him to pursue a career as a composer; he subsequently studied with Richard Toop at the Sydney Conservatorium (1978–81). In 1982–3, with his Sydney fellow student Riccardo Formosa, he worked with Donatoni at the Accademia Nazionale in Rome, and in 1983 acted as Donatoni's assistant at the Accademia Musicale Chigiana, Siena. In 1987 he was appointed to teach composition at the Queensland Conservatorium.

Until the early 1990s Brophy's music was primarily influenced by Italian music, especially that of Donatoni and Sciarrino. These earlier works are predominantly fast and rhythmically intricate, making virtuoso demands of performers and exploring various 'extended techniques'; they also reveal a penchant for laconic, often provocative titles, such as *Flesh* and *Head*. Later, following trips to the USA, Brophy's work became more eclectic and lyrical in style, while developing a taste for the kind of sophisticated instrumentation first apparent in *Forbidden Colours*. Though his work of the mid-1990s consists mainly of short works for small ensembles, two significant new traits emerged during that decade: the use of live electronics, beginning with *Le domaine enchanté*, and the incorporation of styles and instruments drawn from non-Western cultures, as in the percussion quartet *Umbigada, obrigado!*

RICHARD TOOP

Broqua, Alfonso (*b* Montevideo, 11 Sept 1876; *d* Paris, 24 Nov 1946). Uruguayan composer. Along with Fabini and Cluzeau Mortet, he was a leading figure of early 20th-century musical nationalism in Uruguay. He left for Europe at the age of 18 and studied for six years with d'Indy at the Schola Cantorum in Paris before returning to Montevideo in 1904. The première of his lyric poem *Tabaré* in 1910 was a major event in the establishment of the nationalistic style that was to exploit, for the first time in Uruguayan art music, the forms, themes, instruments

and dance types of Uruguayan folklore. Typical examples of the evocative quality of Broqua's scores are *Tabaré*, *Preludios pampeanos* (1938) and *Evocaciones criollas* (1929). His Piano Quintet is considered one of his most significant works. Broqua's extensive literary efforts encompass an opera libretto (*La cruz del sur*), song texts and frequent contributions to the newspaper *El siglo*.

WORKS
(*selective list*)

Stage: Tabaré (lyric poem), solo vv, female chorus, pf/orch 1910; La cruz del sur (lyric drama, 3, Broqua), 1919–22, unpubd; Telén y Nagüey (Inca ballet), 1932; Isabelle (children's ballet), 1938
Orch: Impresiones sinfónicas, 1912; Noche campera, sym. poem, 1931; Poema de las Lomas, sym. triptych [after pf work], 1937
Chamber: Pf Qnt, g, *c*1914

Principal publisher: Eschig

JOHN M. SCHECHTER

Brosa, Antonio (*b* Canonja, 27 June 1894; *d* Barcelona, 23 March 1979). Spanish violinist. He studied with Ainaud in Barcelona and with Mathiell Čricboom in Brussels, and made his début at the age of ten in Barcelona. He settled in London in 1914 and was one of the first violinists to broadcast from the 2LO Studio in Savoy Hill in 1920. He formed the Brosa String Quartet (1925–39) which became well known in Europe and the USA, and had a great influence on the standards of ensemble playing. He went to the USA in 1940 and, on the death of Alphonse Onnue, became leader of the Pro Arte Quartet and toured the USA for four years. Brosa had a polished style and an incisive but sweet tone. He formed duo partnerships with Mathilde Verne (1924–7) and Kathleen Long (1948–66). He gave the first performance of Britten's Violin Concerto (New York, 1940, with Barbirolli), and the first broadcast performance for the BBC of Schoenberg's Violin Concerto. His instrument was the 'Vesuvius' Stradivari of 1727. He taught at the RCM for many years and was made a Commander of the Order of Civil Merit (Spain).

WATSON FORBES/MARGARET CAMPBELL

Brosche, Günter (*b* Vienna, 17 Feb 1939). Austrian musicologist. He studied musicology and drama with Schenk, Wessely and Heinz Kindermann at the University of Vienna, where he took the doctorate in 1962 with a dissertation on Joseph von Sonnenfels and the Viennese theatre. He subsequently worked as a librarian in the music collection of the Österreichische Nationalbibliothek and became its director in 1981; in the same year he was made head of the Institut für Österreichische Musikdokumentation. In 1975 he became secretary of the Internationale Richard Strauss-Gesellschaft. He was awarded the title of *Hofrat* in 1984. In 1997, he became a lecturer at the University of Vienna.

His research has been mainly concerned with Austrian music from the 17th century to the 20th, and includes work on Beethoven, Richard Strauss and Bruckner. He is editor of the journals *Publikationen des Instituts für Österreichische Musikdokumentation*, *Katalog der Sammlung Anthony van Hoboken* and *Musica manuscripta*.

Broschi, Carlo. *See* FARINELLI.

Broschi [Brosca], **Riccardo** (*b* Naples, *c*1698; *d* Madrid, 1756). Italian composer, brother of FARINELLI. According to Prota-Giurleo, his approximate date of birth can be ascertained from a declaration signed on 6 November 1725 while he was witnessing the marriage banns of his younger sister Dorotea: 'I, Riccardo Broschi, Neapolitan, son of Salvatore (deceased), testify that I am a *maestro di cappella* of about 27 years of age'. The same document discloses that the Broschi family moved to Barletta (probably from Andria) about 1707 and returned to Naples some four years later. If, as Prota-Giurleo believed, Riccardo Broschi became a student at the Conservatorio di S Maria di Loreto, then the likely time of his enrolment would have been after his family's return to Naples about 1711–12. The earliest news of his activities as a professional musician comes from the *Gazzetta di Napoli* for 6 February 1725 which states that on 3 February he

provided sacred music for the festival of S Biagio in S Maria del Popolo degl'Incurabili. In the autumn of the same year he presented his one and only comic opera *La vecchia sorda* at the Teatro dei Fiorentini.

Broschi was in Rome by 1727, when his only known oratorio, *Il Martirio di Santa Susanna Vergine*, was performed at the Chiesa Nuova. In 1728 his first *opera seria*, *L'Isola di Alcina*, was produced at the Teatro Tordinona. An active and successful period of composition followed in northern Italy: *Alcina*, revised as *Bradamante nell'isola d'Alcina*, appeared in Parma in 1729; *Idapse*, Broschi's only Venetian opera, was performed during Carnival 1730; and *Ezio* opened the carnival season at Turin in 1731. The cast for *Ezio* included Broschi's brother Farinelli, Faustina Bordoni and Antonio Montagnano; a contract of 3 June 1729 from the Teatro Regio shows that Broschi was paid a salary of 50 luigi d'oro for the work. Earlier in 1730 both Broschi and his brother had been elected to the Accademia Filarmonica, Bologna (the libretto of *Ezio* confirms this honour). Broschi's most popular opera, *Merope*, was first performed at Turin in 1732, where the composer had been given the additional title of *virtuoso del principe di Carignano*.

There is no documentary evidence placing Broschi in London in 1734 for Farinelli's English stage début in the pasticcio *Artaserse* (King's Theatre, 29 October), even though the work included the apparently newly composed bravura aria 'Son qual nave ch'agitata' by him. He was certainly not in London for the revival of his opera *Merope* in 1736: the recently discovered Pepoli correspondence (see Vitali, 1998) includes a letter from Farinelli of 2 July 1735 describing his brother as penniless and in Milan. At the end of 1735 Broschi was probably still in Milan for the production of his new opera *Adriano in Siria*.

In November 1736 Duke Carl Alexander of Württemberg appointed Broschi his *compositore di musica*. The Italian opera company then in the duke's employ at Stuttgart performed Broschi's *Adriano in Siria* at the beginning of 1737. The composer had no further chance to show his abilities at the court of Stuttgart, however, for on 12 March 1737 the duke died. His opera company was disbanded and Broschi lost his post on 1 April. In the autumn of that year, his *Merope* saw its last performance at the command of Count Johann Adam of Questenberg at Jaromeritz in Moravia, but Broschi was apparently not offered a permanent position there. He then made his way to Naples, where he was made a musician without pay on 8 October 1737. According to Strohm, Broschi composed act 3 of *Demetrio*, a new opera performed at the Teatro S Carlo on 30 June 1738, for which Leonardo Leo composed act 1, and various others act 2. Broschi failed, however, to gain other significant commissions for music from the Neapolitans. Nonetheless, he was not totally overlooked, for in October 1739 he was given the salaried post of administrator of wine within the city of Naples. These favours were bestowed because of intercessions made on his behalf by the Spanish court (whose viceroy ruled Naples), of which Farinelli had in 1737 become an influential member. However, all attempts to procure an official musical position failed, and during the 1740s Broschi joined his brother in Madrid, where he was named 'familiar' to the King. Letters in the state archives of Naples (see *DBI*) reveal that later attempts were made to acquire the position of *maestro di cappella* there for Broschi, after the deaths of Sarro and Leo in 1744, but these also failed. Broschi died in Madrid in 1756.

Broschi is best known for the virtuoso arias he composed for Farinelli. His music for other singers is not so extreme and fits squarely into the modern Italian style of the period. Haböck quotes G.V.G. Orloff as writing (1823): 'Riccardo's style is powerful and well made, noble without being pompous, majestic and sustained, not so imposing as Leo and Jomelli, not so deep and pure as Feo, but with the most tender expression'. Broschi's operas were performed by the best singers of the day and involved collaborations with the contemporary scene designer Pietro Righini (*Alcina*, *Merope* and *Demetrio*) and the ballet master Francesco Aquilante (*Merope*, *Adriano* and *Demetrio*). Broschi's *Bradamante*, which Handel probably heard in Parma during one of his European trips to hire singers, served as the model for that composer's *Alcina* (1735). Since Broschi's score does not survive, it is impossible to compare the complete settings. However, two arias from *Bradamante* and works from other lost operas do survive in aria collections and as insertions in other operas.

WORKS

OPERAS

all in three acts; opere serie unless otherwise stated

La vecchia sorda (ob, S. Saddumene), Naples, Fiorentini, aut. 1725
L'isola di Alcina (A. Fanzaglia), Rome, Tordinona, 1728; as Bradamante nell'isola d'Alcina, Parma, carn. 1729, arias in *GB-Lam*, *I-Rc*
Idaspe (G.P. Candi and D. Lalli), Venice, S Giovanni Grisostomo, carn. 1730, *A-Wn*, arias in *GB-Cfm*, *I-Tn*
Ezio (P. Metastasio), Turin, Regio, carn. 1731, arias in *D-Bsb*, *I-Nc*
Arianna e Teseo (P. Pariati), Milan, Ducale, 28 Aug 1731, aria in *D-SW*
Merope (A. Zeno), Turin, Regio, carn. 1732, *A-Wgm*
Adriano in Siria (Metastasio), Milan, Ducale, carn. 1735
?Anagilda (G. Gigli), 1735, *Wgm*
Demetrio [Act 3] (Metastasio), Naples, S Carlo, 30 June 1738 [Act 1 by Leo, Act II by others], aria in *D-SW*
Miscellaneous arias in *A-Wn*, *D-ROu*, *GB-Lbl*, *I-Bc*, *Nc*, *Rsc*

OTHER WORKS

Il martirio di S Susanna Vergine (orat), Rome, Chiesa Nuova, 1727, lost
Lurilla e Tirsi (cant.), 2 S, bc, *A-Wn*

MICHAEL F. ROBINSON/ELLEN HARRIS

Brosmann (à Sancto Hieronymo), Damasus [Antonín] (*b* Fulnek, 7 Sept 1731; *d* Příbor, 16 Sept 1798). Moravian composer of Czech-German descent. He learnt the violin and the cello from the choirmaster Weissgräber of the Augustinian monastery in Fulnek, and in 1749 became a novice in the Piarist college in Lipník nad Bečvou. After completing his studies at colleges in Bílá Voda and Mikulov, he worked in various capacities in Piarist colleges. From 1755 to 1760 he taught both the lower and higher Gymnasium classes and was at the same time *subregens* in the Bílá Voda seminary.

After teaching senior Gymnasium classes in Kroměříž (1760–61), he returned to Bílá Voda as professor in philosophy, *regens* of the seminary and as choirmaster in the church (1761–6). He then became principal of the seminary and choirmaster in Kroměříž (1767–75), later holding the same posts in Příbor (1775–6, 1787–98) and Bílá Voda (1778–87). At Bílá Voda he taught the conductor and composer Gottfried Rieger (1784–6), his most important pupil, and kept up close contact with Dittersdorf, at that time working in nearby Johannisberg. Heavily burdened by monastic responsibilities, he was left little time for composition, and in his later years became ill, partly from overwork.

Brosmann was one of the most productive and popular composers in Piarist-influenced areas at the end of the 18th century. He made use of most of the expressive means then available to church music: High Baroque elements appear in his skilful polyphony, occasional use of obbligato trombones or violas in pairs and in the uninterrupted musical flow; pre-Classical elements figure in the numerous ornaments, concise melodic kernels and stereotyped bass rhythms; Classical elements are especially evident in the clearly articulated forms and carefully thought-out motivic development of his arias. Brosmann generally wrote for four concertante vocal parts, with instrumental accompaniment of two violins and organ, to which he occasionally added winds, depending on the character of the text. His melodic writing sometimes approached folk music in its simplicity, and he frequently used concertante-like ostinato figuration in the instruments as a unifying element. Dittersdorf thought highly of Brosmann's works and regarded his church music particularly as exemplary.

WORKS

MSS mainly in CZ-Bm, SK-BRnm, CZ-KRa, OP, Pnm

Sacred: at least 20 masses, 5 Vespers, 11 Litaniae Lauretanae, 24 gradualia pro dominicis, 50 offs, 20 other works

Other works: Musica pro sacro sepulchro (short orat); Zur Zeit des Türken Krieges (cant.); incid music to Thomas Morus, lost, and to a stage work for Count Salm, lost; Die Tagzeiten (J.F.W. Zachariä), lost; teaching manuals for insts, singing, conducting, composition, lost

JIŘÍ SEHNAL

Brossard, Sébastien de (*b* Dompierre, bap. 12 Sept 1655; *d* Meaux, 10 Aug 1730). French priest, theorist, composer, lexicographer and bibliophile. He was descended from a family founded by Antoine de Brossard (*b c*1286), a natural son of Charles de Valois (son of Philip the Bold) and Hélène Broschart, daughter of the king's treasurer. Sébastien was the last of a family of glass-blowers from lower Normandy. He studied at the Jesuit college in Caen and then attended that city's famous university, studying philosophy for two years and theology for three. When he turned to music, therefore, he was self-taught; he studied the lute, copying and composing pieces for the instrument. He took minor orders in 1675 and became a sub-deacon the next year, but the date when he became a priest is not known, nor is the date of his arrival in Paris. He was living there in 1678, when he published a secular piece in the *Mercure galant* under the name of Robsard des Fontaines. He was thus working methodically on his music, but still with books as his only teachers. He never found a permanent post in Paris.

In May 1687 he was appointed a vicar at Strasbourg Cathedral, and soon afterwards became *maître de chapelle* there, when the musician who had been offered the post, Mathieu Fourdaux, did not take it up. In 1689, two years after his arrival in Strasbourg, the number of cathedral musicians was cut, since the chapter had suffered financial losses as a consequence of the war of the League of Augsburg. Brossard founded an Académie de Musique, where he directed concerts of secular music and French operas and ballets. During the time he spent in Strasbourg he wrote his two books of motets and six books of airs, including serious songs and drinking songs, and acquired a large part of the music books and scores in his library. In December 1698 Brossard left Strasbourg for Meaux, where he succeeded Pierre Tabart as *maître de chapelle* of the cathedral; he was made a canon in 1709. On 1 August 1715 he resigned as *maître de chapelle* in favour of a former pupil, Jean Cavignon, but he continued living in Meaux, where he was often consulted on theoretical questions. He died there and was buried in the cathedral.

In 1724 Brossard, then entering his 70th year, feared that his large and valuable library of music would be dispersed on his death; he therefore offered it to the Bibliothèque Royale, asking for a 'gratification' in return. His offer was accepted, and the king's librarian asked Brossard for the catalogue as well as the collection itself. The collection is now in the Bibliothèque Nationale, together with the catalogue, which is more than simply a list of the books and scores in the canon's library; most of the entries have additional commentary, often providing information unavailable elsewhere.

At first Brossard was known only for his *Dictionaire*, the first work of its kind published in France, and then for his *Catalogue*. During his lifetime he acquired fame as a theorist and was often consulted on theoretical questions. With few exceptions, his music was never played, and only in the late 20th century did it begin to be performed. While he drew inspiration from contemporary French composers such as Lully, Lalande and Charpentier, Brossard borrowed certain technical and expressive formulae from Italian music, which he greatly liked, and sometimes also employed the contrapuntal musical language of German-speaking countries, thus providing an example in his own way of the blending of styles, the *goûts réunis*, dear to his contemporary François Couperin (ii).

YOLANDE DE BROSSARD

Brost, Raymond. *See* HENDERSON, RAY.

Bros y Bertomeu, Juan (Joaquín Pedro Domingo) (*b* Tortosa, Tarragona, bap. 12 May 1776; *d* Oviedo, 12 March 1852). Spanish composer. He received his earliest musical training as a chorister in the cathedral at Tortosa. He then studied with Francisco Queralt in Barcelona, where he became assistant *maestro de capilla* of the church of S María del Mar and organist of the chapel of S Severo. In 1806 he was appointed *maestro de capilla* at León Cathedral; he turned down offers for positions in Málaga (1807) and Oviedo (1815) and remained there until 1823, when he was arrested and tried for his political ideas. After his subsequent acquittal, he moved to Oviedo, married and, in 1834, became *maestro de capilla* of the cathedral there, a position he retained until his death.

Though forgotten today, Bros y Bertomeu was one of the last great masters of Spanish church music in the first half of the 19th century, along with Ramón Cuéllar y Altarriba, M.J. Doyagüe and others, and he enjoyed considerable fame and admiration from his contemporaries. His music, which achieved wide circulation in Spain and beyond, was noted for its expressive and well-schooled fugal writing. His works are preserved in several cathedral archives, including those at Avila, Huesca, León, Mondoñedo, Oviedo and Segovia.

WORKS

all sacred

Benedictus, 4vv, 2 vn, fl, ob, tpt, bc, *E-E*, ed. in Lira sacro-hispana, 1st ser., ii (Madrid, 1869)

GUY BOURLIGUEUX

Brotons (Soler), Salvador (*b* Barcelona, 17 July 1959). Spanish composer, flautist and conductor. He studied at the Barcelona Conservatory (1967–85) and then won a Fulbright Scholarship (1985) to study in the United States, where he gained a doctorate at the University of Florida (1987). He was an associate professor at Portland State University (1987–97).

His musical language, free from aesthetic prejudices and avant-garde influence, is characterized by expressive accessibility and idiomatic naturalness, both instrumental and vocal, and this is partly due to the fact that he is both a performer and a composer. In view of this it is understandable that he should have been attracted early on by a figure such as Shostakovich, to whom he dedicated one of his first piano pieces; his North American experience in the 1980s and 90s has been equally influential. The extrovert character of his music, its fidelity to tonality in the broadest sense of the word, a vigorous rhythmic and melodic impulse, and a constant determination to communicate are combined with a strong feeling for formal balance. These qualities are evident in the sonatas for various solo instruments, chamber works such as the Mixed Sextet (1992), his works for mixed choir, the three symphonies and the symphonic movement *Obstinació* (1991).

In addition to being a prolific composer, he has had a distinguished career as a flautist and conductor. He played the flute in the Orchestra of the Teatro del Liceo, Barcelona (1977–85), was appointed music director and conductor of the Vancouver SO in 1991, and of the Vallès SO in 1997.

WORKS
(*selective list*)

Op: Reverend Everyman (2, G. Corsery), 1989

Orch: 4 Pieces for Str, 1977; Sym. no.1, 1981; Rebirth, band, 1983; Sym. no.2 'Resplendor', 1984; Ataraxia, 1984; Sinfonietta da camera, chbr orch, 1985; Absences, 1986; Fusion, chbr orch, 1987; Wondering, 1987; Sonata da conc., tpt, band, 1990; Phaedo, sym. movt no.5, 1991; Virtus, sym. movt no.6, 1991; Divertimento alla Mozart, 1991; Obstinació, sym. movt no.7, 1991; Terres llemosines, rapsòdia catalana, 1992; Sym. no.3, 1992; Liliana (children's tale) nar, orch, 1993; The Chinese Zodiac Suite, ww orch, pf, perc, 1994; Trbn Conc., 1995; Fl Conc., 1996

BENET CASABLANCAS I DOMINGO

Brott, Alexander (*b* Montreal, 14 March 1915). Canadian composer, conductor and violinist. He studied at the McGill Conservatorium (1929–34) with Maurice Onderet (violin) and Douglas Clarke (composition), obtaining the Licentiate degree in 1932 and the Lauréat of the Académie de Musique du Québec in 1933. From 1934 to 1939 he studied at the Juilliard School with Sasha Jacobsen (violin), Bernard Wagenaar (composition) and Albert Stoessel (conducting). He won the Coolidge award for orchestral composition in 1937 (*Two Symphonic Movements*) and again in 1938 (*Oracle*). Owing to the war he had to forfeit a 1939 Strathcona Award for three years of composition study in England to return to Montreal, where he resumed playing in the Montreal SO, gave solo violin recitals, began teaching at McGill University and founded the McGill String Quartet. That year he also made his conducting début with the Montreal SO in a performance of his symphonic poem *Oracle*. With the composition of *War and Peace* (1944) he won a fourth Composers, Authors and Publishers Association of Canada orchestral award in 1945; the same year he founded the McGill Chamber Orchestra. From 1945 to 1958 he was the leader of the Montreal SO and, during the period 1948–61, also its assistant conductor. He went on to conduct in many parts of the world, winning the Pan-American Conducting Prize in 1957. From 1965 to 1981 he was the music director of the Kingston SO. Throughout these years he maintained his post at McGill University, becoming chair of the instrumental department in 1955 and a full professor in 1965. In 1974 he gained the additional title of composer-in-residence. Upon his retirement in 1985 he founded the youth orchestra Les Jeunes Virtuoses de Montréal. Other awards and achievements include two Olympic medals for composition (1948, 1952), three honorary doctorates (Chicago 1960, Queen's 1973, McGill 1980), the Bax Commonwealth Medal (1961) and the Prix du Disque (1969). He is a member of the Order of Canada (1979) and the Order of Saint John of Jerusalem 'Knight of Malta' (1985), is a FRS (1985) and a Chevalier de l'Ordre National du Québec (1987).

Brott's orchestral compositions exhibit a particular sensitivity to timbre. Most of his works adopt neo-classical forms allied with soaring melodies that are often treated contrapuntally. Some of his later works tend towards wit and satire and involve the reworking of well-known music by earlier composers. The Canadian national anthem *O Canada* is used in *Mutual Salvation Orgy* (1961) and *Centennial Colloquy* (1965), while *Profundum praedictum* (1964) contains fragments of *God Save the Queen* and *Yankee Doodle*. *Paraphrase in Polyphony* (1967) has as its theme the ten-bar canon 'Freu dich des Lebens' written by Beethoven in 1825 for the Quebec-based music teacher T.F. Molt. Canadian folksong and folklore play important roles in a number of other works. *From Sea to Sea* (1947) includes folksong material from each main region of Canada, the ballet *La corriveau* (1966) is based on a 18th-century French-Canadian folktale and *How Thunder and Lightning Came to Be* (1972) is a retelling of an Inuit legend. Brott has also arranged indigenous songs for voice and piano (1971–3). CBC-RCI produced a recorded collection of his works (1941–73) on *Anthology of Canadian Music* 20 (1985). A CD (Analekta ANC 9801) was released *c*1994.

DORITH R. COOPER/ELAINE KEILLOR

Brott, Boris (*b* Montreal, 14 March 1944). Canadian conductor and violinist, son of ALEXANDER BROTT. He studied with his father and with Monteux, Markevich and Bernstein, and made his début as a conductor with the National SO of Mexico in 1958. He founded the Philharmonic Youth Orchestra of Montreal (1959), was assistant conductor of the Toronto SO (1963–5); in England he became principal conductor of the Northern Sinfonia in Newcastle (1964–8), toured with the Royal Ballet (1966–8) and conducted the Covent Garden première of *The Soldier's Tale* in 1966. After winning the gold medal in the Dimitri Mitropoulos International Conductors' Competition in 1968, he was assistant conductor of the New York PO (1968–9), and musical director of the Lakehead SO in Thunder Bay, Ontario (1968–72), and the Regina (Saskatchewan) SO (1971–2). In 1969 he was appointed musical director of the Hamilton (Ontario) PO, and in 1972 chief conductor of the BBC Welsh Orchestra; from 1976 to 1983 he was chief conductor of the CBC Winnipeg Orchestra while holding several regional appointments. In 1988 he founded the Boris Brott Summer Festival in Hamilton; in 1989 he became co-conductor of the McGill Chamber Orchestra in Montreal and in 1992 music director of the New West SO in California. He has appeared as a guest conductor with all the major Canadian orchestras and many leading European and American orchestras.

T. BROWN/CHARLES BARBER

B rotundum. *See* B FA.

Brouck [Prugg], **Jacob de** (*fl* 1568–83). Flemish singer and composer. He appears to have been attached to the chapels of Ferdinand I and Maximilian II. Five of his motets are included in a collection published by Gardane (RISM 1568[3], 1568[6]). In 1573 he was a singer and master of the children at the imperial court chapel in Vienna, receiving several payments in addition to his salary in 1576, 'on account of his poverty'. Christopher Plantin published a volume of his works, *Cantiones tum sacrae (quae vulgo moteta vocantur); tum profane, 5, 6 et 8 vocum* (Antwerp, 1579), dedicated to Archduke Karl II of Austria, containing 20 motets, 18 chansons and one lied. In the book he signed himself 'Belga', the only indication of his origin. In 1583 he was given 15 florins for a *Magnificat* setting; on its title-page he styled himself '*ancien* [old, or former] chapelmaster to the Archduke of Austria'. Brouck's other works include two masses and a number of motets.

LAVERN J. WAGNER

Broude, Alexander. American firm of music publishers, distributors, importers and exporters. Alexander Broude (*b* New York, 1 Jan 1909) was originally associated with his brother, Irving, in Broude Brothers, and began publishing music in the 1930s in New York. In 1954 Alexander severed the association and founded his own company, Alexander Broude, Inc. (ABI Music), which from 1962 published music for all media, including educational materials and music textbooks. 20th-century American composers in the Alexander Broude catalogue include Richard Bales, Ruth Crawford, Dahl, Etler, Frost, Daniel Kessner, Alan Schulman, Elliott Schwartz, Riegger and Peter Westergaard. European composers of all periods, including Rachmaninoff, Casals and Dallapiccola, are also published by the firm. Alexander Broude retired in 1970. In 1982 the company was bought by Michael Lefferts (president) and Dean Streit (vice-president).

W. THOMAS MARROCCO, MARK JACOBS/R

Broude Brothers. American firm of music publishers. Founded in New York in the 1930s by Irving and Alexander Broude, it publishes scholarly editions and reference books as well as performing editions of works by modern and older composers. Its projects have included new editions of the collected works of Buxtehude, Lully, Marais, Marenzio and Rameau. It publishes the series Monuments of Music and Music Literature in Facsimile, as well as historical sets such as Tudor Church Music, Masters and Monuments of the Renaissance and Music at the Court of Ferrara. Among 20th-century composers published by the firm are Babbitt, Bacon, Berger, Bloch, Duke, Herrmann, Hovhaness, Krenek, La Montaine, Lockwood, Messiaen, Nin-Culmell and Rózsa. Alexander Broude left the organization in 1954 and established his own firm. Irving Broude's widow, Anne, took over the firm after her husband's death in 1973; when she retired in 1979, her son Ronald became president. The Broude Trust for the Publication of Musicological Editions was formed in 1981 to provide financial support for the preparation of the collected editions and historical sets.

W. THOMAS MARROCCO, MARK JACOBS

Broughton, Thomas (*b* London, 5 July 1704; *d* Bristol, 21 Dec 1774). English priest, religious and historical writer and librettist. He graduated BA (1727) and MA from Gonville and Caius College, Cambridge, and had a successful church career, including posts as reader of the Temple Church, prebendary of Salisbury Cathedral and vicar of Bedminster, near Bristol, which he merited with several vindications of orthodox Christianity against contemporary free-thinking and a massive two-volume encyclopedia of comparative religion, *An Historical Dictionary of all Religions* (London, 1742). His literary work included an edition of John Dryden's miscellaneous verse, contributions to the *Biographia Britannica* (London, 1747–66) and a free adaptation of Sophocles' *Trachiniae* (with additions from Ovid's *Metamorphoses* IX) to suit contemporary taste for the libretto of Handel's *Hercules* (1745). Broughton was a lover of Handel's music, and subscribed to his *Atalanta*.

RUTH SMITH

Brouncker [Brounckerd, Brunkard], **William,** 2nd Viscount Brouncker of Castle Lyons, Ireland (*b* 1620; *d* Westminster, 5 April 1684). English mathematician and music theorist. He was the elder son of Sir William Brouncker (created 1st Viscount in 1645), Gentleman of the Privy Chamber to Charles I and vice-chamberlain to Prince Charles (the future Charles II). He was a staunch royalist and was the member for Westbury, Wiltshire, in the Convention Parliament of 1660. On the nomination of Charles II he became the first president of the Royal Society in 1662, when he was also appointed chancellor to Queen Catherine and keeper of her Great Seal.

Brouncker entered Oxford University at the age of 16, studied mathematics and received the degree of Doctor of Physick in 1647. He was proficient in languages and soon gained a reputation as a brilliant and original mathematician. At the same time he became well versed in the theory of music. In 1653 he published in London, as *Compendium musicae: with Animadversions by a Person of Honour*, a translation of Descartes' *Compendium musicae*, an early work that was written in 1618 but only published in 1650. Brouncker's *Animadversions* includes a commentary on and criticisms of the *Compendium*, including a suggestion for a new geometrical method of dividing the canon, that could be applied to the lute.

In his musical calculations Brouncker combined the methods of the Greeks (Euclid's canon and mean proportionals) with the use of logarithms, which he was among the first to apply to music. Unlike most theorists, who searched for a satisfactory division of the octave, he chose the interval of an 11th (consisting of an octave and a 4th) and divided it according to the geometrical progression (his detailed instructions appear on pp.84–5 of his version of the *Compendium*). By taking $2 : (3 - \sqrt{5})$ as the overall ratio of his interval of 17 semitones, Brouncker based his system on a ratio taken from the Golden Section. He was well aware of the theoretical shortcomings of his system (it produced semitones of only 98 cents) but thought that they did not matter much 'since the *Sense* of *Hearing* is not so perfect, as to confine the *Consonances* to so precise a *Measure*'. He believed that his new theory had a much wider application, promised to show with its help 'how Astrologers may deduce their Aspects' and intended to present it in 'an entire and particular Tract', but he did not in fact do so. Essentially a theoretical ideal, his system could notionally have worked in monodic music but was useless in a polyphonic context.

Brouncker's volume was read by contemporaries (including Newton) and even in the 18th century his reputation as a music theorist remained high. His interest in the science of music was reflected in the Royal Society meetings under his presidency. At a meeting on 12 November 1662 'Mr. Berchenshaw's paper on music was presented by Dr. Charlton and Lord Viscount Brouncker was desired to examine it'; he gave his thoughts on it a week later. A manuscript in the hand of Silas Taylor (*GB-Lbl* Add.4910) contains Birchensha's '6 Rules of Composition' with 'Enlargements there onto' by Brouncker. Following a Royal Society meeting on 10 August 1664 Pepys and Taylor went to the Post Office 'to hear some instrument musique of Mr. Berchenshaw's before my Lord Brounckerd and Sir Robert Murray [Moray]'. There are many other references in Pepys to Brouncker's interest in music theory as well as its practice.

Brouno, Guillermo [Guillelmo]. *See* BROWN, WILLIAM.

Brouwenstijn, Gré [Gerda Demphina] (*b* Den Helder, 26 Aug 1915; *d* Amsterdam, 14 Dec 1999). Dutch soprano. She studied in Amsterdam and made her début there in 1940 as one of the Ladies in *Die Zauberflöte*. In 1946 she joined the newly formed Netherlands Opera, where her first successes were as Tosca and Santuzza. She made her Covent Garden début in 1951 as Aida and sang there regularly until 1964, appearing as an eloquent Elisabeth de Valois in Visconti's noted production of *Don Carlos* (1958), as Desdemona and as Leonore (with Klemperer). She appeared at Bayreuth (1954–6) as Elsa, Elisabeth, Sieglinde, Gutrune and Eva; she also sang in Vienna and Stuttgart, where she took the leading role in Wieland Wagner's controversial production of *Fidelio* (1956). She sang Jenůfa at Chicago (1959) and Amelia in *Un ballo in maschera* at San Francisco (1961). She appeared at Glyndebourne as an affecting Leonore (1959, 1961, 1963) and made her farewell in that role with Netherlands Opera in 1971. Her beautiful voice was enhanced by musical intelligence and natural dignity on stage.

HAROLD ROSENTHAL/ALAN BLYTH

Brouwer (Mezquida), Leo (*b* Havana, 1 March 1939). Cuban composer, guitarist and conductor. In 1953 he began his studies in the guitar with Isaac Nicola, founder of the Cuban guitar school, and in 1955 he made his performance début. In the same year, and self-taught, he started to compose (e.g. *Música para guitarra, cuerdas y percusión* and Suite no.1 for guitar); his first works were published in 1956. He was awarded a grant (1959) for advanced guitar studies at the music department of the University of Hartford and for composition at the Juilliard School of Music in New York, where he was taught by Isadora Freed, J. Diemente, Joseph Iadone, Persichetti and Wolpe. In 1960 he started working in cinema, as head of the department of music in the Instituto Cubano del Arte e Industria Cinematográficos (ICAIC); he has written scores for more than 60 films. He was involved in setting up (1969) and running the Grupo de Experimentación Sonora at ICAIC, becoming the teacher and mentor of its members, who included Silvio Rodríguez, Milanés and other important figures of contemporary Cuban music. He worked as musical adviser for Radio Habana Cuba (1960–68) and for other Cuban institutions, and taught counterpoint, harmony and composition at the Conservatorio Municipal in Havana (1960–67). His book *Síntesis de la armonía contemporánea* was a core text in his classes.

Together with the composers Juan Blanco and Carlos Fariñas and the conductor Manuel Duchesne Cuzán, Brouwer launched the avant-garde music movement in Cuba in the 1960s. He has been the most significant promoter of the bi-annual Havana Concurso y Festival de Guitarra, and in 1981 he was appointed principal conductor of the Cuban National SO. He has also conducted many other foreign orchestras including the Berlin PO and the Orquesta de Córdoba, Spain, which, under his direction, was formed in 1992. He is a member of the Berlin Akademie der Künste, of UNESCO, of the Real Academia de Bellas Artes Nuestra Señora de la Angustias in Granada (1996) and Honoris Causa Professor of Art at the Instituto Superior de Arte de Cuba (1996). For his contribution to the Cuban and international music scenes he was awarded the Orden Félix Varela, the highest honour granted by the Cuban state for culture.

Three phases can be identified in Brouwer's work: the first, nationalistic (1955–62); the second, avant-garde (1962–7); and a third in which avant garde elements diminish and, particularly after 1980, a creative process described by the composer as 'new simplicity' emerges. The first phase is characterized by the use of traditional musical forms, including sonata and variation form, and by tonal harmonic structures rooted in nationalism (e.g. in *Homenaje a Manuel de Falla* (1957), *Tres danzas concertantes* (1958) and, *Elegía a Jesús Menéndes* (1960), among others). During this phase, despite the prevailing use of tonality, a tendency to structural fragmentation may be discerned, as well as the employment of several simultaneous tonal centres, a device that has remained throughout his output.

Though never lacking formal rigour, Brouwer's works have in general sprung more from a sonic conception: 'I use any form to help me find musical forms: that of a leaf, of a tree or geometric symbolisms. All these are also musical forms; despite the fact that my works appear very structured, what interests me is sound'. This concentration on the sensory, and an accompanying use of extra-musical formal sources, is most to the fore in Brouwer's second phase, which was, with the Cuban avant garde in general, heavily influenced by the Polish school; he first heard this music at the Warsaw Autumn in 1961. *Variantes* for solo percussion and in particular *Sonograma I* for prepared piano typify this phase, which also included a brief turn towards serialism, in works such as *Sonograma II* and *Arioso (Homenaje a Charles Mingus)*. Basic materials frequently comprise intervals of the 2nd, 4th and 7th and chords of superimposed 6ths, 9ths, 11ths and 13ths. Complex polyphonic textures dominate, with thematic independence retained within the different planes of sound, and a resultant richness in rhythmic conjunction. Other common devices include pedals, ostinatos, sequences and melodic and rhythmic echoing. One of Brouwer's most important avant-garde works, which has become a major piece of the guitar literature, is the solo *Elogio de la danza* (1964). In two movements – Lento and Ostenato – it was originally composed for dance with choreography by Luis Trápaga; it makes reference to primitive dances and to mysticism, and conveys an image of stamping feet and gyrations together with other dance elements.

Between 1967 and 1969 such works as *Rem tene verba sequentur*, *Cántigas del tiempo nuevo* and *La tradición se rompe . . ., pero cuesta trabajo* approach what would now be the postmodern, characterized by sharply defined contrasts in structure and texture and employing references to various historical periods. In *La tradición se rompe . . ., pero cuesta trabajo*, for example, the interpolation and superimposition of elements of such composers as Bach and Beethoven in a suggestive heterophony borders on caricature; further, the participation of the audience is invited with a persistent 'sh'. All this is integrated into a process of thematic and instrumental development that evolves through a powerful, controlled aleatorism.

In the 1970s Brouwer continued to work on post-serial and aleatory ideas, for instance in *La espiral eterna* for guitar. But by the 1980s a 'new simplicity' had begun to take hold, involving neo-Romantic, minimalist and newly tonal elements. There is a marked lyricism in this third period, the use of varying nuclear cells to generate development, and the return of traditional forms exemplified in works like *Canciones remotas*, *Manuscrito antiguo encontrado en una botella* and *La región más trasparente*.

VICTORIA ELI RODRÍGUEZ

Brown, Alice. *See* MOYLE, ALICE.

Brown, Chris(topher Owen) (*b* Mendota, IL, 9 Sept 1953). American composer. He studied at the University of California, Santa Cruz (BA 1974) with William Brooks, Gordon Mumma and others, and at Mills College (MFA 1985) where his teachers included David Rosenboom. He has taught at the San Francisco Art Institute (1985–92) and Mills College (from 1991), where he has served as co-director of the Center for Contemporary Music. During the 1980s he was active as an instrument builder, most notably of the 'gazamba', a prepared electric piano. His compositions explore the interaction of acoustic instruments and live electronics. Often improvisatory, they reflect his skills as a pianist. He has collaborated with the Rova Saxophone Quartet, Glenn Spearman and others, and is a member of the computer network band The Hub. *Talking Drum* (1995) received honourable mention at the Prix Ars Electronica, Linz, in 1996.

CARTER SCHOLZ

Brown, Christopher (Roland) (*b* Tunbridge Wells, 17 June 1943). English composer. His musical training was as a chorister at Westminster Abbey and a choral scholar at King's College, Cambridge (1962–5). He subsequently studied with Lennox Berkeley at the RAM and with Blacher at the Hochschule für Musik in Berlin. In 1969 he began to teach at the RAM. Brown's choral training and early career as a singer have left a lasting influence on his work as a composer. A substantial output, which includes works for chorus and orchestra, unaccompanied mixed-voice choir and solo voice, as well as church music, demonstrates a sensitivity to text and a concern for craftmanship, characteristic both of his teachers and other respected senior contemporaries, such as Britten and Tippett.

Brown's alertness to dramatic structure can be heard in early works such as the choral cycle *Elegy* (1967) and is typical of all his most successful pieces, including the atmospheric *Seascape* for speaker, soloists, chorus and brass quintet (1984). Brown's output also includes a significant volume of orchestral, instrumental and educational music. He has been awarded the Prince Pierre of Monaco Prize, the Guinness Prize on two occasions and the Washington International Competition Prize.

MATTHEW GREENALL

Brown, Clifford [Brownie] (*b* Wilmington, DE, 30 Oct 1930; *d* Pennsylvania, 26 June 1956). American jazz trumpeter. He began to study the trumpet at the age of 13 and soon developed an extraordinary technical facility. While studying mathematics at Delaware State College and music at Maryland State College, he attracted attention through his exceptional performances with the college jazz bands and his brief appearances in Philadelphia with such leading jazz musicians as Fats Navarro, Dizzy Gillespie and Charlie Parker, all of whom praised and encouraged him. Navarro's style was particularly important as a model for Brown, and the two men formed a close friendship.

Brown spent a year in hospital after an automobile accident in June 1950, but thereafter resumed his career in Philadelphia, and in March 1952 made his first recordings, with Chris Powell's Blue Flames. He joined Tadd Dameron's band for a recording session and for appearances during the summer of 1953 in Atlantic City, New Jersey. In September of that year Brown toured Europe with Lionel Hampton's big band and recorded with American and European jazz musicians. On his return to the USA, he played with Art Blakey. In 1954, with Max Roach, he formed the Brown-Roach Quintet, with which he was associated until he was killed two years later in an automobile accident. The quintet had a major influence on the establishment of the African American style later known as hard bop.

Brown was one of the outstanding jazz trumpeters of the 1950s, and his reputation as an extraordinary improviser endures. His playing reflected a synthesis of certain stylistic aspects of Gillespie, Miles Davis and Navarro; it was characterized by a rich, broad tone and a percussive attack, unusually long yet carefully shaped phrases, exceptional virtuosity and a seemingly unending flow of logically developed musical ideas. The impeccable technique he displayed in solos at fast tempos, which were projected with equal fluidity from the highest to the lowest register of his instrument, was complemented by the haunting, introspective lyricism that distinguished his performances of ballads. His most mature work was with the Brown-Roach Quintet, as reflected in the albums *Study in Brown* (1955, EmA) and *At Basin Street* (1956, EmA). Brown's style exerted a pervasive influence on jazz improvisation in the 1960s and 1970s, and represented an alternative approach to the subdued manner of Davis. This influence may be seen most directly in the work of Lee Morgan and Freddie Hubbard.

OLLY WILSON

Brown, David (Clifford) (*b* Gravesend, 8 July 1929). English musicologist. He studied English, Latin and music at the University of Sheffield (BA 1950, BMus 1951). During National Service (1952–4) he studied Russian and was subsequently commissioned in the RAF. He worked as a schoolteacher (1954–9) before becoming music librarian in the University of London Library at Senate House (1959–62). In 1962 he was appointed lecturer at Southampton University, becoming senior lecturer (1970), reader (1975), and professor of musicology (1983–9); in 1971 the university awarded him the doctorate for his book on Weelkes. In 1980 he joined the editorial committee of Musica Britannica. His special interests are Russian music and English Renaissance music, particularly the English madrigal. His book on Glinka was the first major study of the composer to appear in English, and contains translations of much valuable information derived from Glinka's own memoirs and the reminiscences of contemporaries. His four-volume study of Tchaikovsky is his major achievement. An authoritative biography and the most comprehensive to date, it includes analyses of all the major works. The final volume includes a chapter on the essential Russianness of Tchaikovsky's music and also presents a lucid and balanced account of Tchaikovsky's last days, concluding in favour of the suicide theory. *Tchaikovsky Remembered* is an edition of important documentary sources, including all those relating to the composer's death. Brown has also appeared frequently as a broadcaster.

PETER LE HURAY/ROSEMARY WILLIAMSON

Brown, Earle (Appleton) (*b* Lunenburg, MA, 26 Dec 1926). American composer. A leading representative of the New York School established in the early 1950s in association with Cage, Feldman, Tudor and Christian Wolff, he pioneered such concepts as graphic notation, time-notation and open form.

1. Life. Brown's early musical background was in jazz. Intent on an aeronautical career, he studied engineering and mathematics at Northeastern University (1944–5) before joining the Army Air Corps. Subsequently, he attended the Schillinger School of Music, Boston (1946–50), and studied the trumpet and composition privately. His encounter with the work of Jackson Pollock and Alexander Calder was particularly influential to his developing musical aesthetic. After moving to Denver (1950–52), he painted, taught the Schillinger method and explored various compositional techniques. At Cage's invitation, he travelled to New York to work on the Project for Music for Magnetic Tape, the results of which included *Octet I* (1952–3). This studio experience proved valuable in his later roles as an editor and recording engineer for Capitol Records (1955–60) and as the director of artists and repertoire, and producer for Mainstream-Time Records' 'Contemporary Sound' series (1960–73).

Through Cage and Tudor, Brown was brought to the attention of the European avant garde. Boulez was helpful in establishing contacts with publishers, performers and orchestras; later a strong relationship developed with

Score in graphic notation of Earle Brown's 'December 1952'

Maderna. Beginning in 1956, Brown visited Europe on numerous occasions: he lectured at Darmstadt (notably in 1964–5) and received several commissions, including those for *Penthatis* (Domaine Musical, 1957–8), *Available Forms I* (City of Darmstadt, 1961) and *Available Forms II* (Rome Radio Orchestra, 1962). His notational and structural innovations were widely copied; as Feldman noted: 'I think he's been ripped off more than any of us, in an overt way' (1989). Later European distinctions included appointments as composer-in-residence with the Künstler Programm, West Berlin (1970–71), and the Rotterdam PO (1974), visiting professor at the Basle Conservatory (1974–5) and guest conductor with the Cologne RSO (1963–5) and Saarbrücken RSO (1981).

Brown also received recognition in America. He held the W. Alton Jones chair of composition and was composer-in-residence at the Peabody Conservatory, Baltimore (1968–73), where he was awarded an honorary DMus in 1970. His visiting or guest appointments included positions at SUNY, Buffalo (1975), the California Institute of the Arts (1973–83), Yale University (1980–81) and the Aspen and Tanglewood music festivals (each on several occasions). In addition, he served as director of the Fromm Music Foundation at Harvard University and programming director of the Fromm Weeks of New Music at Aspen, Colorado (1985–90). Among his numerous honours are a Guggenheim Fellowship (1965–6), an award from the National Institute of Arts and Letters (1972), a commission from the Koussevitzky Foundation (*Cross Sections and Color Fields*, 1972–5), the Brandeis University Creative Arts Award (1977), a Letter of Distinction from the AMC (1996) and the Foundation for Contemporary Performance Art's John Cage Award for Music (1998).

2. Works. Many commentators have inaccurately categorized Brown's work as chance music. With the arguable exception of a small number of graphically notated pieces from the 1950s (most famously *December 1952* from *Folio [I]*; see illustration), however, Brown's structures have consistently emphasized choice rather than chance. While the majority of his compositions are aleatory to some degree, they are also consistent in evincing a distinctly un-Cagean level of subjective involvement. Most of his scores allow for what he has termed 'creative ambiguity', which enables the performers to engage in the creative process, but within parameters (and using material) clearly defined by the composer. His time-notation, first employed in the 1950s (as in *Music for Cello and Piano*, 1954–5), specifies pitch and dynamics precisely but leaves durations relatively undefined, suggested through timings and visual note lengths in the score. Other contemporaneous pieces, including *Twenty-Five Pages* (1953) allow for additional flexibilities; as Brown has explained, 'each page may be performed either side up [and] events within each two-line system may be read as either treble or bass clef'.

Brown's open forms, influenced by Calder's mobiles, are typified by *Available Forms I* (1961). In this work, each of the score's six unbound pages specifies four or five events. The conductor, who has general control over dynamics and velocity, begins with any event on any page and, in almost a painterly fashion, creates from the available materials an individually shaped version of the work. Further permutations of basic principles occur in Brown's largest compositions, such as *Available Forms II* (1962) and *Event: Synergy II* (1967–8), in which two conductors collaborate to create the sonic mix. *Calder Piece* (1963–6) uniquely employs a constantly changing mobile (especially made by Calder) as both a performance object and a structural point of reference.

Brown's later music has tended towards other kinds of 'creative ambiguity'. In *Centering* (1973), *Windsor Jambs* (1980) and *Tracking Pierrot* (1992), the overall shape of each work is fixed, while elements within each structure

remain open. *Centering*, for example, contains three open-form areas, two of which are accompanied cadenzas. In the fully notated *Summer Suite '95*, on the other hand, Brown employed computer technology to transcribe his own performances of graphed sketches, realizing an early desire to 'get the time of composing closer to the time of performing'. Described as 'the *jazziest* of my piano pieces', the work shows Brown both returning to his musical roots and opening up new directions for his music.

WORKS
published unless otherwise stated

DAVID NICHOLLS

Brown, Howard Mayer (*b* Los Angeles, 13 April 1930; *d* Venice, 20 Feb 1993). American musicologist and editor. He took the BA at Harvard College in 1951, then studied singing and conducting privately in Vienna. He returned to Harvard in 1953 for graduate studies with Piston, Gombosi, Merritt and John Ward and received the MA in 1954 and the PhD in 1959, with a dissertation under Ward on music in the French secular theatre of the Renaissance. While at Harvard he studied the flute privately with Georges Laurent of the Boston Symphony Orchestra, and as a graduate student he conducted and performed both early and 20th-century music extensively in Boston and Cambridge. He first taught at Wellesley College, where he was instructor from 1958 to 1960. In 1960 he was appointed assistant professor at the University of Chicago, where he later became associate professor (1963), professor (1967) and chairman of the music department (1970). At Chicago he conducted and played several instruments (including recorder, transverse flute, shawm and the entire viol family) in the university's Collegium Musicum; he also recorded the first volume of the *Historical Anthology of Music* (ed. A.T. Davison and W. Apel, 1954) on ten LP records in which about half of the performances are by the Chicago collegium. In 1972 he replaced Thurston Dart as the King Edward Professor of Music, King's College, University of London; he returned to Chicago in 1974 and succeeded Lowinsky as Ferdinand Schevill Distinguished Service Professor in 1976. He was eagerly sought after as a visiting professor around the world and his appointments included visiting professor at SUNY, Buffalo (1967), Alexander D. White Professor-at-Large, Cornell University (1972–8), visiting professor at New York University (1982), Kennedy Professor in the Renaissance at Smith College (1983), Una Lecturer at the University of California at Berkeley (1986) and visiting professor at the universities of Heidelberg, Mainz, Zürich (1987) and Basle (1992). His particular interest in Renaissance music led him to take special responsibility for providing facsimiles and critical editions: he was editor of Renaissance Music in Facsimile (30 vols., 1977–82, with F. D'Accone and J.A. Owens), a member of the editorial board of the new Josquin des Prez collected edition and general editor of Recent Researches in Renaissance Music (1977–82, with J. Haar) and Monuments of Renaissance Music (1977–93). He was a member of the executive committee for the sixth edition of the *New Grove Dictionary of Music and Musicians*, to which he contributed a number of articles.

Brown's accomplishments, about which he was astonishingly modest, were widely recognized by others. His

professional appointments included president of the AMS (1978–80), vice-president of the IMS (1982–7) and president of the Renaissance Society of America (1990–91). He was named Citoyen d'Honneur by the City of Tours in 1980 (where he was closely associated with the Centre d'Etudes Supérieures de la Renaissance); his edition *A Florentine Chansonnier* (1983) won the AMS Otto Kinkeldey Award for the best musicological book of the year; and he was awarded the Galileo Galilei Prize by the University of Pisa in 1987 for his preparation of two series of facsimile editions of Baroque operas (1977–84) and his edition of Peri's *Euridice* (1980).

Brown's research, centred on the Renaissance but extending into the Middle Ages and to the Baroque era and beyond, combined a magisterial control of the sources with innate musicianship and a broad humanistic frame. His dissertation, first books and music editions (1963, 1965) demonstrated his extraordinary grasp of two large repertories: the 15th- and early 16th-century chanson and 16th-century instrumental music. This early corpus set the foundation and standard for all succeeding work in the field. His avid interest in creating an accurate historical record for music can be seen throughout his career in publications of monumental editions and bibliographic resources. His ground-breaking handbook, *Musical Iconography* (with J. Lascelle, 1972), provided access to the huge reservoir of information concerning music to be found in the visual arts of the West and led to a series of detailed and imaginative articles on the playing of 14th-century fiddles, shawms, harps and gittern. In his multi-volume facsimile editions of Italian Baroque opera (97 vols., 1977–84; 1980–82 with E. Weimer), he made a whole repertory accessible for further research; moreover, in these publications he was at the forefront of emphasizing the importance of the libretto to the study of opera.

Brown's musicianship was commensurate with his research and editorial skills, and he gently chastised both those who, in condemning fact-based scholarship, failed to recognize that certain research is not only worth doing but is also necessary, and those who believed, as he put it with his natural and sometimes cutting wit, that music should be seen and not heard. His voluminous publications on performance practice (see R. Jackson, 1993) attest to his abiding interest in the intersection of performance and scholarship. His command of the historical record and his engagement in music-making allowed him to reach beyond the surviving sources to imagine music sounding in context. He urged scholars who are reluctant to interpret ('as opposed merely to chronicle') to do more (*Renaissance Quarterly*, 1987) and provided examples in his own publications. In *Sixteenth-Century Instrumentation* (1973) and his edition of *Euridice*, he drew on his knowledge of music theory, musical iconography and performing experience to argue persuasively that the performance of these works included improvised instrumental lines, thus transforming the traditional sound-picture of these works. In 'Pedantry or Liberation?' (1986–7), he argued that an 'authentic' musical performance should be understood as one which is 'expertly played and sung, genuinely committed and artistically convincing' rather than one which adheres to some pedantic list of allegedly authentic qualities. From the beginning of his work as a scholar he demanded that music be understood in its social and intellectual context. In his examination of Boccaccio's *Decameron* and other literary works of the Trecento (1977), Brown followed two avenues of inquiry: how did music sound in the 14th century; and what place did it have in society. He insisted that such questions needed to be asked as urgently as those about style, genre and compositional technique, particularly since the latter seemed to preoccupy musicologists.

Brown cared deeply about the field of musicology and its future, and he was a model teacher and mentor, giving generously of time, advice and materials to all who asked. He had a tremendous impact on untold numbers of students and reached out even to those he did not know, giving his large library of modern English-language books and journals to Bologna University. The AMS appropriately chose to honour Brown by establishing an endowment fund to offer graduate fellowships in musicology to minority students. At his death, he left his personal papers, his vast archive of microfilm sources, books and music to the Newberry Library in Chicago.

ELLEN T. HARRIS

Brown, Iona (*b* Salisbury, 7 Jan 1941). English violinist and conductor. She showed early talent for the violin and played in the National Youth Orchestra from 1955 to 1960. Her teachers included Hugh Maguire in London, Remy Principe in Rome and Henryk Szeryng in Paris and Nice. She played in the Philharmonia Orchestra from 1963 to 1966, and began to pursue a solo career at this time. She had joined the Academy of St Martin-in-the-Fields in 1964 and served as musical director from 1974 to 1980. She became musical director of the Norwegian Chamber Orchestra in Oslo in 1980, and has conducted the orchestra in numerous acclaimed performances and recordings. From 1985 to 1988 she was guest director of the CBSO. She was appointed music adviser to the Los Angeles Chamber Orchestra in 1986 and the following year became the orchestra's musical director, a post she held until 1992. Her playing is always musical and stylistically aware, and her technique impeccable. Brown's many notable solo recordings with the Academy of St Martin-in-the-Fields and the Norwegian Chamber Orchestra include Vaughan Williams's *The Lark Ascending*, concertos by Vivaldi and Telemann, and Mozart's 'Haffner' Serenade and Sinfonia concertante. As a conductor she has recorded works including Poulenc's Organ Concerto and Schoenberg's *Verklärte Nacht*. She was created an MBE in 1986.

MARGARET CAMPBELL

Brown, James (*b* Barnwell, SC, 3 May 1928). American soul and funk singer, composer, arranger and bandleader. Born into extreme poverty in the rural South, he began his career as a professional musician in the early 1950s with the gospel-based group, the Flames. By 1956 the group had recorded the rhythm and blues hit *Please, Please, Please* (Federal, 1956) and changed their name to James Brown and the Famous Flames. This early recording established what was to become a stylistic trademark: insistent repetition of a single phrase (in this case, the song's title) resulting in a kind of ecstatic trance. This approach and Brown's characteristic raspy vocal timbre and impassioned melismas display his debt to the black American gospel tradition. His stage shows, dancing and inspired call-and-response interactions with the audience also convey the fervour of a sanctified preacher.

The first decade of Brown's recording career saw him alternating energetic dance numbers such as *Think* and *Night Train* with searing ballads such as *Try me*, *I don't mind* and *Lost Someone*. He achieved his first pop hit in 1963 with an orchestrated remake of the melodramatic 1940s ballad *Prisoner of Love*. The biggest commercial breakthrough during this period, however, came with *Live at the Apollo* (King, 1963) which sold over one million copies, and remained in the LP charts for over a year, unprecedented achievements for a rhythm and blues album. *Live at the Apollo* featured performances of Brown's earlier hits, most notably the driving and polyrhythmic *Think* and the incantatory *Lost Someone*, and illustrated his rapport with the Apollo audience.

The innovations of the live *Think* prefigured Brown's next stylistic turn. During a contract dispute with King Records in 1964, Brown recorded and released *Out of Sight* on Smash Records. The recording was nearly as successful as *Prisoner of Love*; however, its importance lay in the heightened use of riffs and vamps, and in the polyrhythms, actual and implied, created by the band, not only the percussion. Re-signing a contract with King that gave him increased artistic autonomy, Brown released *Papa's got a brand new bag* and *I got you (I feel good)* in 1965. These songs were both commercial successes, and they further extended the textural innovations of *Out of Sight*. Brown's performances on these recordings relied almost exclusively on short riffs derived from blues and gospel phrasing, while increasing his use of paralinguistic grunts, growls and moans. All three of these innovative songs are based on blues harmonic form and phrase structure, and the lyrics were often as important for their sound as for their meaning.

By 1967 even the cursory nods towards previous song forms in Brown's music began to disappear with recordings such as *Cold Sweat*. Verse-chorus structures were replaced by sections of irregular length, defined by densely overlapping vamps played by each member of the band. Brown's lyrics grew increasingly impressionistic, celebrating black vernacular speech (often creating slang in the process) and emphasizing racial pride and self-determination in songs such as *Say it loud – I'm black and I'm proud* (1968). Brown's new style began influencing other artists at this time, such as Sly and the Family Stone, the Motown-based Temptations and Miles Davis, and came gradually to be known as funk.

From the late 1960s until the mid-1970s Brown continued to refine his funk style with great success. During this period he was influenced by a new band that he hired early in 1970, consisting of younger players, which came to be known as the JBs. However, his popularity with the top 40 audience began to wane. Despite this, the influence of funk was felt in a new wave of successful bands including Kool and the Gang, the Ohio Players and the Average White Band, while the popularity of older groups such as Parliament/Funkadelic soared. By the end of the 1970s, however, funk had largely been eclipsed by disco. Brown attempted to capitalize on disco's popularity and promote his concept of stylistic lineage, with the self-referential *The Original Disco Man* (1979), but audiences were unconvinced and the song failed. Although a role in the film *The Blues Brothers* (1980) kept Brown before the public, the late 1970s and early 80s saw no new stylistic innovations and his recordings met with little success.

Brown's fortunes shifted in the 1980s when he was acknowledged by a number of rap artists as the originator of the rhythmic foundations of their music; in 1984 he recorded *Unity* (Tommy Boy, 1984) with Afrika Bambaata. His comeback continued with the surprisingly patriotic theme song from the film *Rocky IV*, *Livin' in America* (1986), and more hits followed in 1987 and 1988. Despite the murkiness and sensationalist aspects surrounding his arrest and imprisonment in 1989, in the 1990s many re-issues and a rejuvenated performing career have heightened public awareness of Brown's enormous musical and cultural significance.

Brown stands out as one of the most influential and successful musicians in the history of rhythm and blues. His innovations as a singer, performer, composer, arranger and bandleader virtually defined the genre of funk and have contributed greatly to the development of hip hop and other contemporary dance styles. In the 1980s and 90s refinements in sampling technology have enabled many rap and dance music artists to use the actual drum patterns from Brown's music as the rhythmic basis for their music (*see* BREAKBEAT). However, his achievements cannot be measured only in terms of his musical contributions: during the height of his popularity he became a cultural icon in the black-American community, representing the limits of economic self-determination for a black performer, and demonstrating how crossover success could be achieved without forswearing the black vernacular.

DAVID BRACKETT

Brown, John (*b* Rothbury, Northumberland, 5 Nov 1715; *d* Newcastle upon Tyne, 23 Sept 1766). English clergyman, writer and amateur musician. He was educated at Cambridge University and held several positions in the Church of England. His contribution to music historiography is contained in his *Dissertation on the Rise, Union, and Power, the Progressions, Separations, and Corruptions, of Poetry and Music* (London, 1763; Ger. trans. by J.J. Eschenburg, Leipzig, 1769; It. trans. by Oresbio Agieo, academic name of Francesco Corsetti, Florence, 1772). Proceeding on the assumption that music arose from the passions and principles of the human mind, Brown isolated 36 stages of musical history, from the early unity of gesture, voice and speech and its perfection as dance, melody and song in Greek society to the separation and degeneration of those arts in the 18th century. Thus, like Isaac Vossius (whom he cited with approval), he believed that music reached its perfection among the ancients and declined with the moderns.

In focussing on expressive aspects of music, Brown could treat it on the same principles as manners, so that, for example, during the unfettered state of 'ignorance' characteristic of 'savage' life, music existed as uncouth gestures, impassioned howls and 'gabbling' (unmeaning) song. For Brown, however, the 'genuis' of national music depends on religion, the 'seeds' or principles of which need to be inculcated early through habit and association. Since the luxury and effeminacy of opera illustrated the corrupt state and character of English manners and music, Brown advocated the establishment of a national academy not as an educational institution but as a coterie of inspectors of 'a superior Taste and Authority'.

Brown's answer to his critics was published anonymously as *Some Observations on Dr. Brown's Dissertation* (London, 1764). He also extracted from the *Dissertation* subject matter relating to poetry, publishing this separately as *The History of the Rise and Progress of Poetry, through its Several Species* (London, 1764); developed his views on education in *Sermons on Various Subjects* (London, 1764), in which he attacked the principles of Rousseau; and issued a general complaint about national corruption as *An Estimate of the Manners and Principles of the Times* (London, 1757). In addition to two plays, he wrote the text of, and selected the music for, an oratorio, *The Cure of Saul* (perf. London, 1763; pubd in *Dissertation*, and separately, London, 1764). Brown had no hand in writing Avison's *Essay on Musical Expression* (London, 1752), although he read the manuscript, made some corrections in the style and recommended some alterations in the order and disposition of the parts. Recurrent fits of 'phrenzy' led him to commit suicide by cutting his throat.

JAMIE C. KASSLER

Brown, Malcolm Hamrick (*b* Carrollton, GA, 9 Nov 1929). American musicologist. He graduated from Converse College in South Carolina (BMus 1951) and took graduate degrees at the University of Michigan (MMus 1956) and Florida State University (PhD 1967). He began his teaching career as assistant professor of piano at Mount Union College, Ohio, in 1956. He joined the faculty of Indiana University in 1962, where he was appointed professor of music in 1976; he became professor emeritus in 1994.

Brown has studied Russian music and musical life of the 19th and 20th centuries, with particular interest in Tchaikovsky, Prokofiev and Shostakovich. From 1987 to 1992 he aided in negotiations for the exchanges of composers, musicologists, music theorists and ethnomusicologists between the USA and the USSR. He is founding editor and general editor of *Russian Music Studies*, the only series in any language or country exclusively devoted to the scholarly study of Russian music; he was also Russian area editor for RILM (1967–9) and from 1987 a member of the advisory board of Monuments of Russian Music.

PAULA MORGAN

Brown, Maurice J(ohn) E(dwin) (*b* London, 3 Aug 1906; *d* Marlborough, 27 Sept 1975). English writer on music. At London University he took the BSc (1929) and BMus (1939). After teaching music at Belle Vue High School, Bradford (1939–44), and serving as a radio and telegraph instructor with the RAF, he taught physics at Marlborough Grammar School, where he was head of the science department (1945–66).

Brown was the leading Schubert scholar of his generation. His work was notable for its disciplined accuracy and depth, balance and perception, and was informed both by his thorough knowledge of the progress of Schubert research and by his enthusiasm for the music under discussion. His knowledge of and delight in literature contributed greatly to his understanding of the devices of word-setting in lieder. The other major subject of his research was Chopin: he compiled the standard thematic index of his works and studied their publishing history.

ROSEMARY WILLIAMSON

Brown, Nacio [Ignatio] **Herb** (*b* Deming, NM, 22 Feb 1896; *d* San Francisco, 28 Sept 1964). American popular songwriter. His family moved in 1902 to Los Angeles, where he attended the Manual Arts High School and, at home, was taught piano by his mother; later he studied composition formally. From 1916 to 1920 he ran a successful menswear store in Beverly Hills, after which he amassed a small fortune in property. During these years he wrote songs as a hobby, including one called *When Buddha Smiles* (to words by Arthur Freed), which became a national hit in 1921. In 1926 his 'novelette' *Doll Dance*, written for *The Hollywood Music Box Revue*, became an international hit. Still he felt no need, either artistic or financial, to become a full-time songwriter. But in 1929, at the urging of the MGM executive Irving Thalberg, he and Freed provided the songs for the first full-length film musical, *The Broadway Melody*. This immediately produced three international hits: *The Wedding of the Painted Doll* (using a catchy triplet motif from *Doll Dance*), where the tunes are linked by sparkling modulations, *You were meant for me* and *The Broadway Melody*, all written in a spare, breezy style.

For the next few years the songwriting team of Brown and Freed dominated Hollywood film musicals. For *The Hollywood Revue of 1929* they contributed 'Singin' in the Rain', the catchy octave leaps of which were later employed by Brown in such songs as 'You are my lucky star' (from *Broadway Melody of 1936*); 'The Pagan Love Song' was written for Ramon Novarro in *The Pagan* (1929); 'Paradise', full of innuendo, was sung by Pola Negri in *A Woman Commands* (1931) and prompted a sequel, 'Temptation', in *Going Hollywood* (1933). In 1934 their song 'All I do is dream of you' was introduced by Joan Crawford and Gene Raymond in *Sadie McKee*; it soon became a standard, and its simple tonic and dominant harmonies were repeated in 'Good morning' (from *Babes in Arms*, 1939). For *Ziegfeld Girl* (1941), an MGM extravaganza, Brown created an evergreen in 'You stepped out of a dream', this time in collaboration with Gus Kahn; a highly original song with daring chromaticism, it is still sometimes used as a model in harmony courses.

During the 1940s Brown gradually abandoned songwriting for other pursuits while Freed, a film producer from 1939, supervised many of MGM's greatest musicals, culminating in *Singin' in the Rain* (1952), which took its songs from the Brown and Freed repertory. By this time Brown had announced his official retirement.

IAN WHITCOMB

Brown, Richard. *See* BROWNE, RICHARD (iii).

Brown, Timothy (David Andrew) (*b* Salisbury, 18 Jan 1943). English horn player and teacher. He was born into a family of musicians and made his début as a horn soloist at the age of 17. After studying with Douglas Moore at the RCM, London, he performed with many orchestras, including the LPO and the Academy of St Martin-in-the-Fields. He joined the BBC SO in 1985 and later succeeded Alan Civil as the orchestra's principal horn. He was appointed professor of the horn at the RCM in 1981 and is associated with many groups, including the Academy of St Martin-in-the-Fields Chamber Ensemble and the Orchestra of the Age of Enlightenment, with whom he has recorded, on the natural horn, the complete Mozart concertos. His other recordings include the Haydn concertos (with the Academy of Ancient Music) and many discs of chamber music. Brown is one of the few horn players to have embraced the values and practices of the period-instrument movement while sustaining a high reputation as a modern orchestral and chamber player.

JEFFREY NUSSBAUM

Brown [?Browne], **William** [Brouno, Bruno; Guillermo, Guillelmo; 'La Janetton'] (*fl c*1600–25). English composer, active in the southern Netherlands. Dart identified him with William Browne (1578–1637), grandson of the first Lord Montague and benefactor of the Jesuit college

at Liège, which he entered as a brother in 1614 and where he remained until his death. Another William Browne, nephew of Lord Montague, was born about 1558 and was studying music in Bologna in 1582 under Annibale Meloni; but the style of the music attributed to 'Brouno' or 'Bruno' makes it rather unlikely that this older man was the composer. In any event, there are good grounds for accepting Dart's opinion that the composer was financially independent and not a musician by profession. The alternative forms of his name reflect only the italianizing propensities of the scribes of the three manuscripts in which his music, all for keyboard, is found: *D-Bsb* Mus.ms.40316 (in *PL-Kj*, containing three allemandes, a courante and a canzona 'Mall Sims'), *B-Lu* 153 (containing a fantasia also found anonymously in *GB-Och*) and *GB-Och* Mus.89 (containing a toccata). All these sources are of Flemish Catholic origin. The first testifies to the composer's English nationality and specifies his curious alias 'La Janetton'. The Oxford manuscript opens with the toccata by Brown, and it is conceivable that the five anonymous, freely composed pieces immediately following it are also by him; indeed, there are parallels between Brown's works and the anonymous Catholic liturgical music that forms the bulk of this manuscript. The most substantial of the pieces attributed to Brown (all ed. R. Vendome and C. Good) are the fantasia, which is in three parts with bass entries in the manner of a double-organ voluntary, and the first of the allemandes, which has the scheme AA′BB′ twice over, in duple and triple time respectively.

JOHN CALDWELL/ALAN BROWN

Browne (Garrett), Augusta (*b* Dublin, 1820; *d* Washington DC, 11 Jan 1882). Irish-American composer and writer on music. Her family had moved to the USA by 1830, and during the 1840s and 50s she was organist at the First Presbyterian Church in Brooklyn, New York. She was described as a 'professor of music' on her compositions published in New York and Boston between 1842 and 1855. One of the most prolific women composers in the USA before 1870, she wrote mainly drawing-room songs and salon piano pieces; Moore, in one of the few published acknowledgments of an American woman composer before 1900, attributes 'over 200' compositions to her and describes her as 'a composer of note'. Her songs are often in modified *ABA* form; the best known include *The Chieftain's Halls* (1844) and *The Warlike Dead in Mexico* (1848). She made use of English and Irish musical sources (for example, John Braham's *The Death of Nelson* was a model for *The Warlike Dead*, and Thomas Moore's *A Selection of Irish Melodies* supplied the themes for *The Hibernian Bouquet* variations), and she resisted any vernacular American styles, describing them as 'taste-corrupting'. Browne was confused in her own lifetime with another composer: Cheney describes her (in *The American Singing Book*, Boston, 1879) as best known for *The Pilgrim Fathers*, a work actually written by Harriet Browne (*c*1790–1858). Augusta Browne became a prominent author in the late 1840s, writing two books and contributing articles on musical taste to various magazines, including the *Columbian Lady's and Gentleman's Magazine* and the *Musical World and New York Musical Times*. In her article 'A Woman on Women' (*Knickerbocker Monthly*, lxi/1, 1863, p.10) she asserted the right of women to a thorough musical education.

WORKS
(*selective list*)

printed works published in New York unless otherwise stated

Vocal: The Family Meeting (C. Sprague) (1842); Grand Vesper Chorus (R. Heber) (1842); The Chieftain's Halls (Boston, 1844); A Song for New England (H.W. Elsworth) (1844); The Volunteer's War Song (Mrs Balmanno) (1846); The Reply of the Messenger Bird (E. Young) (Philadelphia, 1848); The Warlike Dead in Mexico (Balmanno) (1848); Song of Mercy (J. Bunyan) (1851)

Pf: The Caledonian Bouquet, variations (1841); The French Bouquet, variations, op.31 (1841); The American Bouquet, variations (Philadelphia, 1844); The De Meyer Grand Waltz (1846); The Hibernian Bouquet, variations (1840s); The Mexican Volunteer's Quickstep (*c*1850); Angels Whisper, variations (Philadelphia, 1850s); The Merry Mountain Horn, variations (Philadelphia, 1850s); The Ethereal Grand Waltz (n.d.)

JUDITH TICK

Browne, John (i) (*fl c*1480–1505). English composer and musician. In a contemporary musical source his *Stabat mater* is ascribed to 'Johannes Browne Oxoniensis'. No-one of this name appears as a member of the choir of any of the major Oxford colleges at this time; however, during 1490 a John Browne was one of the chaplains of the household of John de Vere, Earl of Oxford. This was the grandest of the aristocratic household chapels of its day, and there need be little doubt that this was the composer. His musical prowess was also known to royalty. His setting of *Stabat iuxta Christi crucem* employs as its cantus firmus the tenor of the song *From stormy windes*, composed by Edmund Turges in 1501 to commemorate the departure of Prince Arthur from court to begin his public life as Prince of Wales. The engagement of this musical quotation simultaneously with a text of maternal mourning suggests that Browne composed the piece for Arthur's mother, Queen Elizabeth, following the prince's untimely death in 1502. No more is known about Browne; there are no grounds for identifying him with the John Browne who, aged 14, applied for election as a scholar of Eton College in 1467.

In the quality of his accomplishment he may be considered the greatest English composer of the period between Dunstaple and Taverner. Among the contents of the Eton Choirbook (*GB-WRec* 178, compiled *c*1502–5) his work was accorded pride of place. Its index reveals that it originally included 15 of his compositions; of the 11 Marian antiphons nine remain complete (or it is possible to complete them), but the sole survivor of the four *Magnificat* settings is only fragmentary. Of the ten pieces written for full choir only four have survived, throwing into especial relief Browne's facility for composing for the restricted compass of men's voices alone. His polyphony is dense and endlessly resourceful. He was a

Ex.2

Mean, Countertenor and Bassus are silent in this extract

master of cogency of overall planning, deploying cantus-firmus technique and the alternation of reduced-voice and full scoring with a seemingly effortless artistry that wholly conceals the fact that certain compositions (for example the first of the *Salve regina* settings) stand upon an elaborately mathematical disposition of their successive and component proportions.

The Eton Choirbook opens with his *O Maria salvatoris mater*, whose eight voices exhibit a remarkable assurance in contrapuntal finesse. Equally imposing are the three six-voice Marian antiphons on the *Stabat mater* and texts cognate with it. Browne is representative of the English florid style of composition not only at its most assured but also at its most imaginative. Few closing periods approach in breadth and sweep the 'Salve' concluding his first *Salve regina*, or in poignancy the setting of 'gaudia' ending *Stabat iuxta Christi crucem*, which (if Harrison's edition represents correctly contemporary practices in the realization of *musica recta* and *musica ficta*) engages a quite remarkable deployment of the technique of false relations (ex.1). Moreover, long before the contrivances of the madrigalists, Browne created in his masterpiece, the six-part *Stabat mater*, a mood of brooding and despairing melancholy and introspection (e.g. in the passage in ex.2) that gathers an inexorable momentum and energy until its eruption into a startling and percussive outburst at 'Crucifige' ('Crucify!), articulated at the very top of the treble register (ex.3), that represents the work's greatest climax – an unforgettable piece of composition unequalled anywhere in the European music of his time (ex.3).

It was common for musicians of this period in aristocratic employment to compose songs and devotional pieces to vernacular texts as well as church music. Three compositions surviving in a songbook of 1501 (the Fayrfax Book, *GB-Lbl* Add.5465) that are attributed just to 'Browne' may well be the work of this composer. Two are to devotional texts and one to secular, two in three

parts, one in four; however, in response to the difference in the destined ambience of performance they are considerably different in style from the sacred compositions. The counterpoint of *Margaret meke* is deft, though lightweight in comparison with that of the church music; the two devotional pieces are more reflective, especially in the occasional held chords and relatively flexible imitation of *Woffully araid*.

ROGER BOWERS

Browne, John (ii) (*b* London, *c*1608; bur. Eydon, Northants., 8 June 1691). English music collector, copyist and amateur composer. On the death of his father in 1621 he was adopted by his wealthy uncle, the merchant taylor John Browne. By the 1630s he was a property-owner in Northamptonshire. In 1636 he was appointed Clerk of the Parliaments, a post that was initially a sinecure, but which led to notoriety at the outbreak of the Civil War in 1642, when he adhered to the parliamentary cause. His office was abolished under the Commonwealth in 1649, but he was restored from 1660 until his death.

Significant as a political archivist, Browne was an astute music lover whose collection is preserved almost entire in Christ Church, Oxford, as part of the music bequeathed by Henry Aldrich. His descendants retained some concordant manuscripts into the 20th century, alongside his parliamentary papers. The collection provides a rare view of Stuart Puritan London up to 1642. It includes early 17th-century vocal music and Jacobean consort music that he inherited through family connections (e.g. *GB-Och* 44/423–8, in which the instrumental music of John Milton is uniquely preserved). As the suite was evolving in the 1630s, he part-copied partbooks (*Och* 353–6, 367–70, 379–81) that constitute sole sources for a great deal of dance music by John Jenkins, Charles Coleman and others. The collection shows that the violin fantasia-suite was played by amateurs before 1642. Browne attempted an imitation of an otherwise unique In Nomine in B♭ by William Lawes, formerly attributed to John Banister (i); he also composed three five-part dances (*Och* 473–8) and an incomplete three-part suite (pavan–alman–corant, *Och* 379–81).

DAVID PINTO

Browne, Richard (i) (*fl* 1615). English composer. No connection between him and Richard Browne (ii) has been established. The earlier Browne is named in an entry dated 26 March 1614 in the treasurer's accounts as vicar-choral and organist of Wells Cathedral. A year later he was made a perpetual vicar-choral, and payments continued to be made to him until 1619. A 'Mr. Browne' is

mentioned in the Winchester Cathedral accounts between 1627 and 1629. Five anthems (*Christ rising again*; *If the Lord himself* (ii); *I have declared*; *My God, my God, look upon me*; *O Lord, rebuke me not in thy fury*) and an Evening Service, all in pre-Restoration sources (*GB-GL, Lcm, Ob, WB*), seem to be by this composer rather than by Richard Browne (ii).

Browne, Richard (ii) (*b* c1630; *d* Worcester, bur. 27 Aug 1664). English composer. No connection between him and Richard Browne (i) has been established. The later Browne was a chorister at Worcester Cathedral in 1639 and was probably the Richard Browne who was appointed a lay clerk there in 1642 and made a minor canon two years later. In an entry in the Chapter Acts dated 26 April 1662 he is named as organist and Master of the Choristers. His burial is recorded in the register of St Michael's, Worcester. Three verse anthems in a post-Restoration source (*GB-Och*; manuscript insertions in the Hereford set of J. Barnard's *The First Book of Selected Church Musick*, 1641) seem on stylistic grounds to be by this composer rather than by Richard Browne (i): *By the waters of Babylon*; *If the Lord himself* (i); and *Unto him that loved us*.

PETER LE HURAY/JOHN MOREHEN

Browne [Brown], **Richard (iii)** (*d* Lambeth, London, bur. 21 May 1710). English composer and organist. Someone of this name makes a brief appearance among Charles II's band of violins between 1670 and 1674, but it seems unlikely that this is the same man, as Browne became organist of St Lawrence Jewry in 1686. A vestry minute of 16 March that year records that 'Browne … be Organist for one whole yeare, he haveing for his satisfacon left himself to the goodwill and kindness of the parish'. He apparently had a year's trial while an organ was being built by Renatus Harris. After 17 months he was paid £27 and offered an annual salary of £20. He held the post of organist until his death. In March 1688 he was also appointed music master at the nearby Christ's Hospital, at a salary of £20 a year and £4 for his lodgings. One of his most important tasks was to compose the Easter Psalms or Psalms of Thanksgiving, which were sung by the children of Christ's Hospital on Monday, Tuesday and Wednesday in Easter week for their founders and benefactors. There are numerous references to Browne in the court and committee minutes of Christ's Hospital, many with respect to his unsatisfactory behaviour. He was accused of using bad language to the children (1689) and was finally dismissed for 'miscarriages & negligence in his office' (1697), though he had the effrontery to reapply for his job. He still enjoyed his income from St Lawrence Jewry, however, and he eventually took up a further appointment in 1701 as organist of St Mary, Lambeth, at a yearly salary of £20. He held both posts until his death, despite complaints from each parish about his absences and use of deputies.

Browne was best known as a composer of catches and songs, many to his own words. Most of them were printed in such collections as Playford's *The Second Book of the Pleasant Musical Companion* (RISM 1686[4], 4/1701) and *Vinculum societatis* (RISM 1687[6], 1688[9]); some also appeared in 18th-century anthologies. At Christ's Hospital he proved himself an innovator by composing his eight Easter Psalms in the style of contemporary verse anthems rather than the stolid psalm tunes of his predecessors (London, 1688–92, 1694, 1695, 1697). His psalm for 1694 consists of three verses (one in the minor) for treble solo and one for full chorus, all based on the same ground. He also wrote an elegy on the death of Jeremiah Clarke in 1707 (*Weep all ye Swains*). His most popular catches were *Come, boy, light a faggot* (*The Drawer's Catch*), *Peter White that never goes right* (*A Catch on a Man with a Wry Nose*), *I, Thomas of Bedford* (*The Bedford Catch*), *The duke sounds to horse boys* (*A Catch on the Duke of Marlborough's Victory over the French*) and *Ah sorry poor Frenchman* (*A Catch on the Modern Courage and Conduct of the French*), all for three voices, and *War begets poverty* (*The Almanack Catch*), for four voices.

Browne, William Charles Denis [Denis Browne, William Charles] (*b* Leamington Spa, 3 Nov 1888; *d* Achi Baba, Turkey, 4 June 1915). English composer and critic. He was educated at Rugby and at Clare College, Cambridge, where he became a close friend of Dent; he graduated in classics and took a MusB in 1912. After a short spell of teaching at Repton he moved to London as a critic and teacher; his articles for *The Times* (1913–14) and the *New Statesman* (1914) reveal a brilliant musical mind. His posthumously published songs are particularly beautiful and the ballet suggests a rare ability to absorb new idioms. He was killed in action shortly after burying his friend Rupert Brooke.

HUGH TAYLOR

Brownie. *See* BROWN, CLIFFORD.

Browning. The name most commonly applied by contemporary scribes to instrumental settings of an English 16th-century popular tune. It resembles an eight-bar galliard strain and was sung to various texts. The words, beginning 'Browning my dear', are otherwise lost, though they may be echoed in Ravenscroft's round on the tune (in *Deuteromelia*, 1609) which starts 'Browning Madame, browning Madame, so merrily we sing, browning Madame'. Two alternative titles, *The leaves be green*, and *The nuts be brown*, derive from a couplet underlaid to each statement of the tune in one source of Byrd's Browning: 'The leaves be green, the nuts be brown, they hang so high they will not come down' (*Byrd Edition*, xvii, 39). One consort version is called *Hey down*, and Danyel's lute variations (EL, 2nd ser., rev., viii, 72) are headed *Mrs Anne Green her leaves be green*.

Like Taverner's somewhat earlier 'Western Wynde' mass, the mid-century Browning settings consist of continuous variations on a tune that moves freely from one part to another. One distinctive characteristic, shared by only two or three other pieces, is the use of these migrations as a formal principle. Thus Henry Stoning, in his five-part Browning (MB, xliv, 70), composed five variations with the tune occurring once in each part; Clement Woodcock (MB, xliv, 72) doubled these proportions (though the bass has only one variation); and Byrd quadrupled them, as the composer of the fragmentary anonymous *Hey down* also appears to have done. Strict rotation of the tune through the three-part texture governs William Inglott's 13 keyboard variations (*Fitzwilliam Virginal Book*, ii, 381). Elway Bevin (MB, ix, 19) and John Baldwin (MB, xlv, 9) in their three-part consort sets, however, showed more interest in transposition than in consistent migration patterns. Carrying the process further than Byrd, who had used transpositions of the tune to C and G as well as its normal F pitch, they both added transpositions to B♭ and Baldwin added D too (with a rhyme about hexachord changes). Such technical features are absent from William Cobbold's consort song *New Fashions* (MB, xxii, 158), much of which employs the Browning tune, and from the variations for lute (two anonymous sets, respectively for solo and duet, and Danyel's solo). Byrd worked two duple-time variations into his *Barley Break*.

Browning, Jean. *See* MADEIRA, JEAN.

Browning, John (*b* Denver, 22 May 1933). American pianist. He made his first public appearance in Denver when he was ten. As a boy he studied in Los Angeles with Lee Pattison, a Schnabel pupil, and in 1953 went to Rosina Lhévinne at the Juilliard School of Music (BM, MM, 1956). He rapidly made his way to prominence by winning the Hollywood Bowl Young Artists Competition and the Steinway Centennial Award in 1954 and the Edgar M. Leventritt Award in 1955. He made his début, with the New York PO under Mitropoulos, in 1956, the same year in which he won second prize in the Queen Elisabeth International Competition in Brussels; thereafter he became one of the American pianists most in demand. In a move comparatively rare for an American pianist, he toured the USSR in 1965. In addition to many appearances as a soloist and recitalist, he has given masterclasses at Northwestern University and at the Manhattan School of Music, and has served as a juror at the Queen Elisabeth Competition. He has been awarded honorary doctorates in music from Ithaca College (1972) and Occidental College (1975).

Browning had particular success when he gave the world première of Barber's Piano Concerto (24 September 1962, with Leinsdorf and the Boston SO at Lincoln Center, New York). Except for Barber, Prokofiev (all of whose concertos he recorded with Leinsdorf in Boston) and Rachmaninoff, his repertory has tended to centre on the 19th century and Mozart. Other recordings include three recital-length discs of Rachmaninoff, Liszt and Musorgsky, and the complete Barber songs with Cheryl Studer and Thomas Hampson. He is a tasteful, serious and straightforward player, blessed with one of the easiest, most brilliant techniques of any pianist before the public.

MICHAEL STEINBERG/R

Brownlee, John (*b* Geelong, 7 Jan 1901; *d* New York, 10 Jan 1969). Australian baritone. He first studied in Melbourne, then with Dinh Gilly in Paris, and was introduced to Covent Garden by his countrywoman Dame Nellie Melba, at whose farewell concert (8 June 1926) he made his London début as Marcello in the last two acts of *La bohème*. In the following February he made his first appearance at the Paris Opéra, remaining a prominent member there until 1936. At Covent Garden he sang Golaud in the 1930 revival of *Pelléas et Mélisande* and was also successful in such Verdi roles as Renato and Amonasro.

Brownlee was among the first group of artists who sang at Glyndebourne: under Fritz Busch he sang Don Alfonso in 1935, Don Giovanni in 1936, as well as the Speaker in *Die Zauberflöte* and the Count in some later performances of *Figaro*. He first appeared at the Metropolitan Opera as Rigoletto on 17 February 1937 and remained a valued member of the company until 1958, singing 348 performances of 33 roles. He also appeared widely elsewhere in North and South America, and became director (1956) and president (1966) of the Manhattan School of Music. As can be heard on the 1936 Glyndebourne recording, his Don Giovanni, if not irresistibly seductive in tone or manner, was musically very sensitive; and his singing in general, while neither so rich nor so resonant as to place him among the greatest baritones, was admirably schooled and always distinguished in style.

DESMOND SHAWE-TAYLOR/R

Brownson, Oliver (*b* Bolton, CT, 13 May 1746; *d* ?Smithfield, NY, 20 Oct 1815). American composer, tune book compiler and singing master. Brownson taught at singing schools for 30 years in Connecticut and Massachusetts; he made his home in New Hartford and Simsbury, Connecticut between 1776 and 1802, when he moved to Smithfield. The first of Brownson's 33 published compositions (all ed. K. Kroeger, *Three Connecticut*

composers, New York, 1997) appeared in Andrew Law's *Select Harmony* (Cheshire, CT, 1779). Brownson's own *Select Harmony* (four issues, n.p., 1783-*c*1791) introduced a large number of new pieces by the compiler and other talented, original Connecticut composers such as Asahel Benham, Solomon Chandler, ?Joseph Strong and Timothy Swan. Its engraved title page depicts a choir arranged around three sides of a meeting house gallery, the leader at the centre with pitchpipe in hand. Brownson also compiled *A New Collection of Sacred Harmony* (Simsbury, CT, 1797), which he printed himself, adding his own portrait to the second issue. In tunes such as 'Salisbury' and the extremely popular 'Virginia', Brownson brought to the sturdy New England idiom an expressive use of melisma and a fine melodic gift.

Brożek, Jan. *See* BROSCIUS, JAN.

Bruant [Bruand], **(Louis Armand) Aristide** (*b* Courtenay, Loiret, 6 May 1851; *d* Paris, 10 Feb 1925). French singer and songwriter. He began as a chanson writer and performer in *cafés-concerts* in Paris, but in the 1880s gained renown as a critic of social injustice through his performances first at the Chat Noir, then at his own cabaret Le Mirliton, where he created the semblance of low life for a mostly bourgeois audience. He published many of his own songs in a journal named after the cabaret. His singing style and lyrics had a lasting influence on the 20th-century chanson. He continued performing into the 1920s but was more active after 1901 as a writer of novels and plays. Many of Bruant's cabaret acts were published as *Dans la rue: chansons et monologues* (Paris, 1889–1909), *Chansons et monologues* (Paris, 1896–7) and *Sur la route: chansons et monologues* (Courtenay, 1897); a collection was edited as *Dans la rue* (Paris, 1962). He made more than 50 recordings.

PATRICK O'CONNOR

Brubeck, Dave [David Warren] (*b* Concord, CA, 6 Dec 1920). American jazz composer, pianist and bandleader. He received early training in classical music from his mother, a pianist, and by the age of 13 he was performing professionally with local jazz groups. He was a music major at the College of the Pacific in Stockton, California, studied compositon with Milhaud (1946) and, with fellow students, founded the experimental Jazz Workshop Ensemble, which recorded in 1949 as the Dave Brubeck Octet. Also in 1949, he organized the Dave Brubeck Trio. With the addition of the alto saxophonist Paul Desmond (1951), Brubeck thereafter led a quartet. In 1967 Brubeck disbanded, ostensibly to concentrate on composing, but he soon formed a new quartet that included Gerry Mulligan (until 1972).

The Brubeck quartet was immensely popular on college campuses in the 1950s; the album *Jazz at Oberlin*, recorded in concert at that college in 1953, contains some of Brubeck's and especially Desmond's finest improvisations. During the 1950s and 60s Brubeck began experimenting with time signatures unusual to jazz, such as 5/4, 9/8 and 11/4. By 1959 he had recorded the first jazz instrumental piece to sell a million copies – Paul Desmond's *Take Five* (in 5/4 metre), which was relased with his own *Blue Rondo à la Turk* (in 9/8, grouped 2+2+2+3).

Brubeck, who considers himself in essence 'a composer who plays the piano', has written and, in some instances, recorded several large-scale compositions since the 1960s, including ballets, a musical, oratorios, cantatas and works for jazz combo and orchestra. In the 1970s he organized several new quartets which at various times included one or more of his sons Darius (keyboards), Chris (bass guitar and bass trombone) and Danny (drums) and (in the 1980s and 90s) the clarinettist Bill Smith, from the 1940s octet. His many honours include the National Music Council's American Eagle Award (1988) and a Lifetime Achievement award (1996) from the National Academy of Recording Arts and Sciences.

WORKS
(*selective list*)

Stage: A Maiden in the Tower (ballet), 1956; Points on Jazz (ballet), 1961; The Real Ambassador (musical), 1962; Glances (ballet)

RICHARD WANG

Brubeck, Howard R(engstorsff) (*b* Concord, CA, 11 July 1916; *d* Escondido, CA, 16 Feb 1993). American composer, brother of DAVE BRUBECK. He studied at San Francisco State College (BA 1938) and Mills College (MA 1941), where he was a pupil of Milhaud. In 1944, after a few years of high school teaching, he became an assistant to Milhaud at Mills College. In 1950 he joined the faculty of San Diego State College as a teacher of composition. He became chair of the music department of nearby Palomar College in 1953. He retired in 1978, having served as Dean of Humanities at Palomar for 12 years.

Many of Brubeck's works incorporate the essence of jazz by using an improvising jazz combo in concertino fashion with strict notation for the orchestra: this is the strategy employed in his *Dialogues for Jazz Combo and*

Orchestra, his most widely played and best-known work. The influence of Milhaud – and sometimes echoes of Copland – can be heard in his music; a flair for orchestral writing, secure craftsmanship and sophisticated wit are also in evidence. In the late 1950s performances of both *California Suite* (in San Francisco and Brussels) and *Dialogues* (performed by the Dave Brubeck Quartet with the San Diego SO and the New York PO) brought him to international prominence. After 1966 Brubeck's attention turned to college administration and family.

BARBARA A. PETERSEN/JOE R. STANFORD

Bruce, (Frank) Neely (*b* Memphis, 21 Jan 1944). American composer, pianist, conductor and musicologist. He studied the piano with Roy McAllister at the University of Alabama (BM 1965), with Sophia Rosoff, and with Soulima Stravinsky at the University of Illinois (MM 1966), where he also studied composition with Ben Johnson (DMA, 1971) and had contact with Hamm, Hiller, Kessler and Brün. He served on the music faculty at Illinois (1968–74) before joining the staff at Wesleyan University. He was a member of the editorial committee of New World Records (1974–8), founding chairman of New England Sacred Harp Singing (1976) and has held visiting professorships at Middlebury College, Bucknell University and the University of Michigan. In 1980 he was Senior Research Fellow at the Institute for Studies in American Music at Brooklyn College.

In 1968 Bruce founded the American Music Group (AMG), an ensemble innovative in its dedication to American music of all eras. AMG recorded the music of Anthony Philip Heinrich for Vanguard, toured widely in the United States and, under Bruce's direction, gave the 20th-century première of Bristow's *Rip Van Winkle* and the first continuous performance of Ives's 114 Songs (co-directed by William Brooks). He has also conducted the Wesleyan Singers (since 1974) and commissioned works from Brant, Duckworth, Fulkerson, Oliveros and Wolff. In 1977 Bruce founded the American Music/Theater Group. As a pianist he gave the premières of Cage and Hiller's *HPSCHD*, Duckworth's *Time Curve Preludes* and Farwell's Sonata op.113; his extensive repertory includes all his own pieces.

The obsessive lyricism and clearly delineated form of works such as the *Suite Fantastique* (1956) or *Trio for Bands* (1995) permeate Bruce's prolific output. Much of his music since *Variations on a Polonaise* (1969) is characterized by the juxtaposition of seemingly incompatible musical elements, while later works such as *Hansel and Gretel* (1996–8) and *Tanglewood* (1993) exhibit greater accessibility. Certain periods focus on specific compositional concerns. Works after the Fantasy in C (1962) move from neo-classical styles and free chromaticism to serial procedures, culminating in the Fantasy for wind and percussion (1967). In 1969 he began to juxtapose widely contrasting compositional techniques. Information theory was used as a formal device to plot and shape the degree of incoherence in these ruptures of structure. Examples of this are the sixth piano sonata and *The Trials of Psyche*, the latter incorporating a rock group and requiring three conductors. From 1976 he focussed on assimilating the entire American musical tradition, including hymn tunes, marches and ragtime, and with *Americana, or, A New Tale of the Genii* he began his most ambitious project yet: a cycle of three operas, each encompassing a century of America's musical heritage. Later works such as *Arabesques Redux* and *The Blue Box* use modes taken from jazz and non-Western traditional musics.

WORKS
(*selective list*)

DRAMATIC

Pyramus and Thisbe (chbr op, 1, Bruce, after W. Shakespeare), 1964–5; The Trials of Psyche (op, 1, J. Orr, after Apuleius), 1970–71; Americana, or, A New Tale of the Genii (op, 4, T. Connor), 1978–83; Hansel and Gretel (op, 2, Bruce, after J.L.C. and W.C. Grimm), 1996–8; incid music, film scores

KEITH MOORE

Bruch, Max (Christian Friedrich) (*b* Cologne, 6 Jan 1838; *d* Friedenau, Berlin, 2 Oct 1920). German composer. The son of a police official, Bruch received his first musical education from his mother, herself a singer. He began to compose from the age of nine; a Septet, written when he was 11, bears early hallmarks of his future style and assured scoring. At 14 he won the coveted Frankfurt Mozart-Stiftung Prize, which enabled him to study with Hiller, Reinecke and Ferdinand Breunung. His first substantial work was an opera based on Goethe's *Scherz, List und Rache*, written and performed in Cologne in 1858 (no orchestrated version survives), after which his teachers encouraged him to travel throughout Germany. He went to Leipzig, a city whose musical life was still dominated by Mendelssohn's influence, but settled in Mannheim between 1862 and 1864. There he wrote two works which would bring his name before the German public, the opera *Die Loreley* and the male-voice cantata *Frithjof*. The opera, based on the Rhine legend and to a libretto by Emanuel Geibel (Mendelssohn considered it shortly before his death), is most effective in the second act, in which the heroine enters into a pact with the river spirits. After a few successful performances in German and other European cities, brief revivals in Leipzig under the young Mahler (1887) and in Stuttgart under Pfitzner (1916), the opera disappeared from the repertory until stagings in Oberhausen (1984) and its British première in London (1986). Bruch wrote one further opera, *Hermione* (based on *The Winter's Tale*), in 1870, but it had no success. *Frithjof*, however, was the first of many successful choral works which kept his name before the German public throughout his long life.

From 1865 to 1867 Bruch was music director to the court at Koblenz, and it was there that he wrote his first violin concerto, in G minor op.26, the work with which his name has always been associated (much to his distaste, for most of his other compositions were subsequently neglected). His friendships with such violinists as David, Joachim, Sarasate and Willy Hess, and the advice he received from them, inspired nine concerted works for that instrument, which 'can sing a melody better than a piano, and melody is the soul of music'. The slow movement of op.26 is a fine example of Bruch's ability to shape a melody. Between 1867 and 1870 he held a similar court post at Sondershausen and, after a freelance career as a composer until 1878, held conducting posts in Berlin (1878–80), Liverpool (1880–83) and Breslau (1883–90). He then directed a masterclass in composition at the Hochschule für Musik in Berlin (1890–1911), where he died at the age of 82, honoured but lonely and somewhat neglected as a composer. His utter distaste for and outspoken criticism of the New German School of Wagner and Liszt isolated him more and more throughout his life. His reverence for the music of Mendelssohn and Schumann and his resistance to change meant that works written at the end of his life, such as the chamber music of 1918, sounded much the same as those compositions dating from 60 years earlier, although his ability to orchestrate almost equalled his melodic invention. He wrote three symphonies (1868, 1870, 1882), all of which contain good material. Bruch was respected as a teacher in his later years, with Respighi and Vaughan Williams among his pupils in his Berlin composition classes. He was awarded an honorary doctorate by Cambridge University in 1893.

Bruch loved folk music as a source of melody, and many of his works were derived from such countries as Scotland (Scottish Fantasy op.46, *Das Feuerkreuz* op.52), Sweden (Serenade on Swedish Melodies op.posth., Swedish Dances op.63) and Russia (Suite on Russian Folk Melodies op.79*b*). During his Berlin years he conducted the Sternscher Gesangverein, a choir from whose Jewish members he received material used in his three Hebrew songs, published in 1888, and *Kol nidrei* op.47. Both works were written in Liverpool, where he succeeded Sir Julius Benedict as conductor to the Philharmonic Society for three somewhat turbulent years. He was appointed on the strength of the successful performances he conducted there of his secular oratorios *Odysseus* op.41 in 1877 and *Das Lied von der Glocke* op.45 in 1879. These large works, together with *Arminius* op.43, *Achilleus* op.50 and *Moses* op.67, were often performed and well received throughout Germany, particularly during the 1870s when the country was unified under Bismarck and the subject matter appealed to prevailing nationalist sentiments. However their appeal in the British Isles and the USA (he conducted several American choral societies on a visit in 1883) was somewhat short-lived, largely because of poor translations and anti-German feeling at the outset of World War I; nevertheless several performances have occurred in more recent years. Max Bruch's precocious gifts remained largely unfulfilled for two reasons. He was

an exact contemporary of Brahms and was forced to exist in the shadow of his greater colleague even beyond the latter's death over 20 years before his own, and the stubborn resistance he maintained to musical developments largely instigated by Wagner stifled any of his own originality. Nevertheless his name will endure, if only thanks to one superb violin concerto.

WORKS

STAGE

op.

1 Scherz, List und Rache (komische Oper, 1, L. Bischoff, after J.W. von Goethe), 1858, Cologne, 14 Jan 1858, vs (Leipzig, ?1858)

CHRISTOPHER FIFIELD

Bruči, Rudolf (*b* Zagreb, 30 March 1917). Croatian composer. He studied music at the Zagreb Academy (until 1936) and composition at the Belgrade Academy (1946–9) with Petar Bingulac. In 1953 he took composition lessons with Uhl at the Vienna Music Academy. Bruči began his career as a violinist in the Belgrade PO (1945–50), opera orchestras and a string quartet, and he also took up conducting. He was appointed opera conductor at the Novi Sad People's Theatre in 1950, and director of the Isidor Bajić Music School, Novi Sad, in 1954. Bruči's music is marked by a clarity of expression and a desire to incorporate new ideas into what is basically a conventional approach. His use of bitonality, polytonality and atonality is always sensitive and considered, and normally enlivened by a strong rhythmic verve and brilliant orchestration; he has made occasional use of serial methods, but never completely or strictly. The symphonic suite *Maskal*, the ballet *Night on the Railway* and the cantata *Čovek je vidik bez kraja* ('A Man is a Limitless Horizon') are fine examples of the application of these qualities. Central to Bruči's work, however, are his large-scale symphonic pieces, of which the best known is the *Sinfonia lesta* of 1965, which won the Queen Elisabeth Prize in 1966. His full-length opera *Gilgameš* (1986) represents a synthesis of the best of his work, incorporating rich orchestration, clear rhythmic structures and archaic choral writing.

WORKS
(*selective list*)

Stage: Susreti [Encounters] (ballet), 1963; Demon zlata [Demon of Gold] (ballet, I. Otrin), 1965; Kirka [Circle] (ballet), 1967; Noć na pruzi [Night on the Railway] (ballet), 1968; Katarina Izmajlova (ballet, D. Pavlić), 1977; Gilgameš (op, 3, A. Milošević), 1986

NIALL O'LOUGHLIN

Bruck, Arnold von [Pruck, Arnold de; Arnoldus Brugensis] (*b* Bruges, ?1500; *d* Linz an der Donau, Upper Austria, 6 Feb 1554). South Netherlandish composer. It has been assumed that he was born between 1480 and 1490, but from the evidence of his will and of documents concerning his relatives, it seems that he was born somewhat later. He began his musical career as a choirboy in Charles V's chapel, where he probably remained until about 1519, and must have been a pupil of Marbrianus de Orto. Bruck does not appear to have been in the chapel by the time Maximilian became emperor, or to have served any other member of the Habsburg family. In 1527 he was ordained

in the Thérouanne diocese (Pas-de-Calais). It was probably at this time that he arranged Févin's four-part *Sancta Trinitas* for six voices. He held an office at Archduke Ferdinand's court before he succeeded Heinrich Finck as court Kapellmeister in the second half of 1527; his vice-Kapellmeisters were Stephan Mahu and Pieter Maessens. Bruck remained in this post until his retirement on 31 December 1545. He was responsible for the musical education of the choirboys and among his pupils were Johann Zanger and Hermann Finck. The former, in his *Practicae musicae praecepta* (Leipzig, 1554), related a conversation on music theory between Erasmus Lapicida, Stephan Mahu and Bruck.

The years of service in the court of Ferdinand I brought Bruck a number of ecclesiastical honours. From 1527 to 1548 he held a canonry at Ljubljana Cathedral, from 28 December 1529 another at Zagreb Cathedral, and from 18 July 1531 the living of Laas (near Kočevje, Slovenia). Towards the end of his career he was made a privy councillor and given permission to continue using the title 'Kapellmeister' after leaving the court. After retiring he settled for a time in Vienna, where he received a chaplaincy for one of the altars at the Stephansdom, and in 1547 he wrote some works for the cathedral choir. In 1548 he moved to Linz, where from 1543 or 1544 he had held a very prosperous living, the Beneficium Sanctae Trinitas.

Bruck's high position in the service of a Catholic ruler and his ecclesiastical honours exclude the possibility that he may have been associated with Protestantism, as has been suggested. He cannot, therefore, have been connected, as he has been in the past, with Stephan Zirler's satirical song *Ich will hinfort gut bepstisch sein, des Luthers sehr verachten*. Bruck was highly regarded by his contemporaries. In 1536 the silversmith, Ludwig Neufarer made a medallion of him. Hans Ott in 1534 and Georg Rhau in 1542 rated him among the more famous composers of the time. The composer Caspar Copus, cantor at the Stephansdom, Vienna, dedicated his *Salve regina* (1550) to him, and Antonius Margaritha (Margolith), professor of Hebrew at Vienna University, wrote his *Kurtze Auslegung über das Wort Halleluia* (*c*1540) at his suggestion and dedicated it to him.

Bruck is one of the most important composers who worked in German lands in the first half of the 16th century. Prominent among his extant works is the sacred and secular German lied, although with the disappearance of the repertory of both Ferdinand I's court chapel and the choir of the Stephansdom in Vienna it is probable that the greater part of his church compositions with Latin texts have been lost. Those which do survive show that Bruck composed in the Josquin tradition and was a master of liturgical cantus-firmus treatment seen for example, in the sequence *Dies irae* as well as in the *Te Deum* (in *A-KN*), an *alternatim* setting in which (with the exception of verse 16) the even numbered verses are set polyphonically. A four-voice *Magnificat* setting by Bruck is also transmitted in the Klosterneuburg manuscript as well as in the recently identified concordance *Ws*. Also of interest are his two- to four-part motets for high voices, written as exercises for the court chapel choirboys. One of these is the threefold setting of the sequence *Grates nunc omnes*, in which the number of voices is increased each time. Bruck's style in the German sacred lied shows the move towards the later motet-style settings of chorales, but his greatest achievements were in polyphonic arrangements of German folksongs and court melodies, as well as in the quodlibet. Among his polyphonic lieder the most prominent is the tenor cantus-firmus type with instrumental accompaniment, as practised from about 1500. There are few settings which appear to be intended exclusively for singing, for the style of the untexted parts suggests a distinctive character compared with those that have texts. To songs of this type belong the burlesque song *Es ging ein Landsknecht* and *Ihr Christen allgleiche*, which apply the technique of continuous imitation. The latter refers to the Turkish siege of Vienna in 1529.

OTHMAR WESSELY/WALTER KREYSZIG

Bruck, Charles (*b* Timişoara, 2 May 1911; *d* Hancock, ME, 16 July 1995). French conductor of Romanian birth. He studied at the Vienna Music Academy, and at the Ecole Normale de Musique in Paris under Perlemuter (piano) and Nadia Boulanger (composition). In 1934 he attended Monteux's conducting classes, and in 1936 won the conducting competition of the Paris SO and became its assistant conductor. After three years as head of the music department of the Ministry of Industrial Production, he held conducting posts with the Cannes and Deauville Casinos (1949–50), the Netherlands Opera (1950–54), the Strasbourg RSO (1955–65) and the Paris ORTF PO (1965–70). In 1970 he was appointed head of the Pierre Monteux School for Conductors and Orchestra Musicians in Maine, a post he held until his death. He made his American début in 1936, and conducted in numerous countries thereafter.

Although Bruck's preference was for the Classical and Romantic repertory, he conducted many contemporary works. He gave the first performances in France of Dallapiccola's *Ulysses*, *Il prigioniero* and *Requiescant*, Penderecki's *Passion according to St Luke* and *Dies irae*, Ligeti's Requiem, *Lontano* and *Atmosphères*, Lutosławski's Symphony no.2, and Janáček's *The Makropoulos Affair* and *Glagolitic Mass*. He also conducted the world premières of Prokofiev's *The Fiery Angel* (in concert form) and Xenakis's *Nomos gamma*. His success in contemporary music (he gave the premières of over 700 works) resulted from his flawless baton technique, his analytical skills and his understanding of the most widely differing styles. He possessed to a remarkable degree the ability to give a new work a clear outline even at its first playing.

CHRISTIANE SPIETH-WEISSENBACHER/CHARLES BARBER

Brucken Fock, Gerard(us Hubertus Galenus) von (*b* Koudekerke, Zeeland, 28 Dec 1859; *d* Heemstede, 15 Aug 1935). Dutch composer. A descendant of an old noble family, he grew up at Ter Hooge, near Middelburg, where he received music lessons from Abraham de Jong. Already during his youth he composed music and made drawings. He studied in Utrecht with Richard Hol (composition) and T.L. van de Wurff (piano); there he also came into contact with Julius Röntgen. He continued his studies in Germany with Friedrich Kiel, Woldemar Bargiel and Ernst Rudorff.

A number of his works appeared in print both in and outside the Netherlands. His piano works are clearly influenced by Chopin and Liszt; for this reason Grieg called him 'the Dutch Chopin'. Although his compositions sometimes show a lack of structure, they were generally well received. His oratorio *De wederkomst van Christus* made a great impression at the Amsterdam Concertgebouw in 1910. His three symphonies were successfully performed by conductors such as Willem Mengelberg and Wouter Hutschenruyter. Johan Wagenaar commented positively on his Requiem and Röntgen honoured him with three orchestral works based on his name, *Drei Präludien und Fugen auf GHGBF*. Von Brucken Fock was also a poet and a painter. Exhibitions of his drawings continued after his death.

WORKS
(*selective list*)

Choral: Kerstcantate, 1900; Paaschcantate, solo vv, chorus, str qt, org, 1901; Pinkstercantate, solo v, chorus, orch, 1902; De wederkomst van Christus (orat, Brucken Fock), 1906, rev. 1910; Requiem, chorus, orch, 1933
3 syms.: C, op.12; B♭, 1907–8; c♯
Other orch: Liederen van de zee, 1906; 9 suites, incl. no.5 'Bretonsche', 1933
Kbd: 5 moments musicaux, op.11, 1891; 224 preludes, 1886, 1890, 1891–5, 1924–31
Chbr music, songs

ALBERT CLEMENT

Bruckner, (Joseph) Anton (*b* Ansfelden, nr Linz, 4 Sept 1824; *d* Vienna, 11 Oct 1896). Austrian composer. One of the most innovatory figures of the second half of the 19th century, Bruckner is remembered primarily for his symphonies and sacred compositions. His music is rooted in the formal traditions of Beethoven and Schubert and inflected with Wagnerian harmony and orchestration. Until late in his career his reputation rested mainly on his improvisatory skills at the organ. As a teacher he communicated the contrapuntal system of Simon Sechter to a generation of Viennese students that included Felix Mottl, Heinrich Schenker, Franz and Josef Schalk and Ferdinand Löwe.

1. Early years: up to 1845. Bruckner's birthplace, the tiny village of Ansfelden, is situated on a fertile strip of land between the Danube and the foothills of Upper Austria. Although it has been almost absorbed by the 20th-century suburban expansion of Linz, in 1824 it was a farming community relatively isolated from the social and cultural activities of the provincial capital. Bruckner was the eldest of 11 children, of whom only five survived early childhood. His father, Anton (1791–1837), was the local schoolmaster, a position which included the responsibilities of organist and director of music for the village church; he supplemented the family income by playing dance music on the violin at local taverns. Bruckner began participating in the musical activities at an early age: late in life, reminiscing for his biographer August Göllerich, he recalled that, at the age of four, he had often been invited to perform on a miniature violin for the parish priest.

Bruckner must have shown talent because, in 1835, his parents sent him to study with his cousin Johann Baptist Weiss (1813–50), a schoolmaster's assistant and organist in the nearby village of Hörsching, which offered a somewhat more sophisticated musical establishment than Ansfelden. Little is known about Bruckner's studies with Weiss, although almost certainly they included thoroughbass. A first edition (1799) of Haydn's piano variations in F minor (HXVII:6) survives with both Weiss's and the young Bruckner's signatures, indicating that piano instruction included music by Haydn. Göllerich and Max Auer (E1922–37) reported that Weiss also introduced Bruckner to the scores of *The Creation* and *The Seasons*. The *Pange lingua* in C (WAB31), believed to be Bruckner's earliest surviving composition, may date from his time in Hörsching.

Studies with Weiss were brought to a premature close by the illness of Bruckner's father in autumn 1836, when Bruckner had to return to Ansfelden to help in the church, school and tavern. On 7 June 1837 his father died of what was referred to locally as 'schoolteachers' disease', described on the death certificate as 'lung fever and exhaustion' (euphemisms for alcoholism and overwork). Rather than allow her eldest son to bear the burden of supporting the family, Bruckner's mother persuaded Michael Arneth (1771–1854), prior of the Augustinian monastery of St Florian nearby, to admit him as a chorister. Many of the churches and schools in the vicinity, including those of Ansfelden, fell under the jurisdiction of St Florian, so it is not surprising that a widow with five children and no means of support would seek help there. Accepting the boy, whatever talent he may have been able to demonstrate, required some kindness on the part of the monastery: at the age of 13 Bruckner's voice was about to change.

Bruckner's first sojourn in St Florian lasted three years. If his Roman Catholicism had already been firmly established during his boyhood in Ansfelden, it was certainly reinforced here. The Baroque halls of the monastery were to be a source of spiritual strength and inspiration for the rest of his life. The church music repertory, compared with the amateur establishments of his early childhood, was vast and featured Austrian classical and pre-classical composers including Michael Haydn, the St Florian composer Franz Seraph Aumann (1728–97, whose music Bruckner admired), Albrechtsberger, Joseph Haydn and Mozart. Contrary to views expressed in much of the Bruckner literature, very little Renaissance and Baroque music (with the exception of that of Antonio Caldara) was performed at the monastery in those years. Bruckner's lifelong devotion to the music of Schubert can be traced directly to St Florian. Schubert's secular music had already been performed often at the monastery while he was still alive and continued to be actively cultivated during both of Bruckner's periods of residence there.

The choristers attended the local school, where records indicate that Bruckner was an excellent student, finishing highest in his class in 1839. He studied the violin with Franz Gruber, who had been a pupil of Beethoven's friend Schuppanzigh, and singing with another local teacher, Michael Bogner. It was his violin playing that earned him an extra year at St Florian after his voice had begun to change in 1839, but most important for his future career were lessons with the monastery organist Anton Kattinger (1798–1852), who was sufficiently impressed to allow him to serve as assistant at Sunday masses.

By autumn 1840 it was time to choose a career. Perhaps because he or his mentors lacked sufficient confidence in his musical abilities to trust his future to them entirely, it was decided that Bruckner should follow his father's profession. He spent the academic year 1840–41 taking teacher-training courses in Linz, where he also continued to study the organ, singing and the piano. His theory teacher was Johann August Dürrnberger (1800–80), whose *Elementar-Lehrbuch der Harmonie- und Generalbass-Lehre* was used as text; Bruckner's annotated copy survives. Other experiences included his first contact with important orchestral repertory; he is known to have attended, for example, a concert conducted by the Domkapellmeister Karl Zappe (1812–71) which included Weber's overtures to *Der Freischütz* and *Euryanthe* and Beethoven's Fourth Symphony.

In autumn 1841 Bruckner set out for his first teaching position. A ride on the horse-drawn train as far as Freistadt followed by a three-hour walk took him to the remote village of Windhaag in the Mühlviertal, where he remained as assistant schoolteacher for 16 months. The conditions of his employment were hardly more attractive than those of the journey to get there, although the severity of his circumstances was probably exaggerated by early biographers. Duties included teaching, assisting with the church music and helping out in the fields. Like his father, Bruckner supplemented his income by playing the violin at community festivities. The musical resources of the church were even more meagre than those at Ansfelden; the organ and a few amateur singers and instrumentalists were all he had to work with. An amelioration was the support of a local weaver, Johann Sücka, who placed the family clavichord at his disposal. Although his employer, Franz Fuchs, has often been pictured as unsympathetic, partly as a result of friction with Bruckner over farm work, he nevertheless provided a glowing reference when it was time for the young man to move on.

Bruckner remained in Windhaag until January 1843, when the intervention of Michael Arneth secured him a new position in the smaller, though more congenial, village of Kronstorf. He spent two relatively happy years there: he was closer to his beloved St Florian and within a few kilometres of the larger municipalities, Enns and Steyr. There were no onerous farm chores, and the schoolmaster Franz Seraph Lehofer indulged him in his musical endeavours. He allowed Bruckner to keep a clavichord in the schoolhouse (the living quarters were too small) where, according to anecdotes, he often practised until the early hours of the morning. From Kronstorf, Bruckner walked three times a week to Enns to study theory with the organist and choirmaster Leopold von Zenetti (1805–92), who was well versed in the music of Michael and Joseph Haydn, Mozart and Beethoven. Zenetti introduced Bruckner to Türk's *Kurze Anweisung zum Generalbassspielen* and *Von den wichtigsten Pflichten eines Organisten* as well as to Bach's chorales. A little further in the opposite direction from Enns was a fine organ by Franz Xaver Chrismann (who had also built the magnificent instrument at St Florian) in the Stadtpfarrkirche in Steyr. The composer valued his connection with Steyr throughout the rest of his life, and requested in his will that he be laid to rest there if arrangements could not be made at St Florian.

Whether or not the few compositions that survive from Bruckner's early years accurately reflect the quantity and quality of his output is not certain. Given the time-consuming nature of his employment and studies, it is doubtful that compositional activity could have been very extensive. An accurate assessment is complicated by questions of chronology, because many compositions that predate Bruckner's move to Linz in 1856 exist only in undated autograph parts. The only surviving composition from the Windhaag period is a Mass in C (WAB25) for alto solo, horns and organ. In Kronstorf he wrote at least two masses (WAB9 and 146), some small sacred pieces for mixed chorus and the secular cantata *Vergissmeinnicht* (WAB93). Bruckner's earliest surviving work for male chorus, *An dem Feste* (WAB59), was composed for the birthday of the pastor at Enns, Josef von Pessler, and first performed in his church on 19 September 1843. Although these early pieces contain occasional striking harmonic progressions, there is little in them to suggest that Bruckner was destined for a musical career any more distinguished than those of his Upper Austrian teachers Weiss and Zenetti.

2. ST FLORIAN, 1845–55. However contented Bruckner may have been in Kronstorf, St Florian remained the centre of his world and on 25 September 1845 he achieved an objective in assuming the position of assistant schoolteacher there. This time he remained at the monastery for ten years, adding to his duties in 1849 the responsibility of singing instructor for the choirboys. Throughout the entire period the careers of schoolteacher and professional musician continued to compete for his allegiance: he studied Latin and travelled to Linz for a variety of classes and examinations with a view to continuing his promotion through the instructors' ranks. Musically he matured from a provincial church organist to a virtuoso player, becoming provisory monastery organist in 1850 when his teacher Kattinger departed for Kremsmünster. He continued his theoretical studies with Marpurg's *Abhandlung von der Fuge*, copying fugues by Caldara, Mozart and Eybler among others, and began to cultivate an interest in the music of Mendelssohn, whose *St Paul* was an object of investigation as early as 1848. At the same time traces of his future greatness as a composer began to emerge.

Several local people exerted a positive influence on his musical career: the family of his superior, the schoolteacher Michael Bogner, to whose daughter Aloisia Bruckner was attracted, and for whom he wrote the piano piece *Steiermärker* (WAB122, *c*1850); the chorus director Ignaz Traumihler (1815–84), to whom he dedicated the *Magnificat* (WAB24, 1852), the *Ave Maria* of 1856 (WAB5) and later the *Os justi* (WAB30, 1879); and his close friend the monastery administrator Franz Sailer, who died on 15 September 1848 and in whose memory Bruckner composed his first notable work, the Requiem in D minor (WAB39), completed on 14 March 1849. Sailer bequeathed Bruckner the Bösendorfer piano which he used for the rest of his life. There was also Friedrich Mayer, who had arranged for Bruckner's return to St Florian in 1845 and who succeeded Michael Arneth as prior of the monastery in 1854. Bruckner composed his second important work, the *Missa solemnis* (WAB29), for Mayer's inaugural mass as prior, celebrated on 14 September 1854.

Other works from the second St Florian period include six *Tantum ergo* settings (WAB41, 42 and 44); the beautiful *Libera me* (WAB22) and *Vor Arneths Grab* (WAB53), both for the funeral of Michael Arneth in 1854; Psalms xxii and cxiv (WAB34 and 36); and a number of secular cantatas – occasional pieces for celebrations at the monastery. The psalms and cantatas for solo voices and chorus with different combinations of instruments demonstrate a strong Baroque influence, sometimes with more than a hint of Mendelssohn. The enormous Psalm cxlvi (WAB37) for double chorus, soloists and orchestra belongs stylistically with these pieces and the *Missa solemnis*, and probably dates from the late St Florian or early Linz years. Nothing is known about its origins or performance history.

As the 1850s progressed Bruckner became increasingly frustrated, both socially and musically, with St Florian (perhaps because his position as organist remained provisory), and he began to set his sights beyond the monastery walls. On 30 July 1852 he dedicated Psalm cxiv to the Viennese Hofkapellmeister Ignaz von Assmayr, with a request for help in finding a better situation. His dissatisfaction came to a head with his assignment to the servants' table at the banquet after the performance of his *Missa solemnis*. Still he did not place all his hopes on a musical future; as late as 28 January 1855 he passed the qualifying examinations for high-school teachers in Linz. That summer he applied in secret and unsuccessfully for the position of cathedral organist in Olmütz (now Olomouc). Friedrich Mayer is reported to have been so irate at learning of this attempt to leave the monastery that, when the post of organist at the cathedral in Linz became available later in the year, Bruckner did not apply for fear of arousing any further ire. He rushed to Linz only at the last moment, at the urging of a local organ tuner, Alfred Just, and had to be persuaded by his former teacher Dürrnberger to take part in the audition. Even after being awarded the position on a provisional basis on 13 November 1855 he was ambivalent about pursuing the permanent appointment. He was careful to secure a promise from Mayer to reserve the monastery post for him for two years.

3. LINZ, 1856–68. On the Feast of the Immaculate Conception, 8 December 1855, Bruckner performed his first mass as *Dom- und Stadtpfarrkirchen-Organist* in Linz and on Christmas Eve assumed full-time responsibilities. After he gained the permanent position with a second audition on 25 January 1856, school teaching was officially behind him. Bruckner now entered into a period which was in many ways the most stable and the most free from controversy of his entire career. Compared with the small towns of his early years, Linz was a metropolis of some 27,000 inhabitants. It had a theatre with an orchestra; an active church music establishment with a professional director; two men's choral societies, the Liedertafel Frohsinn and the Männergesang-Verein Sängerbund (established in 1857); and the amateur mixed chorus and orchestra of the Linzer Musikverein. His immediate superior was the Domkapellmeister Karl Zappe, a fine violinist and leader of a resident string quartet. His employer was Bishop Franz Josef Rudigier (1811–84), a man of extraordinary perspicacity and drive, who became one of Bruckner's most loyal and important benefactors. The lasting monument of his tenure as archbishop (1853–84) is the neo-Gothic Cathedral of the Immaculate Conception, begun as a result of his initiative and completed in 1924. Bruckner composed the *Festkantate* (WAB16) for the cornerstone-laying ceremony on 1 May 1862, and the Mass in E minor (WAB27) for the consecration of its votive chapel on 29 September 1869.

Much of Bruckner's time during his early years in Linz was probably absorbed by the new position, which required his performing services at both the cathedral (the Alter Dom) and the Stadtpfarrkirche; eventually he was able to persuade the diocese to engage assistants for some of the work. As early as July 1855 had begun a remarkable episode: a long period of study with the Viennese theorist Simon Sechter, during which Bruckner abstained almost entirely from composing. Already, at St Florian, Friedrich Mayer and the organist Robert Führer, while acknowledging Bruckner's talent as the composer of the *Missa solemnis*, had impressed upon him the need for more training in technique. The studies with Sechter began with elementary harmony and proceeded through four-part counterpoint to complex canon and fugue. They were carried on by correspondence punctuated by Bruckner's visits to Vienna; these increased in frequency and regularity with the bishop's blessing from 1858. Thousands of pages of exercises survive, testifying to Bruckner's diligence. In a letter of 13 January 1860 Sechter felt compelled to comment that he had never had such an industrious pupil and cautioned him against working too hard.

On 26 March 1861 Sechter signed a certificate declaring that Bruckner's instruction in harmony and counterpoint was successfully completed. A brief flurry of creative activity followed, including the composition of his first masterpiece, the seven-voice *Ave Maria* (WAB6), performed in the cathedral on 12 May 1861 at a celebration commemorating the founding of the Liedertafel Frohsinn. Later that year, consistent with his lifelong preoccupation with diplomas and official credentials, Bruckner petitioned the conservatory of the Gesellschaft der Musikfreunde in Vienna for permission to take an examination to assess his accomplishments in the hope of eventually obtaining a professor's title. The examination was arranged for 21 November in the Piaristenkirche, Vienna. Bruckner was asked to improvise a fugue, after which the Hofkapellmeister Johann Herbeck remarked, 'He should have examined us!' In addition to contributing to his legendary reputation as an improviser at the organ, the incident established Bruckner in Herbeck's mind as an Austrian musical force to be reckoned with.

By December 1861 Bruckner had again immersed himself in study – this time of form and orchestration – with Otto Kitzler (1834–1915), the cellist in Zappe's string quartet and conductor at the Linz theatre. Up to this time, with the exception of a few encounters with the works of Mendelssohn and Weber, for example, the repertory to which Bruckner had been exposed was relatively conservative. Until 1856 his own music had included figured bass parts (the *Ave Maria* with four-part chorus,WAB5, was the last score to do so), often with Baroque-like arias and recitatives, and his orchestral scores employed an antiquated order with the brass at the top. Kitzler must be credited with bringing Bruckner up to date with 19th-century musical practices and introducing him to the music of Wagner (specifically *Tannhäuser*, which Kitzler conducted in Linz on 13 February 1863). Before studying with Kitzler, so far as is known, Bruckner had not attended the theatre.

The studies with Kitzler continued until July 1863. J.C. Lobe's *Lehrbuch der musikalischen Komposition*, E.F. Richter's *Die Grundzüge der musikalischen Formen* and A.B. Marx's *Die Lehre von der musikalischen Komposition* were used for *Formenlehre*. Studies began with the structure of cadences and periods and continued through the forms employed by the Viennese classicists – two- and three-part song forms, dances, marches, minuets and trios, rondos, études and sonatas – and concluded with orchestration based on Marx. Written exercises were reinforced by analyses of the Beethoven piano sonatas. Once again the studies were rigorous and Bruckner applied himself with extraordinary zeal. Compositions that he wrote for Kitzler included the String Quartet in C minor (WAB111), the Overture in G minor (WAB98), the 'Study' Symphony in F minor (WAB99) and Psalm cxii (WAB35) for double chorus and orchestra. There is no evidence that after 1863 Bruckner ever regarded these pieces as anything but exercises. In his own words, his 'composition period' began with the completion of the Kitzler studies. He began numbering his masses with the D minor Mass of 1864 (WAB26) and the symphonies with the C minor Symphony no.1 of 1865–6 (WAB101).

Another important aspect of Bruckner's musical activities in Linz was his participation in the Liedertafel Frohsinn. He joined the chorus in 1856 as a second tenor and was twice its director: November 1860 to September 1861 and again from 15 January 1868 until his departure for Vienna later that year. Contemporary reports indicate that he was an exacting choral conductor, particularly fastidious about dynamics. Under his direction the Frohsinn achieved a number of critical successes, specifically in 1861 at the *Sängerfeste* in Krems (29–30 June) and Nuremberg (20–22 July). Why he resigned as director in autumn 1861 is not clear; in a letter of 3 October to his friend Rudolf Weinwurm he referred to unspecified 'nasty slanders'. Later he wrote several compositions for the choir, including *Inveni David* (WAB19), *Vaterländisches Weinlied* (WAB91) and *Vaterlandslied* (WAB92), and on 9 June 1869 – after he had moved to Vienna – he was named an honorary member. The Frohsinn was also an

1. Anton Bruckner: autograph studies in counterpoint, 1859–60 (A-Wn Mus.24260)

important social outlet for Bruckner, who was a frequent participant in its parties and excursions.

The first composition after the studies with Kitzler was *Germanenzug* (WAB70), a cantata for male voices (soloists and chorus) and brass, written during winter 1863–4 for a competition sponsored by the first Oberösterreichisches Sängerfest in Linz (4–6 June 1865). Much to Bruckner's chagrin his work was awarded only the second prize; his friend Rudolf Weinwurm's *Germania* was the winner. Now all but forgotten, *Germanenzug* enjoys the distinction of being Bruckner's first publication; it was printed in 1865 by the firm of Josef Kränzl in Ried as part of the competition prize. After *Germanenzug* there followed a series of works which moved Bruckner into the front rank of 19th-century composers: the Mass in D minor (June–September 1864), the Symphony no.1 in C minor (January 1865 – April 1866), the Mass in E minor (August–November 1866) and the Mass in F minor (September 1867 – September 1868). Bruckner conducted the première of the D minor Mass in Linz Cathedral on 20 November 1864 and the First Symphony in the Linz Redoutensaal on 9 May 1868. Johann Herbeck conducted the D minor Mass in the Hofburgkapelle on 10 February 1867, the first performance in Vienna of a work by Bruckner.

Meanwhile, Bruckner continued to cultivate his knowledge of and admiration for the music of Wagner, whom he came to refer to as the 'Meister aller Meister'. He heard *Der fliegende Holländer*, *Lohengrin* and *Das Liebesmahl der Apostel* in Linz and in May 1865 at Wagner's invitation, went to Munich for the scheduled première of *Tristan und Isolde* where he met his idol for the first time. When the May performances of the opera were cancelled, Bruckner returned to Linz for the première of his own *Germanenzug*, only to return to Munich for the opening of *Tristan* on 10 June. He is believed to have attended every subsequent Wagnerian première. On 4 April 1868, with Wagner's permission, he conducted the Liedertafel Frohsinn in the first performance of the closing chorus from *Die Meistersinger von Nürnberg*. Nor was his thirst for contemporary music confined to Wagner. On 15 August 1865 he was in Budapest for the first performance of Liszt's *Die Legende von der heiligen Elisabeth* and on 16 December 1866 he attended a performance in Vienna of Berlioz's *La damnation de Faust* conducted by the composer.

The Linz period was not without personal setbacks. On 11 November 1860 Bruckner's mother died. She had sacrificed a great deal by moving to Ebelsberg to work as a servant so that he could attend school at St Florian. Later, Bruckner had supported her financially whenever possible, and he kept her deathbed photograph with him for the rest of his life. Marriage was on his mind throughout much of the time spent in Linz, yet he was as

2. *Anton Bruckner, c1863*

unhappy there in affairs of the heart as he had been at St Florian. On 16 August 1866, in one of the rare emotional outpourings to be found in his letters, he proposed unsuccessfully to a butcher's daughter, Josefine Lang who, at 17, was less than half his age. The most serious crisis occurred in spring 1867; from 8 May until 8 August he was confined to the sanatorium at Bad Kreuzen as a result of a nervous breakdown. One of the symptoms was a number mania: he is reported to have counted such things as beads on necklaces, dots on clothes, windows in the town, leaves on trees and even stars. The specific cause of his collapse is not known, although overwork was certainly a factor. The stress of years of study followed by a period of intense compositional activity as well as the performances of the D minor Mass must have contributed to it. His failure to marry may also have been a cause of his breakdown.

Shortly after his release from Bad Kreuzen, disregarding doctors' orders, Bruckner began work on the Mass in F minor. It is clear that by that time he had become as uncomfortable in the provincial capital as he had been during his final days at St Florian. He began to look for a position elsewhere, though his ambivalence about actually making a move was reminiscent of the months immediately before going to Linz. He wrote to the Vienna Hofkapelle on 14 October 1867, the University of Vienna on 2 November and the Mozarteum in Salzburg on 29 March 1868. Strangely, he did not apply at first for the post of professor of harmony and counterpoint at the Vienna Conservatory, left vacant by the death of Simon Sechter on 10 September 1867. In May 1868 Johann Herbeck travelled to Linz to persuade Bruckner that he should consider it. Still he hesitated, in part because his income would have been lower than in Linz, and he wrote to Hans von Bülow in Munich about the possibility of an organ position there. Herbeck intervened again to sweeten the Viennese offer by adding organ teaching to the responsibilities at the conservatory and arranging for Bruckner to enter the Hofkapelle as an unpaid organist. Finally, on 28 June, after requesting that Bishop Rudigier reserve the Linz position for him as Friedrich Mayer had done at St Florian 14 years earlier, Bruckner committed himself to Vienna.

4. Vienna, 1868–96. Bruckner assumed his duties at the conservatory in October 1868 at a starting annual salary of 800 gulden and remained on the faculty until he retired in January 1891. Dürrnberger's harmony book, Sechter's *Die Grundsätze der musikalischen Komposition*, Marpurg's *Abhandlung von der Fuge*, and E.F. Richter's *Lehrbuch der Fuge* served as his texts, and Sechter's 'Fundamentalbasstheorie' provided the substance for the lectures. Student reminiscences report consistently that his subject matter was textbook harmony and counterpoint, not musical composition. During his conservatory years Bruckner held two other teaching positions: lecturer in harmony and counterpoint at the University of Vienna and piano instructor at St Anna's teacher-training college for women. Despite dogged opposition from the critic Eduard Hanslick, who was also on the faculty, Bruckner was appointed to the university in October 1875 after three unsuccessful applications. At St Anna's Bruckner suffered one of the most humiliating experiences of his career. He began as instructor at the school in autumn 1870 and was cited for disciplinary action in September 1871 after a complaint that he had improperly addressed some of the students. The education minister Carl Stremayr (dedicatee of the Fifth Symphony) ruled in Bruckner's favour and he was able to remain until 1874, when the position was given to Weinwurm in a bureaucratic reorganization.

As well as teaching, Bruckner was one of three organists in the Hofkapelle, where he performed until 1892, and was second singing instructor and vice-archivist between 1875 and 1878. Despite his unquestioned mastery of the organ (his reputation as an international virtuoso was established by highly acclaimed tours to Nancy and Paris in spring 1869 and London in July and August 1871) there are indications that he did not always perform the service music in a manner acceptable to his superiors. Perhaps he was more interested in improvising than in playing the prescribed pieces. Under Herbeck's successor as Hofkapellmeister, Joseph Hellmesberger, Bruckner often found himself demoted from High Mass to afternoon Benediction. The chapel afforded an occasional performance outlet for his compositions. The F minor Mass received its première with the Philharmonic Orchestra and the chapel choir in the Augustinerkirche in June 1872 (at Bruckner's own expense) and was performed in the Burgkapelle itself in 1873; it remained in the repertory along with the D minor Mass until the dissolution of the court in the 20th century.

Throughout Bruckner's years of service in Vienna, the Hofkapelle provided very little stimulus for composition; most of the important motets of the period – *Locus iste*, *Os justi* and *Virga Jesse floruit*, for example – were written for Linz or St Florian (though the last-named was first performed in Vienna). In fact, given the obligations of his various posts and the numerous private students, it

is surprising that he found any time to compose. In Vienna the symphony became the focus of his creative activity, starting with the so-called 'Nullte' (no.0), which he completed in Linz in September 1869. Speculation in early biographies that its autograph score (dated 24 January – 12 September 1869) is a revised version of the work is incorrect: it was originally entitled 'no.2' and composed after the First Symphony (1865–6). The designation 'Nullte' or 'zero' came to be applied because of the symbol 'ø' which Bruckner wrote on the manuscript during the 1890s to indicate that he had withdrawn ('annulliert') the work from the corpus of numbered symphonies. It is not known when Bruckner rejected it, although it must have been by the end of December 1873, when he completed the first version of the Third Symphony (which was always 'no.3').

The next symphonic effort was an aborted work in B♭, which survives only in sketches dated 29–31 October 1869. After a hiatus during 1870 and much of 1871, he returned to the genre with renewed vigour and completed a remarkable series of four symphonies in little over four years: no.2, October 1871 to September 1872; no.3, October 1872 to December 1873; no.4, January to November 1874; and no.5, February 1875 to May 1876. A rehearsal of the Second Symphony (originally entitled no.3 because the 'Nullte' was still no.2) with the Vienna PO conducted by Otto Dessoff in 1872 produced the verdict that it was too long, with the result that the performance was aborted. Once again Herbeck intervened, and the première took place a year later under the composer's direction on 26 October 1873. Reaction to this first Viennese performance of a Bruckner symphony was mixed.

In August 1873 Bruckner went to Marienbad (now Mariánské Lázně) for a vacation, taking advantage of the opportunity to visit Wagner in Bayreuth and secure his acceptance of the dedication of either the Second or the Third Symphony; Wagner chose the latter. Bruckner's continued allegiance to Wagner drew him painfully and irrevocably into the musical-political maelstrom that raged in Vienna for the remainder of the century. In Linz Bruckner had had a powerful ally in Hanslick, who thought he had found the contemporary symphonist so long absent from the Austrian scene. However, by the middle of the 1870s Bruckner's unabashed admiration for Wagner (and perhaps his repeated attempts to obtain a position at the university) turned Hanslick and his followers, Max Kalbeck and Gustav Dömpke, into vicious adversaries. In a segment of the press representing a combination of political liberalism and musical conservatism with Brahms as its idol, they vituperatively condemned what they described as the uncontrolled Wagnerism and decadence of Bruckner's 'music of the future'.

A revival of the Second Symphony on 20 February 1876 and a disastrous première of the 'Wagner' Symphony (no.3) in the Grosser Musikvereinssaal on 16 December 1877 acted as catalysts. Herbeck, who had arranged for the performance of the Third Symphony after the Philharmonic had rejected the work three times, was scheduled to conduct. He died on 28 October 1877, and Bruckner, never a successful orchestral conductor, was forced to take the podium. The orchestra was rebellious; the audience streamed out of the hall during the finale; and Hanslick wrote a blistering review. The only redeeming aspect of the evening for the composer was the presence in the audience of the publisher Theodor Rättig, who agreed, in spite of the débâcle, to print the work. Mahler (possibly with Rudolf Kryzanowsky) made the four-hand piano arrangement. Herbeck's death and the ill-fated Third Symphony performance were the culmination of a series of personal setbacks for Bruckner that began with the loss of his position at St Anna's. His letters from the middle of the decade contain the refrain familiar from his days at St Florian and Linz: he was alone in the face of adversity and misunderstanding. One mitigating factor was his promotion to paid membership in the Hofkapelle in January 1878.

The completion of the Fifth Symphony has been cited as the culmination of a major chapter in Bruckner's compositional history. In 1876 he entered a period in which he became preoccupied with revising earlier scores. Some pieces, such as the masses in D minor and F minor, were subject to a process of subtle 'fine tuning' with adjustments in part-writing and hypermetrical structures on the basis of analyses he had made of Beethoven symphonies and music by Mozart (especially the Requiem). The First Symphony underwent a similar 'rhythmic adjustment' in 1877. The Second, Third and Fourth were subject to more sweeping changes. In 1876 and again in 1877 Bruckner revised the Second in preparation for and probably as a consequence of the February 1876 performance. A series of rejections in Vienna and Berlin combined with the December 1877 disaster in the Musikvereinssaal prompted a dramatic series of alterations to Symphonies nos.3 and 4 between 1876 and 1878, including the composition of a new finale for the Fourth. He made further changes in the Third in preparation for the 1879

publication and continued reworking the Fourth during 1880. These and subsequent alterations obscured, until the publication of the first versions in Leopold Nowak's collected works edition, the gradual evolution of Bruckner's conception of the genre up to 1876.

In December 1878 Bruckner began his only mature chamber music composition: the String Quintet commissioned by Joseph Hellmesberger, who requested that its original scherzo be replaced by the Intermezzo (WAB113). The Quintet was the first of another remarkable series of works including the Sixth Symphony (September 1879 – September 1881), the Seventh (September 1881 – September 1883) and the Eighth (first version, July 1884 – August 1887), and the *Te Deum*, which he began in 1881 and, after an extended diversion for work on the Seventh Symphony, completed in March 1884. On 14 February 1883 work on the end of the Adagio of the Seventh was interrupted by news of Wagner's death. The closing bars with their magnificent horn outcry were his 'lamentatio' on the passing of the 'Meister aller Meister'. Bruckner had last seen Wagner in summer 1882 at the première of *Parsifal* in Bayreuth.

He made his final tour as an organ virtuoso in spring 1884, this time to Prague. The same year he was spurned by Liszt, to whom he offered to dedicate the Second Symphony during the latter's visit to Vienna in October. Bruckner was mollified a few months later when Liszt invited him in May 1885 to a performance of the Adagio of the Seventh Symphony in Karlsruhe. August Stradal reported that the relationship remained cool, in part because of Bruckner's outmoded dress and unsophisticated manners on the occasion. Yet when Liszt died in July 1886 Bruckner and August Göllerich attended the funeral in Bayreuth and, at the request of Cosima Wagner, on 4 August Bruckner performed at a Requiem in Liszt's honour, improvising on themes from *Parsifal*.

The middle 1880s began to bring Bruckner some of the renown as a composer which had so long eluded him. His Seventh Symphony was an overwhelming success conducted by Arthur Nikisch at its première in Leipzig (30 December 1884) and again in Munich under Hermann Levi (10 March 1885). Also in 1885 the String Quintet was performed in Munich and Cologne, and the Third Symphony in Amsterdam, Dresden, Frankfurt and The Hague and at the Metropolitan Opera House (conducted by Walter Damrosch) in New York. Despite Bruckner's fear that Hanslick would undo the accomplishments abroad, Hans Richter conducted the Seventh Symphony in Vienna on 21 March 1886. Hanslick's criticism notwithstanding, the performance was Bruckner's first success in the imperial city. Richter was able to report 'a radical about-face on the part of the entire Philharmonic Society regarding Bruckner'.

The socio-political climate had become more receptive to Bruckner, in part because Hanslick's musical conservatism and the political circles to which it appealed had come to be counterbalanced by the expanding Viennese Wagnerian movement and the pro-German groups where it found fertile ground. In the Academic Wagner Society Bruckner became something of a cultural *cause célèbre*. Young Wagnerites including Mahler, Wolf, Göllerich, Ferdinand Löwe and the brothers Franz and Josef Schalk became his staunchest supporters and were often responsible for the performance and promotion of his music. In large part through their efforts, more of his music appeared in print: the String Quintet in 1884, the Seventh Symphony and *Te Deum* in 1885, and the Third and Fourth symphonies in 1890 and 1889 respectively. With increased fame came honours: in July 1886 Bruckner was appointed a member of the Order of Franz Joseph and in November 1891 a lifelong objective was achieved when he received an honorary doctorate from the University of Vienna. Professor Anton Bruckner revised the First Symphony between March 1890 and April 1891 and dedicated it to the university as a token of his gratitude.

One major disappointment was the rejection of the Eighth Symphony by Hermann Levi in 1887. Levi had been one of Bruckner's most active and devoted supporters; among other things he arranged for the dedication of the Seventh Symphony – which he had conducted so successfully – to King Ludwig II of Bavaria. Bruckner's hopes for a Munich première of his new symphony were dashed when the conductor declined on the grounds that he did not understand the work. There is no truth in the story that Levi did not have the courage to tell the composer and asked Franz Schalk to inform Bruckner of his decision. Levi conveyed the news himself in what must have been a difficult letter to write on 7 October 1887. Bruckner recomposed the symphony between 1887 and 1890.

His final burst of compositional energy was focussed on the Ninth Symphony, which he had begun in 1887. He broke off in 1892 to compose his last motet, *Vexilla regis* (WAB51), *Das deutsche Lied* (WAB63) and Psalm cl (WAB38), and completed *Helgoland* (WAB71) in August 1893. He finished the first movement of the Ninth on 14 October 1892, the Scherzo on 15 February 1894 and the Adagio in November the same year. In 1895 he was given a small apartment in the Belvedere Palace, where he spent his remaining days wrestling with the finale. His maid reported that he was still trying to complete it on the day he died (11 October 1896).

In 1891 he had suffered a stomach disorder, the first in a series of debilitating ailments which, with few respites, rendered the last years of his life a constant struggle. By 1894 it was almost impossible for him to play the organ because of swelling in his feet; in April that year he was too ill to travel to Graz to hear the long-awaited first performance of the Fifth Symphony conducted by his pupil Franz Schalk. His lifelong religious fervour manifested itself at the end in the dedication of the Ninth Symphony to 'Almighty God' as well as in a regimen of prayer carefully recorded in his diaries. His funeral took place in the Karlskirche on 14 October and the following day, in accordance with his will, his remains were placed in the crypt under the great organ in St Florian. Thousands attended the procession to the Westbahnhof, among them Brahms, himself extremely ill, with whom something of a reconciliation had been effected after years of rivalry. At the entombment ceremony the organist Josef Gruber improvised on themes from *Parsifal*.

5. PERSONALITY. After Bruckner died the large number of obituaries reflected, not surprisingly, the polemics of late 19th-century Vienna with an extraordinary range of assessments of his personality and accomplishment. Admirers described him as an unpretentious, modest man and a 'daring innovator who shied away from no enterprise'. Detractors recognized his originality, yet found nothing of value in the work of a modest Viennese church musician 'who lived a solitary dreamlike existence

4. Anton Bruckner, 1894

without ambition' and who had been dragged into the limelight by an 'excessive Wagnerian cult'. To the outside world, both his and ours, Bruckner was an enigma; many of his actions were confusing and even contradictory. He was a solitary person more at home in rural Upper Austria than in the urban environments of Linz and Vienna. His provincial manners and dress were a source of bewilderment and amusement to his Viennese colleagues, and he often found himself the subject of caricatures and humorous anecdotes testifying to his lack of polish. The incident at St Anna's was a more serious manifestation of his awkward behaviour. His Roman Catholic faith was an important source of consolation and no doubt added to the attraction of the monasteries of St Florian, Kremsmünster and Klosterneuburg, which he visited more often as he grew older.

His repeated thoughts of marriage, even relatively late in life, reflect his disquiet at being alone. His few close friendships, as with Rudolf Weinwurm whom he met in 1856, were sincere and lasting, although interrupted by career moves from one locale to another. Contemporary reports from his early days in the Upper Austrian schoolroom describe him as a compassionate and well-organized teacher. There is no question about the admiration of his Viennese students, many of whom went on to have distinguished careers of their own. Their continued loyalty in the face of his, to their minds, often difficult and contrary behaviour over the texts they were publishing, is poignant evidence of his charisma and abilities as a teacher.

That Bruckner's mental stability was suspect on at least one occasion is verified by his period of confinement in the sanatorium at Bad Kreuzen in 1867. Throughout his life ample confidence in his musical abilities was counterbalanced by a nervous, introverted and often obsequious disposition. Perhaps his strongest endorsement of his own creative accomplishment was the will that he signed on 10 November 1893 bequeathing the autograph manuscripts of his most important compositions to the imperial library. Up to that time he had pursued his career with a professional caution which often demonstrated his insecurity. The ambivalence with which he approached the moves to both Linz and Vienna typifies a lifelong behavioural pattern.

His propensity for revising his own scores and his willingness to allow others to influence their content have also been interpreted as illustrative of his indecision and lack of confidence. It must be said that, however negative were the events to which he may have been reacting, his revisions demonstrate an inner logic and musicality which only a great composer could apply. Although he was often more than willing to accept the musical suggestions of others, to the best of our knowledge he never did so without careful scrutiny. He corrected and adjusted his students' arrangements of the Third and Fourth symphonies, for example, with a parental solicitude which they found pedantic. Sometimes another's contribution, such as Nikisch's famous cymbal crash in the Adagio of the Seventh Symphony, became part of his own vocabulary, as at the rehearsal letter 'U' in the slow movement of the first version of the Eighth.

Throughout his life Bruckner was preoccupied with financial security and the social stature which a doctorate or professorship would convey. His constant expressions of consternation over his financial position exceeded reasonable anxiety and, especially towards the end of his career, were not justified by his circumstances; he was not poor. Financial concerns pushed him to the limits of his physical and mental endurance: he held three positions simultaneously in Vienna and taught an untold number of private students. In many ways he was remarkably skilful at managing his career; twice, for example, he was able to persuade his former employers (the prior Mayer and Bishop Rudigier) to hold a position for him while he tried out a new one. As a public figure in Vienna Bruckner was able to accomplish a difficult balance between the roles of devoted imperial employee (textbook representative of the status quo) and avant-garde Wagnerian composer (resident symbol of a new world order). Many of the Wagnerian fundamentalists from whom he received the critical acclaim he desperately craved participated in a reactionary, pro-German, often anti-Semitic political fringe which was an embarrassment to the palace. The extent to which he actually supported their politics is not clear; so far as is known he never commented publicly on the issues beyond the selection of a number of patriotic German texts for his settings for male chorus, and his letters are remarkably non-committal. The frequently expressed view that he had no political awareness or that he did not know what was happening cannot be substantiated.

Bruckner left few clues as to his private thoughts and motivations. His surviving correspondence is not large by 19th-century standards and most of the letters are either terse and businesslike or replete with obeisant, not always diplomatic, gestures towards people of influence. They seldom offer a point of view on any subject other than to

lament his financial circumstances and complain about the lack of appreciation he sensed in those around him, or to express his gratitude to those who helped him. There is no question but that Bruckner was deeply hurt by the setbacks of the 1870s and the criticism of Hanslick, although at times one wonders, particularly with regard to Linz, where his situation was relatively secure and free of controversy, if he did not 'protest too much'.

6. Publication and reception history. Assessing the relative merits of Bruckner's various versions and searching for their raison d'être was a concern of Bruckner performers and scholars for most of the 20th century. The problem is twofold. He revised a number of his compositions, sometimes more than once, so that many are preserved in two or more manuscript versions. The masses and symphonies also appeared in printed scores, many of which differ yet again from any surviving manuscript. The precise nature of the involvement of the Schalk brothers, Ferdinand Löwe, Cyrill Hynais and Max von Oberleithner – all former pupils upon whom Bruckner relied for editorial assistance – in the publication of these scores is one of the thorniest source-critical problems of the 19th century. Controversy over the validity of 'first editions' over 'manuscript' versions lay at the heart of the Bruckner 'Streit' from the late 1920s to the 1940s and continues to haunt the composer's legacy. The issue has been complicated by the loss of most of the engravers' copies for Bruckner's first editions.

The two collected works editions – the first published from 1930 to 1953 and left incomplete by Robert Haas and Alfred Orel, the second begun in 1951 by Leopold Nowak – are based primarily on the manuscripts, although each addresses the question of versions with different strategies. In his editions of the Second, Seventh and Eighth symphonies, Robert Haas spliced together different manuscript versions to produce an ideal reading. His term 'Originalfassung' or 'original version' is misleading because his scores sometimes have little to do with the actual first versions by Bruckner. Haas's score of the Eighth Symphony, for example, mainly follows manuscripts of the 1890 revision. He used 'Originalfassung' to distinguish his 'manuscript' version from the first edition of 1892. Nowak criticized Haas's ideal readings as ahistorical and published editions based on distinct manuscript versions which Bruckner made at different points in his career. Nowak identified, for example, three such versions of the Third Symphony.

For both Haas and Nowak, establishing the unauthenticity of the early prints became almost an editorial first principle. In some cases it was an easy position to take: the first editions of the Sixth and Ninth symphonies had appeared in altered scores in 1899 and 1903 respectively, years after the composer's death. Scores published while Bruckner was alive were harder to discredit. A series of arguments, sometimes tenuous, were brought to bear to the effect that the composer, in some instances, had not known what was happening and, in others, had disavowed the work of his editors. The crowning piece of evidence was the instruction in Bruckner's will, that whatever had happened during his lifetime, he wanted the 'original' autograph manuscript versions he had left to the library to be printed after his death.

Alfred Orel, among others, and even Haas and Nowak came to realize that ignoring all the first prints was not prudent. After the 1884–5 successes of the Seventh Symphony, Bruckner hoped that extensive publication would cement his reputation and bring financial rewards. With his consent, the Schalk brothers and Löwe made reorchestrated and abbreviated arrangements of the Third and Fourth symphonies for publication, hoping perhaps to couch Bruckner's ideas in terms more accessible to the public. They admired him as a highly gifted symphonist on paper, but whose music was marred by simplistic orchestration, too much influenced by organ registration and not sensitive enough to the performing problems of a large ensemble. Although the extent to which Bruckner participated in making these arrangements at the outset is not clear, there is no questioning that, in the case of these two symphonies, he was well aware that they had been done and corrected them extensively. The engraver's copy for the 1890 edition of the Third Symphony (*A-Wn* Mus.6081) is full of Bruckner's emendations, and a photograph of the lost engraver's copy, similarly corrected, for Albert Gutmann's 1889 edition of the Fourth survives in the Vienna Stadtbibliothek. These readings must be regarded as Bruckner's last versions; accordingly, Nowak included the 1890 edition of the Third in his collected works and Haas, in 1944, after Orel had called attention to the existence of an engraver's copy of the Fourth, admitted that its reading should also be included in the complete edition. However, because the engraver's manuscript has since disappeared, this version has yet to be included in the collected works.

It has already been observed that the collaboration initiated with the students in 1887 was successful from the point of view of getting Bruckner's works into print. There is evidence, primarily in the correspondence of the Schalk brothers, that Bruckner's pupils began to grow impatient with the composer's 'tedious' corrections to their arrangements and began to exclude him from the publication process. Even the first prints of both the Third and the Fourth symphonies contain unauthorized alterations inserted after Bruckner had placed his imprimatur on the engravers' manuscripts. These alterations were removed from Nowak's edition of the last version of the Third Symphony. Towards the end of his life the students conspired to bypass Bruckner entirely. Perhaps the most striking case of Bruckner's loss of control over the publication process involved the Doblinger edition (1896) of the Fifth Symphony. The Schalks' letters provide incontrovertible evidence that they deceived the composer into believing it was the autograph version of the score which Franz Schalk conducted in 1895 and which they supplied to the engraver for the edition. The masses in E minor and F minor as well as the Eighth Symphony also went to the printer without Bruckner's supervision. Given the overwhelming evidence of unauthorized tampering with printed scores which appeared during the 1890s, for most of Bruckner's compositions, today the autograph manuscripts he gave to the library must be the measure by which issues of authenticity are judged.

The history of the first collected edition was marred by its association with the Nazi movement which endorsed it. Bruckner was one of Hitler's favourite composers; the correspondences between the careers of the two native sons of Upper Austria who had triumphed over the Viennese bourgeoisie were obvious. Bruckner's well-documented admiration for Wagner and his known association with ultra-nationalist predecessors of the Nazi party certainly contributed to his value in the cultural

propaganda of the Third Reich. As the 1930s progressed, justification for the new Bruckner scores came to resonate more and more with the racial theories of National Socialism: the first editions had been 'contaminated' by 'foreign' influences which had to be 'purged' in a 'purifying' process to reveal the true German genius which was Bruckner. Despite these underlying ideological biases, Haas's fundamental position regarding most of the first editions continues to be valid.

After World War II, public sentiment demanded the expurgation of Nazi influences. The Bruckner who emerged was something of an Austrian mystic, a genius and a simple soul who was, at times, psychologically unstable. Although the association of his music with the Third Reich militated against its acceptance in many parts of the world, by the 1970s it had found a home in the programmes of most major orchestras and choral societies. Scholarly interest followed slowly and was confined largely to Austria and Germany for most of the century. With international conferences in the USA (New London, Connecticut) in 1994 and England (Manchester) in 1996 the situation has begun to change in the English-speaking world.

7. Versions of the symphonies. Bruckner's symphonies can be divided into three groups. To the first may be assigned the two early symphonies from the Linz years: the 'Study' Symphony, sometimes referred to as no.00 (1863), and Symphony no.1 (1865–6). The second group includes the five symphonies composed after Bruckner's move to Vienna in 1868: the 'Nullified' or 'Nullte' Symphony in D minor (1869) and Symphonies nos.2–5 (1871–6). Completion of the contrapuntal Fifth Symphony, which testified to Bruckner's consummate mastery of all the technical aspects of composition, marked a watershed in his creativity. From 1876 to 1879 he paused to rework his music; there was a hiatus in the composition of symphonies while he revised nos.2–4. Then he composed the String Quintet (1878–9) and between 1879 and 1887 completed in unbroken succession the next three symphonies in the final group (no.6, no.7 and the first version of no.8) and began the Ninth.

It is noteworthy that Bruckner had already embarked upon an overhaul of the Fourth Symphony before Hermann Levi's rejection of the first version of the Eighth in 1887; therefore, the significance of the Levi episode for the later revisions remains controversial. Another sequence of revisions, of the First, Third, Fourth and Eighth symphonies, in the late 1880s and early 1890s slowed down composition of the Ninth so that its finale was unfinished at Bruckner's death. Symphonies nos.2–4 underwent considerable revision, resulting in multiple versions; by contrast, nos.5–7 were comparatively little revised and exist in only one version. There are two distinct versions of the Eighth (1887 and 1890) but only one of the Ninth. It is notable that in the last three symphonies (1883–96) the orchestra is enlarged to include Wagner tubas and in the last two the scherzo is placed before the slow movement (as in Beethoven's Ninth).

It is important to bear in mind that international success and recognition came late in Bruckner's life. Until the 1880s the symphonies were mostly unperformed and unpublished. The extent to which they remained unknown in the 19th century is revealed by the lack of performances (especially of the first versions): the 'Nullte', the Sixth (not given complete until 1899), the Ninth and the first versions of the Third, Fourth and Eighth symphonies were never played during the composer's lifetime. Also, Bruckner never heard the Fifth Symphony, except in a two-piano arrangement. The second performance of the Seventh Symphony (Munich, 10 March 1885), conducted by Levi, was one of Bruckner's first unequivocal triumphs and important for the wider dissemination of his music. The *Berliner Tageblatt* critic summed up the general reception when he wrote (10 August 1885) that Bruckner 'beguiled us all so that when the last chord of his creation died away, we asked with amazement: how is it possible that you remained unknown to us for so long?'

The two versions of the First Symphony elegantly straddle Bruckner's symphonic output. The first ('Linz') version was composed in 1865–6 (edited by Robert Haas in 1935 and by Leopold Nowak in 1953) and reworked and reorchestrated in 1890–91, during Bruckner's last creative period, to celebrate the granting of the honorary doctorate by the University of Vienna in 1891. It is notable that Bruckner confined his revisions to reworking the texture and orchestration in accordance with his own ideas concerning consecutives (see §8 below). The first printed edition (supervised by Cyrill Hynais) was published during Bruckner's lifetime (1893), but the *Stichvorlage* (engraver's copy) has disappeared and it is impossible to verify which of its variants from the 'Vienna' manuscript (*A-Wn* Mus.19473) originate directly from the composer.

The Second Symphony exists in at least three versions. The first was completed in 1872 and Bruckner revised it in 1873, 1876, 1877 and 1892. The editions of 1938 (Haas) and 1965 (Nowak), which purportedly presented the 1877 version, actually conflated elements of the earlier and later versions. The first edition, published by Doblinger in 1892, used the copyist's manuscript (*A-Wn* Mus.6035, one of the copy scores owned by Bruckner) as a *Stichvorlage*.

One of the many remarkable features of the Second Symphony is the extensive use of rests between main formal sections, for which the work was nicknamed (not entirely in a friendly manner) the 'Symphony of Rests' (*Pausensymphonie*). Using Bruckner's metrical grids (see §8 below), research has shown that the cuts and 'tightening', particularly of the rests in the later versions, were made by Bruckner (not by the conductor, Herbeck) to make the music fit the grid. The main cuts indicated by Bruckner in 1877, preserved in the first edition, concern the approach to the final cadence and the coda in the finale. Bruckner cut the citation of the Kyrie of the Mass in F minor in bars 540–62, probably because he felt it was redundant after the citation in bars 200–19. The original coda twice completes a cycle through related material; Bruckner eliminated the first cycle as redundant.

There are three distinct versions of the Third Symphony. Bruckner completed the first version in 1873 (ed. Nowak, 1977). The second version exists in no less than three phases. In 1876 Bruckner revised the symphony rhythmically and reworked the Adagio (ed. Nowak, 1980). Between May 1876 and 25 April 1877 Bruckner made substantial revisions to the entire symphony. He further revised the Adagio in October 1877, and in January 1878 added two bars to the first movement and modified the Scherzo, including the addition of a new coda. In 1948 the autograph score of the first three movements of the 1876–8 version (including the October 1877 Adagio),

which Bruckner had given to Mahler, was acquired by the Österreichische Nationalbibliothek. In 1981 the 1878 score was published by Nowak, who incorrectly identified it as the 1877 version. In 1950 Fritz Oeser's new edition of the first print was published as the 'Second Version of 1878'. This also is misleading because the first print was not published by Theodor Rättig until 1879. It contained the third and last stage of the second version of the symphony. Perhaps the most important difference between the Mahler manuscript and the printed edition are the cuts indicated (with 'Vi-de' signs) in the recapitulation of the finale at bars 379–432, eliminating the first theme group, and bars 465–514, removing the second part of the second group and the first part of the third. Another cut, in the development (bars 283–96), was indicated by Bruckner in his copy of the first print. These cuts, already suggested by Bruckner in 1879, were later incorporated into the third version (1887–9), which served as the basis for the first printed edition (1890; the 1889 *Stichvorlage* was edited by Nowak and published in 1959). For this last revision, Bruckner used a score of the finale prepared by Franz Schalk. It is interesting that he rejected, early in the revision process, the single passage where Schalk had introduced a substantial recomposition of his own. Perhaps at Bruckner's request, Schalk tried to abbreviate the final appearance of the principal theme in the third group (Nowak, 1959, bars 393–441); but Bruckner was clearly unhappy with Schalk's rather tame and incoherent 27-bar version of this crucial climax, and on 15 March 1890 sketched his own 44-bar reading of the climax, which became the final version.

The Fourth Symphony, like the Third, exists in three distinct versions. The first was completed in November 1874 (ed. Nowak, 1974). In 1878, Bruckner 'tightened up' the first two movements, revised the finale (now entitled 'Volksfest') and replaced the original scherzo with a new movement designated 'Jagd-Scherzo' (ed. Haas, 1936, Nowak, 1953 and 1981). In 1880 Bruckner substantially recomposed the finale (ed. Haas, 1936 and 1944, Nowak, 1953). The 'second' version, comprising the first three movements of 1878 and the finale of 1880, was given its first performance by the Vienna PO, conducted by Hans Richter, on 20 February 1881. After this performance, Bruckner unsuccessfully attempted to get the symphony published. In undertaking the third and final revision, Bruckner was assisted by Ferdinand Löwe and probably by the Schalk brothers. The new score – which may have contained further unauthorized revisions by the pupils – was eventually published by Gutmann in September 1889. Of the changes between the second and third versions, those concerning the structure of the scherzo and the finale, and the orchestration, are the most significant. In the finale, the recapitulation of the first group was removed, necessitating a new transition from the development to the reprise of the second group. That Bruckner sanctioned this large cut is revealed by his metrical numbers at the affected place in the *Stichvorlage*. The third version was first performed on 22 January 1888 (again with Richter). Based on his experience of this performance and in accordance with his ideas concerning consecutive octaves, extensive revisions to the pupils' reorchestration were made by Bruckner in February 1888. It is interesting that shortly afterwards, in March, Bruckner was already revising the *Stichvorlage* of Schalk's arrangement of the finale of the Third Symphony. A larger picture emerges: in 1887–8, Bruckner extensively 'regulated' (his word) the pupils' reorchestrations of the third versions of the Third and Fourth symphonies.

The Fifth Symphony exists in essentially one version which is authentic (ed. Haas, 1936, and Nowak, 1951). Bruckner's manuscript (*A-Wn* Mus.19477) contains both the first version (completed in 1876) and a slightly later revision (completed in 1878). Franz Schalk made an arrangement (1892–3), which formed the basis for the first printed edition (1896). Since Schalk's *Stichvorlage* is lost, there is no way of knowing whether Bruckner saw the Schalk manuscript and corrected it. It is likely that the kind of collaboration with Schalk that had taken place with the arrangements of the Third and Fourth symphonies did not occur in 1892–3 because by that time Bruckner had become suspicious of his collaborators. The letters between Franz and Josef Schalk reveal that from 1892 they conspired to publish and perform Franz's arrangement while convincing Bruckner that it was his own version which was being reproduced.

The Sixth Symphony exists in only one authentic version (ed. Haas, 1935, and Nowak, 1951). It appears that Bruckner wanted the original manuscript to serve as the basis for the edition since he lent it to the publisher Eberle. An annotation on the wrapper in the hand of Cyrill Hynais – 'Original [manuscript]. Returned into my hands after typesetting.' – is signed by Bruckner and witnessed by Hynais. It seems that the manuscript had been sent to the printer under Hynais's supervision and returned safely to the composer. Since Bruckner's signature is shaky, presumably from illness and old age, one suspects that these events date from the last few years of his life, perhaps even from early 1896. But in spite of its trip to the typesetter, the Sixth Symphony was not published until 1899, in an arrangement by Hynais. Hynais's *Stichvorlage* for the edition surfaced during the 1940s before disappearing again; Alfred Orel, who had the opportunity to study it, reported that Bruckner's handwriting did not appear anywhere in the manuscript. This suggests that Hynais made his arrangement without any involvement by Bruckner, probably after the composer's death; it is therefore unauthentic.

The Seventh Symphony probably existed in three distinct versions. The original version dates from 1881–3. A second version resulted from changes apparently made in preparation for the first performance, conducted by Arthur Nikisch on 30 December 1884. In a letter written shortly before the première, Nikisch told Bruckner that 'in certain places you will have to change the instrumentation, because it is written impractically and does not sound good' (21 December 1884). The third version resulted from revisions made in January 1885. They were suggested by Josef Schalk and Löwe, who went through the score with Bruckner and discussed further improvements to the instrumentation. However, since these seem to have been relatively minor changes, and no cuts were involved, the revisions were entered directly into the manuscript with paste-overs and erasures rather than into a copy score. The autograph (*A-Wn* Mus.19479), incorporating the changes, then served as the *Stichvorlage* for the printed edition, published by Gutmann in December 1885 (this is the only case where a Bruckner autograph was used as the *Stichvorlage* for the first edition). Haas, in the first collected edition (1944), tried to restore the piece to its 'original' state, presumably to the reading

before the changes made for the first performance. Nowak, on the other hand (1954), incorporated the revisions suggested by Nikisch, Schalk and Löwe as sanctioned by Bruckner. Since the tempo indications were probably Bruckner's (conveyed to Nikisch in preparation for the première), Nowak included them in parentheses.

There are two authentic manuscript versions of the Eighth Symphony: the first from 1887 (ed. Nowak, 1972) and the second from 1890 (Nowak, 1955). The first printed edition (1892), based on Bruckner's 1890 version, was supervised by Max von Oberleithner working in consultation with Josef Schalk. The *Stichvorlage* for the first print is lost; it is therefore impossible to ascertain whether the variants between Bruckner's 1890 score and the first edition were authorized by him. Probably they were not, since by that time the Schalk brothers and Oberleithner had already distanced Bruckner from the publication process.

Like his edition of the Second Symphony (1938), Haas's version of the Eighth (1939) conflates two versions. For the most part, he followed the second (1890) score, but he restored passages from the first version where he felt that Josef Schalk had given Bruckner poor advice and the 1887 reading better reflected the composer's original intentions. Although Haas's method of splicing disparate sources now seems untenable, Deryck Cooke (G1969, pp.480–82) supported Haas's restorations and criticized Nowak for following Bruckner's 1890 treatment of the 'Gesangsgruppe' (see §9 below) in the exposition and recapitulation. Cooke was troubled because the 1890 version includes a reminiscence of the Seventh Symphony in the exposition (Nowak, 1955, bars 85–98) but not in the recapitulation (bars 563–6). In the course of preparing the first edition, Josef Schalk asked Oberleithner to make a cut in the exposition so that the citation would be eliminated in both places. According to Cooke,

> in making the cut in the exposition [Schalk] did show that he cared about the 'balance of motives', whereas Nowak, by leaving out what Bruckner and Schalk had cut in the recapitulation and keeping in what Schalk had cut of his own accord in the exposition [in the first edition], achieved only a piece of musicological pedantry which makes no structural sense at all.

But Nowak was fully justified in following Bruckner's 1890 cut: in 1877 Bruckner had made a similar cut in the finale of the Second Symphony, when he kept the first citation of the Kyrie, in the exposition, but removed the second (presumably redundant) from the recapitulation.

The Ninth Symphony, like the Fifth and Sixth, has been published in only one authentic version (ed. Orel, 1934, and Nowak, 1951). The first edition (1903), based on an

5. Autograph MS of part of the second movement (bars 177–80) of Bruckner's Symphony no.7, first performed in Leipzig, 30 December 1884 (A-Wn Mus.19479); it is disputed whether or not the instruction to the timpani, triangle and cymbals to play at the climax is in Bruckner's hand

arrangement by Löwe, was probably not sanctioned by Bruckner. In addition to making cuts and reorchestrating the work, Löwe toned down the dissonance of the original. For example, at the climax of the Adagio (bars 205–6), Bruckner's score presents a seven-note dominant 13th chord of C♯ minor (G♯–B♯–D♯–F♯–A–C♯–E); Löwe apparently found it too harsh and in his version eliminated the dissonant 11th and 13th (C♯–E).

To what extent did Bruckner complete the finale of the Ninth Symphony? The answer to this question is much more problematic than in the case of Mahler's Tenth Symphony. Mahler drafted almost all of his last symphony in one continuous short score which could be orchestrated by others. Bruckner, on the other hand, especially in his late period, tended to work in a more piecemeal way, sometimes drafting sections of music directly into full score several times before continuing with composition. Marianna Sonntag has observed (H(iii) 1987) that, in composing the first movement of the Ninth Symphony,

> in general, [Bruckner] evidently did not establish an over-all structure for the piece, at least not on paper, but composed one section at a time, systematically completing one before moving on to the subsequent passage.

Dr Heller, Bruckner's physician during his last years, reported a similar kind of sectional approach:

> then [Bruckner] sat at the piano and played for me with trembling hands, but correctly and energetically, parts [of the Ninth Symphony's Finale] . . . Although he was really weak, I often begged him to write down the symphony in its main ideas, but he was not to be moved. Page by page, he composed the whole instrumental realization.

The sketches for the last motet, *Vexilla Regis* (1892), show a similar process of drafting the piece phrase by phrase.

Research has suggested that in spite of this sectional approach Bruckner had progressed considerably further with the composition of the finale than Orel, in the early 1930s, recognized; indeed, it has been shown that the incompletely preserved sources contain a rough draft for the whole movement – though with unfortunate lacunae – to the end of the coda. Bruckner began composing the finale in May 1895 and, although gradually becoming weaker, he continued to work on it from January to May 1896. In drafts dated 19 and 23 May 1896, he set down the main outlines of the final cadence and then began to revise the movement's earlier sections. An article that appeared in the *Steyrer Zeitung* (10 May 1896) reported that he 'has already completely sketched [*vollständig skizziert*] the final movement of his Ninth Symphony but, as he himself told [his friend, the choral conductor from Steyr,] Mr. Bayer, no longer believes that he will be able to work it out completely'. There are gaps in the draft because of lost pages and the sketch itself is 'not completely worked out' (as Bayer stated).

During the last three years of his life, distracted by illness and preoccupied with new projects, Bruckner realized that he had lost control of the publication of his music. As a consequence, he became increasingly suspicious of the Schalk brothers and Löwe, and concerned – with good reason – that the published versions did not represent his final intentions. The making of his will (10 November 1893), in which he declared his intention to lend the original manuscripts ('die Originalmanuskripte') of his most important works to the imperial library and asked that they serve as the basis for publications by the firm of Eberle, may be taken as an indication of his lack of confidence in the published scores. Are we to assume from the stipulations in the will that in 1893 Bruckner reconsidered the 1889 version of the Fourth Symphony? Did he want the 'original manuscript' of the 1878–80 version (*A-Wn* Mus.19476), which he lent to the library, to be the definitive reading? Without more evidence, the question must remain.

To summarize: the versions of the symphonies which Bruckner regarded as definitive at the time of his death are preserved in a combination of autographs and copy scores. When Bruckner accepted the suggestions of others, he made them his own. His extensive involvement in the pre-publication revisions of the Third, Fourth and Seventh symphonies – his 'regulation' of their orchestration – suggests that the readings preserved in the *Stichvorlagen* when they left Bruckner's possession are his final readings. The last authentic versions of the symphonies are as follows:

No.1: *A-Wn* Mus.19473, autograph of the 'Vienna' version completed in 1891 (ed. Nowak, 1980).
No.2: *A-Wn* Mus.6015, copy score of the 1877 version.
No.3: *A-Wn* Mus.6081, copy score of the version completed in 1889 (ed. Nowak, 1959).
No.4: *A-Wst* M.H.9098/c, photograph of the 1889 copy score; or, because of Bruckner's instructions in his will, the 1878–80 autograph *A-Wn* Mus.19476.
No.5: *A-Wn* Mus.19477, autograph of the version completed in 1878 (ed. Nowak, 1951).
No.6: *A-Wn* Mus.19478, autograph, completed in 1881 (ed. Nowak, 1951).
No.7: *A-Wn* Mus.19479, autograph, including the changes made for the 1885 publication (ed. Nowak, 1954).
No.8: *A-Wn* Mus.19480, autograph of the version completed in 1890 (ed. Nowak, 1955).
No.9: *A-Wn* Mus.19481, autograph of movements 1–3 and draft of finale, 1896 (ed. Nowak, 1951, excluding finale); finale reconstructed by J.A. Phillips (Vienna, 1994).

8. Metrical and part-writing theories, composition and revision processes. Bruckner is one of the few front-rank composers to have adopted an analyst's perspective vis-à-vis his own and other composers' music. Although the literature has focussed on his 'obscurantist' side – his religiosity and mysticism – there was a profoundly rational and analytical aspect to his thinking, intimately connected with his composition and revision processes. From 1875, when he initiated his campaign to make music theory a university subject and undertook the first thorough overhaul of his symphonies and masses, Bruckner became increasingly concerned with demonstrating the 'scientific' aspects of harmony, part-writing and metre, and with testing or 'regulating' (his term) the correctness of his own and other composers' music from a theoretical perspective. From about 1876 or 1877, with regard to pitch, Bruckner became interested in the problem of doubling; namely, when does momentary doubling constitute parallel octaves? About the same time, he began to use the 'metrical grid', which systematically analyses the phrase structure of a whole piece, and he continued to employ it to the end of his career, while both composing and revising his music.

One can distinguish two different types of metrical analysis: the first concerns the composition's large-scale durational proportions, while the second tracks the lengths of phrases and the emphases of given bars within phrases. The sketches for the Mass in F minor, from 1867–8, bear witness to the first type of durational analysis; these comparatively early sources reveal Bruckner

counting the number of bars in large sections of music (fig.6). Many later manuscripts contain the so-called metrical numbers, which represent the number of bars in phrases. By 1872, Bruckner was already employing the numbers in a few places while composing. These early analyses tend to be mechanical and even at odds with the music, but by 1876 his use of the grid had become systematic. By the time of his first revision period he had become deeply concerned with rhythmic problems and with achieving an absolutely accurate conception of the rhythmic structure of his works.

From about 1888 Bruckner was prepared to go to great lengths in the pursuit of 'correct' part-writing in an orchestral context; indeed, in order to ensure that his orchestrations met his stringent test for correctness, he was willing to delay still all-too-rare orchestral performances and to pay for expensive recopying of parts. After the first performance of the new arrangement of the Fourth Symphony on 22 January 1888, Bruckner's dissatisfaction with consecutives prompted him to revise the orchestration immediately (in February). As the score was 'regulated' and the unwanted consecutives were eliminated, Bruckner carefully kept note of the revisions in his pocket calendar. The issue of proper part-writing had become so important to him that, in preparation for the next performance (conducted by Levi), he paid for the recopying of the parts. Two years later, for the same reason, he took back the score of his First Symphony from Richter and the Vienna PO; its revival was delayed for a year to allow Bruckner to correct the part-writing. In the 'Vienna' version (1891) Bruckner dispensed with the services of his students and regulated the part-writing with the utmost care himself.

Some scholars have awarded the Schalk brothers and Löwe the title of 'collaborators', arguing that Bruckner asked them to help him reorchestrate the Third and Fourth symphonies because he lacked their practical experience. Without denigrating their musicianship (which was, by all accounts, formidable), it is unlikely that Bruckner considered them his superiors in the art of orchestration; on the contrary, in seeking their help with the revision of the Third and Fourth symphonies, he allowed them to assist in the preparation of the score and then carefully revised what they had done in light of his own theories of correct orchestral part-writing. Until Bruckner's theoretical concern with the issue of consecutives is fully understood it will not be possible to explain the rationale for his revisions of his assistants' reorchestrations of the Third and Fourth symphonies and his dissatisfaction with their work, so that he subsequently attempted to prevent any other unauthorized revisions. Furthermore, an understanding of the significance of Bruckner's concern with consecutive octaves will illuminate his late orchestral style and extensive use of part-writing diagrams in the post-1890 manuscripts.

6. Autograph score, with revisions from 1881, of the Credo from Bruckner's Mass in F minor (A-Wn Mus.19479)

9. FORM, LARGE-SCALE HARMONY AND THE REVISIONS. Bruckner's pupil Carl Hrubý recounted important comments regarding his teacher's formal-harmonic innovations and their relationship to the Viennese tradition. After a performance of Beethoven's 'Eroica', a symphony which Bruckner revered and had studied closely (especially its metrical and orchestral part-writing aspects), Hrubý recalled:

> After he had spent a while sunk in thought, his gaze as it were turned inwards, he suddenly broke the silence: 'I think, if Beethoven were still alive today, and I went to him, showed him my Seventh Symphony and said to him, "Don't you think, Herr von Beethoven, that the Seventh isn't as bad as certain people make it out to be – those people who make an example of it and portray me as an idiot – " then, maybe, Beethoven might take me by the hand and say, "My dear Bruckner, don't bother yourself about it. It was no better for me, and the same gentlemen who use me as a stick to beat you with still don't really understand my last quartets, however much they may pretend to"'.

After apologizing to Beethoven's shade for 'going beyond' him in terms of form, Bruckner asserted that he had 'always said that a true artist can work out his own form and then stick to it'. These comments not only document Bruckner's assimilation of the formal innovations of late Beethoven, they also reveal that he consciously 'went beyond' them.

After completing harmony and counterpoint studies with Simon Sechter, Bruckner nevertheless felt that his grounding in practical compositional matters remained incomplete; he had acquired from Sechter a solid technique, but he turned to the conductor and cellist Otto Kitzler for instruction in form and orchestration. With Kitzler, the investigation of sonata form began logically with short first groups and proceeded to first groups with bridge sections, lyrical second groups (*Gesangsgruppen*) and short closing sections. It is noteworthy that Bruckner considered sonata form to comprise essentially two (rather than three) large spatial units, whereby the exposition is one element and the development and recapitulation together form the other. He retained this way of thinking until the end of his career, still referring to the development and recapitulation in the first and last movements of his Ninth Symphony as the second part ('2. Abtheilung'). Bruckner repeated the exposition in the first movement of the String Quartet and in the 'Study' Symphony. But, interestingly, as early as the First Symphony (begun in 1865), Bruckner abandoned the repeated exposition and did not employ it again in his later symphonies.

The ideal of the Classical sonata in practice (in the works of Haydn, Mozart and Beethoven) had been dynamism: the music evolved both tonally and motivically to create the effect of goal-orientated forward motion. This dynamism was created both by harmonic motion and logical motivic transformation. But in the later 19th century, sonata form became increasingly segmented or sectionalized into comparatively stable and self-contained thematic-harmonic units. (Perhaps this tendency towards sectionalism combined with sometimes awkward harmonic stasis resulted from the codification of sonata form by theorists in their mid-century *Formenlehre* treatises.) In the later versions of his symphonies, Bruckner sought to counteract such stasis by restoring the dynamic continuity that had characterized the Classical symphony. His revisions were focussed on improving transitional or linking passages to create greater synthesis and dynamism; more rarely they involved changing the primary thematic materials themselves. Comparing the 1874 and 1878 finales of the Fourth Symphony, for example, reveals that the main themes in their particular sequence and keys remained fixed, while the intermediary passages were substantially recomposed to increase continuity. The same process underlies the 1890 version of the Eighth Symphony: the main ideas were unchanged, but the transitional passages were tightened or cut.

Bruckner's imaginative unorthodoxy with regard to the key schemes of his sonata form was already apparent in the works composed for Kitzler and continued through to the late works. A typical strategy was to present the *Gesangsgruppe* in an unexpected key, which then fails to set up the 'redemptive' tonic at the parallel place in the recapitulation. For example, in the Third Symphony, in D minor, the second theme in the exposition of the finale is presented in the unexpected key of F♯ major (♯III/D minor, 1873 score, bars 65ff) instead of the conventional F major (III/D minor). Furthermore, when the *Gesangsgruppe* is restated in the recapitulation, it does not appear in the tonic but rather is transposed to the even more distant key of A♭ major (♭V/D minor, 1873 score, bars 537ff). In this version of sonata form, where the recapitulation fails to secure the tonic, the form's inability to achieve tonic closure sparks a crisis in the 'redemptive' symphonic narrative: the pilgrimage is endangered and promised redemption threatened. Only in the coda, which remains outside the sonata space proper, can the triumphant tonic be reasserted and, in terms of the narrative, bring about salvation: hence the considerable importance of the coda in a Bruckner symphony.

It is widely believed that Bruckner made large cuts in the later versions of his symphonies to conform to the contemporary Viennese taste for shorter works. Certainly he was sensitive to critics who, like Brahms, had condemned his works as 'symphonische Riesenschlange' ('giant symphonic serpents'). For example, in an attempt to obtain a performance of the first (1873) version of the Third Symphony, Bruckner even proposed splitting the work between two concerts (letter to the Vienna PO, 8 January 1875). However, it can be strongly argued that his cuts, which decisively affect the large-scale form, the harmony and the symphonic narrative, were made for more fundamental compositional, theoretical and aesthetic reasons.

Bruckner employed sonata form, expressively transformed, in the outer movements of all his symphonies except the 'Nullte', which has a finale in rondo form. In the final versions of the outer movements of the symphonies and the String Quintet, Bruckner's larger tonal-narrative strategy was to achieve 'redemption' in the coda of the finale by deferring the full force of the tonic until that point. Reversing the recapitulation – as in the finales of the String Quintet and the Seventh Symphony – can postpone the definitive return of the tonic associated with the primary theme group until the end of the movement. Similarly, cutting the recapitulation and eliminating the tonic reprise of the first group, or both the first and the second groups (as in the last versions of the finales of the Third and Fourth symphonies), is associated with postponing the definitive arrival on the tonic until the third group, or the coda.

Another aspect of Bruckner's formal innovations that upset the normative sonata paradigm is the 'breakthrough' technique. A striking example is provided by the first

movement of the First Symphony. Here the music appears to follow the three-group expositional pattern established by the first movement of the earlier 'Study' Symphony: in bars 94–100 Bruckner interpolated a completely new, unexpected melody in the trombones accompanied by filigree passage-work in the upper winds (evoking the chorale in *Tannhäuser* and betraying Wagnerian impulses). Playing through the score in 1865, Hans von Bülow remarked, 'This is dramatic!', to which Bruckner replied, 'Ah, that's just it!' The entire passage is ultimately revealed to be completely extraneous to the sonata form since it does not recur in the recapitulation; instead, Bruckner drew upon the breakthrough material for the music of the first section of the development. The concept of the breakthrough is intimately connected with the epiphanic-revelatory connotations of the chorale. A clear example of the interrelatedness of the breakthrough and the chorale is provided by the finale of the Fifth Symphony (1876), where the chorale theme 'breaks through' at the end of the exposition space (bars 175–200), inserting itself into the exposition's third group.

With regard to the inner movements of Bruckner's symphonies, the slow movements are often the most popular and considered the most accessible (the Adagio of the Seventh Symphony made Bruckner famous). In the two unnumbered symphonies and in nos.1–7 Bruckner placed the slow movement second (at one point, while composing the Second Symphony, he considered putting the Andante after the Scherzo, but rejected this idea); in the Eighth and Ninth, on the other hand, he followed the model of Beethoven's Ninth with the slow movement preceding the finale. The rondo schemes in Bruckner's slow movements are considerably more varied than one might expect. In the slow movements of the later symphonies rondo and sonata principles are synthesized; the manner in which Bruckner varied and embellished the returns was strongly influenced by the concept later described by Schoenberg (as 'developing variation'). The Adagio of the Ninth provides a characteristically Brucknerian variation of six-part rondo form in which the first and second subjects are recapitulated in reverse order. The fundamental compositional idea in this remarkable movement is the gradual 'liquidation' of the opening theme – which is characterized by an anguished leap of a minor 9th – as the music attains a state of peace and tranquillity. To comply with this larger strategy, Bruckner reversed the recapitulation of the first and second subjects, postponing the final return of the *A* section (at bar 207) and then truncating its recapitulation to eliminate the initial 9th.

If Bruckner's slow movements exhibit great formal variety, his scherzos display less significant variation in design. In the 'Study' Symphony and the First Symphony, Bruckner repeated both parts of the scherzo's 'two-section form'; but from the 'Nullte' onwards he abandoned the repetition. In that symphony he expanded the trio to achieve formal parity with the scherzo. Furthermore, from the Second Symphony onwards, he compensated for abandoning literal repeats in the scherzos and trios by expanding their content. Comparing the colossal, ultimately abandoned 1874 scherzo of the Fourth Symphony with its counterpart in the First Symphony reveals a fourfold increase in the number of bars. In the 1874 scherzo, Bruckner further inflated the scherzo's rounded binary form (*ABA′*) by subdividing both the *A* and *A′* components into small-scale *ABA′* forms. Similar ternary expansions occur in the scherzos of the Fifth and Seventh symphonies, and the scherzo of the second version (1878–80) of the Fourth Symphony.

The strategy of delaying the tonic epiphany, which was observed in the cut finales of the Third and Fourth symphonies, also underlies the scherzos of the Fourth (1874 version) and Sixth symphonies. Especially striking is the manner in which the tonic arrival is postponed until the end of both these scherzos; like the finale of the String Quintet, they are structured harmonically as large-scale perfect cadences. The same idea of withholding the definitive tonic arrival underlies the 1888 version of the 1878–80 'hunting' scherzo of the Fourth Symphony. In the first edition, the tonic at the end of the first statement dissolves into a quiet transition (bars 247–55), which leads into the trio. Then, uniquely in Bruckner's entire output, the whole scherzo is repeated with a *fortissimo* conclusion, thereby reserving the full force of the triumphant tonic for the end of the scherzo.

10. Vocal music. Bruckner's upbringing at St Florian ensured that his models for sacred music would include Austrian masses, beginning with Lotti, Assmayr and Mozart, and including Michael and Joseph Haydn. His first large-scale sacred choral works, the Requiem in D minor (1849) and the *Missa solemnis* (1854), reveal the strong influence of these Classical precedents. Later, Mendelssohn's influence can be detected in the cantata-like structure of a work such as Psalm cxlvi, composed in the mid-1850s. The setting of Psalm cxii (1863), which Bruckner wrote under Kitzler's tutelage, however, remains Classical – even neo-Baroque – in spirit and inspiration.

Bruckner's short works for the Liedertafel Frohsinn consist of songs on patriotic German texts and poems about nature, and drinking-songs, which were in vogue with the German male-chorus movement in the mid-19th century. They sometimes feature special effects such as humming and even yodelling, occasionally combined with some of Bruckner's most sophisticated and idiosyncratic harmonic gestures.

With the *Ave Maria* and *Afferentur regi*, both composed in 1861, Bruckner found his own distinctive style of vocal music. Later, in *Germanenzug* (1863–4), and especially the masses in D minor (1864) and F minor (1867–8), he succeeded in combining the neo-Baroque structural matrix of his earlier choral music with the freedom and expressiveness of Wagnerian chromatic harmony. Simultaneously, the D minor and F minor masses continue the tradition of the Viennese concerted mass; in style and scope they are the direct descendants of Mozart's Requiem and Beethoven's *Missa solemnis*.

While the great choral works of Bruckner's later period such as the *Te Deum* (1881–4), Psalm cl (1892) and *Helgoland* (1893) all extend the stylistic synthesis first achieved in the masses in D and F minor, the Mass in E minor and the later small-scale sacred choral works develop a neo-Palestrinian style enriched by chromatic harmony. In these masterpieces, Bruckner frequently exploited enharmonic transformation to represent redemption through faith. In *Christus factus est* (1884), for example, the pain of Christ's Crucifixion and Original Sin are associated with the 'fallen' D♭ (bars 14–19). Through Christ's sacrifice, the fallen D♭ is then raised, on the word 'Christ', by its emphatic enharmonic transformation into 'risen' (i.e. resurrected) C♯ (bars 38–40). With *Os justi*

(1879), Bruckner proved to the sceptical Ignaz Traumihler, choirmaster at St Florian, that he could compose a work in the best spirit of the Cecilian movement entirely in the Lydian mode. In spite of relinquishing all chromatic-harmonic metaphors, Bruckner was still able to do justice to the text: in this magnificent motet, the 'all-encompassing' laws of God are represented by the dramatic octave jumps in contrary motion in the outer voices in the opening bars (1–10) and by the marvellous suspension sequences (bars 10–16) that realize divine law expressed in musical terms.

Mozart's Requiem continued to fascinate Bruckner throughout his life and to serve as the yardstick against which he measured his own sacred music. Research has revealed that, in the process of revising the Mass in F minor in 1877, Bruckner referred directly to the Requiem for justification of his own composition procedures. An interesting feature of his method with regard to the large-scale choral works is that he generally wrote out the choral lines in their entirety before filling in the instrumentation. While, in later revisions, changes made to the accompaniment could be far-reaching, the vocal parts tended to remain – like a sacred cantus firmus – largely untouched. Thus, the choral part of the first version of the Mass in F minor (completed in 1868) remained the same while the figuration in the instrumental accompaniment was substantially reworked in later revisions (1877, 1881 and the 1890s). The structural priority of the vocal lines can be observed in the genesis of the later large-scale choral works such as the *Te Deum* and *Helgoland*.

Some writers have commented on the 'gothic' quality of Bruckner's music, both symphonic and choral. Perhaps this stylistic trait is most noticeable in the neo-gothic style – organum-like parallel octaves and 5ths – of the *Te Deum*. Bruckner first sketched the work in May 1881 but was apparently dissatisfied with it and put the draft aside. In September 1883 he returned to the project, inserted the fugue (bars 402–48) and recomposed the ascending harmonies from the climax of the Adagio (bars 163–76) of the Seventh Symphony at the climax of the *Te Deum* (bars 449–66). Wagner's death provided the impulse to finish the *Te Deum*. Indeed, it was the possibility of a programmatic connection between the two compositions – the earlier passage in the Adagio of the Seventh representing Wagner's apotheosis and the music of the 'non confundar' passage in the *Te Deum* derived from it – that precipitated completion of the *Te Deum*, which Bruckner himself considered his greatest work. Surely, the motivic reference to the *Te Deum* in the finale of the Ninth Symphony and Bruckner's proposal that it crown the Ninth if the finale remained unfinished, suggest that he considered the *Te Deum* his ultimate statement of faith. Bruckner's faithful disciple Mahler concurred; in his personal score, he crossed out the instrumentation and wrote: 'For the tongues of angels, heaven-blest, chastened hearts and souls purified by fire'.

11. Narrative and intertextuality. All Bruckner's numbered symphonies may be considered 'persona symphonies', in that a symphonic narrative can be posited in which a hero experiences a 'pilgrim's progress' from the mystical-tragic to the triumphant. That this narrative model is central to the symphonies should not be surprising, since Bruckner's most important symphonic models were also heroic 'persona' works. Beethoven's 'Eroica' Symphony, Berlioz's *Symphonie fantastique* and

7. Anton Bruckner, c1895

La damnation de Faust and Liszt's *Faust-Symphonie*. In Bruckner's symphonies, in spite of the seemingly insurmountable obstacles encountered along the way, the narrative is sustained by faith and the deity always redeems the hero. Important elements of this discourse can be the sudden shifts and unusual combinations of stylistic registers, that is, of high (heroic) and low (pastoral) styles. For example, a pastorale may follow a heroic outburst, as in the first movement of the Fourth Symphony at the conclusion of the first group and beginning of the second (1878–80 version, bars 63ff); or a chorale may be combined with a polka, as in the finale of the Third Symphony (1887–9 version, second group, bars 65ff).

While Hanslick and others had attacked Bruckner, claiming that he merely transferred the style of Wagner's music drama to the symphony, many of Bruckner's supporters from the 1920s onwards countered by defending the symphonies as 'absolute music'. Robert Haas, August Halm and Ernst Kurth, in different ways and from different perspectives, all described Bruckner as an 'absolute musician'. In his monumental study *Anton Bruckner* (E1925), Kurth devoted an entire chapter to celebrating Bruckner's symphonies as absolute music, and in various writings Halm praised Bruckner's symphonies as 'the summit of absolute music'. Later scholarship, however, has challenged the Haas-Kurth-Halm position, calling attention to hitherto ignored biographical and internal evidence that Bruckner intended to incorporate the semantic aspects of his references to other music – especially Wagner's music dramas – into his own symphonic narratives.

An especially fascinating aspect of intertextuality in Bruckner's symphonies are the allusions to his own music; subtle links forged between the symphonies suggest that he may have considered each symphony to be a component

of a single 'meta-symphony' encompassing all nine symphonies, each symphonic statement building directly upon its predecessor. For example, the Adagio of the Sixth Symphony (bars 40ff) incorporates the sequentially falling 7th motif of the Fifth Symphony's Adagio (bars 23ff). Similarly, the quotation of the Eighth Symphony's Adagio in the coda to the Adagio of the Ninth points to a network of motivic and semantic connections between the last two symphonies.

Pfitzner and others have accused Bruckner of 'recomposing the same symphony nine times'. A more considered appraisal reveals each symphony to possess its own unique general character, which often derives in part from its particular blend of intertextual references. The First Symphony, with oblique allusions to *Tannhäuser* (in the first movement) and the *Tristan* prelude (in the second), and neo-Baroque festive counterpoint in the finale, is for the most part a secular, celebratory work. The Second, by contrast, is shot through with allusions to Bruckner's own F minor Mass and wears a sacred mantle. While the Third is a 'Wagner' symphony, especially in its 1874 version (including many Wagner quotations), like the 'Nullte' it also emphasizes the redemptive narrative as in Beethoven's Ninth Symphony. The 'romantisch' Fourth Symphony evokes the world of Beethoven's 'Eroica', Weber's *Der Freischütz* and Wagner's *Tannhäuser*. The Fifth and Sixth both celebrate the technical aspects of musical composition: the Fifth through its intense focus on counterpoint, chorale and cyclic features, the Sixth through its complex interaction of harmony and sonata form. The Seventh is a 'Wagner' symphony in a way quite different from the Third: it is a musical commentary on the death of the 'Meister aller Meister'. While secular, nationalist allusions colour the scherzo and finale of the Eighth Symphony, the Ninth, dedicated to God and with unequivocal allusions to the *Te Deum*, is clearly orientated to the sacred, if not to the sublime.

12. RESEARCH ISSUES. A principal challenge for Bruckner scholarship is a reassessment of the music and its historical position. That the composer remains cloaked in an almost exclusively Wagnerian mantle is no longer justifiable. Although he admired Wagner and often made references to his music, aesthetically, politically, philosophically and even musically, the two men were far apart. All evidence indicates that during periods of self-analysis Bruckner turned to the music of Mozart, Beethoven and Schubert rather than to Wagner. In view of the Classical roots of his symphonic and choral styles, theorists have begun to explain his composition techniques in relation to Classical precedents.

Bruckner continues to pose serious source-critical problems. The chronology and significance of his layers of metrical numbers, and the purpose of the marginalia concerning part-writing in his late orchestration, for example, remain far from clear. Deciphering his complex manuscripts, in which many revisions may have been superimposed, is difficult. Issues of authenticity will continue to be decided on the basis of careful re-examination of the primary sources.

For information about Bruckner's life, scholars have relied mainly on the indispensable though often unreliable biography *Anton Bruckner: ein Lebens- und Schaffensbild* (1922–37), begun by August Göllerich (whom Bruckner appointed to be his official biographer) and completed by Max Auer. Perhaps now the most important task is to remove the layers of special interest which accumulated during the 20th century. Archival research by the Anton Bruckner Institut Linz should continue to add to knowledge of his activities, especially those of his early years. The collected edition of Bruckner's letters will be a major contribution. There is still much to learn about his personal views, musical and otherwise, in particular concerning the socio-political issues encountered during the years in Vienna.

Finally, largely unaddressed is the question of Bruckner's influence on later composers. Some of the outstanding composers of the younger generation, including Mahler and Wolf, were devoted to him; Sibelius and Richard Strauss made efforts to obtain and study his music. Later, Hindemith was a champion of the symphonies and Ligeti professed his admiration for Bruckner. At the end of the 20th century, the extent to which the symphonies and choral works of this 'modest Viennese church musician' had an impact on the careers of others remained to be explored.

WORKS

Detailed lists: R. Grasberger: *Werkverzeichnis Anton Bruckner* (Tutzing, 1977) [WAB]
U. Harten, with R. Grasberger and others, eds.: *Anton Bruckner: ein Handbuch* (Salzburg and Vienna, 1996)
Editions: *Anton Bruckner: Sämtliche Werke*, i–ii, iv–viii, xiv–xv, ed. R. Haas (Augsburg, 1930–53); iii, ed. F. Oeser (Wiesbaden, 1950); ix, xi, ed. A. Orel (Vienna, 1934); xiii, ed. R. Haas and L. Nowak (Leipzig, 1940) [A]

PAUL HAWKSHAW (1–6, 12, work-list, bibliography), TIMOTHY L. JACKSON (6–12)

Brückner-Rüggeberg, Wilhelm (*b* Stuttgart, 15 April 1906; *d* Hamburg, 1 April 1985). German conductor and teacher. He studied in Munich under August Schmid-Lindner and Siegmund von Hausegger, and began his operatic career as a répétiteur at the Staatsoper in Munich. After engagements in Essen, Dortmund and Kiel, among other places, he conducted a Beethoven cycle with the Berlin PO in 1937 at Furtwängler's invitation, and he received an appointment at the Hamburg Staatsoper in 1938. In addition to his commitments at the opera, he undertook the directorship of the Hamburger Lehrergesangverein in 1940. Three years later he assumed responsibility for a class in conducting at the Schule für Musik und Theater (later the Staatliche Hochschule für Musik), and became a professor there in 1955. He also conducted the Hamburg PO in more than 700 concerts for schoolchildren.

Brückner-Rüggeberg was an enthusiast of Handel's works and was considered in Germany and South America an exceptional oratorio conductor. In 1969 he conducted the first complete performance in Rio de Janeiro of Beethoven's *Missa solemnis*. His recordings include Weill's *Die Dreigroschenoper* and *Aufstieg und Fall der Stadt Mahagonny* with Lotte Lenya.

HANS CHRISTOPH WORBS/R

Bruckner societies. Austrian, German and American organizations. After World War I numerous Bruckner societies were established in Austria and Germany; the one founded in Leipzig in 1925 became the International Bruckner Society (Ger. Internationale Bruckner-Gesellschaft), based in Vienna, in 1929. It published the periodical *Bruckner-Blätter* until 1940 and collaborated with the Österreichische Nationalbibliothek in publishing the earlier volumes of Robert Haas's complete Bruckner edition. Nationalist propaganda among the German-speaking parts of the society led to its decline and in 1939 it became simply the Deutsche Bruckner-Gesellschaft, ceasing its activity soon afterwards. A second international society, again based in Vienna, published *Mitteilungsblatt der Internationalen Bruckner-Gesellschaft* from 1971. The Bruckner Society of America was founded in 1931 to 'develop in the public an appreciation of Bruckner, Mahler, and the other moderns'; it publishes the periodical *Chord and Discord* (1932–41, 1947–) and has awarded medals to Koussevitzky, Toscanini and other outstanding conductors of Bruckner.

□

Bruder. German family of organ builders which specialized in mechanical instruments. Ignaz Blasius Bruder (1780–1845) was the founder of the organ-building industry in Waldkirch. He had five sons, those of greatest significance being Wilhelm (1819–82) and Ignaz (1825–91). Each of these in turn produced three sons who ultimately formed three partnerships – Wilhelm Bruder Söhne, Gebrüder Bruder and Ignaz Bruder Söhne. The precise output of each partnership is hard to identify but they all produced work of outstanding quality starting with organ-playing clocks, progressing through portable street organs and ending with showground and dance organs. The Bruders kept to the forefront of technical and musical development and were among the first to apply music programmes in the form of perforated paper rolls to the fairground organ, using a keyless pneumatic system. They also fitted Swell shutters to these instruments. Bruder enjoyed a worldwide reputation and until the outbreak of World War I they supplied organs to the Wurlitzer company in America.

ARTHUR W.J.G. ORD-HUME

Brudieu, Joan (*b* diocese of Limoges, *c*1520; *d* Urgell, Catalan Pyrenees, between 22 April and 10 May 1591). French-Catalan composer. He was listed as a 'French singer' in the pay voucher he received for conducting an imported vocal quartet at the 1538 Christmas services in La Seu d'Urgell cathedral. The chapter members were so pleased with his services that they named him permanent choirmaster on 20 July 1539. After an unexplained absence from 16 April 1543 to 28 October 1545, perhaps spent studying for the priesthood, he returned as choirmaster, and upon being ordained sang his first Mass at Christmas in 1546. On 3 March 1550 Brudieu made his will before beginning a trip lasting several months. After retiring on 15 March 1577 for a one-year retreat at Balaguer (south of Urgell), he became *maestro de capilla* and organist of S María del Mar at Barcelona in May 1578. Disliking the climate, he returned to his old post at Urgell in April 1579.

Six years later he revisited Barcelona to superintend the publication there of his madrigals dedicated to Carlo Emanuele I of Savoy. Next year the Urgell chapter permitted Rafael Coloma to substitute for him from 14 August 1586. When Coloma left, on 21 January 1589, he was recalled to active duty.

Apart from *De los madrigales del muy reverendo Ioan Brudieu maestro de capilla dela sancta yglesia de La Seo de Urgel a quatro bozes* (Barcelona, 1585; the four partbooks survive uniquely in *E-E*), he left a four-part requiem mass in manuscript at Urgell Cathedral. The texts of the 13th and 15th madrigals are by the great Catalan poet Auzias March. Except for the *Goigs de Nostra Dona* ('Joys of Our Lady'), with which the 1585 collection begins, and madrigals 13–16, all the rest are in Spanish (nos.6 and 7, 8 and 9 set identical texts). All the Spanish madrigals except no.5 are in two *partes*. One madrigal celebrates the victory at Lepanto on 7 October 1571. Throughout the longest – no.5 (which runs to seven *partes*) – Love and Majesty break cane lances (*las cañas*), Love at length winning the tourney. Janequin's *La guerre* served as Brudieu's model for the battle-sounds that enliven *las cañas*.

ROBERT STEVENSON

Brueggen, Frans. *See* BRÜGGEN, FRANS.

Brugensis, Arnoldus. *See* BRUCK, ARNOLD VON.

Bruges (Flem. Brugge). City in Belgium. Thanks to its situation on the Zwin estuary to the North Sea, it became one of the most important trading centres of northern Europe in the 13th century; in size (*c*35,000 inhabitants) it was comparable with Cologne and London in the 14th century. Then and in the 15th century it was a favourite residence of the dukes of Burgundy. When the Zwin silted up in the 16th century, Bruges lost its dominant position to other Flemish towns.

1. Sacred music. 2. Music for court and town.

1. SACRED MUSIC. Before the foundation of the diocese of Bruges (1559), the town belonged to the diocese of Tournai. Three collegiate churches employed professional musicians. In 1368 the oldest chapter, St Donatian (St Donaas, founded *c*918–44), included 31 canons and more than 60 chaplains. The earliest records of polyphony, mentioning an organ, date from 1127. In 1251–2 there was an organist and a *zangmeester* (choirmaster) who, from 1312, was charged with training eight *chorales* (choirboys). The existence of a *liber motettorum* of 1377 indicates that polyphony was performed, sung by the *ghezellen van der muzycke* or *socii de musica*, a select company of about 12 musicians from a total of 18 *clerici installati*. In 1421 the chapter established a daily polyphonic Maria mass (*Missa de Salve*). A number of important composers received a canon prebend without duty of residence, among them Grenon, Binchois, Du Fay and Joye. 15th-century choirmasters included Fabri, Heyns, Obrecht and Cordier. The 16th century produced the composers Antonius Divitis and Lupus Hellinck, who was trained as a chorister in Bruges. Hellinck was choirmaster at St Donatian, as was Antonius Galli; Adrian Willaert was also associated with the church. In the 17th century the permanent core of musicians remained and an instrumental ensemble was added.

The church of Our Lady (Onze-Lieve-Vrouwekerk) was a parish church as early as 909 and became a collegiate church in 1091; by about 1400 it had 11 canons, 24 chaplains, four vicars and at least 14 *clerici installati*, among whom many were musicians. The dukes of Burgundy considered it their 'court chapel'. The confraternity of Our Lady of the Snow (Onze-Lieve-Vrouwe-ter-Sneeuw), founded shortly before 1450, played an important role in musical life. In the 16th century Jeronimus de Clibano, Lupus Hellinck and Galli, all also employed by St Donatian, were active in the church of Our Lady. The Cacheux organ dates from 1721–2. In 1787 the church employed about 20 musicians. The church of St Saviour (St Salavtor), founded in about 850, became a collegiate church in 1501 and included 20 prebends; it had known a flourishing musical life before this time, not least during the choirmastership of Antoine Busnoys (before 1492). Confraternities and private foundations ensured a varied musical practice. Musicians from the 15th century included: Jacobus Buus (in 1499 also organist at the church of Our Lady and in 1504 mentioned as choirmaster) and Nicasius de Brauwere (Braxatoris), who in 1484–5 composed motets for the 'Salve concerts' by the town musicians. During the 16th, Galli and Andreas Pevernage were active there. The number of canons was reduced to 12 in 1600 and in 1787 about ten musicians were permanently employed. The rood-loft, moved in 1935–6 to the west side of the nave, contains the restored Jacob Van Den Eynde organ of 1717.

In addition to the parish churches of St Gillis (St Giles), in which the choirmaster Johannes Richafort probably died in 1547, and St Walburga, St Jacob (St James) is worth mentioning. It was a rich institution as various prosperous merchants, among them Giovanni Arnolfini from Lucca, lived within its parish. The hairdressers' guild held an annual feast, including organ music during evensong, a procession during which boys sang a motet,

the singing of hours and a mass in descant by six or seven singers (typical of such services on special occasions). In the 16th century Benedictus Appenzeller, Antoine Barbé, Geerkin De Hondt and Pevernage were among the choirmasters. Convents, monasteries and confraternities also played an important role in the city's musical life. The Carmelite convent included from 1428 the confraternity of the Chamber of Rhetoric of the Holy Ghost, which organized an annual passion play, performed refrains and hired singers. The Droge Boom (Dry Tree) confraternity (before 1396), in the Franciscan monastery, hired singers on Sundays and holy days to perform masses *in discante*.

2. Music for court and town. The Burgundian court chapel was often in Bruges. Largely by awarding prebends in St Donatian to the best singers, the dukes developed an outstanding chapel which was held in great respect throughout Europe. Notable performances were at the three 15th-century gatherings of the Order of the Golden Fleece and, in 1468, at the wedding of Charles the Bold and Margaret of York in Bruges. Through the activities of the court (e.g. peace negotiations with foreign countries), musicians from many regions (France, England, the Habsburg empire) met there.

As early as 1310 and more regularly from 1331–2, Bruges employed four or five town musicians. They served as tower guards and played the trumpet, organ or fiddle. They participated in processions and other ceremonies with musicians from other towns (e.g. Sluis, Ghent or even Florence) or courts. In the 14th century minstrel courses, which enjoyed an international reputation, were held during Lent. The town musicians continued in existence until the French Revolution.

In 1280 there is mention of three bells in the belfry tower: the *campana nuptiana*, the *scepenen scell* (alderman bell) and the *magna campana*, used to announce important events. As early as 1533 there was a town carillonneur (Adriaen Vander Sluus), a post still financed by the town council. The current carillon (47 bells, four octaves) still contains 26 bells cast by J. Dumery, a native of Bruges, in 1743.

The Gruuthuse manuscript (*c*1390–1400), an exceptional collection of monophonic songs in stroke notation, is an example of music performed in middle-class society. Important references to domestic music can be found in the manuscripts of Hieronymus Lauwereyn van Watervliet (*GB-Lbl* Add.35087, shortly after 1500), the so-called Tournai/Brussels partbooks, which probably also originated from Bruges (*B-Tv* 94, *Br* IV 90, 1274; 1511) and the superb songbook of the merchant Zeghere van Male (*F-CA* 125–8, 1542). This last volume contains many compositions by local choirmasters. The 17th century produced Charles Guillet, an alderman and organist who composed 24 fantasias for organ (Paris, 1610). Carolus Hacquart probably received his musical training in Bruges.

After the foundation of a local music school in 1841 (from 1854 the Stedelijk Conservatorium), the responsibility for musical tuition was placed in the hands of the municipality. A concert society was formed in 1895. Since 1964 an annual two-week summer festival of early music has been organized as part of the Festival van Vlaanderen. As well as concerts, lectures and an exhibition, a competition is held following a triennial cycle: organ; harpsichord and pianoforte; singing, melodic and bass instruments, lute and ensembles. Important ensembles in Bruges include the Collegium Instrumentale Brugense, the Capella Brugensis (both conducted by Patrick Peire) and the Nieuw Vlaams Symfonie-Orkest.

EUGEEN SCHREURS

Brüggen [Brueggen], **Frans** (*b* Amsterdam, 30 Oct 1934). Dutch conductor, recorder player and flautist. He studied the recorder with Kees Otten, the flute at the Amsterdam Muzieklyceum and musicology at the University of Amsterdam. His early career as a recorder and Baroque flute virtuoso won him international fame for his highly individual translucent tone, brilliance and rapidity, and the depth of his interpretations. At the age of 21 he was appointed professor at the Royal Conservatory in the Hague and in 1972–3 he held the position of Erasmus Professor at Harvard University.

He commissioned many works for recorder, outstanding among them Berio's *Gesti* (1965), of which he gave superbly theatrical performances. Brüggen has left a legacy of his career as a flautist and recorder player in numerous remarkable recordings, including over 50 for Telefunken's 'Das Alte Werk', many associated with Gustav Leonhardt (harpsichord) and Anner Bylsma (cello).

In 1981 he embarked on a career as a conductor, founding the Orchestra of the Eighteenth Century, a period-instrument group comprising some 50 members

from 16 countries. Their recordings of a wide-ranging repertory, encompassing works by Purcell, Bach, Rameau, Haydn, Mozart, Beethoven, Schubert and Mendelssohn, have received a number of international awards. Brüggen has also conducted orchestras including the Chicago SO, the Royal Concertgebouw Orchestra, the Orchestra of the Age of Enlightenment, the Oslo PO, the CBSO, the Vienna PO and the Tonhalle in Zürich. He made his début at the Salzburg Festival with the Orchestra of the Age of Enlightenment in 1991 and returned in 1992 and 1995 for highly praised series of concerts with the Mozarteum Orchestra.

Brüggen's operatic début was with the Netherlands Opera, conducting *Idomeneo*, in 1991. In 1992 Brüggen became the joint principal guest conductor, with Simon Rattle, of the Orchestra of the Age of Enlightenment, with whom he has recorded works by Bach, Haydn and Mozart. He is also artistic director of the Radio Hilversum Chamber Orchestra and the Stavanger SO. His recordings are notable for their clarity of articulation, strong dramatic sense and rhythmic vitality, specially evident in the Haydn London symphonies, Mozart's late symphonies and the symphonies of Beethoven.

J.M. THOMSON

Brugk, Hans Melchior (*b* Munich, 24 Nov 1909). German composer and teacher. Gifted in the visual arts as well as in music, he first studied art education at the University of Munich; then, from 1935 to 1938, he studied composition and conducting at the Munich Akademie der Tonkunst. After six years of military service and imprisonment in Russia he returned to Germany as a teacher and freelance composer. From 1963 to 1976 he taught theory, composition and music education at the Musikhochschule in Munich. In 1981 he was awarded the Verdienstkreuz der Bundesrepublik Deutschland.

Brugk has composed in all genres except opera and ballet, in a style ranging from a traditional to an expanded tonality. His music bears the stamp of a Bavarian background in its songfulness, its clarity of form and its lively appeal to both performer and listener. His instrumental works, including the numerous pieces for wind band and for brass choir are animated and colourful, full of a rhythmic drive and metrical variety that reflects his admiration for the music of Orff. Brugk's greatest achievement is considered to be his liturgical music, especially the *Missa Cantate Dominum* and the *Deutsches Te Deum*, which draw upon both polyphonic tradition and contemporary practice in their marked use of harmonic colour and declamatory rhythm.

WORKS
(*selective list*)

Orch: Variationen und Rondo über ein heiteres Thema, op.5, 1941, rev. 1975; Festouvertüre, op.9, 1962; Für die Jugend, suite, op.16, str, pf obbl, perf. 1964; Karneval, op.24, pf, orch, 1963; Sinfonietta, op.27, str, 1966; Sinfonia Serena, op.33, 1976

Choral: Deutsches Te Deum, op.15, solo vv, chorus, orch, org, 1950; Missa Cantate Dominum, op.19, S, chorus, 1953; Festmesse, op.20, solo vv, chorus, orch, org, 1953; Die Hochzeit zu Kana (cant., B. von Heiseler), op.25, solo vv, chorus, 1956; Hymne an die Musik (G. Flossmann), op.26, chorus, brass, 1961; Bläser-Messe, op.30, 3vv, brass (1965); Ps xlvii, op.31, chorus, 4 brass/org, perf. 1964; Kammermusik (J. Weinheber), op.34/1, chorus, insts ad lib, perf. 1968; other unacc. pieces

Solo vocal: 3 Abschiedslieder (Ger. texts), op.1/3, 1v, pf, 1936–40; Leuchtende Nacht (H. Carossa), op.18, Mez, fl, pf, 1952; Gesänge an Gott (O. Butzer, R. Schaukal, von Heiseler, G. Schüler), op.39, high v, pf, 1974; Gezeiten der Liebe (J.M. Lutz, H. Frank), op.37, S, B, ob/fl, pf, 1975; Letzte Liebe, op.44, B, pf, 1981

Chbr: Pf Qt, op.2, perf. 1950; Pf Qt, op.4, perf. 1966; Pf Trio, op.6, perf. 1967; Str Trio, op.11, perf. 1951; Sonata, op.14, vn, pf, 1951; Serenade, op.22, wind qnt, 1955; Qt, op.32, fl, ob, cl, bn, 1955; Divertimento, op.29, wind qnt, hn, tpt, 1961; Sextet, op.38, wind qnt, pf, 1973; Sonata, op.36, vc, pf, 1974; brass pieces, opp.1, 7, 8, 13, 21, 43

Kbd: 2 pf sonatas: op.3, 1939, op.17, perf. 1955; Präludium, Toccata und Fuge, op.35, org, 1971

CHARLOTTE ERWIN/R

Bruguera (i Morreras), Juan Bautista (*fl* 1750–66). Catalan composer. He studied at the Escolanía (choir school) of Montserrat. In 1750 he competed for the post of *maestro de capilla* of S María del Pino, Barcelona, and in 1763 for that of Toledo Cathedral. In 1765, while *maestro de capilla* at Figueras (Catalonia), he won a prize medal from the London Catch Club for his *Canon Nine in One* (to the text of Psalm cxi.1), published in Warren's *Fourth Collection of Catches, Canons and Glees*. To aid his brother Pedro, a harpist in Descalzas Reales monastery at Madrid who had challenged Antonio Soler, he published a *Carta apologetica que en defensa del Labyrinto de labyrintos compuesto por un autor, cuyo nombre saldrá presto al publico* (Barcelona, 1766), chiefly notable for the autobiographical data on the sixth page. Fragments of his sacred works survive in manuscript at the Biblioteca de Catalunya in Barcelona.

ROBERT STEVENSON

Bruhier [Bruchier, Brugier, Bruyer], **Antoine** (*b* ?Noyon; *d* after 1521). French singer and composer. He described himself in an unpublished document (*I-Rvat* Archivio Segreto Vaticano, *Registra supplicationum* 1425, ff.24*v*–25*r*) as a cleric of the diocese of Noyon and as the illegitimate son of a priest and a single woman. As he is identified as a cleric of Noyon in other documents, he would appear to have been French, even though he once received a dispensation from Pope Leo X allowing him to take possession of benefices in Geneva and Lyons without being able to speak the language common in those dioceses (but as Bragard has pointed out, this may not have been the same French that was spoken in northern France). He may have been the Antonio Brugier who was in the Milanese court chapel in 1474. For a few months in 1504, Bruhier was master of music at Langres Cathedral and may also have had some connection with the French court, since he is mentioned in Moulu's motet *Mater floreat florescat*. Between 1505 and 1508 he was employed by Cardinal Ippolito d'Este in Ferrara, also possibly by Sigismondo d'Este and then by the Duke of Urbino.

Shortly after the accession of Leo X (11 March 1513), perhaps as early as April 1513, Bruhier became one of the pope's *cantori segreti*, a position he held for the entire length of Leo's pontificate. Whether he was at the same time a member of the papal chapel is not altogether clear; his salary of 8 ducats (higher than any of the other private singers) was precisely that of the papal singers, but he appears not to have been designated specifically as a singer of the papal chapel until 1519 (not 1517 as published by Frey: see Sherr). There is no trace of Bruhier after Leo's death in 1521.

Along with Ninot le Petit, Bruhier was a master of four-part arrangements of popular French melodies in a kaleidoscopic style mixing short duets, four-voice imitation, homophony and rapid triple-time sections, occasionally setting texts of doubtful literary quality (such as the frankly obscene 'Frappez petit coup'). This style seems to have flourished at the beginning of the 16th century in the hands of French composers who had some connection with Italy (where most of the music was preserved). Bruhier's sacred music also shows distinct traces of this style. Popular songs (not all identified) underlie most of the movements of the *Missa Carminum*. This mass uses 'constructive' cantus-firmus procedures, such as the consecutive mensural reinterpretation of a segment in the Kyrie and the Obrecht-like procedure of choosing only the breves of the contratenor of Ghizeghem's *Allez regretz* for the cantus firmus of the Agnus III (and placing that cantus firmus in the bass); but other sections resemble the arrangements that Bruhier excelled in (see for example the Benedictus and Agnus II). Bruhier's other masses have not yet been published in modern transcription. The chanson style can also be seen in his motets, two of which are decidedly secular: both *Vivite felices*, undoubtedly written to celebrate the meeting of François I and Leo X in Bologna in 1515, and *Ave color boni vini* might be termed drinking motets. In a letter to Cardinal Ippolito d'Este written from Urbino in about 1508 (*I-MOs*, Musica e Musicisti, B.I.), Bruhier claimed to have composed two extra voices for the third Agnus Dei of Josquin's *Missa 'L'homme armé' super voces musicales*, as well as a Marian motet and 'the seven hours of the Passion for three voices'. The additions to the Josquin mass and the Passion pieces have not survived, but the motet could be his *Ave celorum regina* (*I-Bc* Q20).

RICHARD SHERR

Brühl [of Martinskirche], **Hans Moritz,** Count of (*b* Wiederau, Saxony, 20 Dec 1736; *d* London, 9 June 1809). German musical dilettante. He is sometimes designated 'of Martinskirche' to distinguish him from his cousin Hans Moritz 'of Seifersdorf'. He was a nephew of the famous minister Count Heinrich Brühl and the son of Count Friedrich Wilhelm Brühl, and served in diplomatic posts in Paris and Warsaw before becoming Saxon ambassador to London in 1764. The count's marriage (1767) to Lady Egremont, an attendant at the English court, placed him in association with the queen's retinue of German musicians. He became the patron of, among others, C.F. Horn and the pianist J.S. Schroeter, who dedicated to him his op.1. Clementi's sonatas op.13 were dedicated to Brühl and Haydn's canons on the Ten Commandments (HXXVIIa: 1–10) written for him. Brühl himself published a set of six sonatas for piano with violin accompaniment op.1 (*c*1785) in the modern 'singing' style of J.C. Bach and Schroeter, and probably wrote the several interesting but more conservative manuscript sonatas attributed to 'Count Brühl' in the Sächsische Landesbibliothek, Dresden; in 1791 he provided the theme for a set of keyboard variations by Hummel (*GB-Lbl*). According to Forkel, he supervised the construction of the first piano with strings of tempered steel in 1778; it was subsequently demonstrated by Philidor to the Académie in Paris with much acclaim. Brühl also made notable contributions to astronomy both as patron and in his own right. As he seems not to have been on the Continent at the time, the Count Brühl whom Burney heard sing and perform in Vienna was probably his younger brother Heinrich Adolph Brühl (1744–78), who had been a patron and student of J.A. Hiller in Dresden and Leipzig, 1754–60.

Bruhns, Friedrich Nicolaus. German composer. *See under* BRUHNS, NICOLAUS.

Bruhns, Nicolaus (*b* Schwabstedt, nr Husum, Advent 1665; *d* Husum, 29 March 1697). German composer, organist, violinist and viol player. His family formed a small musical dynasty in Schleswig-Holstein. His grandfather, Paul (*d* Lübeck, 17 Jan 1655), a professional lutenist to the ducal court at Gottorf and to Lübeck town council, was married to the daughter of Nicolaus Bleyer. Their three sons chose different musical careers. Friedrich Nicolaus (*b* Schleswig, 11 Feb 1637; *d* Hamburg, 13 March 1718), the eldest, directed music for the cathedral and town council of Hamburg; two arias by him were published (Hamburg, 1692 and 1693); *Satanas und sein Getümmel*, formerly attributed to Böhm, is also probably by him (ed. in *G. Böhm: Sämtliche Werke: Vokalwerke*, ed. J. Wolgast, rev. G. Wolgast, ii, Wiesbaden, 1963). The youngest son, Peter (*b* Lübeck, 20 Nov 1641; *d* Lübeck, 23 April 1698), studied string instruments with his father and stepfather, Nathanael Schnittelbach, and the middle son, Paul (*b* Lübeck, 6 April 1640; *d* Schwabstedt, *c*1689), became an organist and may have studied with Tunder. As was a practice of the time, he secured a position at Schwabstedt by marrying his predecessor's daughter. They had two sons, Nicolaus and Georg (*b* Schwabstedt, Nov 1666; *d* Husum, 18 Jan 1742).

According to Gerber, Nicolaus Bruhns 'at an early age could play the organ and write quite well for keyboard and voice'. When he was 16 his father sent him and his brother to live at Lübeck with their uncle Peter. Bruhns learnt the violin and bass viol from him and the organ and composition from Buxtehude, who regarded him as a favourite pupil and who sent him out into the world with the highest recommendation. For a few years he worked as a composer and virtuoso violinist in Copenhagen, where Italian musicians, among others, broadened his stylistic background. On 29 March 1689 he competed for the position of organist of the Stadtkirche, Husum. The decision to appoint him was unanimous, 'since never before had the city heard his like in composition and performance on all manner of instruments'. Only a month or two elapsed before the civic authorities at Kiel tried to woo him away to fill the vacancy caused by the departure for Copenhagen of their organist, Claus Dengel. Making an exception in his case alone, the authorities at Husum protected their interests by raising his salary. As a result he remained in this pleasant, thriving town, enjoying the support and approbation of clergy and musicians until his untimely death. Since his only son, Johan Paul, had chosen theology as a career, he was succeeded by his brother, Georg.

It is unfortunate that none of Bruhns's chamber music has survived, especially his compositions for violin and viol. The solo cantata *Mein Herz ist bereit* opens with a brilliant polyphonic sonatina that displays the double and multiple stopping technique of the north German school of violin virtuosos. A well-known passage in Mattheson may relate to such works as this: 'Sometimes he took his violin up to the organ loft and played with such skill that it sounded like two, three or more instruments at once. Thus he would realize the upper parts on the violin while his feet played an appropriate bass on the pedals'. His extant compositions are for the church and amount to five organ works and 12 vocal works – not an insignificant number considering his early death. Kölsch considered two other cantatas that Eitner ascribed to him to be the work of his uncle Friedrich Nicolaus; *Sanctus est Dominus Deus Sabaoth*, not mentioned by Eitner, may be a third (all three works are in *D-Bsb*).

Bruhns's four praeludia are modelled after Buxtehude's. Two of them, the G major and the longer of the two E minor ones, are in his five-section form: brilliant toccata-like prelude, 4/4 fugue, middle section, 3/4 (3/2) or 4/4 (12/8) fugue and concluding toccata. Bruhns also employed elements of his teacher's fugal technique, in particular repeated-note subjects and counter-subjects, and thematic transformation in the G major and shorter E minor works. The latter also makes extensive use of the echo device, after the manner of Sweelinck's fantasias. The toccatas equal Lübeck's in technical brilliance and include extended passages for solo and double pedal and others that recall violin figuration, but apart from the two excellent E minor works there is not quite the same strength of internal organization as in Lübeck's music. Bruhns's setting of the Advent chorale *Nun komm der Heiden Heiland* is open to similar criticism, though the north German chorale fantasia, itself a potpourri of three diverse older forms, the organ ricercare, organ chorale and toccata, tends to be disjunctive in its line-by-line treatment of the verbal text. Bruhns's piece, played perhaps during the Communion, is in the tradition of Buxtehude, Lübeck, Reincken, Scheidemann and Tunder and uses imitative, free-fantasia and echo techniques. He could not possibly have known Böhm's ornamental style, as Sharp suggested.

It is the 12 vocal works that, despite their marked inequality, firmly establish Bruhns's importance in the mid-Baroque period. He brought the Italian solo cantata to new heights of virtuosity in Germany with his four small-scale sacred concertos. Three of these, *De profundis*, *Mein Herz ist bereit* and, perhaps the weakest, *Der Herr hat seinen Stuhl*, may have been written between 1689 and 1691 for the famous bass Georg Ferber, who had been Kantor at Husum for 14 years before moving to nearby Schleswig two years before Bruhns arrived. The three sacred madrigal cantatas, *Hemmt eure Trähnenfluht*, *Muss nicht der Mensch* and *O werter heilger Geist*, provide a direct link with the 18th century and the work of Bach. For some reason Bruhns seemed to attach less importance than his contemporaries to two other forms, each of which is represented in his output by only a single work: the chorale concerto by *Erstanden ist der heilige Christ* and the concerto-aria cantata by *Ich liege und schlaffe*, though Geck considered the latter undoubtedly the most beautiful of his larger-scale works. The three remaining ensemble concertos include *Die Zeit meines Abschieds*, a work of strong formal organization. The instrumental writing in the vocal works suggests that Bruhns, like Lübeck, could draw on musicians of only average competence. In the main he used a five-part string ensemble with two violas or viols, typical of French music of the period, and with bassoon and continuo.

Concerning Bruhns's influence on Bach the evidence is inconclusive. The obituary of Bach by J.F. Agricola and C.P.E. Bach stated that he took the keyboard works of Bruhns, among others, as models. Some of Bach's early works do show superficial resemblances – BWV568, for example, to the Prelude in G – but in formulae common to the period.

HUGH J. McLEAN

Bruins, Theo (*b* Arnhem, 25 Nov 1929; *d* Haarlem, 8 Jan 1993). Dutch pianist and composer. He studied with Jaap Spaanderman at the Amsterdam Muzieklyceum, and gave his first concerts and recitals in 1946. From 1948 to 1950 he studied in Paris with Yves Nat, and in 1951 he became a composition pupil of Kees van Baaren. In 1960, after a recital in London, he was awarded the Harriet Cohen Beethoven Medal. Bruins's playing was distinguished by great clarity and intelligence, and he was one of the most sought-after interpreters of contemporary music, although his repertory was by no means limited to this field. The Dutch composers van Baaren, Jan van Vlijmen and Tristan Keuris dedicated concertos to him. After his death recordings of several of his concerts were released on CD, among them a recital of works by Debussy and Berg, Beethoven's Diabelli Variations and the three piano concertos of Bartók. Bruins's own compositions include a piano concerto in serial style (1952); for solo piano, a sonata (1955), the serial *Sei studi* (1963) and *Quartet '84* (1984); *Tremani* (1991) for two pianos and *Sincope* (1992) for harpsichord.

TRUUS DE LEUR

Brulé, Gace. *See* GACE BRULE.

Brüll, Ignaz (*b* Prossnitz [now Prostějov], 7 Nov 1846; *d* Vienna, 17 Sept 1907). Austrian pianist and composer. He came from a musical family that had settled in Vienna by 1850. There he studied the piano with Julius Epstein and composition with Johann Rufinatscha and Otto Dessoff. In 1861 Epstein played a concerto by Brüll; this brought the young composer to the public's attention. In 1864 his First Serenade for orchestra was played in Stuttgart, and in the same year he completed his first opera, *Die Bettler von Samarkand*. He appeared as a concert pianist in Vienna and made several concert tours, including one in 1878 to London, where he played in 20 concerts; however composing gradually replaced performing as his main activity. He taught at the Horák piano school in Vienna (1872–8) and became one of its directors in 1881. A retiring, modest man, he was a member of the Brahms circle in Vienna and a close friend of Brahms, for and with whom he often played. His greatest success was the opera *Das goldene Kreuz*, which was first produced in Berlin in 1875 and revived in London three years later by Carl Rosa.

WORKS

Stage: 10 ops, incl. Die Bettler von Samarkand (op, O. Prechtler), Vienna, 1874; Das goldene Kreuz (romantische Oper, 2, S.H. Mosenthal, after A.H.J. Mélesville and N. Brazier: *Catherine*), Berlin, Kgl, 22 Dec 1875 (Berlin, 1876); Ein Märchen aus der Champagne (ballet), Vienna, 1896

R.J. PASCALL

Brumby, Colin (James) (*b* Melbourne, 18 June 1933). Australian composer. After undergraduate studies at the University of Melbourne (BMus, 1956) and a spell of teaching in Australia, he undertook advanced compositional studies in Spain, England (with Goehr), and Italy (1962–4). In 1964 he was appointed to a lecturership at the University of Queensland, where he later became senior lecturer, then reader. In 1971 he received the DMus of the University of Melbourne; other awards have included the Don Banks Fellowship (1990).

Strongly influenced by Anglican and Catholic choral traditions in his youth, Brumby came under the spell of Schoenberg's music during his BMus studies. Many of his works until the early 1970s were constructed serially.

One of his first systematic serial explorations was *Fibonacci Variations* (1963), in which the number series was applied to the durations of a 12-note row. Brumby still worked with simple, motivically generated melody, however, and nurtured these qualities in several highly popular operettas for children written during the late 1960s and toured throughout Queensland. A series of full operatic and choral works soon followed, and with them the start of a long-lasting collaboration with librettist Thomas Shapcott.

Sabbatical studies with Evangelisti during 1972 engendered a stylistic crisis, from which Brumby emerged convinced of the derivative nature of much of his existing serial output. He dedicated himself to 'melody as the principal means of expression, and a harmony in which the notes *do* matter'. *The Phoenix and the Turtle* (1973), a free fantasia for strings and harpsichord, was the first work in Brumby's new tonally affirming style. Since 1973 he has written prolifically, both for professional and amateur ensembles. *Victimae paschali* (1977), for chorus and string orchestra, is one of the finest examples of his preferred, mixed vocal/instrumental medium. Brumby's many original songs and folksong arrangements have proven immensely popular in schools and with choirs of all levels. The reaffirmation of tonality has also been associated with varied approaches to traditional forms. His Piano Concerto (1984) is identical formally with Beethoven's 'Emperor', and his Piano Quartet (1983–4) is formally indebted to Dvořák.

Many of Brumby's recent compositions have been commissioned for institutional anniversaries. His cantata *A Special Inheritance* (1990), for Pymble Ladies' College, Sydney, explores in part the sounds of a birds' dawn chorus, with freely interpolated cockatoo sounds. Brumby does not, however, promote an 'Australian' style, believing that European traditions still predominate in the nation's, and his own, musical thinking.

MALCOLM GILLIES

Brumel [Brummel, Brommel, Brunel, Brunello], **Antoine** (*b* *c*1460; *d* ?1512–13). French composer. He was prominent among a group of composers who ranked, after Josquin des Prez, as the most eminent masters of the late 15th and early 16th centuries. He was praised by numerous writers: Crétin, Eloy d'Amerval, Gaffurius, Ornithoparchus, Heyden, Rabelais, Glarean, Coclico, Hermann Finck, Zarlino and Morley. He was perhaps the first of the great Renaissance composers of French rather than Netherlandish origin.

1. Life. Brumel may have been born at Brunelles, near Nogent-le-Rotrou, west of Chartres, about 1460. A famous passage in Crétin's *déploration* on the death of Ockeghem has often been interpreted to mean that Brumel was a pupil of the great master of Tours:

> Agricolla, Verbonnet, Prioris
> Josquin Desprez, Gaspar, Brumel, Compère,
> Ne parlez plus de joyeulx chantz ne ris,
> Mais composez ung *Ne recorderis*,
> Pour lamenter nostre maistre et bon père.

However, nothing in Brumel's early works points to a close connection with Ockeghem. The earliest mention of the composer is found at Chartres, where the cleric Anthonius de Brumel became an *horarius et matutinarius* (singer at the day and night Office) at Notre Dame on 9 August 1483. Because of his abilities, he was granted the larger stipend of the church. By 4 October 1486 he had become Master of the Innocents at St Pierre, Geneva, where he remained until 1492. Meanwhile he was given leave for a period during 1489–90 to visit the court of the Duke of Savoy at Chambéry. Although offered a position there, he returned to Geneva, where relations with the chapter authorities became so strained that he suddenly left in August 1492. His immediate destination remains unknown, but in 1497 he was a canon at Laon Cathedral. At some time he became a priest, probably during that interim.

On 5 January 1498 Brumel was placed in charge of the education and musical training of the children at Notre Dame, Paris. In September 1500 he was given two weeks' vacation to visit his birthplace, which, although unnamed, must have been in the general vicinity. Later the same year a controversy arose over the appointment of a new choirboy, so that again Brumel resigned in unpleasant

circumstances. From 1 June 1501 to 1 July 1502 he was employed at Chambéry as a singer at the ducal court.

In July 1505 Alfonso I d'Este of Ferrara entered negotiations through an intermediary, Sigismondo Cantelmo, Duke of Sora, then at Lyons, to employ the composer as *maestro di cappella*. The lifetime contract offered provided a benefice valued at 100 ducats a year, an annual salary of 100 ducats, a house in Ferrara and 50 ducats toward the expenses of travel to Ferrara. Brumel began his duties in August 1506 and remained at Ferrara until the chapel was disbanded in 1510. A document of 11 May 1512 indicates that Brumel was then archpriest of the united churches of S Johannes in Libia and S Sabina outside Faenza, and that he was probably in Mantua at about this time. Circumstances surrounding the document suggest that the composer was then quite ill and may have died soon after. At least one important work, the *Missa de beata virgine*, seems to have been composed after Brumel left Ferrara.

Vincenzo Galilei wrote a treatise (*I-Fn* Anteriori Galilei, vol.i, f.138) in which he listed a number of French and Netherlandish composers, including Brumel, who he said assembled in Rome in 1513, when Leo X was elected pope (see Lowinsky). Nothing has been found to confirm Brumel's activities there. Since Galilei was born at about the time Brumel died, he could have had no direct knowledge of the event, and his report may be incorrect.

2. WORKS. Brumel lived during a period of profound changes in style, as his music exemplifies. Elusive, meandering lines gave way to sensuous, harmonically orientated textures; abstract melismatic polyphony following purely musical precepts relatively independent of text was replaced by word-orientated, increasingly syllabic settings with growing care for text underlay. Varied mensurations and irregular rhythmic patterns were progressively eliminated in favour of a more predictable flow, most often in duple measure. Simultaneous rather than successive composition of voice parts became the norm and greater harmonic direction was achieved.

The reasons for the reorientation were at least partly geographical: Franco-Flemish masters who emigrated to Italy developed a new musical language resulting from the fusion of traditional northern contrapuntal prowess and elements of native Italian music. Brumel was one of the masters who played a leading role in effecting this transformation.

Brumel was primarily a composer of sacred music. Most prominent among his works are the masses, not only because of their quantity and bulk, but also because of the frequency with which they occur in the sources. It was to them that theorists turned most often for music examples. Petrucci devoted an early volume to five of Brumel's masses, and later publications regularly featured masses and motets. Andrea Antico's celebrated *Liber quindecim missarum* (1516) contains three masses by Brumel, including his *Missa de beata virgine*, which opens the volume.

Brumel's masses may conveniently be divided into three stylistic periods. The first is represented by the five in the Petrucci publication (*'Berzerette savoyenne'*, *'Je nay dueul'*, *'L'homme armé'*, *'Ut re mi fa sol la'* and *'Victimae paschali'*) as well as by *Missa 'Bon temps'*. All depend primarily on a cantus firmus for their formal design, though *Missae 'Berzerette savoyenne'* and *'Je nay dueul'* occasionally draw material from several voices of their

models, indicating an incipient parody technique. *Missa 'Ut re mi fa sol la'* is a kind of fantasy in which the hexachord material not only provides the sole material of the tenor but also pervades the surrounding voices. Characteristic of all the earlier masses are irregular, unpredictable rhythms and lengthy overlapping phrases lacking pronounced internal divisions. Often there seems to be little relationship between music and text. On the other hand rapid declamatory passages, which seem to be peculiar to Brumel, are occasionally encountered (ex.1). Ternary mensuration, variety of mensuration and occasional simultaneous use of different mensurations are evident. Of special interest is the final Agnus Dei of *Missa 'Bon temps'*. The cantus firmus is disposed in half-blackened breves, so that an implied quintuple metre results.

The masses of the middle period (*'Descendi in hortum'*, *Missa dominicalis*, *Missa 'Et ecce terrae motus'* and the first untitled mass) show a tendency towards greater regularity of rhythm – sometimes very pronounced, as in *Missa 'Descendi in hortum'* – more flexible and thinner textures and more concise phrases. Greater interest is shown in apt text-setting. Vertical sonorities are clearer and the harmonic progressions more predictable. Occasionally considerable vocal virtuosity is required, as in ex.2.

The most striking of these masses is *Missa 'Et ecce terrae motus'* for 12 voices, which foreshadows polychoral writing. A work of such proportions must have been a distinct novelty at the time. The Easter antiphon which serves as the cantus firmus is often skilfully moulded into a three-part canon. Very slow harmonic movement is offset by vigorous rhythmic movement, with triadic motifs overlapping one another in quick succession. The rather close grouping of the lower voices sometimes produces a thick, heavy texture, perhaps reflecting the composer's inexperience with large forces.

Among the later masses is a *Missa pro defunctis*, one of the earliest extant requiem settings, and the oldest that includes the Dies Irae. Brumel's love of canon, exemplified in numerous earlier masses, is most evident in *Missa 'A l'ombre d'ung buissonet'*; like Josquin's chanson, on which it is based, it consists entirely of canons, mostly double canons. It also represents the extreme of the trend in the later works towards concentration and brevity; the entire Kyrie, for example, is only nine bars long. A work from which Glarean drew several examples is the *Missa de dringhs*, whose title he gave in Greek letters. Although the title has never been satisfactorily explained, the mass is now known to be a parody of the composer's own chanson *Tous les regretz*. Both are characterized by a strongly chordal style, reminiscent of the contemporary Italian *lauda*. Probably the most famous of Brumel's works is the *Missa de beata virgine*, which Glarean found 'worthy of a great man'. He compared it, not entirely favourably, with Josquin's mass of the same title, and said that both had been written when their composers were 'verging towards extreme old age'. Both are in a learned, somewhat retrospective style.

Numerous bicinia by Brumel are found in 16th-century collections. All but one of these prove to be mass sections, usually excerpts from complete masses, such as 'Pleni sunt caeli', Benedictus or the second Agnus Dei.

Brumel's motets include a wide variety of types: sequences, antiphons, hymns, prayers, psalms and the like, as well as those composed to texts compiled from a variety of sources. The greatest number are devoted to Marian themes, somewhat fewer to feasts of the *Temporale*, and the remainder to various saints or unspecified liturgical use. Three of what appear to be the older motets are bitextual, one voice bearing the cantus firmus with its text, the others composed to different words. One of these, *Nativitas unde gaudia*, can be dated with reasonable certainty from Brumel's years at Chartres and may well be his oldest extant work.

Motets which do not have a cantus firmus in long note values frequently do present a borrowed melody in one or more voices, skilfully paraphrased and in a style indistinguishable from the surrounding voices. Such is the case with nearly every liturgical text which has a well-known melody, such as *Haec dies, Regina caeli laetare* and *Sub tuum praesidium*. Sequences, prayers and rhymed metrical antiphons, however, seem to be without borrowed material.

Magnificat settings use material from the plainchant tones. Settings vary from only six verses to all 12, with a single work usually appearing in two or three distinct versions. Especially noteworthy is an *Exemplum octo modorum*, which occurs singly and also as the 'Sicut erat' of a dubious *Magnificat octavi toni*. Each voice paraphrases a different tone, so that all eight modes are in use simultaneously. The *Magnificat secundi toni* is attributed in *E-Bc* M.454 to 'Fr. Benito' or 'Fr. Venito', and the three other works carrying this ascription may also be Brumel's.

Secular works are of secondary importance. Several incorporate recognized borrowed material; others are probably settings of unidentified pre-existing melodies. The later ones are clearly of a popular nature (e.g. *Dieu te gart* and *Le moy de may*). Four-voice pieces have texts whereas, with one exception, the three-voice ones are purely instrumental.

WORKS

Edition: *A. Brumel: Opera omnia*, ed. B. Hudson, CMM, v/1–6 (1969–72) [H]

MASSES AND MASS SECTIONS

Title	*No. of voices*	*H*	*Comments*
Missa 'A l'ombre d'ung buissonet'	4	iv, 52	Double canons throughout; parody of Josquin's chanson
Missa 'Berzerette savoyenne'	4	i, 20	Cantus firmus: S of Josquin's chanson
Missa 'Bon temps'	4	ii, 1	Cantus firmus: a melody common to several chanson settings, e.g. anon. piece in Petrucci's *Canti B* (ed. in MRM, ii, 1967)
Missa de beata virgine	4	iv, 1	Paraphrases plainchant melodies: Kyrie IX, Gloria IX, Credo I, Sanctus IX, Agnus Dei XVII
Missa de dringhs	4	iv, 35	Parody of Brumel's chanson, 'Tous les regretz'; the title, written in Greek letters by Glarean and Wilfflingseder, is unexplained
Missa 'Descendi in Hortum'	4	ii, 48	Paraphrase of plainsong antiphon
Missa dominicalis	4	ii, 24	Paraphrases plainsong melodies: Kyrie XI, Gloria XI, Credo IV, Sanctus VIII
Missa 'Et ecce terrae motus'	12	iii, 1	Cantus firmus: Easter plainsong antiphon; the mass survives in a Munich choirbook used for a performance under Lassus, *c*1570
Missa 'Je nay dueul'	4	i, 1	Cantus firmus: T of Agricola's chanson, which is also parodied at times
Missa 'L'homme armé'	4	i, 65	Cantus firmus mass on chanson melody treated by numerous other composers
Missa pro defunctis	4	iv, 65	Based on introit, Kyrie, sequence and communion of plainsong Mass for the Dead; earliest known requiem to include the Dies irae
Missa 'Ut re mi fa sol la'	4	i, 41	A hexachord mass

Title	*No. of voices*	*H*	*Comments*
Missa 'Victimae paschali'	4	i, 89	Cantus firmus: Easter sequence
Missa [untitled]	4	ii, 74	
Missa [untitled]	4	iv, 84 (Kyrie)	Survives in *I-Rvat* Pal.lat.1982, a S partbook; only Kyrie is complete in *Bc* Q19
Benedictus, fuga ex una	2	iv, 114	Probably belonged to a complete mass now lost
Benedictus	2	iv, 115	Probably belonged to a complete mass now lost
Credo	4	iv, 87	
Credo	4	iv, 92	
Credo	4	iv, 99	
Credo villayge	4	iv, 106	
Pleni sunt caeli, fuga ex una	2	iv, 113	Probably belonged to a complete mass now lost
OTHER SACRED			
Ave, ancilla Trinitatis	3	v, 1	Extra-liturgical prayer
Ave cujus conceptio	4	v, 3	Votive antiphon
Ave Maria, gratia Dei plena	3	v, 6	
Ave stella matutina	4	v, 8	Sequence
Ave virgo gloriosa	4	v, 12	Sequence
Beata es, Maria	4	v, 18	Marian antiphon and other texts
Bonus et rectus Dominus [=Noe, noe, noe]	4		
Conceptus hodiernus Mariae semper virginis	4	v, 21	Rhymed office antiphon
Da pacem, Domine	4	v, 28	Antiphon for peace; plainsong paraphrased in double canon
Dominus dissipat consilia	2	iv, 116	Probably part of a complete mass now lost
Exemplum octo modorum	8	vi, 62	Occurs also as the 'Sicut erat' of Magnificat (doubtful works); each voice is in a different mode
Gloria, laus et honor	4	v, 29	Hymn; conflicting ascriptions to Brumel and Josquin
Haec dies quam fecit Dominus	4	v, 37	T lost; Easter gradual respond or antiphon
Heth. Cogitavit Dominus	4	v, 38	Lamentation
Languente miseris	5	v, 43	Text: incipits only; cantus firmus 'Clamor meus ad te' in T; sub-titled Lamentatio Brumel (perhaps a ?secular motet)
Lauda Sion Salvatorem	4	v, 46	Sequence

Title	*No. of voices*	*H*	*Comments*
Laudate Dominum de caelis	4	v, 53	Psalms cxlviii and cl
Magnificat primi toni	3	vi, 1	
Magnificat secundi toni	4	vi, 7, 24	Attrib. Brumel and 'Fr. Benalt' or 'Fr. Venalt'
Magnificat sexti toni	4	vi, 39	
Mater patris et filia	3	v, 63	Rhymed office antiphon
Nativitas unde gaudia/ Nativitas tua, Dei genitrix	4	v, 65	Compilation of various texts
Nato canunt omnia	5	v, 71	Compilation of various Christmas texts
Noe, noe, noe	4	v, 84	Text inc.; exists also with text Bonus et rectus Dominus (Psalm xxiv.8–11)
O crux, ave, spes unica	4	v, 85	Passion hymn (verse 6 of Vexilla regis)
O Domine Jesu Christe	4	v, 86	Prayer
Philippe, qui videt me	4	v, 89	Antiphon; T lost
Quae est ista	4	v, 91	Responsory
Regina caeli laetare	4	v, 95	Marian antiphon
Regina caeli laetare	4	v, 99	Marian antiphon
Rosa novum dans adorem	4	v, 103	Sequence
Sicut lilium inter spinas	4	v, 110	Antiphon
Sub tuum praesidium	4	v, 111	Marian antiphon
Vidi aquam	4	iv, 80	Mass antiphon
SECULAR VOCAL			
Dieu te gart, bergere	4	vi, 70	B lost
Du tout plongiet/Fors seulement	4	vi, 74	S of Ockeghem's rondeau appears in T; exists also as inst piece, Fors seulement as incipit in all voices
James que la ne peult estre	4	vi, 80	Opening of the Du Fay-Binchois chanson, Je ne vis oncques la pareille appears in T
Le moy de may	4	vi, 84	B lost
Tous les regretz	4	vi, 101	
INSTRUMENTAL			
Amours, amours	3	vi, 68	
En amours que cognoist	3	vi, 76	
En ung matin [=Vray dieu d'amour]	3		
Esnu sy que plus ne porroie	3	vi, 78	
Fors seulement [=Du tout plongiet/Fors seulement]	4		
Jamays	3	vi, 79	
Je despite tous	3	vi, 83	

Title	No. of voices	H	Comments
Pour vostre amour	3	vi, 87	
Tandernac	3	vi, 88	
Una maistresse	3	vi, 102	
Vray dieu d'amour	3	vi, 104, 113	Based on popular melody from *F-Pn* 12744; appears with text and without; also found with incipit En ung matin

DOUBTFUL WORKS

Title	No. of voices	H	Comments
Missa sine nomine			Attrib. 'Fr. Benalt' or 'Fr. Venalt'; ed. Ros-Fábregas, ii, 73–96
Ave Maria, gratia plena	4	v, 113	Attrib. Brumel in index, Jo. Brumes at heading in *I-Rvat* C.S.45
Credo	4	iv, 118	In *MOd* IV the christian name is Antonius but the surname has been seriously damaged; enough remains to show it is neither Brumel nor Fevin, the names added in pencil by E. Pancaldi (*d* 1950)
Magnificat primi toni			Attrib. 'Fr. Benalt' or 'Fr. Venalt'; ed. Ros-Fábregas, ii, 179–89
Magnificat octavi toni	4	vi, 48	Only the 'Sicut erat' (Exemplum octo modorum) is attrib. Brumel
Magnificat octavi toni			Attrib. 'Fr. Benalt' or 'Fr. Venalt'; ed. Ros-Fábregas, ii, 201–14

BARTON HUDSON

Brumel [Brumello], **Jacques.** *See* BRUNEL, JACQUES.

Brumen [Brument], **Denis** [Denys] (*fl c*1530–40). Composer of probable French origin. The style of his music is reminiscent of Willaert; structure depends entirely on points of imitation, the melodic and rhythmic style is smooth and fluent, and there is little textural contrast. The use of dissonance is freer and more piquant than Willaert's, but still controlled and purposeful like Gombert's. The motets were evidently highly regarded by contemporaries, appearing in an impressive number of sources. *In illo tempore* is attributed to 'Brumen' in all sources but two: the ascription to Richafort in the Munich manuscript (*D-Mu* Art.401) can be dismissed on stylistic grounds. *Domine, labia mea aperies*, by contrast, is attributed to 'Denys Brument' in one source only (1542^5); it is anonymous in the other sources, which also present it a 4th higher.

Eitner (probably following a suggestion of Haberl's) mistakenly identified Brumen with Denis Briant. The styles of the two composers are sufficiently distinct to indicate two separate composers. The chanson *Quant me souvient*, though ascribed only to 'Denys', demonstrates the characteristics of Brumen rather than Briant.

WORKS

Domine, labia mea aperies, 5vv, 1542[5], 1542[6], *A-Wn* Mus.15500, *I-Lg* 775; In illo tempore ... Cum venerit paraclitus, 5vv, 1543[3], 1553[13], 1555[10], *CZ-HKm* II.A.26, II.A.29, II.A.30, *D-Mu* Art.401, *I-Lg* 775, *Rvat* C.S.19 (attrib. 'Brumeti' above music, 'Brumen' in table of contents), formerly in Breslau, Stadtbibliothek, MSS 3, 5 (now lost)

Come havrò dunqu'il frutto, 5vv, 1542[16]; arr. for vihuela, 1554[32] (attrib. 'Verdeloth'); L'autr'ier je vois dans un bosquet, 4vv, *F-Pm* Rés.30345A; Quant me souvient de ma triste, 6vv, 1553[25], 1560[5], *DK-Kk* 1873 (anon.)

Brun, Fritz (*b* Lucerne, 18 Aug 1878; *d* Gross Höchstetten, canton of Berne, 29 Nov 1959). Swiss composer, conductor and pianist. After lessons with Willem Mengelberg in Lucerne, he studied at the Cologne Conservatory (1897–1901), where his teachers included Franz Wüllner (composition) and Max van de Sandt (piano). Upon the completion of his studies, he became music tutor to Prince George of Prussia (1901) and met Busoni and Nikisch in Berlin. Short stays in London and Dortmund were followed by an appointment to teach the piano at the Berne Music School (1903). During this period he performed regularly as a soloist in orchestral and chamber concerts promoted by the Berne Music Society. In 1909 he succeeded Karl Munzinger as principal conductor of the Berne SO, the Cecilian Choral Society and the Berne Liedertafel. Despite a busy conducting schedule (until his retirement in 1941), he also remained active as a composer.

Brun's early works coincided with an upsurge in nationalist schools of composition. While the Austro-German Romantic antecedents of his Second Symphony (1911) are clear, especially in its yearning slow movement, features of the symphonies nos.3–5 are more closely associated with the Swiss Alps; the Third (1919), for example, includes a set of variations on the Ticinese folksong *Noi siamo in tre re*. His string quartets also express the atmosphere of his homeland. He characterized the finale of the First Quartet (1898) as suggesting 'mountain air, the smell of hay'. The Fourth Symphony (1925), however, suggests the influence of Stravinsky, as well as Brahms and Bruckner. The Fifth (1929), which is lighter in texture, grapples with the disintegration of the tonal system; after an elegy for Hermann Suter, the work concludes with a jagged fugue. Showing greater freedom of expression, the Seventh (1937) begins with a noble meditation on themes from Schoeck's opera *Venus* and culminates in a hymnic finale. More programmatic in nature, the movements of the Eighth (1942) correspond to times of day and the Ninth (1950) was conceived as a kind of diary. With the Tenth (1953), Brun returned to the absolute music and formal procedures of his youth. Although his music fell out of favour in the latter half of the 20th century, he has continued to be considered a pre-eminent Swiss symphonist.

PETER PALMER

Brün, Herbert (*b* Berlin, 9 July 1918). German composer. He left Germany in 1936 for Palestine, where he studied the piano and composition at the Jerusalem Conservatory. He later studied with Stefan Wolpe, Eli Friedman and Frank Pelleg, and attended Tanglewood and Columbia University (1948–50). From 1955 to 1961 he conducted research into electronic composition in Paris, Cologne and Munich. During this period he also worked as a composer, conductor and guest lecturer, and broadcast a series of programmes on contemporary music. After a lecture tour of the USA in 1962, he joined the composition department at the University of Illinois, where he continued to work in the electronic studio and began composing with computers. Brün has held residencies and guest professorships at Ohio State University (1969–70), the Hochschule der Künst and Technische Universität, Berlin (1978) and the University of Kassel (1989). Beginning in 1980, he toured and taught with the Performer's Workshop Ensemble, a group he founded. Many of his writings and lectures focus on the social and political significance of composition. His work with computers can be seen broadly as an exploration of two questions. Firstly, is it possible to define a musical idea in such a way that a computer will generate the compositional realization of it?; and secondly, is it possible to design a computer system which would 'compose' with the input of an initial idea?

Bruna, Pablo (*b* Daroca, bap. 22 June 1611; *d* Daroca, 26/27 June 1679). Spanish composer and organist. Known as 'El ciego de Daroca', he was blinded by smallpox in early childhood. He became organist of the collegiate church of S María, Daroca, in 1631 and was named its choirmaster in 1674. He was honoured as one of the foremost organists and organ teachers in Spain; his pupils included Pablo Nassarre.

Apart from seven *Pange lingua* settings and one incomplete set of psalm versets, most of Bruna's 32 known organ pieces are of the tiento type (though a few have other titles). The tientos for undivided keyboard (*lleno*) are quite varied, some brief and quiet (especially those termed 'de falsas', which feature suspensions and chromatic inflections), others long and full of tumultuous figuration. All begin with imitation and retain their opening subjects throughout, though in the longer works these are transformed in various ways. The tientos for divided keyboard (*partido* or *medio registro*) also begin with imitation, but this gives way to passage-work with accompaniment in which series of figures are taken through long sequential progressions. Bruna's music is sonorous, well suited to the keyboard and imbued with an intensity peculiarly Spanish; at times it achieves a real magnificence through its fantastic figuration and dense, close imitation. He was the leading Spanish keyboard composer between Correa de Arauxo and Cabanilles.

Bruna's two nephews were also musicians, both taught by him. Diego Xaraba y Bruna (*b* Daroca, 1652; *d* *c*1716) was organist of the cathedral of Nuestra Señora del Pilar, Zaragoza, and a chamber musician to Don Juan José of Austria, governor of Aragon 1674–7. In May 1677 he became organist of the royal chapel in Madrid and in 1700 *maestro de clavicordio* to Charles II's queen, Marie-Louise. Some of his organ works survive (*E-J*, *Mn* 1357). His brother Francisco Xaraba y Bruna (*d* 30 July 1690) was appointed organist of the collegiate church at Pastrana, Guadalajara, in 1680, then (1687) of the royal chapel in Madrid, where he was also *maestro de clavicordio* to the queen.

WORKS

INSTRUMENTAL

ALMONTE HOWELL/LOUIS JAMBOU

Brunckhorst, Arnold [Andreas] **Matthias** [Melchior, Martin] (*b* Celle or Wietzendorf, 1670; *d* ?Hanover, 1725). German composer and organist. From 1693 to 1697 he was employed as an organist at Hildesheim, first at the church of St Martini, then at the Andreaskirche. In 1697 he was called by Duke Georg Wilhelm of Brunswick-Lüneburg to become organist of the Stadtkirche in Celle, where a large organ had been erected in 1653 as a ducal donation. Around 1700 he may have met the young J.S. Bach on one of his visits from Lüneburg to hear the duke's famous French instrumentalists. When the court was dissolved after Georg Wilhelm's death in 1705, Brunckhorst retained his post until, in 1720, he was appointed court organist at Hanover. In this capacity he is last mentioned in the *Hamburgischer Relations-Courier* of 10 August 1723. The paper reported that the organ of the residential church had been greatly enlarged at Brunckhorst's instigation. He was also frequently called on to test new organs, but he did not work as an organ-builder himself, as some writers have supposed from a misinterpretation of a passage in J.H. Biermann's *Organographia* (Hildesheim, 1738).

Brunckhorst's one-movement keyboard sonata, written about 1715–20, is a remarkably early testimont to the reception of Domenico Scarlatti's sonatas in Germany; Bach is said to have owned the autograph at one time. The only surviving example of Brunckhorst's organ music, a prelude and fugue, shows features typical of the post-Buxtehude north German style, while his Christmas and Easter cantatas are obviously influenced by the Thuringian tradition: choral polyphony has been abandoned in favour of simple homophonic movements, most of them in the same key. The melodic invention, however, is original. During his years at Celle Brunckhorst dedicated to the duke several Passion works, now lost, the payment for which is documented in the account books.

WORKS

Christmas cantata, 4vv, 2 tpt, 3 vn, vle, bc; Easter cantata, 4vv, tpt, 2 vn, va da braccio, bc: *D-Bsb*; Christmas cantata ed. A. Egidi, Musikschätze der Vergangenheit (Berlin, 1931); both ed. D. Hellmann (Stuttgart, 1959)

Sonata, A, hpd, *Bsb*; prelude and fugue, e, org, *LEm*, ed. in Organum, iv/7 (Leipzig, 1925)

Passion music, lost

DOROTHEA SCHRÖDER

Bruneau, (Louis Charles Bonaventure) Alfred (*b* Paris, 3 March 1857; *d* Paris,15 June 1934). French composer. He began his musical studies as a cellist, studying at the Paris Conservatoire with Franchomme (1873–6) and winning a *premier prix* on the instrument and in his twenties playing in the Orchestre Pasdeloup. From 1879 to 1881 he studied composition with Massenet, who left an indelible impression on his musical style. A cantata, *Geneviève*, won him a second prize in the Prix de Rome in 1881 and his *Ouverture héroïque* and cantata *Léda* saw their première with the Pasdeloup Orchestra (1884). In 1887 his first opera, *Kérim*, was successful enough to convince him that he should devote himself largely to opera.

Kérim, like a number of Bruneau's operas, directly incorporates folk melodies (in this case of oriental origin), and these are clearly indicated in the score. Although they are blended with more conventional elements of contemporary French operatic style, following Massenet and Gounod, Bruneau attempts to present the oriental elements in an unconventional way, using harmonies derived from the melodies themselves as well as highly coloured orchestration.

It is easy to dismiss the central period of Bruneau's output, dominated by his collaborations with Emile Zola, as one of realism, naturalism or French *verismo*. Yet despite his close identification with Zola's works, strong elements of fantasy, symbolism and extravagant musical effects are found in his many operatic transformations of Zola's tales. The first, *Le rêve*, to a Zola adaptation by Louis Gallet, has as its central character an *ange-femme*, Angélique. She is strongly characterized in Gallet's libretto and Bruneau responds extravagantly, incorporating both folksong and plainsong and employing an unseen choir and orchestra for the hidden virgin voices which she frequently hears. The opera, whose blend of eroticism and religiosity caused it to enjoy considerable success at the Opéra-Comique after its première in 1891, was precisely in tune with artistic tastes in the 1890s, although these soon went out of favour, causing such works to fall into neglect. But Bruneau's fundamental achievement should not be overlooked: namely, in the words of Georges Pioch, who attended the première, 'to have introduced on to the stage of an opera house [in 1891] singers dressed in 1891 costumes'. Among those who wrote to congratulate him was Chabrier: 'c'est un début de maître, absolument'.

In *L'attaque du moulin* Bruneau repeated the formula of setting a Gallet adaptation of Zola, again with considerable success, but this time more dependent on the pace and realism of the story than on special effects. Originally set during the Franco-Prussian war, but transposed in Carvalho's first production to the time of the Revolution, its theme is the effects of war on a miller's family and a stranger who has fallen in love with the miller's daughter. Bruneau provides two possible endings.

From this time onwards, Zola, who had become a close friend of the author, himself supplied Bruneau with librettos. *Messidor* (1897) was the first fruit of this collaboration. Although initially successful, it was produced at the height of the Dreyfus affair, in which Bruneau actively followed Zola's support of Dreyfus and was his constant companion during the trial. This led to a marked fall in his popularity and for some years his works were less than welcome in Paris.

Alongside the operas of the 1890s, Bruneau also composed several collections of songs. In choosing poetry for these, he returned several times to the poet Catulle Mendès, a fellow enthusiast of Wagner who had produced librettos for several composers including Chabrier, Messager and Debussy. The 10 *Lieds de France* are deliberately simple in style, modelled on folksongs from different regions of France. In strong contrast to the heavy, Wagnerian style of much of his operatic music, these strophic songs use accompaniments which are pared down to bare essentials and ally themselves to the late 19th-century interest in the regional music of France led by Bourgault-Ducoudray and d'Indy, among others. Each of the *Chansons à danser*, also to poems by Mendès and delicately orchestrated for chamber orchestra, is named after an antique dance, and Bruneau responds by using elements of pastiche. A number of his other songs are more forward-looking, reflecting the composer's continual experimentation with word-setting. Several were also orchestrated, one of the most ambitious and widely performed being *Penthésilée, reine des Amazones*, styled a 'poème symphonique avec chant' also to a text by Mendès and scored for large orchestra. These collections were later complemented by more elaborate and advanced settings notable among which are *Les chants de la vie*, to poems by various poets, four of which were orchestrated, while a few single songs were directly composed for voice and orchestra.

Among a modest output of religious music, the *Requiem* stands out as the most ambitious. Commissioned by the Bach Choir, and first conducted in London by Stanford, it follows the model of Gounod's more ambitious works by including dramatic effects with various groups of

singers and players spatially separated, including two groups of brass, a cappella singing and a children's choir accompanied by harps and organ.

The first opera of the new century, *L'ouragan* (1901), is an opera in which libretto and music are particularly closely wedded. The hurricane of the title not only provides an opportunity for descriptive music but also mirrors the increasing conflict between the two pairs of brothers and sisters on whom the story centres. As a magic tree (common in the Celtic mythology on which this opera is based) sings to the lovers, Bruneau employs an orchestra behind the scenes. Bruneau's final direct collaboration with Zola was *L'enfant roi*, a *comédie lyrique* set in a Parisian bakery. Here the composer introduces extended passages evoking Parisian street life: children singing nursery rhymes in the Tuileries, the cries of flower sellers in a street market and scenes in the patisserie. After Zola's death in 1902, Bruneau continued his allegiance by fashioning his own librettos from the author's work. In *Naïs Micoulin* (1906), the first of these, Bruneau's libretto is curiously lacking in drama, although its extended dialogues are faithful to Zola in their inclusion of poignant physical detail. *Les quatre journées* is an opera concerned with a family before, during and after a war. It is a naively sentimental work recounting the fortunes of a couple brought up on the banks of the river Durance. Each act represents one of the seasons and Bruneau plays to the contemporary audience with some appropriately jingoistic choruses.

Henceforth Bruneau turned away from contemporary realism, *Le jardin du paradis* being the first of his works to take such a step. Based on a Hans Christian Andersen fairy-tale, the work has as its centrepiece an oriental paradise garden, with appropriately stylized music, and is characterized by more static, scenic music than found elsewhere in Bruneau's output.

Musicological interest in Bruneau's role in the politics of turn-of-the-century French opera has largely outweighed interest in reviving his music. While some have been critical of his lack of a natural melodic gift comparable to Massenet, others have found that his harmonic turns, once seen as experimental, with hindsight seem merely clumsy. It was perhaps inevitable that the first monograph on his work should have come from the English critic Arthur Hervey rather than a French contemporary, for apart from the unpopularity he encountered after allying himself with Zola in support of Dreyfus, the themes of his earlier operas frequently raised political issues which many thought had no place in the opera house. The issues of class conflict and distasteful social realities dealt with in the Bruneau-Zola collaborations can hardly have endeared the composer to the richer patrons of the Opéra. *Messidor*, for example, the story of a village community starved of water because a wealthy industrialist has diverted a river to purify gold, brought an entirely new, and by no means entirely welcome, level of social realism into establishments traditionally dealing only with the historical, the fictional and the make-believe. Even though, as Bruneau himself explained, his operatic *vérisme* was much less confrontational than Zola's undiluted brand, and wove in more fantasy with more idealised characters, the association with the figurehead of naturalism remained paramount in his critical reputation in France. He was also criticized for using a prose instead of a rhymed libretto. This practice had already been advocated by Berlioz, even though he set prose only once, and subsequently by Gounod and Massenet, but Bruneau's *Messidor* was the first opera to use prose specifically in the service of naturalism. A similar practice was employed by Charpentier, in *Louise*, and later by Gabriel Dupont and Xavier Leroux. In an important article 'Vers ou prose', originally published in *Le Figaro* in 1897 and reprinted in his collection of essays *Musiques d'hier et de demain*, he defended the practice, although he returned to verse librettos in his later, less naturalistic works.

His ideas in general were constantly challenging tradition and his admiration for Wagner was based on his view that Wagner was the great liberator of 19th-century music. Although he used leitmotifs and owed a great deal to Wagner's chromatic language, his music is far less Wagnerian than that of many of his contemporaries and in his later music he used a plurality of musical languages and effects.

Bruneau's writings on music include important memoirs of Zola (Paris, 1932), a book on Massenet (Paris, 1935), essays outlining his own theory of opera (notably in *Le Figaro* and *Rivista musicale italiana* in 1897), and perceptive comments on other operas in reviews and articles.

WORKS

Unless otherwise indicated, printed works were published in Paris and unpublished MSS are in F-Pn.

OC – *Opéra-Comique*
PO – *Opéra*

OPERAS

unless otherwise stated, drames lyriques, first performed in Paris

Kérim (opéra, 3, P. Milliet and H. Lavedan), Château d'Eau, 9 June 1887, *F-Pn*; (1887)
Le rêve (4, L. Gallet, after E. Zola), OC (Favart), 18 June 1891, *Pn*; (1892)
L'attaque du moulin (4, Gallet, after Zola), OC (Favart), 23 Nov 1893, *Pn*; (1893)
Messidor (4, Zola), Opéra, 19 Feb 1897, *Pn*; (1897)
L'ouragan (4, Zola), OC (Favart), 29 April 1901 (1901)
L'enfant roi, 1902 (comédie lyrique, 5, Zola), OC (Favart), 3 March 1905 (1905)
Lazare, 1902 (1, Zola), Radio France, 20 May 1954, *Pn*
Naïs Micoulin (2, A. Bruneau, after Zola: *La douleur de Toine*), Monte Carlo, 2 Feb 1907, *Pn*; (1907)
Les quatre journées (conte lyrique, 4, Bruneau, after Zola), OC (Favart), 25 Dec 1916, *Pn*; (1916)
Le jardin du paradis, 1913–21 (conte lyrique, 4, R. de Flers and G.-A. de Caillavet, after H.C. Andersen), Opéra, 31 Oct 1923, *Pn*; (1924)
Le roi Candaule, 1917–19 (comédie lyrique, 4 acts and 5 tableaux, M. Donnay), OC (Favart), 1 Dec 1920, *Pn*; (1922)
Angelo, tyran de Padoue, 1923–5 (5, C. Méré, after V. Hugo), OC (Favart), 16 Jan 1928, *Pn*; (1928)
Virginie, 1928–30 (comédie lyrique, 3, H. Duvernois and Bruneau), Opéra, 7 Jan 1931, *Pn*; (1930)

Undated: Vercingétorix, vs frag. *Pn*

OTHER STAGE WORKS

first performed in Paris

Les bacchantes (ballet, 2, F. Naquet and Bruneau, after Euripides), 1888, OC (Favart), 30 Oct 1912, *F-Po*, vs (1912)
La faute de l'abbé Mouret (incid music, Bruneau, after Zola), 1904–5, Odéon, 1 March 1907 (1907)
L'amoureuse leçon (ballet, C. Mendès), Arts, 6 Feb 1913 (1913) [from Chansons à danser, 1895]

VOCAL WITH ORCHESTRA

Jeanne d'Arc (A. de Musset), scène (1879)
L'arabe, chorus, orch, 1881, *F-Pc*
Geneviève (E. Guinand), scène lyrique (*c*1881)
Léda: poème antique (H. Lavedan), choral sym., solo vv, chorus, orch, 1882

Requiem, solo vv, chorus, orch, org, ?1884–8, *B-Bsp*, vocal score (1895)
Penthésilée (Mendès), sym. poem, 1888 (1892)
Le tambour (Saint-Georges de Bouhélier), poème lyrique (1915)
Le chant du drapeau (M. Boukay), hymne, 1916 [orig. with pf acc. (1915)]
Le navire (R. Puaux), poème lyrique (1917)

Other orchd songs, orig. for 1v, pf

OTHER VOCAL

Choral: Ave Maria, mixed vv, org/pf, 1880 (1903); O salutaris, mixed vv, org/pf, vc, 1880 (1903); Hymne du neuvième dragons (Martinet) (1888); Notre amour (A. Silvestre), female vv (1903); Les petiots (J. Richepin), 2 female vv/(S, Mez) (1903); 2 choruses or vocal quartets (M. Desbordes-Valmore), 4vv (1933): Les cloches et les larmes, La jeune fille et l'oiseau; several unpubd choruses
Songs: 5 mélodies (F. Coppée, L. Adrien, G. Chezol) (1880); 2 mélodies (Lavedan), 1883 (1885); 3 mélodies (Lavedan, Richepin) (1889); Les [10] lieds de France (Mendès) (1892); 6 chansons à danser (Mendès) (1895) [later used for L'amoureuse leçon, ballet, 1913]; 3 lieds de France (Mendès) (1896); [8] Mélodies de jeunesse (Ronsard, C. Hugues, Richepin, P. Bourget, Silvestre, R. Rousseil, Gautier) (1903); La nouveau-né (H. Lavedan) (1903); Les amants fidèles (Mendès) (1904); Chanson de s'amie bien belle (C. Marot) (Milan, 1904); Les [20] chants de la vie (Saint-Georges de Bouhélier, F. Gregh, H. Bataille) (1913); Vocalise-étude (1914); Nocturne (R. Puaux) (1915); Résurrection (P. de Choudens) (1915); Ode à la paix (Puaux) (1920); Amitié (A. de Mollet) (1921); [10] Chansons d'enfance et de jeunesse (Desbordes-Valmore) (1928); [10] Chants antiques (A. Chénier) (1928); Plein air (Gautier), 10 songs (1933); several unpubd songs

INSTRUMENTAL

Orch: Idylle, suite, 1881; Romance, hn/vc/va, orch/pf, 1882, with pf acc. (1885), with orch (1909); Ouverture héroïque, 1883; La belle au bois dormant, sym. poem, 1884 (1902); Romance, F, vn, orch, acc. arr. pf (1901)
Chamber: 2 morceaux de genre, vc, pf (1878); [3] Pièces, pf, 1883: Maman, Petit frère, Grande soeur; Romance, fl/vn, pf, 1884 (1902); Nuit de mai (de Musset), 2 vn, va, vc, harp, recitation, 1886; Fantaisie, hn, pf (*c*1901); several other unpubd romances and morceaux de lecture for various solo insts, pf and for 2 cl

RICHARD LANGHAM SMITH

Brunei [State of Brunei Darussalam] (Malay Negara Brunei Darussalam). Country in South-east Asia. An independent Islamic sultanate, Brunei is located on the north-west coast of the island of Borneo, about 440 kilometres north of the equator. The country is bounded on its northern edge by the South China Sea and on all other sides by the Malaysian state of Sarawak.

Despite a relatively small land mass of 5765 km² Brunei is anything but geographically and demographically homogeneous. Swampy tidal plains line the coast, hilly lowlands mark the western interior, and thickly-forested mountains rise in the east to 1850 metres above sea-level. The inland areas are sparsely inhabited compared to the coastal plains, where more than 85% of the population resides. According to 1998 estimates, the population of the sultanate is approximately 323,600. About 67% of this figure comprises the 'Brunei Indigenous' peoples, a governmental category officially embracing Brunei Malays, Kedayan, Tutong, Belait, Bisaya, Dusun and Murut communities. The Brunei Malays are numerically (and culturally) dominant, having been reported in various sources to amount to more than 50% of the total population. Recent censuses, however, do not provide figures for the less statistically substantial groups, largely because of increasing ambiguity of ethnic affiliations, the result of intermarriage and cultural assimilation. Consequently, diverse Brunei Indigenous peoples are typically subsumed under the official rubric 'Malay', despite differences in language, history and religion etc. Second to the Brunei Malays in numerical significance are the ethnic Chinese, who constitute their own census category. Government statistics indicate that 15% of the population is Chinese, though studies conducted during the 1990s suggest that a much higher figure, 25–30%, might be more accurate. 'Other Indigenous' communities, primarily Iban and Kelabit peoples who have entered the sultanate through Sarawak, form about 6% of the population. The remaining inhabitants of Brunei include Europeans (mainly British), Indians and assorted non-indigenous groups.

Islam is the principal religion of Brunei, with over 80% of the population adhering to this faith. Other prominent religions or belief systems include Taoism, Confucianism and Buddhism within the Chinese community, and Christianity, which is also common among the Chinese as well as among many non-Malay-speaking peoples of the interior. In general, inland dwellers exhibit a more pronounced tendency to retain indigenous belief systems and practices, often but not always within a broader Muslim or Christian context.

At an international symposium on the music and drama of South-east Asia in 1969, the Brunei delegation bemoaned the absence of any systematic study of these traditions in its country. This situation remains remarkably unchanged. Of the little work that has been conducted in Brunei, most has highlighted only Malay practices, if not specifically those of the royalty, and vocal performance has yet to be addressed in any detail. Further complicating the matter is the inconsistent use of various ethnic labels in the literature. Bisaya, Belait, Tutong and other peoples, who may or may not have their own category in government records, are sometimes collectively called 'Dusun', and 'Dusun' may again be lumped into the 'Malay' category for census purposes. Some publications have described Brunei traditions without mentioning ethnic groups or regions at all. The following musical sketch must therefore be understood as necessarily imbalanced (*see also* MALAYSIA, §§II and III).

1. Music of the Royal Sultanate and the Malay majority. 2. Minority music. 3. Gong ensembles. 4. New directions.

1. MUSIC OF THE ROYAL SULTANATE AND THE MALAY MAJORITY. Like other Malay sultanates of South-east Asia, the Sultanate of Brunei maintains a royal ensemble of gongs, drums and double-reed aerophones, called *nobat*. Staffed by specially appointed musicians, the ensemble marks an array of royal occasions, including coronations, marriages, circumcisions, bestowal of titles and visits by noble officials, as well as the departure from the palace of the Sultan or his consort. The *nobat* may also announce the morning, late afternoon and evening prayers of the Muslim faith. At the installation of the present Sultan in 1968, the *nobat* comprised two large hanging gongs, four smaller hanging gongs (*canang*), four double-headed barrel drums (*gendang labek*), two silver-covered goblet drums (*nakara*) and four double-reed aerophones (*serunai*). Specific melodies, rhythms and combinations of instruments characterize various events, if not particular portions of them. In the case of death of a member of the royal family, the *nobat* ensemble is silenced. Only after a prescribed period may the orchestra be ritually 're-opened'.

An instrument most closely associated with Malay communities at large is the *gambus*, a plucked lute. Ultimately of Middle Eastern origin, the *gambus* of Brunei has developed so idiosyncratically that it may sometimes scarcely resemble its Arab ancestor. The Brunei instrument is carved from softwood, with a soundboard made from the skin of a deer, goat, monitor lizard, snake or other animal. Three courses of fibre or nylon strings are tuned in 4ths and are plucked with a rattan or water buffalo horn plectrum. The *gambus* typically combines with drum, flute and voice to provide dance accompaniment for all sorts of festive occasions.

Hadrah is a type of ensemble music that typically marks major Muslim religious celebrations (for example, the birthday of the Prophet Muhammad, the end of the fasting month of Ramadan), as well as Malay weddings, betrothals, circumcisions and other festivities. Comprised of several *rebana* frame drums (without jingles), *hadrah* accompanies songs of praise for the Prophet Muhammad, usually in Arabic. Consequently, while it may be used in multifarious recreational settings, *hadrah* nevertheless retains its religious association. Different playing styles demand different types of *rebana*, and the singing, in turn, is stylistically dependent on the nature of the accompaniment.

2. MINORITY MUSIC. The shallow pool of literature on the musical practices of Brunei's Malay population appears bottomless compared to the sprinkling of studies on the musics of minority groups. Sporadic reference is often made to various dance forms such as the Murut *umak rumak* house-warming dance or the ceremonial *alai* dances, through which certain Dusun communities contact spirit realms. The musical components of these and other dances, however, are usually not mentioned. Similarly, while Chinese New Year is described as the largest annual celebration for much of the Chinese population, its musical elements still await rigorous research.

Among the minority groups whose traditions have received some attention over the years are the Kedayan, Belait and Bisaya. *Gulintangan* gong ensemble music (see below) is a feature of the Kedayan harvest festival, *Makan Tahun*, as is a special procession and incantation called *ratib saman*. This incantation is performed throughout the second night of the festival by a group of Muslim religious leaders, who slowly proceed in a circle inside the men's hall while rhythmically intoning Arabic words. It is thought that this part of *Makan Tahun* stems from a pre-Islamic practice during which spirits and deities were called to partake of the feast.

Earlier in the 20th century, Belait villages conducted a type of harvest ritual (*Perakong*) that employed hanging gongs, a drum and a special percussion board, *perakong*, from which the ritual drew its name. The *perakong* board was suspended from the rafters and played by two individuals who stood at each end of the instrument, striking it rhythmically with two wooden rods. Sounding together with the *perakong* were eight vertically-hanging knobbed gongs: five large *agung* and three smaller *canang*. At one point in the ritual sequence, two dancers performed to the beat of the gongs with bell-bearing bamboo stamping sticks. Although the *Perakong* was evidently characteristic of Belait villages in the past, the extent to which this ritual and the musics associated with it continue to be practised remains unclear.

3. GONG ENSEMBLES. These are common to many of the 'indigenous' peoples of Brunei. The most prominent of these ensembles, *gulintangan*, can be heard in coastal Malay, Kedayan, Murut and Belait communities. Among the Iban, the cognate tradition is called *engkerumong* (*see* MALAYSIA, §III, 2). The *gulintangan* ensemble takes its name from the lead melody instrument (*gulintangan*), which consists of a row of seven or eight small knobbed gongs, resting horizontally on ropes or rattan strips in a wooden frame. The ensemble also includes three types of vertically-hanging gongs, which support the melody of the *gulintangan*. Of these the *gong* is the largest in diameter and lowest in pitch. The *tawak-tawak* has a deeper rim than the *gong*, but a smaller diameter, yielding a higher tone. The highest-pitched supporting gong is the *canang*, which can be identified by its narrow rim and flat face. *Canang* surfaces are sometimes decorated with Chinese dragons, which has elicited speculation that some of the components of the *gulintangan* ensemble are of Chinese origin. All of the gongs are made of brass and are usually cast in Brunei. The only non-gong instrument included in the *gulintangan* ensemble is the *gendang labit*,

a double-headed conical drum with parallel cord- and belt-lacing and wedge bracing.

The composition of the *gulintangan* ensembles varies from community to community in terms of the number of supporting gongs and *gendang labit*. Malay and Kedayan groups, for instance, may use as few as five hanging gongs and two *gendang labit* in addition to the *gulintangan*. Belait villages, on the other hand, may use more than twice as many hanging gongs and a single drum as supporting instruments. The instrumentation of a Murut ensemble would likely fall somewhere in between its Malay and Belait counterparts.

Oral tradition holds that the *gulintangan* ensemble was the province of the Brunei elite until the nobility converted to Islam early in the 15th century. At that time, the Sultanate accepted the *nobat* as its official musical ensemble, and the *gulintangan* subsequently spread to the coastal communities and the inland areas. There, it typically marked harvest festivals, marriage ceremonies and the start and finish of headhunting expeditions. While headhunting has long ceased to be practised, the *gulintangan* is still performed in conjunction with various local celebrations; within the Malay communities, it also accompanies the martial art *pancak silat*.

The Bisaya at one time maintained an ensemble tradition similar to the *gulintangan*, but evidently the *gulintangan* itself was not present. In a 1960 publication, G.C. Davis described a Bisaya gong ensemble without making any reference to a *gulintangan*-like row of gongs. His instrument inventory included two large hanging gongs, four to six medium hanging gongs, four to six smaller ones, and a single-headed drum, which certainly seems to parallel the gong and drum backdrop of the *gulintangan* ensemble. The Brunei delegation to the 1969 conference on Traditional Music and Drama of Southeast Asia also mentioned an ensemble of the 'indigenous race of the Kuala Balai' estuary (i.e. Bisaya) that consisted exclusively of hanging gongs and a drum. Such hanging gong ensembles are common to many of the inland populations of the neighbouring Malaysian states of Sarawak and Sabah and have often been associated with indigenous ritual activities. Consequently, some have speculated that these ensembles pre-date Islam in the area. Among the Bisaya, the gongs once accompanied a dance intended to honour the spirit of the deceased leader, but the position of the gong ensembles in a contemporary setting remains to be investigated.

4. NEW DIRECTIONS. As indicated above, little work has been done to assess the role of older musical practices in contemporary society, including the extent to which these forms have interacted with newer musical styles. At Malay weddings, older vocal and instrumental sounds may be juxtaposed with recent popular musics. Sometimes electric keyboards and amplified guitars are added to ensembles of Malay instruments. Fearing an extinction of local music traditions and their replacement by Western styles, the Brunei Ministry of Culture, Youth and Sports has made an effort to revive interest and perpetuate many of the country's indigenous music traditions through its programmes.

VIRGINIA GORLINSKI

Brunel [Brunello], **Antoine.** *See* BRUMEL, ANTOINE.

Brunel [Brumel, Brumello, Brunello], **Jacques** [Giaches, Jacomo] (*d* Ferrara, 1564). French organist and composer. A certain Jacques Brunel vacated an organist's post at Rouen Cathedral in December 1524. He was probably the same Brunel who was organist at the Este chapel from early 1532 until 1564. Thus from 1547 to 1558 he would have served under Cipriano de Rore. During the years 1543–59 Brunel received money for the keep of a horse, apparently for travel to Modena and Reggio nell'Emilia to oversee the Este chapels there; he is also known to have spent some time in Pesaro and Urbino, at the request of Duke Guidubaldo II of Urbino, in the summer of 1534 and during the period 1561–3. He was last paid in March 1564 and had died by May. It is not known whether he was related to ANTOINE BRUMEL who was at Ferrara from 1506 to 1510.

The few 16th-century references to Brunel make it clear that he was regarded as an outstanding organist. Jacopo Corfini (*Primo libro de motetti*, Venice, 1571), Luigi Dentice (*Due dialoghi della musica*, Naples, 1552), and Cinciarino (*Introduttorio*, Venice, 1555) praised him. In *Ragionamenti accademici* (Venice, 1567) Cosimo Bartoli said that 'he plays with more grace, with more art and more musically than any other, whoever he may be'. Brunel was succeeded by a son, Virginio, who was organist at the Cathedral of Ravenna from August 1572 until some time after 1580.

Anthony Newcomb has made the case that 14 anonymous ricercares preserved in the so-called Bourdeney Codex (*F-Pn* Rés.Vm 851), four of which are attributed to 'Giaches' in *I-Rvat* Chigi Q.VIII.206, were composed by Brunel in the 1550s and 60s. If so, they show him to have been a major innovator in the genre. They are rigidly contrapuntal, based on between one and four subjects. In multi-thematic pieces the various themes are closely related through evolving variation, often using *inganno*, inversion or augmentation, and the works often employ countersubjects as well.

BARTON HUDSON

Brunelli, Antonio (*b* S Croce sull'Arno, Tuscany, 20 Dec 1577; *d* Pisa, before 19 Nov 1630). Italian composer, organist, teacher and writer on music. It has often been stated that he was born at Bagnarea (now Bagnoregio), near Viterbo. In his op.12 he himself called it his place of origin, but he was referring to the fact that his family came from there – they had been there since the 15th century – while making it clear that he was born in Tuscany. He received his main musical education in the 1590s in Rome, where his teacher was G.M. Nanino; he stated in the preface to his *Regole utilissime* that he had visited many other cities and schools besides. In 1603 he became *maestro di cappella* and organist of the cathedral at S Miniato, near Pisa. The last recorded payment to him was made in August 1607. He moved to Prato in March 1608 as *maestro di cappella* at the cathedral and at the same time came into contact with Florentine society. In March 1613 he was appointed *maestro di cappella* of the Grand Duke of Tuscany to the Knights of St Stephen at Pisa. In their letter to the grand duke recommending him, the knights praised his qualities as a composer, singer and general musician; they paid him a monthly salary of ten scudi, six scudi more than his predecessor received. G.P. Bucchianti, in the preface to his *Arie, scherzi, e madrigali* (1627), paid a warm tribute to Brunelli as his teacher; Giovanni Bettini was another pupil. Indeed, Brunelli's didactic publications suggest that he was much concerned with teaching, including, perhaps, the teaching of singing. He was on intimate terms with Giulio Caccini, to whom he dedicated his 1612 book of canons (his dedication is a useful source of information about Caccini). In his op.10 he included two songs by Caccini and others by Lorenzo Allegri, Vincenzo Calestani and Peri; his op.12 includes three pieces by Bettini. He was replaced at Pisa by his brother Lorenzo on 19 November 1630, so he probably died shortly before then.

Brunelli is an important, versatile figure in the period of stylistic transition in Florence at the beginning of the 17th century. Until recently, he has been studied mainly as a composer of songs, dances and dance-songs, but he was brought up in the polyphonic traditions of Rome and he published a good deal of sacred polyphony as well as pedagogical writings, vocal exercises and canons. Indeed, recent studies confirm that he was one of the most significant Italian music theorists of his time. In the preface to his *Regole utilissime* (1606), dating from after his arrival in Tuscany from Rome, he questioned the lasting quality of the new monodic style, which he clearly considered an ephemeral fashion. Contact with the lively Florentine environment, home of Caccini, Peri and other monodists and an active centre of court entertainment music, must, however, have tempered his enthusiasm for polyphony, and in his opp.9, 10 and 12 he produced some of the most attractive of all Florentine monodies, duets and trios; a good example is *Pur si rupp'il fero laccio* (in op.10), with its persistent Lombard rhythm (facs. in Racek, 282; transcr. in *FortuneISS*, appx iv, 18). Some of his songs have ritornellos, and in this and other aspects they are akin to those of Vincenzo Calestani. In his op.12 he included dance music that had been performed in court entertainments, as did, for example, Lorenzo Allegri in his *Primo libro delle musiche* (1618) and Marco da Gagliano in his *Musiche* (1615); he is known to have written with Peri the music for the *Ballo della cortesia*, performed at court on 11 February 1614. Moreover, his *Varii esercitii* is not only for voices but also 'for practising on cornetts, flutes, recorders, viols, violins and similar instruments'.

FABIO BISOGNI, NIGEL FORTUNE

Brunello, Jacques. *See* BRUNEL, JACQUES.

Brunet, Johannes (*fl c*1510–30). French composer. He may have been active in Rome; his motets all appear in manuscripts of the Cappella Sistina, but he was never a member of that institution or of the Cappella Giulia. His musical style resembles that of Richafort, having affinities also with Moulu, Le Brung and De Silva, as well as certain (doubtless conscious) reminiscences of Josquin. But Brunet's musical personality is distinctive, combining an extravagant deployment of dissonance and a colourful use of subsidiary tonalities with superb control of form, pace and texture. Only two motets have unequivocal ascriptions to 'Brunet'; three others have disputed, confused or no ascriptions.

Reynolds identified the composer with a Breton Benedictine priest named Johannes Brunet who was a member of the papal household in Rome from 1486 until 1493 and served as organist of S Pietro in 1490–91. He died on 6 June 1515 at the monastery of St Mathieu-de-Finistère, of which he had been abbot since 1489. This man would have been an exact contemporary of Févin's, but the style of the motets and the sources in which they are preserved point to a member of the next generation of French composers, contemporary with Richafort. It is possible that the abbot of St Mathieu is the composer of the chanson *Hellas, madame*, which does not share stylistic characteristics with the motets: it is a typical example of the three-voice chanson as cultivated by Févin, and unlike any of the motets it is preserved in a French manuscript, one closely associated with Queen Anne of Brittany.

JEFFREY DEAN

Brunet, Pierre (*fl* late 16th century). French composer and lutenist. The Parisian archives, in recording the baptism of his two sons in 1579 and 1589, describe him as lutenist to Henri III. He is known to have written a volume of music (in tablature) for the mandora, published by Le Roy & Ballard in Paris in 1578, but no copy of it survives.

HOWARD MAYER BROWN

Bruneti, Gaetano [Caetano, Cayetano]. *See* BRUNETTI, GAETANO.

Bruneto (dalli Organi) [Bruneto dalli alpichordi]. *See* PONTONI, BRUNETO.

Brunette. A species of song popular in France during the late 17th century and the 18th. It has been claimed that the name derives from the refrain ('Ah, petite Brunette! Ah, tu me fais mourir') of the song *Le beau berger Tirsis*, which became very popular (see GMB, no.217). Such *airs*, usually in bipartite form (generally for one to three voices with or without accompaniment), are characterized by tender sentiments and references to young brunettes, although the latter are not mentioned in every piece of this name. Melodic variations, often introduced into the later verses, were sometimes included in publications of brunettes, as in those issued in Paris by the firm of Ballard between 1703 and 1711. Chambonnières and D'Anglebert made some use of brunette melodies in their harpsichord pieces.

The brunette bore the same relationship to the Italian Baroque aria as did the romance to the lied in the 19th century; in its simplicity and elegance it was regarded as quintessentially French. Its many champions (including Montéclair and L'Affilard) regarded it as the perfect means of developing 'taste' because of the sensitivity demanded from the performer. A number of brunettes were also reworked as instrumental pieces, especially for teaching purposes. The brunette remained popular until well into the second half of the 18th century. Pierre de La Garde, for example, published in Paris in 1764 three volumes of his brunettes in which the accompaniment could be played on the harpsichord, guitar or harp and in some cases the violin too.

DAVID TUNLEY

Brunetti. Italian family of musicians.

(1) **Giovan Gualberto Brunetti** (*b* Pistoia, 24 April 1706; *d* Pisa, 20 May 1787). Composer. His father was Giovanni Piero Brunetti (not the Antonio created by an error of Fétis). He had his first music lessons in Pistoia from a priest, Atto Gherardeschi, specializing on the

violin. In 1723, when G.C.M. Clari left Pistoia to become *maestro di cappella* at the primatial church in Pisa, Brunetti followed him there and studied counterpoint with him for five years. In 1728 he became a student at the Turchini conservatory in Naples, where he had intended to continue the study of the violin, but instead was forced by his superiors to train as a tenor. In 1733 he had a comic opera performed in Naples, where he remained after leaving the conservatory and worked as a church singer. Later he became *maestro di cappella* to the Duke of Monte Nero, in whose service he spent six months in Sicily, where he composed a serenata for the arrival of Carlo IV in Messina in 1735 and two comic operas to librettos by Pietro Trinchera. Another six months were spent away from Naples teaching at the Oratorio dei Padri Filippini in Genoa. After the death of Leo in 1744 Brunetti was in 1745 appointed *secondo maestro* at the Turchini conservatory, a post he held until 1754, when he succeeded Clari as *maestro di cappella* in Pisa, where he remained until his death. On 23 January 1756 he became a member of the Bologna Accademia Filarmonica; his test piece, a Kyrie, is in the Accademia archives. In 1763, the year after the death of his wife Giuseppina, he became a priest.

Brunetti produced most of his large output of church music in Pisa, for both the primatial church and that of the Cavalieri di S Stefano. Those works conceived for the whole *cappella* are intended to be performed with the four vocal parts taken by one or two singers (the second singer called 'di rinforzo') and usually accompanied by orchestra (responsories and Lamentations are accompanied only by violins and violas). Works for ordinary circumstances have only a figured bass accompaniment, performed on the organ. Brunetti also composed occasional cantatas for Pisa and, in 1763 and 1776, three more operas, all serious, performed in Pisa and Lucca. He was the father of several children. Three of his five sons, (2) Antonio (i), (3) Giuseppe and Paolo, became musicians. Paolo (*b* Naples, *c*1735–45; *d* Pisa, 18 April 1769) was a singer at the primatial church.

WORKS

Sacred: 21 masses, 17 Kyrie–Gloria, 4 requiems, many mass movts, 12 Magnificat, 16 litanies, 2 Te Deum, numerous psalms, Lamentations, hymns, motets, introits, antiphons etc., *I-PIp*, many in autograph; 9 masses, Magnificat, many psalms, Lamentations, responsories, antiphons etc., *I-PS*; others, *D-Dkh*, *MÜs*, *GB-Ob*, *I-Baf*, *Bc*, *Fc*, *Gl*, *Ls*, *PIst*

Operas: Amore imbratta il senno (3), Naples, Fiorentini, 1733; Don Pasquino (chelleta, 3, P. Trinchera), Naples, Pace, aut. 1735; Lo corrivo (pazzia, Trinchera), Naples, Pace, 1736; Ortensio (commedia per musica, G. Federico), Naples, Fiorentini, carn. 1739; Alessandro nell'Indie (os, P. Metastasio), Pisa, Publico, carn. 1763; Arminio (T. Reghini), Lucca, Giglio, 1763, collab. G. Puccini; Temistocle (Metastasio), Lucca, Publico, 1776

Occasional: L'augurio di tutte le felicità (serenata), Messina, 1735; Dori alle ninfe dell'Arno (M. Coltellini), 1757; Componimento drammatico, Pisa, for wedding of Archduke Joseph, 1761; Il trionfo d'Arno (cant.), Pisa, for visit of Grand Duke Pietro Leopoldo, 1766

Other vocal: Ester (orat), Florence, 1758; Il trionfo della casta Susanna (componimento sacro), Palermo, 1742; Cant., *I-Nc*; 5 cants., *Mc* [attrib. Giovanni Aliberto Brunetti]

(2) **Antonio Brunetti (i)** (*b* Naples, between *c*1735 and 1745; *d* Salzburg, 25 Dec 1786). Violinist, son of (1) Giovan Gualberto Brunetti. He may have been the Antonio Brunetti listed in 1755 as a student at the Turchini conservatory in Naples. On 1 March 1776 he was appointed Hofmusikdirektor and Hofkonzertmeister at Salzburg; he was called Konzertmeister from 1777 when he succeeded Mozart as leader. On 11 November 1778 he married Michael Haydn's sister-in-law, Maria Judith Lipps, by whom he had had a child earlier that year. Mozart composed for him (K261, 269, 373, 379) but held him personally in low esteem, referring to him in a letter (9 July 1778) as 'a thoroughly ill-bred fellow' and in a later one (11 April 1781) as 'that coarse and dirty Brunetti ... who is a disgrace to his master, to himself and to the whole orchestra'. (H. Schuler: *Mozarts Salzburger Freunde und Bekannte: Biographien und Kommentare* (Wilhelmshaven, 1996) 146–8)

(3) **Giuseppe Brunetti** (*b* Naples, between *c*1735 and 1745; *d* after 1780). Composer, son of (1) Giovan Gualberto Brunetti. He lived mainly in Pisa from 1754 to 1775. In 1759 he had an opera, *Didone abbandonata*, performed at Siena. In 1762–3 he was at Brunswick, where his opera *La Galatea* was performed (the score is in *D-BS*, along with a Gloria). He was living at Siena in 1779, when he applied for the post of *maestro di cappella* at Milan Cathedral. In 1780 he was living at Florence. Two psalms by him are in the Florence Conservatory library, two *lezioni* and a *Tantum ergo* in that of Genoa.

(4) **Antonio Brunetti (ii)** (*b* ?1767; *d* ? after 1845). Composer, grandson of (1) G.G. Brunetti. He was probably the Antonio born to (3) Giuseppe Brunetti in 1767. He is frequently called a Pisan in contemporary sources, but may have been born elsewhere. In 1786 he composed an opera and oratorio for Bologna and in the next six years six more operas (the *Demofoonte* performed in Venice in 1791 and ascribed to him by Gerber has no composer's name on the libretto and was perhaps a pasticcio). Another five followed intermittently until 1815. He was *maestro di cappella* at Chieti Cathedral from 1790 to 1800. His whereabouts in the next decade are uncertain, but in 1810, when he applied for the post of *maestro di cappella* at Urbino Cathedral, he was described as *maestro* at Chieti. He held the Urbino post until 1816, when he took a similar one at Macerata, remaining there until 1826. On 27 December 1826 he was again elected to his former post in Urbino, but resigned it on 22 March 1827 without having taken it up. At that time he was serving as *maestro* in Imola. In 1837 he was reported in the *Allgemeine musikalische Zeitung* (xxxix, col.423) as living in Bologna as a theatrical agent and later that year (col.730) as having been the impresario of an unsuccessful opera season in Imola. He wrote a large amount of church music (82 works are in *I-Us*, the latest dated one being from 1846). He was a member of the Bologna Accademia Filarmonica.

WORKS

OPERAS

Lo sposo di tre e marito di nessuno (dg, F. Livigni), Bologna, Zagnoni, aut. 1786; Le stravaganze in campagna (dg, 2), Venice, S Cassiano, aut. 1787; Il Bertoldo (dg, 2), L. da Ponte), Florence, Pergola, carn. 1788, *F-Pn* [attrib, G.G. Brunetti], *I-Fc*; Vologeso re de' Parti (os, 3, A. Zeno), Florence, Intrepidi, spr. 1789; La serva alla moda (dg, 2), 1789; Fatima (2), Brescia, Accademia degli Erranti, sum. 1791; Le nozze per invito, ossia Gli amanti capricciosi (dg, 2), Rome, Valle, 1791; Li contrasti per amore (dg), Rome, Dame, aut. 1792

Il pazzo glorioso (dg, 2, G. Bertati), Rome, Tordinona, carn. 1797; Il libretto alla moda (2), Naples, Fiorentini, carn. 1808, *Nc*; La colomba contrastata, ossia La bella carbonara, Rimini, Comunale, carn. 1813; Amore e fedeltà alla prova (2), Bologna, Corso, May 1814; La fedeltà coniugale (G. Rossi), Parma, Ducale, 30 Jan 1815 [same work as the preceding]

OTHER WORKS

Sacred: numerous masses, motets, psalms, antiphons, responsories, Lamentations etc., *I-Fc*, *RI*, *Us*, Macerata Cathedral, Chieti Cathedral

Other vocal: Il sacrificio d'Ifisa (orat), Bologna, 1786; Ascoli avventurata (cant.), Fermo, 1796; Davide e Assalonne (orat), Chieti, 17 Sept 1797; La giustizia placata (cant.), Pianella, July 1799; Betulia liberata (orat, Metastasio), Tagliacozzo, 27 Aug 1799; Il trionfo della religione, ossia Il martirio di S Pietro (orat), Urbino, 1814; Il presagio fortunato (cant.), Ancona, 28 Aug 1826

FRANCO BAGGIANI

Brunetti, Domenico (*b* Bologna, *c*1580; *d* Bologna, between late April and 7 May 1646). Italian composer and organist. In 1609 he was organist of S Domenico, Bologna. From 1618 until his death he was *maestro di cappella* of the cathedral there, a somewhat lesser establishment than the better-known S Petronio. He founded the Accademia dei Filaschisi in 1633.

Brunetti was one of the very first composers to publish accompanied monodies: there are 19 in *L'Euterpe*. 14 of them are madrigals in a bland diatonic style reminiscent of that of the madrigals in Caccini's *Le nuove musiche* (1601/2); a good example is *O miei pensieri* (ed. in Fortune, appx iv, 3–4), which is notable for a very early example of a change near the end from the prevailing common time to 3/2. The other five monodies are simple little arias with attractive melodies. The volume also includes seven pieces that can be sung as either solos or duets, four genuine chamber duets with continuo, a three-part madrigal featuring echoes, and four pieces for four voices. Of the latter, two – *Stanchi miei lumi* and *Bocca amorosa* – are versions of pieces from earlier in the book, one a monody, the other one of those that can be sung as either solos or duets. They are for two mezzo-sopranos and two basses, with two continuo parts that are virtually identical to the bass voice parts. The latter are elaborations of the bass of the other versions, while the first mezzo-soprano part is the same as before and the second is new. These pieces are likely to have been arrangements of those for smaller forces, but it is possible that the latter are reductions from the four-part versions.

Brunetti's sacred music shows that he also early adopted the new concertato style popular in northern Italy: his 1609 collection includes solo motets, duets and trios, but the seven-part *Ave verum* (RISM 1612[3]), written for two unequal groups of voices, is in a more transitional style. Another seven-part piece, *Congratulamini mihi* (1609), has a rondo structure alternating solos and tuttis. This collection is interesting for the presence of a right-hand part to go with the basso continuo; sometimes it is an unornamented version of the vocal melody, sometimes it fills in the harmony. Brunetti's pleasing melodic gift is apparent in small motets such as *Lux aeterna* (RISM 1625[1]) for two sopranos, tenor and continuo; the sopranos comment intermittently on a declamatory tenor solo.

WORKS

L'Euterpe ... opera musicale di madrigali, canzonette, arie, stanze, e scherzi diversi, in dialoghi et echo, 1–4vv, theorbo/other insts (Venice, 1606); 1 ed. in Fortune; 2 ed. in Leopold

Concentus cum gravi et acuto ad organum, 1–4 and more vv (Venice, 1609)

Canticum Deiparae Virginis octies iuxta singulos rhytmorum sacrorum ordines gradatim repetitum decantandum, 5vv, bc ad lib (Venice, 1621)

7 motets, 1612[3], 1616[2], 1619[5], 1620[2], 1623[2], 1625[1]; 1 piece in Exercitatio musica, ed. J. Dilliger (Magdeburg, 1624)

1 madrigal, 1624[11]; 1 in Madrigali, 4–5vv, bc, ed. G.P. Biandrà (Venice, 1626)

1 litany, 6vv; 1 piece, 2vv, org: lost

NIGEL FORTUNE, JEROME ROCHE

Brunetti [Bruneti], **Gaetano** [Caetano, Cayetano] (*b* ?Fano, 1744; *d* Colmenar de Orejo, nr Madrid, 16 Dec 1798). Italian composer, violinist and orchestra director, active in Spain. The son of Stefano Brunetti (of Fano) and Vittoria Perusini, he probably studied the violin in Livorno with Pietro Nardini. Having moved with his parents to Madrid by 1762 (the date of a collection with one small piece by him), he entered the service of Charles III in 1767 as a violinist of the royal chapel. He also taught music and the violin to the king's son, the Prince of Asturias, and composed for the court. By 1771 his duties had expanded to include commissions for festivities at Aranjuez, and in 1779 he was appointed music director of such festivities.

When Charles IV became king (1788) he appointed Brunetti director of the newly formed royal chamber orchestra; Brunetti wrote much for the group and selected a wide repertory from contemporary European composers, with works of Haydn strongly featured. Brunetti was also responsible for collecting and maintaining the royal library, and he is partly responsible for the rich collection now housed in the royal palace, Madrid. In spite of the social and governmental weaknesses of his court, the king's interest in art (as Goya's patron), his accomplishments as a violinist and his insatiable appetite for new works provided a stimulating cultural atmosphere in which Brunetti flourished. Brunetti was also a welcome and frequent visitor at the court of the Duke of Alba, to whom he dedicated several works, and his influence extended to numerous other courts in Madrid, including that of Boccherini's patron, the Infante Don Luis. He remained in Charles's service until his death, which occurred within a month of his second marriage. He was survived by a daughter and a son Francesco (*b c*1770), a cellist in the royal chamber orchestra.

Brunetti's music has remained virtually unknown since the 18th century; very little was published during his lifetime, and only a few pieces are available in modern editions. Most of his 451 works are chamber pieces written to be performed by and for the king and his ensemble. The symphonies, mostly in four movements, form another important group. The music found in the royal palace archives indicates Brunetti's exposure to a wide range of stylistic influences from composers of various nationalities. The king's preference, however, was for the style of the early Classical composers, and Brunetti's music, written with unusual imagination in a blend of traditional and progressive styles, best fits into that category. He most frequently wrote in Classical forms – sonata-allegro, variation and rondo; he also used dance forms and occasionally inserted a minuet into a final rondo. The sonata-form movements have extended development sections (generally based on the principal theme and favouring the minor mode) and abbreviated recapitulations that may invert the order of thematic material or omit the principal theme altogether; there is seldom a coda. The transitional or developmental passages frequently make use of interesting and original chromatic or enharmonic modulations, and the return to the tonic is often intentionally unprepared. The symphonies feature prominent wind parts, and some of the later works, particularly the minuets and contredanses, use large-scale forces: flute, two oboes, two bassoons, two horns, two trumpets, timpani and strings. The third movements are usually in a double dance form other than the minuet and trio, with the first dance scored for a wind quintet and the second for strings.

Brunetti's consistently graceful melodic lines are built from a single small motif, providing the cohesive structural element of a whole movement. The phrases are balanced, with the second half of each usually longer than the first and closing with an extension or development of the thematic idea. The texture is usually homophonic and is given an impelling rhythmic drive by the frequent juxtapositions of triplets and duplets. His manuscripts explicitly indicate tempo, embellishments, dynamics, phrasing, bowing and other performing techniques (*ponticello*, *spiccato*, *col legno* etc.). Of particular interest are the group of 13 *adagios glosados*, of which ten have been identified as alternative second movements to existing sonatas. They form an important group of Brunetti's works from a historical point of view, both within his own output and as part of the history of ornamentation.

ALICE B. BELGRAY, NEWELL JENKINS

Brunetti, Giovanni (*b* Sabbioneta, nr Casalmaggiore; *fl* 1613–31). Italian composer. He was *maestro di cappella* of Novara Cathedral from 1613 to 1617, at the Accademia della Morte, Ferrara, from 1621 to 1625 and at the ducal chapel of Urbino between 1625 and 1631. In the preface to his *Salmi intieri* of 1625 he remarked on the different manners of singing he had found in the various districts of Italy to which his career led him. He also explained how to add a ripieno choir in these psalms by using it only at the *forte* markings – a common procedure in much functionally conceived Italian church music at the time.

He is known only as a composer of such music. Much of it is in the modern concertato idiom, as the titles of three of his collections indicate, but the five-part motets in the first collection listed below are in the more impersonal *stile antico* beloved of some composers of the Roman school (appropriately enough he dedicated them to Pope Urban VIII). (J. Roche: *North Italian Church Music in the Age of Monteverdi*, Oxford, 1984)

JEROME ROCHE

Brung, Jean le. *See* LE BRUNG, JEAN.

Bruni, Antonio Bartolomeo (*b* Cuneo, 28 Jan 1757; *d* Cuneo, 6 Aug 1821). Italian violinist, composer and conductor, active in France. According to Fétis he studied the violin with Pugnani in Turin and composition with Speziani in Novara. He arrived in Paris in spring 1780, and on 15 May made his début as a violinist at the Concert Spirituel, performing one of his own concertos; the performance won considerable acclaim from the *Mercure de France*. In 1781 he joined the orchestra of the Comédie-Italienne. His first published work, a set of six violin duos, appeared in the following year and was soon followed by numerous other instrumental works, mostly for violin, and by the periodical collection *Journal de violon* (Baillon and Porro), on which Bruni collaborated. His first opera, *Coradin*, was performed at Fontainebleau in 1785 and in Paris the following year, and began a series of nearly 20 comic operas produced in Paris with considerable success over the next 15 years. In 1789 he was appointed by Viotti to the orchestra of the Théâtre de Monsieur as first solo violinist, and for a short time served as director of this orchestra, succeeding Mestrino, and of the orchestra of the Théâtre Montansier.

A supporter of the Revolution, Bruni was made a member of the Commission Temporaire des Arts in 1794, and in that year wrote the hymn *O Dieu puissant*, sung in the presence of Robespierre by 'blind labourers' and a chorus of blind children. In 1795 he was appointed by the Directoire to catalogue the musical instruments confiscated during the Terror; his inventory was later edited by J. Gallay and published (1890).

From 1799 to 1801 Bruni directed the orchestra of the Opéra-Comique. Upon the opening of the Théâtre Italien in 1801 he was appointed director of that orchestra. He retired to Passy in 1806, and later that year returned to Cuneo. In 1814 he returned to Paris to produce two theatrical works, *Le règne de douze heures* and *Le mariage par commission*; but these were badly received and, threatened by the restoration of the Bourbons, he retired in 1816 to his newly purchased estate, 'La Magnina', near Cuneo.

Apart from the mythological subject of *L'isle enchantée* and the oriental plot of his late opera *Le règne de douze heures*, the core of Bruni's stage works shows the civic life of revolutionary France with a mixture of sentimentality and realism. Stylistically, Bruni, in common with contemporary Italian composers, had a penchant for the insistent repetition of certain phrases, octave leaps and a quick-paced recitation on the same pitch. But the brevity of many song-like arias, the syllabic text-setting without repetitions, and vaudevilles at the ends of operas such as *Claudine* and *La rencontre en voyage* reveal his reliance on the French style. Bruni is probably best remembered, however, for his viola method, a valuable work which was translated into several languages and has undergone many new editions to the present day.

The Consiglio Comunale in Cuneo possesses an outstanding portrait of Bruni, probably the work of David; another portrait attributed to David, in the Frick Collection (New York), may also be of Bruni.

Brunner, Adolf (*b* Zürich, 25 June 1901; *d* Thalwil, 15 Feb 1992). Swiss composer. He studied composition in Berlin with Jarnach, Schreker and Gmeindl (1921–5) and then pursued general studies in Paris and elsewhere before returning to Zürich in 1933. In common with his belief that music 'should be an element of our active life', he combined his compositional activity with a concern for the practical and the social. During World War II he was a member (and later executive president) of the 'Gotthardbund', a Swiss non-political organization for opposition to Nazism. He was subsequently employed by Swiss radio as an expert on politics and sociology (1948–60). His deep preoccupation with Protestant theology and with the place of music in the church, evident in his choral works and his book *Wesen, Funktion und Ort der Musik im Gottesdienst*, led him in 1955 to establish the Swiss Society for Protestant Church Music.

Brunner's music is linear and transparent. A number of his works – such as the Concerto for Large Orchestra (1955–6), with its contrasts between different groups of instruments, and *Konzertante Musik* (begun in 1928 and finally completed from sketches in 1959) – show the influence of the Italian concerto grosso principle. The concertante element is equally evident in the chamber and piano works, which, featuring extended tonality and a more pervasive chromaticism, achieve a concentrated harshness of restrained emotion. By contrast, his choral music is predominantly modal: whether in the Schütz-inspired *Geistliche Konzerte* or the *a cappella* pieces – which range from the contrapuntally complex Mass and motets to simple, almost homophonic works such as the *Chorlieder nach alten Texten* (1949) – the text provides the sole foundation for the form. After the *Passionsgeschichte nach dem Evangelisten Markus* (1970–71), which presents a synthesis of his vocal and instrumental techniques, Brunner ceased composing, instead writing 12 books of philosophical fragments under the title *Natur und Mensch* (unpublished).

WORKS

VOCAL

Acc. choral: Das Gleichnis von den 10 Jungfrauen (geistliches Konzert), 4vv, hn, str orch, 1938–9; Das Weihnachtsevangelium, 4–6vv, str, 1963; Passionsgeschichte nach dem Evangelisten Markus, 8 solo vv, double chorus, org, orch, 1970–71
Unacc. choral: Mass, 4vv, 1933; 4 Altdeutsche Liebeslieder, 3 female vv, 1938; Der Mensch, 6vv, 1938; Gott ist Geist, motet, 4vv, 1939 [from Jesus und die Samariterin, 1939]; 5 Motets, 4vv, 1942; Die Versuchung Jesu (geistliches Konzert), 4vv, 1945; Sprüche nach Angelus Silesius, 4vv, 1947; 4 Chorlieder nach alten Texten, 4vv, 1949; 16 Spruchmotetten, 4vv, 1956–60; 4 Jahrzeiten-Choräle, 4vv, 1959; 8 Chorales, unison vv, 1961
1–3 solo vv: Jesus und die Ehebrecherin (geistliches Konzert), 1v, org, 1939; Jesus und die Samariterin am Brunnen (geistliches Konzert), 3 solo vv, fl, 5 str insts, org, 1939; Taufkantate, 1v, vn, vc, org, 1946; Das Gespräch Jesu mit Nikodemus (geistliches Konzert), 2 solo vv, ob, 5 str insts, org, 1947; 3 Lieder, S, A, va, 1949

Brunold, Paul (*b* Paris, 14 Oct 1875; *d* Paris, 14 Sept 1948). French harpsichordist, organist and musicologist. After studying the piano with Marmontel and harmony with Lavignac and Leroux at the Paris Conservatoire he became a pupil of Paderewski, and from 1910 he took up the study of early music (he owned an 18th-century harpsichord). From 1912 to 1920 he edited the periodical *Echo musical*. In 1915 he became organist of St Gervais,

and from 1946 to his death he was also curator of the instrument collection at the Conservatoire. His research was almost entirely confined to French Classical keyboard music; his monograph on the organ of St Gervais is his most thorough piece of archival research. His short biography of François Couperin (1949, translated by J.B. Hanson from notes provided by the author shortly before his death) is a popularization based on the work of Tessier, Tiersot and Bouvet, but he contributed to this research in *Documents inédits sur les premiers Couperin à l'orgue de Saint-Gervais*, 1932. He was well acquainted with the problems confronting the interpreter of French Classical keyboard music, and he provided one of the earliest aids for the modern performer in *Traité des signes*. His interest in French harpsichord music resulted in his preparation of the first critical modern editions of, among others, Chambonnières (with Tessier), Dieupart, Louis Couperin and above all François Couperin.

EDWARD HIGGINBOTTOM

Brunswick (i) (Ger. Braunschweig). City in Lower Saxony, Germany. The early development of music there was largely the responsibility of the ruling house of Braunschweig-Wolfenbüttel. The city was notable for its liturgical music in the 14th and 15th centuries. Numerous manuscripts from this period are in the libraries at Wolfenbüttel (among them several Passion plays from Brunswick Cathedral; see Sievers), Hanover and Hildesheim. After the Reformation closer links were forged between civic, church and court music by Dukes Julius (1568–89) and Heinrich Julius (1589–1613). Under Julius, singers from the mining districts of the Harz mountains were invited to perform at court, and in 1571 a Hofkapelle was established at neighbouring Wolfenbüttel. Heinrich Julius recognized the genius of John Dowland, who was a guest of the ducal household in 1594.

In the 14th century an organ was made for the Benedictine abbey church of St Aegidien. A two-manual instrument without pedals was installed in the cathedral of St Blasius in 1499 and in 1560 replaced by one built by Johann Thomas. In 1596 Duke Heinrich Julius arranged a congress attended by 53 organists at his country residence in Gröningen. In 1603 the cathedral organ was rebuilt by Henning Henke and Christopher Münch. Other builders of this period were Gottfried Fritzsche, Jonas Weigel and Esaias Compenius. Thomas Mancinus and Michael Praetorius (chronicler of these developments) were also conspicuous figures in the musical life of the area.

Renowned 17th-century Kapellmeisters at Brunswick were Heinrich Schütz (non-resident, but visiting several times), Johann Rosenmüller and Johann Theile. The development of opera, fostered by a strong tradition of *Singballette* and similar festivities at the ducal residence in nearby Wolfenbüttel, was largely due to Duke Anton Ulrich (vice-regent from 1685, reigning duke 1704–14). His extant librettos (e.g. for J.J. Löwe von Eisenach's *Amelinde, oder Dy triumphirende Seele* (of 1657) are closer to Singspiel than to the Italian opera of the period. In 1689 the derelict Rathaus am Hagenmarkt was converted at great expense into the city's first opera house, where performances were given during trade fairs in February and August (for the repertory, see Schmidt). The first work to be heard there was Kusser's *Cleopatra* with a festive prologue, followed by operas of German origin (by Bronner, Erlebach, Krieger, Steffani, Keiser, Schürmann, Hasse and Graun) as well as from Italy (Giannettini, Orlandini). Because of the close dynastic bonds between the house of Brunswick-Lüneburg and the Habsburgs, many court operas from Vienna were also performed at the Hagenmarkt, and after 1732 Brunswick became a German stronghold of Metastasian opera. During the 17th and 18th centuries school drama was also enthusiastically supported; a colloquy between Croesus and Solon presented at the Catharineum in 1737 is extant.

Musical life was much assisted towards the end of the 18th century by two professors at the Carolineum (founded 1745), F.W. Zachariä (a friend of Telemann) and J.J. Eschenburg (a friend of C.P.E. Bach). Eschenburg translated English theoretical works on music into German and also befriended W.F. Bach, who was anxious to establish himself in Brunswick.

The Carolineum promoted public concerts, which were subsequently organized by the Musikliebhaber Gesellschaft. J.G. Schwanenberger, court music director, and K.A. Pesch, leader of the court orchestra, were significant pioneers of the symphony. Schwanenberger was succeeded by C.L. Maucourt (1760–1825), Spohr's first teacher. Franz Abt went to Brunswick in 1852 as conductor at the opera house, which in 1818 had been designated a national theatre. Abt, who also took an active part in the Gesangsverein, became director of the Hofkapelle in 1855, founded the Singakademie, and was principally responsible for introducing Wagner's operas to Brunswick.

In 1861 the existing theatre was replaced by the new Hoftheater, which became the Landestheater in 1919. At the turn of the century the Brunswick composer Hans Sommer enjoyed success throughout Germany. During

World War II the Landestheater was destroyed, to be reconstructed as the Staatstheater, which opened in 1948.

In the second half of the 19th century music publishing (Carl Weinholtz, Henry Litolff) began to flourish. In 1837 the piano manufacturing firm of Zeitter & Winkelmann was established. Two years later Heinrich Engelhard Steinweg (Steinway) successfully exhibited two square pianos and a grand at the State Fair in Brunswick. Steinway's oldest son Theodore set up business in Brunswick in 1858. When he followed his father to New York in 1866, he sold his firm to Friedrich Grotrian; Grotrian-Steinweg and Schimmel continued to make pianos in Brunswick.

Notable institutions in the city are the Städtische Musikschule, the cathedral choir and the Musikgesellschaft. There is a collection of early instruments in the Städtisches Museum, while music education is taught at the Technische Universität and research in acoustics is carried out at the Physikalisch-Technische Bundesanstalt. An annual festival of contemporary chamber music takes place in November.

PERCY M. YOUNG, DOROTHEA SCHRÖDER

Brunswick (ii). Record company and label. The company was owned by the firm Brunswick-Balke-Collender of Dubuque, Iowa (originally a piano manufacturer but by this time primarily involved in producing bowling and billiards equipment). Records were first issued in 1916; four years later the company released its first discs manufactured using lateral cutting methods. Among the jazz musicians who recorded early for the company were the Original Memphis Five (under the pseudonym the Cotton Pickers) and Fletcher Henderson. Around November 1924 the company acquired VOCALION from the Aeolian Co.; it operated the two labels separately, but with considerable interchange of material and cataloguing. The resulting confusion of issues and matrix numbers continues to perplex discographers. Although it recorded such vaudeville blues singers as Rosa Henderson and Lena Wilson in 1923–4, Brunswick did not have a 'race series' (*see* RACE RECORD) as such until the launch of its 7000s in March 1927. Like Vocalion's race catalogue, it was directed by Jack Kapp; issue was particularly prolific towards the end of the decade under the supervision of J. Mayo Williams.

In Britain issue of Brunswick's recordings began in 1923; the discs, manufactured by Cliftophone, Ltd., and bearing American issue numbers, were marketed by the Chappell Piano Co., Ltd. In 1927 the operation was transferred to the British Brunswick Company, formed by Count Anthony de Bosdari, then taken over by the Duophone and Unbreakable Record Co., Ltd, in August 1928. Trading ceased within a year, but the company released on the Duophone label a number of recordings made for, but never issued by, American Brunswick.

In April 1930 Warner Bros. bought Brunswick-Balke-Collender and moved the company headquarters from Chicago to New York, but in December the following year they sold it to Consolidated Film Industries, which already owned the American record company. Brunswick and ARC remained formally independent but were effectively run as one organization (and have often been referred to collectively as ARC-BRC). The 7000 series was discontinued in July 1932. During the 1930s Brunswick's catalogue included work by some of the most important jazz musicians, including Duke Ellington, Red Norvo and Mildred Bailey (both from 1933), and Teddy Wilson and Billie Holiday (both from 1935). In February 1938 ARC-BRC was bought by CBS, which in 1940 discontinued the label name Brunswick in favour of Columbia. In 1942 the Brunswick trademark was sold to Decca, which had already acquired the rights to Brunswick's pre-1932 catalogue and was using the name for its own issues in territories other than the USA. The Brunswick label was used in the USA by American Decca from 1944 for the 80000 series of reissues of early jazz but otherwise was little used there until 1957, when it was revived, mainly for popular music. Brunswick's significance as a jazz label ended in 1967 when MCA Music, which by that date owned American Decca, adopted a policy of using its own name for issues outside the USA.

Warner Bros. revived the British label Brunswick in December 1930; in April 1932 the rights to use the trademark in Britain, and to issue there material recorded by American Brunswick, were purchased by British Decca. Companies using the Brunswick name also operated in several European countries, including France, where many sessions involving American expatriates were organized. In Germany the Deutsche Grammophon Gesellschaft established a Brunswick label in 1926; issues in the A100 series (1926–9) and the A7500 series (from 1928) included alternative takes of recordings made for Vocalion in the USA by King Oliver and others. In the late 1920s American Brunswick began pressing, specifically for issue in Germany, versions of recordings without the vocal part; of particular jazz interest are items by Red Nichols and King Oliver. After 1934, however, most of the European Brunswick companies began drawing their material from American Decca after its foundation. Many of these, especially those in Britain and Germany, remained active for many years; there were many important reissues of early jazz on German Brunswick in the 1950s and 60s.

A limited number of classical recordings were also made by Brunswick in the USA. A few recordings were made by the Cleveland and Minneapolis orchestras between 1924 and 1928, notably Rachmaninoff's Second

Symphony by the Cleveland. A very few recordings of the New York Philharmonic under both Willem Mengelberg and Toscanini were made in 1926, using the light-ray method. Brunswick had a number of singers on its roster, and Polydor's singers also recorded during their American tours. After 1930 only re-pressings of Polydor masters were added to Brunswick's classical catalogue.

JEROME F. WEBER

Brunswick, Mark (*b* New York, 6 Jan 1902; *d* London, 26 May 1971). American composer. After studies with Rubin Goldmark (harmony, counterpoint, and fugue) and Bloch (composition), he lived in Europe (1925–38), where he studied with Boulanger (1925–9). He also associated with a group of Viennese musicians that included Webern, who admired his Two Movements for string quartet. On his return to the USA he was made chairman of the National Committee for Refugee Musicians (1938–43). He taught at Black Mountain College (1944) and Kenyon College (1945) before his appointment as chairman of the music department of the City College of New York (1946–67). He was also president of the American section of the ISCM (1941–50) and of the College Music Association (1953). Brunswick's music, from the earliest works, is economical, non-rhetorical, and extremely intense. His dissonant linear writing shows the influence of 16th-century polyphony, to which he was very much drawn, and an imaginative and individual use of colour is apparent in each of his works. Most of the vocal pieces are settings of his own verse or of ancient Latin or Greek poetry. He contributed to the *Musical Quarterly*, *Modern Music* and the *Saturday Review of Literature*.

MIRIAM GIDEON/MICHAEL MECKNA

Brunzema, Gerhard (*b* Emden, 6 July 1927; *d* Fergus, ON, 7 April 1992). Canadian organ builder of German birth. He was apprenticed to Paul Ott in Göttingen and attended technical college in Brunswick. In 1954 he went into partnership with JÜRGEN AHREND in Leer, East Friesland, to build and restore mechanical-action organs in accordance with historical North German principles. In 1972 Brunzema left Germany to become tonal director for Casavant Frères in Quebec, a position he held until 1979. During his tenure several distinguished organs were built, including the instrument at Dordt College in Iowa (1976). In 1980 he established his own firm, Brunzema Organs, Inc., in Fergus, Ontario, where he built a number of three- and four-stop 'box'-style continuo organs (*Kistenorgeln*) for churches and colleges, as well as several two-manual mechanical-action organs based on historical tonal principles, but with attractive casework in a contemporary style. Among the latter were those in Central College, Pella, Iowa (1982), St Anne's, Glace Bay, Nova Scotia (1986), and St John's, Charlotte, North Carolina (1988).

BARBARA OWEN

Bruolo, Bartolomeo. *See* BROLLO, BARTOLOMEO.

Brusa, (Giovanni) Francesco [Gianfrancesco] (*b* Venice, 1700; *d* Venice, 20 May 1768). Italian composer. His name first appears in connection with his four *opere serie* of 1724–6. On 22 December 1726 he was made *organista del palchetto* at S Marco, where he was succeeded on 24 July 1740 by Angelo da Cortona. Quadrio, writing a little later, mentioned Brusa as having 'flourished' about 1724, reflecting the fact that he had ceased composing operas for the time being. In reminiscences set down in the 1760s, Goldoni mentioned a serenade set to music in 1732 by 'Sig. *Francesco Brusa*, dilettante in quel tempo e poi per sua disgrazia professore di musica', implying that necessity had compelled Brusa to turn professional (a particular reiterated in 1780 by Goldoni's friend La Borde and in 1789 by Burney, who copied La Borde). In the meantime there is evidence of Brusa's activity as a church composer in two oratorios he produced in Genoa in 1736. He was again active as an opera composer in 1756 and soon turned to *opera buffa*, setting *Le statue* (1757) to a libretto by his son Giovanni Battista, who later had a career as a *buffo* singer. In 1758 Brusa produced *La cascina* in Pesaro and in 1759 revived it and produced *La ritornata di Londra* in Forlì, where he appeared as the impresario of a company that included his wife Arcangela and two daughters, Emilia and Laura. Another daughter, Angiola, also became an opera singer.

Brusa was appointed *maestro di coro* of the Ospedale degli Incurabili in Venice in 1766, replacing Galuppi who had gone to Russia. There he continued until his death, distinguishing himself with sacred works that included a

requiem and several other things 'written beyond the call of duty' to satisfy the 'repeated requests of the prioress and the girls, who evinced the keenest pleasure in all these compositions' – thus a report, dated 10 June 1768, in which the hospital's governors granted an allowance to the composer's widow and her 'numerous family'. Galuppi, who had meanwhile returned, was reappointed choirmaster on 22 December 1768. Of Brusa's extant works, only *Le statue* has been critically appraised in modern times (by Della Corte).

WORKS

music lost unless otherwise stated

OPERAS

drammi per musica in three acts unless otherwise stated

Il trionfo della virtù (P. d'Averara), Venice, S Giovanni Grisostomo, aut. 1724, 25 arias *I-Vnm*

L'amore eroico (A. Zeno and P. Pariati), Venice, S Samuele, Ascension 1725

Arsace (A. Salvi), Milan, Ducale, 28 Aug 1725

Medea e Giasone (G. Palazzi), Venice, S Angelo, 26 Dec 1726

PIERO WEISS

Bruscantini, Sesto (*b* Portocivitanova, Macerata, 10 Dec 1919). Italian bass-baritone. He studied with Luigi Ricci in Rome and made his début at Civitanova in 1946 as Colline. He first sang at La Scala in 1949 as Geronimo (*Il matrimonio segreto*). In 1951 he made his Glyndebourne début as Don Alfonso (*Così fan tutte*) and returned there regularly until 1956, as Guglielmo, Dandini, Figaro (both Rossini's and Mozart's), Raimbaud (*Le comte Ory*), and then in 1960 as Ford and Leporello and in 1961 as Rossini's Figaro. He sang Malatesta in Salzburg (1953) and made his American début in 1961 in Chicago.

After 1962 he added further Verdi roles to his repertory – Rigoletto, Germont, Renato and Iago. He sang Falstaff for the first time in 1976 with Scottish Opera. He made his Covent Garden début in 1971 as Rossini's Figaro, returning in 1974 as Malatesta. He appeared several times at Wexford, notably in Ricci's *Crispino e la comare* (1979) and *Un giorno di regno* (1981), which he also directed. In 1988 he sang Don Alfonso at Los Angeles and in 1989 Michonnet at Rome. His recordings of Alfonso, Germont and Rossini's Figaro show his musicality, sense of style and dramatic ability, which compensate for a voice of limited tone and range.

HAROLD ROSENTHAL/ALAN BLYTH

Bruschi, Giulio (*b* Piacenza; *fl* 1622–9). Italian composer. He was *maestro di cappella* of S Francesco, Piacenza, in 1625. He was one of many provincial north Italian composers of liturgical music, though his inclinations were not wholeheartedly towards the new concertato style usually adopted in the 1620s; this was partly because much of his published music was intended for the Offices, in which there were few opportunities for expressive underlining of the texts. In the collection of 1627 he writes for a double-choir medium in which the first choir consists of solo voices in an up-to-date manner; but the solos are never florid and a simple recitando style prevails. Interesting features include the more frequent use of triple time than formerly and the use of the same motif at the beginning of each movement of the mass. But the musical ideas are on the whole dull, tuttis occur in predictable places, and there is little pathos in the 'Crucifixus' of the mass. The motets in the 1629 collection include two dialogues, and a duet with obbligato violins which uses echo effects.

WORKS

Modulatio Davidica ad vesperas, 5 vocibus concinenda una cum parte infime ad org, op.1 (Venice, 1622)

JEROME ROCHE/ELIZABETH ROCHE

Brusilovsky, Yevgeny Grigor'yevich (*b* Rostov-na-Donu, 30 Oct/12 Nov 1905; *d* Moscow, 9 May 1981). Kazakh composer. He developed a serious interest in music while serving in the Red Army, which he left in 1922 to spend a year at the Moscow Conservatory; in 1926 he entered the Leningrad Conservatory, where he studied with Steinberg, graduating in 1931. In 1933 he settled in Alma-Ata, where he began work in the research department of the Kazakh Music and Drama Technical College, studying Kazakh folksongs and *kyui* (programmatic fantasias for the *dömbra*, a plucked-string folk instrument); his folk-song arrangements provided material for later compositions. From 1934 to 1938 Brusilovsky, who was of Jewish descent, was artistic director of the Kazakh Music and Drama Theatre (later the Abay Opera and Ballet Theatre), for which he composed works that laid the foundations of Kazakh national opera. In addition, he created the first Uzbek national ballet, *Gulyandom* (1940). From 1940 he turned his attention to instrumental music as well as stage works, producing the Third Symphony 'Sarï arka' ('The Golden Steppe', the first important work in this genre to be written in Kazakhstan, and a piece based on *kyui* themes) and chamber works. Brusilovsky was an organizer and the first chairman of the Kazakhstan Composers' Union (1939–59). In 1955 he was made professor at the Alma-Ata Conservatory, where he had taught since 1934; all the leading younger Kazakh composers have been among his pupils. He settled in Moscow in 1970. He was awarded the Badge of Honour (1936), the title People's Artist of the Kazakh SSR (1936), the Order of the Red Banner of Labour (1945, 1956), the State Prize of the USSR (1948), the Order of Lenin (1959) and the State Prize of the Kazakh SSR (1967).

Brusilovsky was trained in Russian classical traditions, and his works represent an interesting attempt to introduce the characteristic vocal monophony and distinctive instrumental harmonies of Kazakh music into the standard European genres, but without superficial orientalism. His path led from arrangements in quartal and quintal harmonies, to the introduction of these arrangements into operas as separate numbers – the operas of the 1930s were, in their first versions, essentially conversational dramas with aria-songs and instrumental dance episodes – and then (from about 1940) to the harmonic enriching of folk melodies and their organic development into large-scale sonata-symphonic forms. The experiment of introducing a *kyui* into the symphony proved particularly successful; apart from the Third, the Sixth, on a theme by the folk musician Kurmangaza, is notable in this respect.

L.M. BUTIR

Bruson, Renato (*b* Este, nr Padua, 13 Jan 1936). Italian baritone. He studied singing at Padua and made his début in 1961 at Spoleto as Luna. After singing in many of the major Italian theatres, in 1969 he made his Metropolitian début as Enrico Ashton, returning as Luna, Germont, Don Carlo (*Forza del destino*) and Posa. In 1972 he made his début at La Scala as Antonio (*Linda di Chamounix*) and sang Ezio (*Attila*) in Edinburgh with Palermo Opera. He made his Covent Garden début in 1976 as Anckarstroem (*Ballo in maschera*), returning for Macbeth, Boccanegra, Miller, Iago and Falstaff. He has also appeared in Vienna, Berlin, Munich, Chicago, San Francisco and Los Angeles, where he sang Falstaff (1982) under Giulini. A specialist in Donizetti as well as Verdi, he has sung in revivals of *Belisario*, *Gemma di Vergy*, *Les martyrs*, *Le duc d'Albe*, *Torquato Tasso*, *Caterina Cornaro* and *La favorite*. Warm, well-focussed tone and eloquent phrasing have made him an ideal exponent of noble characters such as Boccanegra and Posa, but he has also been effective as Scarpia and Don Giovanni. He has recorded many of his best roles, including Rigoletto, Boccanegra and Falstaff, producing a more serious, wise and musing reading than many. (G. Gualerzi: 'Renato Bruson', *Opera*, xxx (1979), 214–18)

ALAN BLYTH

Brussel, Tiburtius van. *See* TIBURTIUS VAN BRUSSEL.

Brusselmans, Michel (*b* Paris, 12 Feb 1886; *d* Brussels, 20 Sept 1960). Belgian composer. After studying at the Royal

Conservatory in Brussels, he continued his education at the Schola Cantorum in Paris and finally studied composition with Gilson. In 1911 he won the Belgian Prix de Rome, and three years later won the Agniez Prize with his symphonic poem *Hélène de Sparte*. Thereafter he lived in seclusion in Paris and Provence. An Impressionist composer, Brusselmans excelled in orchestral music which displays originality in its sonorities and language. Although he drew his inspiration from Flanders on several occasions (e.g. in the *Rhapsodie flamande*), he also evoked contemporary subjects in his symphonic poems, such as *The Railway*.

WORKS

HENRI VANHULST

Brussels (Flem. Brussel; Fr. Bruxelles). Capital city of Belgium. The city dates from the 10th century, when it consisted of a small group of artisans and merchants gathered round the military encampment of the Duke of Lorraine. In 1012 it became part of the territory of the Count of Leuven. From the 13th century it developed as a centre of textile manufacture; it was well known in the 15th and 16th centuries for its tapestries. It became important when the dukes of Brabant came to live there, and when Brabant was absorbed into the Burgundian territories Brussels retained a privileged position as their favoured residence. As a result it became the administrative and political capital of the principalities of the Low Countries, and frequently housed the governors of these territories under the King of Spain in the 16th and 17th centuries and the Emperor of Austria in the 18th. When Belgium became independent in 1830, Brussels was the obvious choice for the capital of the new state and its main development started then.

1. The royal chapel and religious institutions. 2. Opera. 3. The conservatory. 4. Concert life. 5. Festivals, composers. 6. Music publishing. 7. Instrument making.

1. THE ROYAL CHAPEL AND RELIGIOUS INSTITUTIONS. Duke Henri III of Brabant (*d* 1260) was a trouvère and entertained minstrels at his court, including Adenet le Roi, author of chivalrous romances. The use of polyphony in Brussels is first documented in 1362 at the collegiate church of Ste Gudule (now Ste Gudule et St Michael). A papal bull of 12 April 1444 gave the chapter the permission to appoint new chaplains who were trained to sing polyphony. The church became a centre for the practice of polyphony; a choirmaster (*sangmeester*) directed the music and was responsible for the musical education of the young choristers (*choraelen*), who sang soprano in the services and were trained as professional musicians. During the second half of the 15th century Ste Gudule had a full complement of choristers and professional cantors directed by a choirmaster, and an organist. Until the end of the 18th century it was a centre of musical life, and its choirmasters and organists were often well-known composers. During the 15th century polyphonic music was also practised in the other Brussels churches, but to a lesser extent.

The sumptuous court of the dukes of Burgundy and the choice of Brussels by Philip the Good as his favourite residence attracted many musicians to the city. In their picturesque narratives chroniclers often stressed the importance of fêtes and court rejoicings and, more prosaically, account books also testify to the brilliance of occasions such as the Festival of the Golden Fleece (1435), the Shrove Tuesday tournament (1444) and the funeral ceremonies for Catherine of France (1446), first wife of Charles the Bold.

The musicians were permanent members of the ducal court and fell into two distinct categories: those who were attached to the chapel, the *chapelains*, and those who were attached to the *hôtel* or town house, the *ménestrels*, who were socially far inferior. The minstrels were in turn divided into 'high instruments' (oboe, trumpet and sackbut) and 'low instruments' (harp, flute, lute and hurdy-gurdy). Some *chapelains* were composers of polyphonic music but of those who won fame at the Burgundian court (Binchois, Busnoys, Fontaine, Grenon, Hayne van Ghizeghem, Morton, Vide and La Rue) not one was born or trained in Brussels. At the beginning of his reign, when he inherited the chapel of John the Fearless, Philip the Good employed only French musicians. Later, he preferred to engage northern artists, as did Charles the Bold and his successors to an even greater extent, but there was never a native of Brussels among them. This confirms the theory that Brussels developed musically fairly late and lacked the standing of Liège, Courtrai, Bruges, Ghent or Antwerp as a centre of musical training. From the time of Maximilian, Philip the Fair and, later, Charles V, the princes resided only occasionally in the Low Countries and took their chapels with them to Austria, Germany or Spain.

In the Low Countries there is evidence that musicians were employed by the governors. While Margaret of Austria, Charles V's aunt, lived in Mechelen from 1506 to 1530, her successors moved to Brussels. Maria of Hungary, the emperor's sister (1531–55), employed Benedictus Appenzeller as choirmaster from 1530 to 1551; he was the first composer who had his music printed in the Low Countries. The chapel of Margaret of Parma, the emperor's natural daughter, who was the governor from 1555 to 1567, consisted of a choirmaster, 12 cantors, four young choristers and an organist. Alessandro Farnese, her son, contributed to the diffusion of the madrigal in the Low Countries, and Jan-Jacob van Turnhout, his *maître de chapelle*, was one of the first local musicians to compose mainly to Italian poems.

The Archduke Albert and Archduchess Isabella were more than just governors, for Philip II wished them to rule the Low Countries as a political entity with considerable independence from Spain. The musical chapel was therefore reorganized as the 'royal chapel' of Brussels with statutes based on those of the Burgundian chapel. Géry Ghersem, a prolific composer who had begun his career as *chapelain* and later became assistant director of Philip II's chapel in Spain, was director in Brussels from 1604 to 1630, which was a particularly brilliant period.

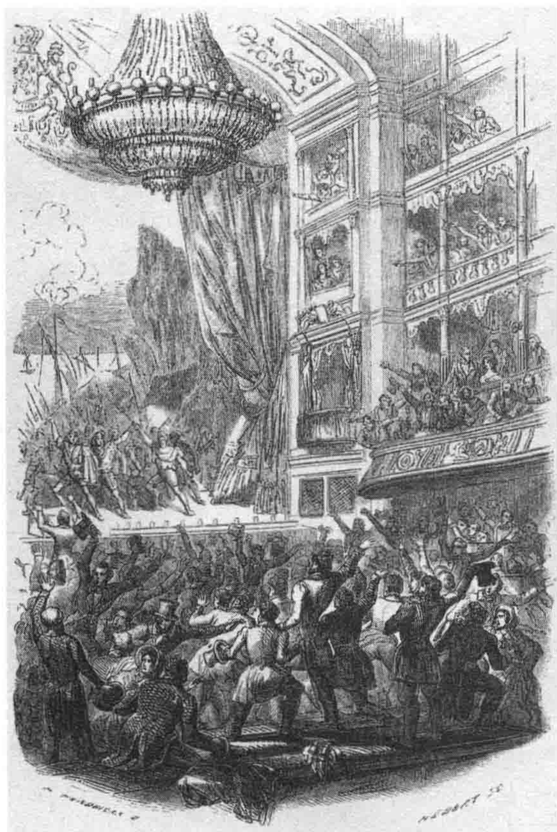
The chapel included some exiled Catholic musicians from England, such as the *chapelain* Peter Philips and the organist John Bull (1613–14).

Even when mere governors ruled the Low Countries again, the royal chapel was always the most important centre of religious music. In contrast to 'chamber' music, used in the 17th century for court entertainments and usually directed by Italians or Spaniards, the chapel was always headed by a native musician, often from Brussels itself, and thus the royal chapel maintained a continuity during the successive regimes – Spanish, French and Austrian – until the French Revolution.

Other composers (whose works have not survived) succeeded Ghersem as master of the chapel: Charles Caullier (1630–58), Jean Tichon (1658–66), Honoré Eugène d'Eve (1666–85) and Nicholas van Rans (1685–98). However, the masses and motets of 18th-century masters of the chapel such as the Venetian Pietro Antonio Fiocco (1698–1714), his son Jean-Joseph Fiocco (1714–46), Henri de Croes (1749–86) and Ignace Vitzthumb have survived. Among the best musicians of the royal chapel were the organists Peeter Cornet (1611–43) and Abraham van den Kerckhoven (1656–*c*1680).

In the 18th century chamber and chapel were no longer distinct from each other, for the same musicians played both types of music. The master of the chapel, Croes, wrote sonatas for various instruments, concertos for flute or violin, and divertissements in the *galant* style for the court orchestra.

Apart from the royal chapel, the most important centre in Brussels for religious music was Ste Gudule, where there is an important music collection. Its organists included Nicolaus a Kempis, who published at Antwerp three volumes of 'symphonies' (which are in fact sonatas for one to five instruments with basso continuo), and Josse Boutmy, whose pieces for harpsichord were influenced by Couperin and Handel. Among the choirmasters who were also composers were Petrus Hercules Bréhy, Joseph-Hector Fiocco and Charles-Joseph van Helmont.



2. OPERA. The first opera production in Brussels, *Ulisse all'Isola di Circe*, by Gioseffo Zamponi, took place in 1650 to celebrate the marriage of Philip IV of Spain and Maria Anna of Austria. Zamponi was master of chamber music to Archduke Leopold Wilhelm, governor of the Low Countries, and he, the librettist, set-builder, designer and singers were all Italian. The first public theatre, the Académie de Musique on the Quai du Foin, dates from 1682. Apart from some Italian works, it was Lully's tragic operas that had the greatest success in Brussels. Although

1. Ommegang procession in Brussels in honour of the Archduchess Isabella, 31 May 1615: detail of a painting by Denijs van Alsloot (Victoria and Albert Museum, London); the centre float contains Apollo and the Muses playing harps, lute, ?cittern, flute, tambourine, triangle, bass viol, viola da braccio and rebec (or kit)

no operas by local composers were produced there, Pietro Antonio Fiocco, musical director of the theatre, wrote prologues in praise of the governor. Opened in 1700, the Théâtre de la Monnaie quickly became the centre of theatrical activity. In the 18th century the French repertory still predominated; after Lully came Destouches, Campra, Mouret, Collasse and, later, Favart's *opéras comiques*, but a few italianate works were also performed. Operas by Flemish composers were seldom performed, with the exception of those by Pierre van Maldere, who wrote some *opéras comiques*, and Grétry, from Liège, who achieved fame in Paris.

When the *ancien régime* came to an end, so did the roles of the royal chapel and of Ste Gudule, but the Théâtre de la Monnaie survived, and the riots after a performance there of Auber's *La muette de Portici* (commonly called *Masaniello*) on 25 August 1830 (fig.2) helped to spark off the revolution from which the modern state of Belgium was born. In the 19th century La Monnaie was particularly successful under Stoumon and Calabresi (1875–85, 1899–1900), Dupont and Lapissida (1886–9) and Maurice Kufferath and Guidé (1900–14). They were followed by Corneil de Thoran and various collaborators (1918–53), J. Rogatchewsky (1953–9) and Maurice Huisman (1959–81). In 1963 the city of Brussels relinquished ownership of La Monnaie for financial reasons and it became a national theatre, the Théâtre Royal de la Monnaie (Koninklijke Muntschouwburg). From then on operas were given in their original languages. Many French, as well as Belgian, opera premières were given there, including Massenet's *Hérodiade* (1881), Reyer's *Sigurd* (1884), Chabrier's *Gwendoline* (1886), d'Indy's *L'étranger* (1903) and *Les chant de la cloche* (1912), Chausson's *Le roi Arthus* (1903), and the first French-language performances of many Wagner operas. Other French-language productions included Richard Strauss's *Salome* (1907) and *Elektra* (1910), Berg's *Wozzeck* (1932), Prokofiev's *The Gambler* (1929) and works by Ravel, Milhaud and Honegger either as premières or immediately after their premières in Paris.

2. *Riot at the performance of Auber's 'La muette de Portici' at the Théâtre de la Monnaie, 25 August 1830: engraving by Hébert after Henri Hendrickx*

Huisman's administration was noted for the foundation in 1960 of the famous Ballet du XXème Siècle, directed by Maurice Béjart. The company's performances of *The Rite of Spring*, *Ninth Symphony* and *Romeo and Juliet* with inventive modern choreography aroused the enthusiasm of a vast, mainly young, public. Béjart placed great emphasis on the spectacular in works such as *Mathilde*, *Messe pour le temps présent*, *Baudelaire* and *Bakhti*. He also founded an international ballet school, the Mudra.

Under Gérard Mortier (1981–91) La Monnaie achieved an international reputation for the quality of its productions and the originality of its programming (including Janáček and the lesser-known operas of Mozart). Bernard Foccroulle (from 1991) introduced Baroque works (e.g. Cavalli) to the repertory. La Monnaie also gave the world premières of André Laporte's *Das Schloss* (1986), Philippe Boesmans's *La passion de Gilles* (1983) and *Reigen* (1993), and John Adams's *The Death of Klinghoffer* (1991).

3. The conservatory. One of the most important 19th-century musical institutions in Brussels was the conservatory, founded as a state academy in 1832. From 1833 to 1871 its director was the famous musicologist François-Joseph Fétis. Taking the Paris Conservatoire as his model he planned the musical instruction on very strict lines and engaged excellent teachers. His successor, another musicologist, François-Auguste Gevaert (1871–1908), exercised a despotic authority over contemporary musical life. Thereafter the conservatory was directed by the composers Edgar Tinel (1908–12), Léon Du Bois (1912–25), Joseph Jongen (1925–39), Léon Jongen (1939–49), Marcel Poot (1949–66), Camille Schmit (1966–73), Eric Feldbusch (1973–87) and Jean Baily. Teachers included the violinists Charles-Auguste de Bériot, Vieuxtemps, Wieniawski, Ysaÿe, César Thomson, Gertler and Grumiaux and the pianists De Greef, Bosquet, Del Pueyo, Vanden Eynden and Blumenthal. In 1967 the conservatory was divided into two separate institutions (Conservatoire Royal de Musique and Koninklijk Muziekconservatorium) giving instruction in French and Flemish respectively, with Kamiel D'Hooghe as director of the Flemish one (1967–95).

4. Concert life. The conservatory was for a long time the centre of the city's musical life, as it organized the principal concerts, including both classical and non-controversial modern masterpieces in its programmes. Fétis organized 'historic concerts' of 16th-, 17th- or 18th-century music, or concerts devoted to a particular musical genre, for example church music, dance music etc. Gevaert chiefly promoted the great choral works of Bach and Handel, Gluck's operas and Beethoven's *Missa solemnis*. After 1850 the conservatory concerts became less important because of the development and diversification of

musical life. In 1865 Adolphe Samuel founded the Concerts Populaires de Musique Classique, which, in spite of their name, presented innovatory modern works as well as a traditional repertory. Most of Wagner's works were played at these concerts before they were staged, a policy initiated by Samuel and encouraged by his successor, Joseph Dupont, who also introduced Richard Strauss's music to Brussels. However, the most innovatory group before World War I was the Cercle des XX (1884–93, later known as the Libre Esthétique). This was a group of artists working in the visual arts who publicized the work of the impressionists, pointillists and symbolists before they were appreciated elsewhere, and regularly gave concerts of chamber music in conjunction with their exhibitions. Octave Maus (1856–1919) was a friend of d'Indy and Ysaÿe, and presented concerts of important contemporary French chamber works by Franck, Duparc, Chausson, Milhaud, Chabrier, Debussy, Roussel and Fauré.

After World War I the Pro Arte concerts continued this policy of innovation and between 1921 and 1934 often presented works by young composers such as Milhaud and Poulenc before they were heard in France, as well as many works by Stravinsky, Satie, Bartók, Hindemith, Berg and others. The nucleus of the Pro Arte was the excellent Quatuor Pro Arte (later resident in the USA as the Pro Arte Quartet) and the impresario Paul Collaer.

The work of the Concerts Populaires was continued by the Société Philharmonique de Bruxelles, founded in 1927 by Henry Le Boeuf. The concerts, which include orchestral and chamber music, take place in the Palais des Beaux-Arts, a building with facilities for music, theatre, cinema, lectures and exhibitions. Marcel Cuvelier, during his time as the director of the society, raised the quality of performance by inviting great international conductors and soloists; however, he favoured familiar works, often at the expense of contemporary music. The Brussels SO was founded in 1931 by Désiré Defauw and the Belgian National Orchestra formed from it in 1936.

In 1946 Cuvelier founded JEUNESSES MUSICALES, which has since become a powerful international movement concerned with the musical education of young people. However, like the Société Philharmonique, it has neither encouraged the performance of contemporary music nor attracted audiences from all social classes. André Souris, director of the music section of the Séminaire des Arts, promoted music that was largely unfamiliar at the time, such as English Renaissance music, as well as contemporary music, including 12-note works by Messiaen and Boulez's early compositions.

5. FESTIVALS, COMPOSERS. Since the 1950s several festivals have sprung up in Brussels, with Reconnaissance des Musiques Modernes (1964–75) and Ars Musica (from 1988) devoted to contemporary music. The Festival van Vlaanderen (from 1958) and the Festival de Wallonie (from 1971) organize concerts in Brussels. The Concours Musical Reine Elisabeth (founded in 1937 as the Concours Eugène Ysaÿe) is a competition for pianists, violinists and singers which has brought some virtuosos to public attention.

Musical activity in Brussels intensified when the city became the home of the EEC and NATO and therefore an international economic and political centre. Because of its cultural attraction as a capital city, many important Belgian musicians, although often born elsewhere, have spent at least part of their working lives in Brussels and many important national organizations are located there (*see* LOW COUNTRIES,§I, 5). A list of composers who have worked in Brussels is in fact a summary of Belgium's musical history from 1830. The composer Paul Gilson, whose work was influenced by Wagner, Richard Strauss and The Five, was also a renowned teacher of several generations of composers. His best-known pupils include Marcel Poot, Gaston Brenta and René Bernier (founders of the 'Synthétistes' group in Brussels in 1925), Jean Absil and André Souris. Other composers who have spent most of their working life in Brussels include: Léopold Samuel, Raymond Moulaert, René Barbier, Willem Pelemans, René Defossez, Pierre Moulaert, Jacques Stehman, Jean Louël, Victor Legley, Marcel Quinet, David van de Woestijne, Frederic Devreese, André Laporte, Jacques Leduc, Raphael D'Haene and Frederik van Rossum.

6. MUSIC PUBLISHING. In the second half of the 18th century Brussels became an important centre of music publishing, notably with the Van Ypen brothers and their associates Pris and Mechtler. From 1795 to 1813 Weissenbruch ran a music store where a stock of 23,000 manuscripts and editions was assembled. In the 19th century local publishers (Messmaeckers, Katto) were forced to compete with branches of foreign firms (Schott, Breitkopf & Härtel, Bosworth). After 1918 some firms specialized in music for brass and wind bands or in jazz, while others (Editions de l'Art Belge, Editions Ysaÿe) commissioned such artists as Magritte to design the covers of their editions of Belgian composers. The decline in publishing after World War II prompted the Belgian government to create CeBeDeM.

7. INSTRUMENT MAKING. Court archives show that instruments were being made in Brussels as early as the 15th century. The heyday was in the 18th and 19th centuries, with makers of string instruments (Boussu, Snoeck, Vuillaume), wind instruments (Rottenburgh, Mahillon), pianos (Hoeberechts, Berden, Hanlet) and organs (Forceville, Merklin).

ROBERT WANGERMÉE/HENRI VANHULST

Brusser [Bruster, Brusters]. *See* BREWSTER.

Brustad, Bjarne (*b* Christiania [now Oslo], 3 March 1895; *d* Oslo, 22 May 1978). Norwegian composer and viola player. He studied under Gustav Lange (violin and theory) at the Kristiania Conservatory (1907–12), under Thornberg and Flesch (1915–16) in Berlin, and later briefly in Paris, London and Budapest. Having made his début as a violinist in 1914 he was concert master in the Stavanger Sinfonieorkester (1918–19), then violinist in the Kristiania Philharmonic Society Orchestra (1919–22), of which he became the solo viola (1929–43). He then concentrated on composition and teaching, and taught theory and composition at the Oslo Conservatory between 1937 and 1961. He received a state pension for life from 1953.

Brustad's first compositions, already in sharp contrast with the Griegian late Romantic style that dominated Norwegian music until the 1920s, helped to establish him in the forefront of radical Norwegian composers. There are early signs of French influence, and the Suite no.1 (Orientalsk suite) for orchestra (1920) is strongly Impressionist. Towards the end of the 1920s and in the 1930s, like many contemporaries, he took a more national line. This was already to be heard in the *Norsk suite* for viola and piano (1926), in which Brustad combines Norwegian folk elements with new techniques. Writing of the Trio no.1, Brustad noted that 'it was important ... not to follow in Grieg's footsteps, ... but to free oneself and find new means of expression, indeed, to create a form which could link up with the Norwegian folk ballad'. He took personal inspiration from meetings with Bartók and Kodály; at the same time he pursued the international neo-classical manner, characterized by rhythmic vigour and dissonant harmony, often bi- or polytonal (Violin Concerto no.4); after the war this side of his work gained precedence. His open-minded interest in new ways of musical expression, including microtonal music, comes to the fore in the polytonal and dissonant Str Qt no.3 (1959). His progressive and imaginative use of instrumentation made him one of the foremost teachers of composition in Norway in the 1950s.

RANDI M. SELVIK/HARALD HERRESTHAL

Brustwerk (Ger.: 'breast department'; Dut. *Borstwerk*). A small organ-chest, usually with its own manual, encased compactly above the keyboards and below the HAUPTWERK, 'in the breast' of the organ. Many early examples contained a regal or two only, and even later the department usually kept its character as a regals or chamber organ. Such subsidiary chests were common in the 17th century, the pedal keyboard sometimes communicating with a so-called *Brustpedal* chest in north European organs. The term *Brustwerk* belongs only to 18th-century theorists like Agricola who standardized terminology; previous names had been 'positive forn an die brust' (A. Schlick, 1511), 'voer yn dye borst' (Amsterdam Oude Kerk, 1539), *Brustpositiff* (M. Praetorius, 1619; A. Schnitger, 1682), 'in der Brust zum Manual' (Praetorius, G. Silbermann, 1710). Some builders between about 1710 and 1730 in central Germany referred to the 'Unterwerk' as *Brustpositiv* or *Brustwerk*. If the *Brustwerk* regal rank (placed near the organist for convenient tuning) were played by the main manual's keyboard, as sometimes happened in Italy, Spain and Austria, there might be no written indication that an organ contained such a department. In modern 'organ revival' organs, the *Brustwerk* is often, as a compromise, given the shutters of a Swell organ instead of the usual solid doors.

PETER WILLIAMS/BARBARA OWEN

Bruxelles (Fr.). *See* BRUSSELS.

Bruynèl, Ton (*b* Utrecht, 26 Jan 1934). Dutch composer. He studied from 1952 to 1956 with Wolfgang Wijdeveld at the Utrecht Conservatory, at the same time taking private composition lessons with Kees van Baaren. From 1957 he concentrated on electronic music, establishing his own studio, where he composed *Reflexes* (1960), based on manipulations of a recorded drumbeat. His *Mobile*, for two soundtracks, was awarded a prize during the Gaudeamus Music Week in 1966. Since then he has sought to refine the combination and blending of synthetic and acoustic sounds. For his achievements in this field his *Chicharras* and *Adieu petit prince* won prizes in 1986 at

the Festival International de Musique Electroacoustique 'Synthèse' in Bourges.

Bruynèl has been interested in combining electronic music with other art forms. One such work, *Signs*, a collaboration with the artist Gérard van den Eerenbeemd, was played and exhibited at the Amsterdam Stedelijk Museum. In 1997 Bruynèl was composing a video opera on the history of flying, using texts by the Dutch poet Bert Schierbeek.

KEES ARNTZEN

Bruzdowicz, Joanna (*b* Warsaw, 17 May 1943). Polish composer. She studied composition with Kazimierz Sikorski at the State Higher School of Music in Warsaw, graduating in 1966. She was awarded a French government scholarship and studied in Paris (1968–70) with Messiaen, Boulanger and Schaeffer. In 1969 she was a co-founder of the Groupe International de Musique Electroacoustique. In 1975 she moved to Belgium, where she has combined composing with a wide range of other artistic interests, including writing film scripts for television. She is active as a critic and broadcaster, promoting new music in programmes for French, Belgian and German radio, and has directed composition courses at Aix-en-Provence, in the USA (MIT, UCLA and Yale University) and at the University of Montreal. She also promotes Polish music in Belgium and was the founder and first president (1983) of the Belgian Chopin and Szymanowski Society. She has worked in the electronic studios of Ghent University and Belgian radio and television.

Bruzdowicz's large output is diverse and her music is performed worldwide. Though she uses all modern techniques and media, they are never employed for ostentatious effects or radical experiments but are subtly integrated into the fabric of the music. (*GroveO*, A. Thomas)

BARBARA ZWOLSKA-STESZEWSKA/R

Bryan, Albertus. *See* BRYNE, ALBERTUS.

Bryanston Summer School. A summer school of music established in 1947 at Bryanston School, Dorset; in 1953 it moved to Dartington Hall, near Totnes, Devon. It became the DARTINGTON INTERNATIONAL SUMMER SCHOOL in 1985.

Bryant [O'Brien], **Dan(iel Webster)** (*b* Troy, NY, 1833; *d* New York, 10 April 1875). American minstrel performer and manager. He began as a performer in the late 1840s, and made his first New York appearance with Charley White's Serenaders in 1851. From 1852 to 1854 he and his brother Jerry performed with Wood's Minstrels in New York, and late in the 1854 season he formed Bryant and Mallory's Minstrels with Ben Mallory. By this time he was being advertised as 'the unapproachable Ethiopian comedian'. In February 1857 he formed Bryant's Minstrels with his brothers Jerry and Neil. As a versatile and brilliant performer, Bryant quickly became a public idol; the troupe performed with great success in New York until Bryant's death in 1875, and also toured in California and elsewhere in 1867–8. Bryant's Minstrels excelled in the portrayal of black 'plantation life', marking a return to the classic type of minstrelsy of the 1840s; they were also innovators, placing a greater emphasis on burlesque skits. Bryant engaged Dan Emmett in 1858 as performer and composer, and it was for Bryant's troupe that Emmett wrote *I Wish I Was in Dixie's Land* (1859) and other walk-arounds; Emmett enjoyed a second heyday with the Bryants until 1866.

Bryant was the leading minstrel performer of his day, appearing as comedian, dancer, musician and singer. He was one of minstrelsy's greatest dancers, and his widely imitated song-and-dance skits *The Essence of Old Virginny* and *Shoo fly don't bodder me* are regarded as true classics of minstrelsy. As a musician his primary instrument was the banjo, but he also played the tambourine and the bones. He also had a secondary career as a whiteface Irish comedian during summer seasons from 1863 to at least 1870, winning great acclaim in *Handy Andy* and *The Irish Emigrant*. He wrote the lyrics 'Turkey in the Straw' (1861) to G.W. Dixon's tune *Zip Coon*.

ROBERT B. WINANS

Bryars, Gavin (*b* Goole, Yorkshire, 16 Jan 1943). English composer. He read philosophy at Sheffield University (1961–4) and studied composition with Cyril Ramsey and George Linstead. In 1968 he became part of London's fast-developing experimental music scene; although never a member of the Scratch Orchestra, he worked regularly for a while with the pianist John Tilbury. His best known works of this period – *The Sinking of the Titanic* (conceived in 1969 and still officially in progress 30 years later) and *Jesus' Blood Never Failed me Yet* (1971) – are good working examples of his early aesthetic. While conceptual concerns are central (the former work is based on a series of hypotheses surrounding the disaster that befell the liner), these are explored via a rigorous, not to say relentless, extrapolation of found objects, be they the music which evidence suggests was performed on board the *Titanic* as it sank, or the tape of a London tramp's song, incessantly repeated in *Jesus' Blood*. A further dimension of the experimental aesthetic was demonstrated by the concerts of the Portsmouth Sinfonia, founded while Bryars taught at the Portsmouth College of Art: here, the performances of Western classical music by untrained musicians embodied what Michael Nyman called the 'wide discrepancy between intention and effect' (*Experimental Music*, London, 1974). The first period of Bryars' work offers a very English perspective on the experimental tradition, augmenting territory already defined by Satie, Cage and others with an openness towards, for instance, frankly sentimental materials and their associations.

The influence of Marcel Duchamp, already detectable in earlier works, was enhanced by intensive study during two fallow compositional years (1973–4), by which time Bryars had established what was to become a long-standing relationship with Leicester Polytechnic. A determination – inspired in part by the composer's affiliation to the 'Pataphysics movement – to justify every compositional decision via specific, though often hidden or arcane, associations with its literary or artistic inspiration is here harnessed to musical processes derived in part from American minimalism. Bryars's main source of performances during this period was his own ensemble, formed in 1979 and initially dominated by keyboards and percussion, since the early 1990s by low strings. Pieces such as *Out of Zaleski's Gazebo* for two pianos, six or eight hands (1977) and *My First Homage* (1978 onwards, best known in the version of 1981 for eight performers) submit familiar-sounding borrowed materials – many taken from his then favourite composers: Lord Berners, Grainger, Bill Evans, Karg-Elert – to repetitive forms governed as much by the logic implied by these pieces' musical and extra-musical reference points (and by the significant play of irony) as by purely internal musical processes. This approach governs Bryars's second period which lasted until the opera *Medea* (1982, rev. 1984). The flexibility, if not compromise, demanded of a composer in the theatre led to changes in Bryars's attitude and working methods; the Duchamp-inspired principle of justification was then abandoned in favour of a more free-wheeling approach to structure. Since *Medea* his output has often been for more conventional forces, such as orchestras and string quartets, and commissioned by musicians of repute in other fields; there has been a number of works, for instance, for the Hilliard Ensemble, including *The First Book of Madrigals* (1998–2000). While a modal but often chromatically restless melancholy remains an important component of his idiom, the opportunities to write for much larger forces later enriched and sometimes energized Bryars's melodic and harmonic style while offering him a broader timbral palette. These developments are well illustrated by the opera *Doctor Ox's Experiment*, first performed in 1998.

WORKS

STAGE

Medea (op, 5, after Euripedes, dir. R. Wilson), 1982, rev. 1984, 1995; Opéra de Lyon, 23 Oct 1984, concert perf. of rev. version, Glasgow, Tramway, 3 Nov 1995

Four Elements (dance score, choreog. L. Childs), A/taped v, a sax, b cl, flugelhorn, hn, trbn, pf, elec kbd, amp db, 2 perc, 1990, Oxford, Apollo, 16 Nov 1990

Biped (dance score, choreog. M. Cunningham), kbd, elec gui, vn, 1999, University of Berkeley, CA, 23 April 1999

Doctor Ox's Experiment (op, 2, B. Morrison, after J. Vernes), London, Coliseum, 15 June 1998

KEITH POTTER

Bryceson. English firm of organ builders. In 1868 the Bryceson brothers acquired the sole rights to use Charles Spackman Barker's practical electric organ mechanisms in England, and the same year the firm, based in London, built organs with electric key action at Drury Lane Theatre, Christ Church, Camberwell, St Michael Cornhill and St George's, Tufnell Park. The Camberwell instrument was first used at the Three Choirs Festival in Gloucester Cathedral, where the organ was placed in the south aisle and its console in the orchestra. The firm also supplied an instrument for the Three Choirs Festival in 1869 in Worcester Cathedral, where it was placed on the chorus platform in front of the west window, with the console next to the conductor. Bryceson Brothers was taken over by Alfred Kirkland some time after 1874, and the combined business was later absorbed by Hill, Norman & Beard. A contemporary account is given in 'Electric Organ', *Musical Standard* (28 Mar 1868).

MICHAEL SAYER

Brydon, Roderick (*b* Edinburgh, 8 Jan 1939). Scottish conductor. After studying at Edinburgh University and in Siena and Vienna, he worked as an associate conductor with the Scottish National Orchestra, Sadler's Wells Opera and Scottish Opera. He was founder and first artistic director of the Scottish Chamber Orchestra (1975–83), and principal conductor at the municipal theatres in Lucerne (1984–7) and Berne (1987–90), where his repertory included Delius's *A Village Romeo and Juliet*, *Peter Grimes*, *Owen Wingrave*, *Parsifal* and *Capriccio*. He made his Australian début in 1991 conducting *Madama Butterfly* for Victoria State Opera, and has since been based in Sydney, where he conducted *Lucia di Lammermoor* in 1996. Widely respected for his Britten interpretations (he conducted *A Midsummer Night's Dream* at the 1992 Aldeburgh Festival), Brydon also has a special affinity for the music of Mozart, Verdi and Stravinsky.

ANDREW CLARK

Bryennius, Manuel [Bryennios, Manouēl] (*fl* Constantinople, *c*1300). Byzantine scholar and music theorist. Although academically eccentric, Bryennius instructed the statesman Theodorus Metochites (*c*1260–1332) in mathematics, astronomy and, probably, also music (a didactic poem by Theodorus reflects his teaching). No works by Bryennius on mathematics and astronomy survive, but his doctrines on these subjects can be seen in a letter to the monk Maximus Planudes (*c*1260–*c*1310) and in scholia (annotations) to manuscripts of Ptolemy's *Almagest*.

The only work attributed to Bryennius that survives is the *Harmonics* (*Harmonika*), in three books. It was compiled in order to prevent the music theory of antiquity falling into oblivion (i.1). Like the somewhat earlier treatise of Georgios Pachymeres (*d c*1310), *Harmonics* is based on ancient Greek tradition, but Bryennius drew on more sources than Pachymeres, treated his material in a more independent fashion, and carried his conclusions further. The neo-Pythagorean numerological theory of music is Bryennius's most important source (though for facts more than for metaphysical speculation); his other sources include the works of Nicomachus of Gerasa, Aristides Quintilianus, Theon of Smyrna and, above all, Ptolemy, for his theory of the eight *tonoi* (*Harmonics*, ii.3–4; iii.1–2), the 'shadings' (*chroai*) of the tetrachords (i.7; ii.1) and the monochord and its division (ii.6–7).

Unlike his more one-sided precursors, Bryennius also drew extensively on the empiricist school of Aristoxenus. Its basic theories on the elements of melody are quoted according to the sources underlying the *Introduction to Harmonics* attributed to Cleonides (formerly to Euclid). On the other hand, the detailed accounts of melodic species and figures (*Harmonics*, iii.3, 5, 10) appear to have been derived from the lost account by Aristoxenus of the composition of melody.

The first section of the treatise is based largely on Aristoxenus and his school; the second, however, is based on the neo-Pythagorean tradition and concludes, like the treatise by Pachymeres, with a comparison of the divisions of the tetrachords, but in a different order (ii.8–15). The third section unites the Pythagorean and Aristoxenian traditions and culminates in a theory of melodic construction. It cannot be accidental that the final quotation in the treatise is drawn from the *Harmonics* of Aristoxenus: it is a general comparison of the procedures to be adopted by the musician and the geometrician (iii.11).

One section of the treatise deals with the Byzantine ecclesiastical modes (*ēchoi*) and identifies them with the ancient transposition scales (*tonoi, tropoi*); this section contains evidence concerning the musical practice of Bryennius's own time. Like Pachymeres, Bryennius connected the relative pitch of the *tonoi* with the eight *ēchoi*; he based the numbering of the modes in the OKTŌĒCHOS, however, on the respective position of the note *mesē* within the tetrachord (iii.4).

Bryennius's *Harmonics* is the most comprehensive surviving codification of Byzantine musical scholarship. Its composition reflects the increase in interest in mathematics at the beginning of the Palaeologan dynasty and contributed to the rediscovery of ancient music theory. The treatise was highly valued in the period of the late Byzantine empire and in the Italian Renaissance: there are 46 surviving manuscripts from before 1600, and two early Latin translations (1497, by Gian Francesco Burana

of Verona, commissioned by Gaffurius, and 1555, by Antonio de Albertis). After Meibom, in the preface to his collected edition of Greek music theorists (*Antiquae musicae auctores septem*, Amsterdam, 1652/*R*), had promised a publication of Bryennius, the Oxford mathematician John Wallis in 1699 published his treatise together with those of Ptolemy and Porphyry.

LUKAS RICHTER

Brygeman, William (*d* Bristol, 1524). English musician and composer. Between 1503 and 1504 he was a clerk of the choir of Eton College; three parts of his five-part *Salve regina* survive in the Eton Choirbook (incipit in MB, xii, 1961, no.59); a five-part *Magnificat*, listed in the index of the choirbook, is now lost. At the time of his death he was clerk, and possibly master, of the choir maintained in the parish church of All Saints, Bristol. There exists an inventory of the polyphonic music bequeathed by him to the church (see F.Ll. Harrison: 'The Repertory of an English Parish Church in the Early Sixteenth Century', *Renaissance-muziek 1400–1600: donum natalicum René Bernard Lenaerts*, ed. J. Robijns and others (Leuven, 1969, pp.143–7); the inventory includes three choirbooks, three sets of partbooks and some 50 smaller items providing music for use on all liturgical occasions throughout the church's year. The music was in up to five parts, and included such items as Fayrfax's *Magnificat* and *Mass O bone Jesu*, and a Mass *Ascendo ad patrem* by Brygeman. Since the most important of the Bristol religious fraternities, the Gild of the Kalendars, was established in All Saints, this inventory gives an impressive insight into the musical repertory of the choirs widely maintained in parish churches throughout England by such fraternities in the century before the Reformation.

ROGER BOWERS

Brymer, Jack (*b* South Shields, 27 Jan 1915). English clarinettist. He began his career as a schoolmaster and achieved sudden prominence in the musical world in 1947 when Beecham appointed him successor to Reginald Kell in the RPO. He held the appointment for 16 years, and was subsequently co-principal of the BBC SO, 1963–72, and then principal of the LSO, 1972–86. He is a founder-member of the Wigmore, London Baroque and Prometheus Ensembles, and director of the London Wind Soloists. Among his recordings are Mozart's Clarinet Concerto, the Quintet and music for wind ensemble. He lectures widely and has taught at the RAM, Kneller Hall and the GSM. He was made an OBE in 1960, and awarded an honorary MA from the University of Newcastle upon Tyne in 1973. Brymer is one of the most outstanding British clarinettists of the 20th century. His playing style is somewhat similar to his predecessor in the RPO, Reginald Kell, and his tone is flexible and beautifully rounded. He has continued into his 80s to undertake concerto engagements with consumate skill.

PAMELA WESTON

Brymley, John. *See* BRIMLEY, JOHN.

Bryne [Bryan, Brian], **Albertus** [Albert] (*b* ?London, *c*1621; *d* Westminster, 2 Dec 1668). English organist and composer. He studied under John Tomkins, succeeding him as organist at St Paul's Cathedral in 1638. Under the Puritans he was dismissed from this post and he taught the harpsichord in London during the Commonwealth. At the Restoration he returned to St Paul's and petitioned unsuccessfully to the king to appoint him organist at the Chapel Royal, Whitehall. After the Great Fire he moved to Westminster Abbey and when he died in 1668 he was succeeded there by Blow. Anthony Wood stated that he was buried in the cloisters at the Abbey, but his grave cannot now be traced. The signature of his son, also Albertus, appears in a salaries book at St Paul's until January 1671, and he was organist at Dulwich College as a 'young man' (1671–7). He is probably the 'Mr Bryan' who was organist at All Hallows, Barking-by-the-Tower, from 1676 until his death in 1713, but he is not known as a composer.

The elder Bryne was evidently well respected by contemporaries, being described as 'that famously velvet fingered Organist' (J. Batchiler, *The Virgin's Pattern*, 1661) and 'an excellent musitian' (Wood). He composed anthems and services, the words of some being printed in Clifford's *Divine Services and Anthems* (1663), and was one of the leading English harpsichord composers of his day; his suites were a strong influence on harpsichord composers of the next generation and some are among the earliest English examples with four movements (*GB-Ob*).

WORKS

SACRED

Short Service, in G (TeD, Jub, Ky, Cr, San, Mag, Nunc), 4vv, org, *GB-DRc*, *Lcm*, *LF*, *Och*
3 full anthems, 4vv, 2 with org, *DRc*, *Lbl*, *Mp*, *Ob*, *Y*, *US-BEm*
2 verse anthems, inc., *GB-Mp*
Anthem (text only) in J. Clifford: The Divine Services and Anthems (London, 1663)

INSTRUMENTAL

5 dance movts, a, hpd, 1678[6]; 3 suites, d, D, a, hpd, *Ob*, *Och* (inc.), *US-NYp*; 2 suites, D, d, hpd, *NYp*; 1 suite, F, hpd, *GB-Och* (first 2 movts doubtful); 2 single movts, G, C, hpd, *Och*, *US-Cn*; Voluntary, a, org, *GB-Lbl* (doubtful): 4 suites ed. in RRMBE, lxxxi (Madison, WI, 1997)

B.A.R. COOPER

Bryn-Julson, Phyllis (Mae) (*b* Bowdon, ND, 5 Feb 1945). American soprano of Norwegian parentage. Trained as a pianist at Concordia College, Moorhead, Minnesota, she was heard by Gunther Schuller, who was struck by her facility at sight-reading 12-note music. At his instigation she undertook vocal study at Tanglewood, receiving additional encouragement from Erich Leinsdorf. After further study at Syracuse University she made her official début with the Boston SO in Berg's *Lulu* Suite in 1966; this led to orchestral engagements throughout the USA, including an appearance with the New York PO under Boulez. Although her repertory was broad and eclectic, she achieved her greatest successes in an extraordinary variety of testing modern works, many written specially for her. The clarity and pure timbre of her voice, her perfect pitch, three-octave range and ability to sing accurately (even in quarter-tones) made her a valued exponent of Boulez, Crumb, Ligeti and Foss. She has served on the faculties of Kirkland-Hamilton College (Clinton, New York) and the University of Maryland, and given masterclasses in Europe and the USA. Her first operatic role was Malinche in the American première of Sessions's *Montezuma* under Sarah Caldwell (1976, Boston). The following year she made an acclaimed début at the Proms in Henze's *Das Floss der 'Medusa'*, and in 1987 sang in Stravinsky's *The Nightingale* and Ravel's *L'enfant et les sortilèges* at Covent Garden. Bryn-Julson's many recordings include Birtwistle's *Punch and Judy*, Dallapiccola's *Il prigioniero*, *The Nightingale*, *Pierrot Lunaire* (of which she was a famous exponent) and several works by Boulez.

MARTIN BERNHEIMER/R

Bryssiger, Peter. *See* BREISIGER, PETER.

Brysson, John (*d* 1818). Scottish music publisher. He managed the Edinburgh firm that was founded by ROBERT BREMNER.

Brzezina, Antoni (*d* Lemberg [now L'viv], June 1831). Polish bookseller, music publisher, lithographer and printer. In 1822 in Warsaw he founded a bookshop which until 1825 dealt mainly in music. He was in contact with many booksellers in Poland and abroad, and imported much music from other countries, including Schott's edition of Beethoven's collected works. One of Brzezina's regular customers was the young Chopin. From about 1823 Brzezina published 309 lithographed musical works, including *Śpiewy historyczne* ('Historical songs') to words by J.U. Niemcewicz, Chopin's Rondo op.1 (1825) and *Rondo à la Mazur* op.5 (1828), works by J. Damse, J. Stefani, K. Kurpiński (keyboard method, 1829), as well as Auber, Boieldieu, Rossini, Weber and others. In 1832 Gustaw Sennewald, Brzezina's partner from 1828, purchased the firm, which then traded under his name until 1905. Brzezina also published his own trade and publishing catalogues, of which four survive (1827–30).

KORNEL MICHAŁOWSKI

Brzeziński, Franciszek (Ksawery) (*b* Warsaw, 6 Sept 1867; *d* Warsaw, 6 Aug 1944). Polish composer and music critic. He studied law (graduating in 1890) at the University of Dorpat (now Tartu) and until about 1903 practised law in Warsaw. During the same period he also studied the piano with Jan Kleczyński. Later, he studied at the Leipzig Conservatory with Reger (composition) and Nikisch. From 1916 to 1921 he was a music reviewer for *Kurier Warszawski*. In 1921 he was appointed Polish Consul in Breslau (now Wrocław) and later appointed to the equivalent position in Berlin, where, from about 1928, he served as music correspondent for the monthly Warsaw journal *Muzyka*. After returning to Poland (in 1931) he contributed to a range of musical and non-musical publications. In 1929 he became a board member of the Association of Writers and Music Critics.

Brzeziński's music is strongly based in the late Romantic tradition, although it shows signs of restrained modernism. His works are characterized by an integrity of feeling, a good command of polyphony and a predilection for the use of folk melodies and their occasional humour.

In contrast to his compositions, which are now largely forgotten, Brzeziński's writings are of historical value and a good source of information about Polish musical culture at the turn of the century. As a critic he was interested in a broad range of issues; he was objective, honest and without prejudice towards the new music of such composers as Szymanowski or Stravinsky. His main interest lay in music of the Romantic era; he valued highly the music of Brahms, Smetana, French and Italian composers (particularly Verdi) and was sharply critical of Liszt and Mahler. He placed his erudition and fine literary style not only at the service of music criticism (including music for the church, schools and radio) but also wrote about operatic production and choreography (especially Polish dances). He defined the boundaries of good music criticism in an article for *Muzyka polska* in 1935.

WORKS

Orch: Tema con variazioni, f♯, op.3, c1904; Polnische suite, G, op.4, c1907; Tryptyk, op.5 [3 Preludes and Fugues], 1910; Polonez-Ballada, 1917, arr. pf; Toccata, op.7, c1910; Concerto, g, op.9, before 1916

Other: Sonata, D, op.6, vn, pf, c1910; Śpiewnik studencki [Student's Songbook], c1890, collab. S. Brzeziński; songs, 1v, pf

BARBARA CHMARA-ŻACZKIEWICZ

Brzoska, Matthias [Johannes Maria] (*b* Frankfurt, 24 June 1955). German musicologist. After studying musicology in Marburg with Brinkmann and Sieghart Döhring (1977–81), he attended the Technical University of Berlin (1982–6) and took the doctorate under Dahlhaus with a study on Schreker's opera *Der Schatzgräber*. From 1981 to 1986 he worked as an assistant at the Hochschule der Künste in Berlin with Budde and Schnebel. In 1992 his *Habilitationsschrift* on the concept of the Gesamtkunstwerk during the July Monarchy was accepted by the Technical University and he became professor at the Folkwang Hochschule in Essen the same year. His main areas of study are French music from the 18th to the 20th centuries, music aesthetics in the 19th and 20th century and the history of opera. A pioneering scholar of opera, he has contributed important articles to *Pipers Enzyklopädie des Musiktheaters* and *Metzlers Komponisten-Lexikon*.

CHRISTIAN BERGER

Brzowski, Józef (*b* Warsaw, 1805/03; *d* Warsaw, 3 Dec 1888). Polish composer and teacher. He was a pupil at the Piarist School and the Warsaw *lycée*, studying music with Karol Kurpiński and then (from 1821) at the Conservatory where he studied theory with Wilhelm Würfel and the cello with J. Wagner. From 1827 to 1832 he was successively cellist, coach and conductor of the ballet at the Warsaw Opera. In 1836 and again in 1843 and 1867 he toured Germany, France and Belgium. From 1861 until his death he was inspector and piano teacher for singers in the Warsaw Institute of Music. In 1877 he was decorated with the Spanish Order of Isabella the Catholic.

His sister Zofia (19 Jan 1800–28 June 1879) was an opera singer and the wife of Karol Kurpiński. His daughter Jadwiga (1830–after 1886) was a well-known pianist, a pupil of Moscheles. She gave concerts in Poland, Germany, France, Belgium, England and America (1840–58). In 1860 she married the Marquis Méjean, Belgian ambassador in New Orleans, where from 1858 she was director of the Institute of Music. Towards the end of her life she lived in Brussels and in Paris.

ALINA NOWAK-ROMANOWICZ/
BARBARA CHMARA-ŻACZKIEWICZ

Buarque (de Hollanda), Chico (Francisco) (*b* Rio de Janeiro, 19 June 1944). Brazilian composer and singer-songwriter. The son of a prominent historian and intellectual, he began studying architecture at the University of São Paulo in 1963 but decided soon after to pursue a career in popular music. Although he was a great admirer of the bossa nova musician João Gilberto, his first hits, *Pedro Pedreiro* and *Sonho de um Carnaval* (both recorded in 1965), as well as *Olê Olá*, revealed innovative talents. The first piece is an early expression of his concern for and subsequent criticism of some of Brazil's urban social problems. The well-known poet-diplomat Vinicius de Morais, a family friend and fundamental figure of the bossa nova movement, exerted a strong influence on Buarque's music and poetry. Indeed the 'master of the language', as Jobim characterized him, went on to produce some of the most sophisticated popular songs of his generation, both poetically and musically. In 1966 vocalist Nara Leão presented his *A Banda* at the second festival of Brazilian Popular Music, a song that brought him overnight success. Following the song and subsequent play *Roda-Viva* (1967, produced in 1968), which denounced the machinations of showbusiness against a popular artist, he developed problems with the military censors. At the end of 1968 the political climate became strongly repressive and he left for Italy in early 1969 and remained there in voluntary exile for about 15 months.

Upon his return to Brazil, Buarque recorded an LP of his new songs, and in 1971 released the album *Construção*. Although several of his songs continued to be banned, censorship diminished in the late 1970s. During that time he also became involved with theatre, film and literature. His musical *Opera do malandro* ('Hustler's Opera', 1977–8), based on *Die Dreigroschenoper* of Brecht and Weill, was a well-received social satire of the Vargas regime of the 1930s and 1940s. The return to democracy in 1985 finally gave the composer the chance to express himself freely. His lyrics indeed reflect the hopes and frustrations of his generation and especially of the 1964–85 period of authoritarian regime. Buarque's prolific song output reveals a creative individual whose facets have been classified as those of a troubadour, lover, politician, chronicler and hustler.

GERARD BÉHAGUE

Bubblegum. South African popular music style. The worldwide popularity of disco during the 1980s spawned a South African township variant commonly called 'bubblegum', although its exponents prefer the official classification 'township pop'. Catering for the tastes of the black urban youth, bubblegum retains some indigenous characteristics such as call-and-response in the vocal parts, but is dominated by synthesizers and a disco beat, commonly supplied by a drum box. Lyrics are often in English, although vernacular languages and the latest phrases in township lingua franca are also used.

The icon of township pop is Brenda Fassie, who has enjoyed more top-selling albums over a longer period than any other female singer. Her closest competitor, Yvonne Chaka Chaka, is known as the 'Princess of Africa' for her popularity throughout the continent. The most successful male vocalists and producers are Dan Tshanda with his group Splash and Sello 'Chicco' Twala. In the mid-1990s the township dance music market was taken over by *kwaito* (a South Africanized blend of hip hop with European and American house, pop and techno) in which the latest township catch phrases are sung and chanted over computer-generated backing. Top *kwaito* groups include Boom Shaka, Arthur, Trompies and Bongo Maffin.

LARA ALLEN

Bucaenus, Paulus. *See* BUCENUS, PAULUS.

Buccellanito, Nicolaus de ['Auritus' ('Big Ears')] (*fl* ?*c*1450). Italian theorist. He is the otherwise unknown author (possibly from Bizzolano, a quarter of Canneto sull'Oglio west of Mantua) of a short treatise for boys, *Introductiones artis musice* (incomplete in *I-Vnm* lat.Cl.VIII.85 (3579), ff.61*v*–67*v*, copied in Mantua and Bozzolo in 1463–4). Book 1 treats letters, notes, hexachords, avoidance of the tritone, and intervals in summary fashion. Book 2, on the species of intervals, is copied largely verbatim from Book 2 of Johannes Ciconia's *Nova musica* (2. 1–8, 13–14, 16, 20; part of Book 1 is also used). Buccellanito appears to be the only theorist who was directly influenced by Ciconia; like him, he uses Greek note names as a matter of course. (O.B. Ellsworth, ed.: *Johannes Ciconia: nova musica and De proportionibus*, GLMT, ix, Lincoln, NE, 1993)

BONNIE J. BLACKBURN

Bucchi, Valentino (*b* Florence, 29 Nov 1916; *d* Rome, 9 May 1976). Italian composer. He studied with Frazzi, Corrado Barbieri and Dallapiccola at the Florence Conservatory, where he was awarded the diploma in composition in 1944; he also took a degree in philosophy at the University of Florence. From 1945 he taught in the conservatories of Florence, Venice and Perugia, and he was later artistic director of the Accademia Filarmonica Romana (1958–60) and director of the Florence Conservatory (from 1974). He worked as a music critic for various daily newspapers, including *La nazione* and *Avanti!*.

Non-conformist in character with an ironic burlesque streak, Bucchi has occupied a unique position in Italian 20th-century music. Equally removed from the avant garde and from tradition, he developed a compositional technique based on the play of permutations, a collage of elements drawn from a broad, heterogeneous spectrum, mixing classical and popular, old and new features. Following a series of pieces inspired by the tragedy of World War II and the Resistance (*La dolce pena*, *Pianto delle creature*, *Cori per la pietà morta*) characterized by vehement vocal phrases and violent juxtapositions of voices and instruments, Bucchi went on to use more moderate means of expression. In 1952 he turned to early music, re-writing *Li jeus de Robin et de Marion* by Adam de la Halle and *Laudes evangelii*, a kind of sacred stage work which draws on the melodies of medieval *laudes*. With these works, Bucchi made a decisive move towards simplifying his musical language; this led both to further achievements in the theatrical domain and also to a small number of instrumental compositions of a concertante type, essentially playful in character, for example the *Concerto grottesco* for double bass and strings (1967). From this point on, Bucchi formed his own personal style based upon an aesthetics of simplicity, defined by d'Amico as using 'minimum means'.

Bucchi's interest in the theatre, which marks all his work, had a particularly fruitful result in the one-act *Il contrabbasso* (1954), based on a Chekhov short story. The strange narrative is matched by Bucchi's acute sense of irony, together with an underlying bitterness and a disconcertingly simple musical language. In his next operatic piece, *Una notte in paradiso* (1960), a treatment of an Italian folktale collected by Italo Calvino, the humorous style reflects popular culture: an approach already seen, if with a surrealist character, in the evocation of folk myth in *Il giuoco del barone* (1939). In *Una notte*, Bucchi experiments with a fusion of technical devices and stylistic 'levels' – popular song, jazz, art music – which is also fundamental to *Il coccodrillo* (1970), after Dostoyevsky. In this, his last work for the theatre, Bucchi eschews a conventional dramatic sequence. Instead the action is split into 32 episodes and matched by a multiplicity of artistic means: spoken sections, rhythmic recitative, song, orchestral music, recorded sound, the projection of filmed sequences, mime and dance. In his works of the 1970s, Bucchi abandoned montage techniques, and devoted himself to exploring new sound worlds, including microintervals and clusters. His final compositions, *Lettres de la religieuse portugaise* and *Colloquio corale*, draw the threads of all his previous works, including the expressive tension of the postwar operas, together.

WORKS

(*selective list*)

Ops: Il giuoco del barone (1, A. Parronchi), Florence, Sperimentale, 20 Dec 1939, rev. 1955, Spoleto, 26 June 1958; Il contrabbasso (grottesco, 1, M. Mattolini and M. Pezzati, after A. VIRGILIO BERNARDONI

Bucchianti, Giovanni Pietro (*b* 1608; *d* after 1627). Italian composer. He was appointed a musician to the Cavalieri di S Stefano at Pisa, whose director of music was Antonio Brunelli. In his only known music, *Arie, scherzi, e madrigali*, for one and two voices and continuo (Venice, 1627), he states that he was a pupil of Brunelli and that he has 'not yet completed 19 years'. He may have died soon afterwards, for while the 27 songs in his volume are naturally derivative they are promising enough for one to expect more music to have followed them. They are exceptionally wide-ranging, as though as a student he were trying his hand at as many forms and styles as possible. In the madrigals in particular he handled with some imagination a variety of possible influences ranging from Caccini to d'India and Saracini. *Vagh'e dolc'augelletto* shows the strong influence of the aria on the declining madrigal at this date. The strophic arias are less appealing, though one interesting setting of a strophic poem, *Hor ch'io posso dolente*, illustrates another recent influence in being a cantata in the manner of Alessandro Grandi (i). The cantata-like duet *Tu sei pur bella* is structurally more resourceful still and also includes a few notably expressive passages.

NIGEL FORTUNE

Buccin (i). A crude wind instrument, created during the French Revolution for use in outdoor music (*see* REVOLUTIONARY HYMN). It was frequently paired with the TUBA CURVA. The buccin has not survived, but is known to have incorporated crooks in the same way as the natural trumpet. It possessed 'a prodigious strength of sound' according to Choron (Pierre, 1894, p.52); this combined with a high tessitura made it less popular with composers than the tuba curva.

The buccin was first heard publicly at Voltaire's reburial on 11 July 1791 and is last known to have been written for in Méhul's *Chant National du 14 juillet 1800* (1800), for three choirs and three instrumental ensembles. Engravings made of the Voltaire ceremony vary in their portrayal of the instrument, but historically the most likely shape was a straight conical tube ending in a slight flare after the Greco-Roman pattern. Three such instruments are found in J.-L. David's drawing *The Reception of the Emperor and Empress at the Hôtel de Ville* (1804; see illustration). This design confirms what an examination of the buccin's music reveals, namely that it was between 1 and 1·5 metres long, and most frequently sounded the harmonic series *f′–c″–f″–a″*.

DAVID CHARLTON

Buccin (ii). A form of TROMBONE with a bell terminating in a stylized serpent's or dragon's head, often with a metal tongue, free to flap, protruding. Berlioz scored for buccin in the Kyrie and 'Resurrexit' of his *Messe solennelle* of 1824.

ARNOLD MYERS

Buccina [Bucina] (Gk. *bukanē*). A curved Roman brass instrument (an AEROPHONE). It is less easily definable than its contemporaries owing to the scarcity of iconographic evidence and the ambiguity of the literary references, some of which confuse it with the CORNU. The majority of evidence, nevertheless, points to a distinct instrument. Originally it was a curved animal's horn but it came to be covered with brass and even to be fashioned entirely from brass. Its musical capability seems to have been limited to a few pitches of the overtone series; this would agree with the literary references, which consistently attributed to it a signalling function.

In earlier times it was associated with country folk, particularly shepherds, and although it became primarily a military instrument, it maintained something of this early association throughout the classical period. Roman authors described the herding of sheep and the summoning together of rural communities as among its early uses. The later, more common, military references give the impression that it was used within the camp, unlike the more powerful tuba (*see* TUBA (ii)) and cornu, which were used on the field of battle. Within the camp, it gave signals, for example, for the changing of the watch and for reveille. A number of poetic references contrasted its sleep-shattering call to arms with the soporific and erotic associations of instruments such as the kithara. In conformity with its smaller size, it was used also by the cavalry, whereas the tuba and cornu were played by men on foot.

A final association was with Triton, the sea god who blew upon a horn of shell; this instrument was referred to as a buccina in Roman literature.

JAMES W. McKINNON

Bucenus [Bucaenus], **Paulus** (*b* Holstein; *fl* 1567–84; *d* ?Riga). German composer. In 1567 he matriculated at Greifswald University; adjoined to his name was the indication 'Philorhodus, Holsata', but it cannot now be determined what place of origin in Holstein this signified (possibly Rostock). The same document makes clear that he was already a musician of talent. About 1570 he

became Kantor at the Gymnasium at Thorn (now Toruń, Poland) and by 1576 was Kantor of Riga Cathedral, where he was also very active as a composer.

Bucenus composed a six-part *Passio Domini Jesu Christi* (Stettin, 1578, inc.). His work and a Passion by Ludwig Daser published in the same year are the last Lutheran settings to Latin words; like those of Balthasar Resinarius and Johannes Galliculus they used a composite version rather than the words of a single gospel. Bucenus set the opening and closing choruses, the Saviour's words and the Evangelist's narration all in six parts, and this may be the reason for Kadès' faulting it as unexpressive. In 1583–4 Bucenus assembled a large, two-volume collection of his music, *Tomi musici operis ecclesiae rigensis*. The first volume, *Cantiones ... ad tria contrapuncti genera accomodatae musicis instrumentis scholisque aptissimae decantatae*, for four to six voices, contains over 100 motets on texts from the Old and New Testaments, among them many dedicatory pieces. The second volume begins with 24 parody and cantus firmus masses ('Missae aliquot ... ad clarissimorum musicorum motetas et sacros quosdam tenores accomodatae'), for four, five, six and eight voices; the second section ('Preces vespertinae') consists of numerous responsories and hymns, and *Magnificat* settings in all the tones. Some of Bucenus's compositions also appeared in a large anthology compiled by Paul Praetorius, Kantor of Stettin from 1579 to 1587, but only the list of contents survives.

Although Bucenus's work has yet to be studied in detail, it is evident that he was a fluent, gifted and orderly composer of church music. The dedicatory compositions show that he was an educated humanist and that he was held in high regard.

WALTER BLANKENBURG

Buchan, John (*fl* 1562–1608). Scottish composer. Described in the 1635 Scottish Psalter as one of the 'primest Musicians that ever this kingdome had', he is today known only for two identified psalm settings (Psalms lxvii and cxxviii). Certainly these are very good examples of their kind, and have an added interest in being in Thomas Wood (i)'s collection (*IRL-Dtc, GB-Eu, Lbl, US-Wgu*) in the composer's own hand. He appears in contemporary records possibly as 'schoolmaster' in Ayr (1554–9), but more likely as master of the song school in Haddington (1584) who was appointed prebendary of the Chapel Royal in the same year. In 1592, as master of the song school in Glasgow, he was given a prebend of Glasgow Cathedral and is mentioned frequently in civic documents until 1608.

KENNETH ELLIOTT

Buchanan, Dorothy Quita (*b* Christchurch, 28 Sept 1945). New Zealand composer and teacher. The second of six daughters, she grew up in an intensely musical environment. She graduated from the University of Canterbury in 1967. In 1973 she founded the influential Christchurch music workshops, and later formed and directed the Centre Sound choral group. She gained a teaching diploma in 1976 and the following year became the first 'composer-in-schools'. Her work as a teacher has led to a 'school' of young Christchurch composers. She also plays a leading role as a lecturer, writer, adjudicator and musical director.

A prolific composer, she has been influenced above all by landscape. She has worked closely with painters and has set texts by leading New Zealand poets such as Ian Wedde and Ruth Gilbert as well as the writings of Janet Frame and Margaret Mahy. Of her *Five Vignettes of Women*, for flute and female chorus (1987), Elizabeth Kerr wrote in the *New Zealand Listener* (23 May 1987) 'this moving work is unashamedly romantic ... The idiom is a simple tonal one, with the gentle and imaginative melodic, harmonic and rhythmic surprises often found in Buchanan's music'. In 1984 she became composer-in-residence at the New Zealand Film Archives in Wellington, where she also composed scores for classic silent films.

J.M. THOMSON

Buchanan, Jack (Walter John) (*b* Helensburgh, 2 April 1890; *d* London, 20 Oct 1957). Scottish actor, producer and director. After a disastrous début as a comic in music hall in Glasgow, he danced in West End musicals until he understudied, then replaced, Jack Hulbert in *Tonight's the Night* (1915–17), in which he sang Kern's 'They

didn't believe me'. He established himself as a leading man, particularly in the revues of André Charlot, then starred with Gertrude Lawrence in *A to Z* (1921), introducing Ivor Novello's 'And her mother came too'. He also scored success in New York in two editions of *Charlot's London Revue* (1924 and 1925). An ambitious and astute businessman, he produced *Battling Butler* (1922) as a vehicle for himself, and in 1926 brought Kern's *Sunny* to the London Hippodrome, which became the home to a series of Buchanan productions. With Elsie Randolph he appeared in *That's a Good Girl* (1928), *Stand Up and Sing* (1931), *Mr Whittington* (1934) and *This'll Make You Whistle* (1936). Having already introduced 'Who?' and 'Two Little Bluebirds' to London in *Sunny*, Buchanan regularly imported the songs of other American composers, so giving his musicals a distinctly modern feel. He swept away many of the sentimental clichés associated with musical production, despite his romantic reputation; his shows used contemporary settings and composers and arrangers from a popular music backround. Indeed, many of his recordings were accompanied by Ray Noble, who contributed 'I think I can' to Buchanan's film *Brewster's Millions* (1953).

In America he was the original star of George and Ira Gershwin's *Pardon My English* (1933), and Schwartz and Dietz wrote 'By Myself' and 'Triplets' for him in *Between the Devil* (1937), songs later used in the MGM film musical *The Bandwagon* (1953) in which Buchanan sang and danced 'I guess I'll have to change my plan' with Fred Astaire, the perfect synthesis of British and American elegance. He had previously starred in Hollywood with Irene Bordoni in *Paris* (1929) and with Jeanette MacDonald in *Monte Carlo* (1930). His many British films included versions of his stage successes as well as the popular *Good-Night Vienna* (1932), featuring the sinuous title song by George Posford and Eric Maschwitz. Buchanan's last appearance in a stage musical was in 1951, when he replaced the late Ivor Novello in *King's Rhapsody*.

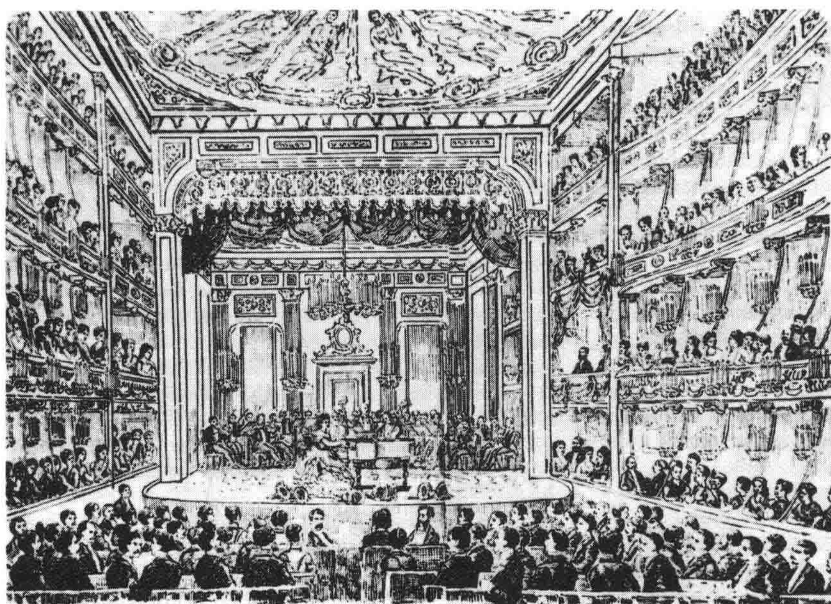
ROBERT HOWIE

Buchardo, Carlos López. *See* LÓPEZ BUCHARDO, CARLOS.

Bucharest (Rom. Bucureşti). Capital city of Romania. It is situated on the southern plain between the Carpathian mountains and the river Danube. Its origins go back to the Neolithic age. Documentary evidence from 1459 shows that it was the residence of Vlad Ţepeş, the ruler of Wallachia; it became the capital of Romania in 1859.



Vocal and instrumental folk melodies and the psalms of the Orthodox church dominated the music of the medieval city. The royal court acted as a catalyst for both Western and Eastern musicians. The earliest known concert was given by the organist Hieronimus Ostermayer in 1539. From the 18th century the European style became dominant as professional musicians introduced instruments such as the harpsichord and violin into aristocratic salons. This process culminated in visits by opera troupes, beginning with that of Livio Cinti in 1770 and followed by Italian and German groups. A new trend appeared in liturgical music when in 1713 Sân Agăi Jipei Filothei produced the *Psaltichia rumânească* with psalms written in the Romanian vernacular. These began to replace the Greek and Slavonic psalms in use at that time; Constantin Şerban and Radu Duma Braşoveanu continued the trend. F.J. Sulzer (*fl* 1782) helped European instrumentalists to gain recognition while also encouraging the popularity of Ottoman music, which was favoured in official circles.

By the beginning of the 19th century European styles had almost completely replaced indigenous music. A fashion for violin, piano and guitar music spread, and well-known instrumentalists and opera singers gave concerts; in 1812 Bernhard Heinrich Romberg performed his own compositions, which made use of Romanian songs, and Liszt appeared during the winter of 1846–7. Foreign opera companies performed in halls built for the purpose: the Cişmeaua Roşie (Red Water Pump, opened 1818), the Momolo (1833), the Bossel (1848) and the Teatrul cel Mare (Grand Theatre) or Teatrul National (1852; see illustration). From 1843 the Teatrul Italian, with its own local company, offered the latest operas of the day.

The Şcolii de Psaltichie, opened in 1814, taught the *hrisantic* system with its new characteristic notation. Macarie Ieromonahul (1770–1836) and Anton Pann (1796–1854) continued the process of romanizing religious vocal music, which had been monodic but began to use harmony. Pann founded the first music printing firm in Bucharest; he also collected secular popular melodies, as published in his *Hospital of Love* booklets. The need to train performers encouraged the development of Western-style musical tuition under the auspices of the Societăţii Filarmonice (1833). Classes in vocal and instrumental music were held, along with productions of musical scenes, vaudevilles and such works as *Triumful amorului* ('The Triumph of Love') by Ion Andrei Wachmann (1807–63), who directed the Teatrul National from 1852 to 1858. In 1836 Archimandridul Visarion founded the Chorul Cântăreţilor (Choir of Singers). After 1840, under Western European influences, Romanian composers began to produce works that synthesized folk elements with features of art music. Works that had their premières in Bucharest during this period included Alexandru Flechtenmacher's National Moldavian Overture (1846) and his operetta *Baba Hîrca* ('The Old Witch Hîrca', 1848); Wachmann's opera *Mihai Braval în ajunal bătăliei de la Călugăreni* ('Michael the Brave on the Eve of the Battle of Călugăreni', 1848); and the *Concert patetic* for violin and orchestra by Ludwig Wiest (1852).

By the second half of the 19th century the foundations for stable municipal musical institutions were in place. From 1850 orchestral 'concerte spirituale' were given in the Slater, Mimi and Raşca gardens. In 1868 the orchestra of the Societăţii Filarmonice gave its inaugural concert, conducted by Eduard Wachmann. From 1888 the venue for its concerts was known as the Ateneul Român (the Romanian Atheneum). On 1 March 1898 George Enescu made his conducting début, presenting his *Poème roumain*. From 1873 Constantin Dimitrescu encouraged concerts of chamber music. At the same time the development of choral music gained pace. The most important ensemble was the Societate Corală Carmen, established in 1901 by Dumitru Kiriac-Georgescu and, after a period of fruitful activity, disbanded in 1948 by the Communist regime.

George Stephănescu, who had been both singing tutor and conductor at the Teatrul National, established Opera Română in 1885, aiming to present performances in

Interior of the Teatrul Național, Bucharest: lithograph by Carol Pop de Szathmari, c1870

Romanian featuring Romanian soloists; among premières given by the company was Eduard Caudella's *Petru Rareş* (1889), one of the first Romanian national operas. The Italian theatre companies competing with Opera Română also adopted works with Romanian subject matter, some based on popular folk music: the ballets *Doamna cu părul de aur* ('The Lady with Golden Hair', 1869) by Wiest, *Fidanţata Română* (1871) by Grazziani and Mattiuzzi and *Ielele* ('The Pixies', 1892) by Francesco Spetrino; and the operas *Magdalena* (1861) by Zissu, *Vârful cu dor* ('The Peak of Longing', 1879) by Lubicz and *Haiducul* ('The Outlaw', 1884) by Bimboni. Music critics became very exacting in the periodicals of the time, which included *Musicul român* (1860), *Lyra română* (1879–80), *Doina* (The Ballad, 1884–6), *România muzicală* (1890–1905) and *Muzica* (1908–10, 1916–25). Stephănescu's successors at Opera Română included Alfred Alessandrescu, I.N. Otescu, Jonel Perlea, George Georgescu and Constantin Silvestri. In 1921 it became a government institution. It has given productions of works by indigenous composers including Tiberiu Brediceanu, Sabin Drăgoi, Paul Constantinescu, Mihail Jora, Gheorghe Dumitrescu, Pascal Bentoiu and Mircea Chiriac. The Teatrul de Opereta was established in 1950 and later named after Dacian, one of its principal tenors.

In 1864 the Conservatorul de Muzică şi Artă Dramatică was established, with Alexandru Flechtenmacher as its director for the first five years. Eduard Wachmann then ran it for four decades, lending it prestige and training musicians in all disciplines, many of whom achieved recognition abroad. After 1900 the conservatory improved under Alfonso Castaldi, who taught harmony and composition and introduced the students to modern techniques. Under Otescu, director from 1919 to 1940, the conservatory became the Academia Regală de Muzică şi Artă Dramatică in 1931. George Breazul was the first to hold the chair of music literature and music education (1929–36). During the turbulent years of World War II and after, Jora took charge of the academy, but he was later removed by the Communist authorities. Among those who taught there after the war were Ion and Gheorghe Dumitrescu, Georgescu, Silvestri, Ioan Chirescu, Theodor Rogalski and Drăgoi. After 1949 the institution became the Conservatorul Ciprian Porumbescu, and in 1990 the Academia de Muzică. There were also private conservatories in Bucharest. In 1929 the Academia de Muzică Religioasă came into being, with Constantin Brăiloiu as its director; among teachers there were Petrescu, Constantinescu, Chirescu, Ion Dumitrescu and Breazul.

Enescu took part in the concert life of Bucharest as a conductor, pianist and violinist. In 1913 he established the Premiul Naţional de Compoziţie, designed to encourage chamber and orchestral composition; it later took his name and was awarded until 1946. For 29 years Enescu was also the president of the Societăţii Compozitorilor Români (Society of Romanian Composers), which was founded on 2 November 1920 by a group of musicians led by Brăiloiu, who later became its general secretary. The society's purpose was to promote indigenous compositions by giving concerts, printing new scores and protecting the moral and material rights of its members. The Communist authorities tried without success to transform the society into a syndicate, facing stiff opposition from Jora, then its vice-president. It became the Uniunea Compozitorilor (Composers' Union) in 1949 and published a new series of the journal *Muzica* from 1950; the union later also included musicologists.

The Orchestra Filarmonică, the leading orchestra in Bucharest, has since 1955 been named after Enescu. Among its conductors have been Otescu, Alessandrescu, Dimitrie Dinicu, Georgescu, Perlea, Silvestri, Mihai Brediceanu and Mandeal. Performances still take place in the Ateneul Român, acoustically the best hall in the city. The orchestra has worked with composers including Richard Strauss, Mascagni, Ravel, Prokofiev, Bartók and Stravinsky; guest conductors including Weingartner, Walter, Karajan and Barbirolli; and soloists including Menuhin, Casals and Rubinstein. Other orchestras in Bucharest have been the Societatea Muzica (from 1922); the Romanian RSO (from 1928), first conducted by Jora, who had been the music director of the Romanian

Broadcasting Corporation since 1928; the Orchestra Armatei (Army Orchestra, 1940–43); the Orchestra Cinematografiei (1953–61); the Romanian Broadcasting Studio Orchestra (from 1955); and the orchestra and chamber orchestra of the Academy of Music.

Regular concerts have been provided by numerous chamber ensembles such as the Cvartetul Regina Maria, Cvartetul C. Nottara, Pro Arte, Muzica Nouă, Cvartetul Uniunii Compozitorilor, Ansamblul Ars Nova, Arheus and Traect; and also by the choral ensembles Cantarea României (founded 1919), Hora, Corurile Filarmonicii, Radio and Madrigal. In addition to the theatres and the Ateneul Român, concert venues include the Sala Dalles (1936), the Sala Mare Palatului and Sala Mică Palatului (the great and small halls of the palace, cap. 3000 and 500 respectively), the Studioul de Concerte al Radiotelev-iziunii Române (1967) and the George Enescu hall of the conservatory.

In 1928 Breazul laid the foundations of the Arhiva Fonogramică and in the same year Brăiloiu established the Arhiva de Folclore; the two archives were amalgamated in 1949 to form the Institutul de Folclore, an important centre for collecting and research in folk music which houses a substantial collection. The publishing firm Editura Muzicală was established in 1956. *Actualitatea muzicală* was published from 1990. The triennial Festivalul şi Concursul Internaţional George Enescu has been held since 1958, and the annual Săptămâna Muzicii Noi (New Music Week) since 1991.

Bûche. *See* EPINETTE DE VOSGES.

Buchla. A SYNTHESIZER, several models of which have been designed by Donald (Frederick) Buchla (*b* Southgate, CA, 17 April 1937) and manufactured by Buchla Associates (later Buchla & Associates) in Berkeley, California, since 1964. Between 1969 and 1971 CBS Musical Instruments had manufacturing and marketing rights to the original model. Donald Buchla gained experience in electronics by building devices such as a sonar-like guide for blind people and also constructed acoustic sound sculptures; in 1962 he began designing voltage-controlled electronic music modules for the San Francisco Tape Music Center (SFTMC), and in the following year a complete Buchla synthesizer was installed there. The instrument became commercially available in 1964. A close collaborator in this development was the co-founder of the SFTMC, the composer Morton Subotnick, who with his tape works produced on Buchla instruments (including several created for gramophone recordings) became their best-known exponent.

Although they are classified as such, Buchla has never called his instruments 'synthesizers'. His models include the Modular Electronic Music System (Series 100, 1962–70), the Electric Music Box (Series 200, 1971–78), the larger hybrid Series 500 (1971–75), the monophonic Music Easel (1974, nicknamed 'Weasel'), the polyphonic Series 300 (1975–82), the short-lived Touché (1980–?1983), the Series 400 (1982–?1987) and Series 700 (1987–); all except the Touché and the Series 400 and 700 are modular or quasi-modular, and from 1970 most of his instruments have featured programmable computerized elements. Already in the Series 100 a special feature was introduced that characterizes nearly all the Buchla models – control by means of capacitative pressure-sensitive fixed touch-plates. In this Buchla also pioneered the SEQUENCER.

In 1979 Buchla constructed an electric cello ('Essence of Cello'), and he designed the circuitry for Subotnick's 'ghost box' VOLTAGE CONTROL system. Since the late 1980s Buchla has concentrated on the development of two sophisticated MIDI synthesizer controllers, Thunder (1990; an array of 50 programmable touch-sensitive touch-plates on a small stand) and Lightning (1991, second version 1996; a 3-D location-sensing spatial controller, with a wand held in each hand).

HUGH DAVIES

Buchner, Alexandr (*b* Prešov, 3 Sept 1911). Czech musicologist. After taking violin lessons at Prague Conservatory (1931–2), he studied at Prague University under Nejedlý and Hutter (1932–6), taking the doctorate in 1936 with a dissertation on Liszt. He then went to Košice, first teaching at a music school and later working as music editor of the local radio station (1939–45). From 1948 to 1962 he was head of the music department of the National Museum, Prague. The wide-ranging collection of musical instruments there is largely due to Buchner's long years of steady collecting, and the valuable experience he gained in this has led to his numerous popular publications. From 1962 he worked in the theatre department of the National Museum, continuing his specialization in organology, from which he retired in 1979. He has also been involved in regional studies focussing mainly on Prague.

JOSEF BEK

Büchner, Georg (*b* Goddelau, nr Darmstadt, 17 Oct 1813; *d* Zürich, 19 Feb 1837). German dramatist. The son of a doctor, he studied medicine in Strasbourg and Giessen before settling in Switzerland, where he began a promising career as a lecturer in comparative anatomy. He left Germany in 1835 after publication of the pamphlet *Der hessische Landbote*, which was born of the same desire to effect social justice and relieve the sufferings of the poor that informs his best-known drama, *Woyzeck*. His first drama, *Dantons Tod*, was his only work to be published in his lifetime; indeed, despite the advocacy of Hebbel and Gutzkow, his works were hardly performed until the 20th century. Danton, sickened by the Terror and his involvement in the September Massacres, makes no effort to save his own life; indeed, his denunciation of Robespierre hastens his end. The only positive message is of the invincibility of the human spirit. The play was turned into an opera by von Einem, to a libretto by Blacher, and was first heard at the Salzburg Festival in 1947. In 1929 Eisler wrote incidental music for a production of the play in Berlin.

The best-known work based on Büchner is Berg's *Wozzeck* (1925, Berlin) which sets almost verbatim Büchner's text as edited by K.E. Franzos (1879), but in a revised ordering of scenes. Other composers who have written music for *Woyzeck* are Gurlitt (1926) and Gerhard (1961, for BBC radio). Not surprisingly, Büchner's brilliant and disturbing comedy *Leonce und Lena* (1836–7) has been most often taken up by musicians, though none of the resulting works has established itself. Robert Müller-Hartmann wrote incidental music for a production in 1923, and a year later Weismann set it as an opera to a text by himself and W. Calé (1925, Freiburg); it was set as *Valerio* by Hans Simon, to a libretto by Theodor Ginster in 1931. Will Eisenmann wrote an opera based on the story in 1943, and Svend Erik Tarp in 1955; in 1972 Peter Maxwell Davies used the play for his masque *Blind Man's Buff*. Paul Dessau's last opera (1979) was a setting of *Leonce und Lena*. Wagner-Régeny's *Der Günstling* (1935), to a libretto by Caspar Neher, was based on Büchner's translation of Victor Hugo's *Marie Tudor*. Büchner's unfinished prose work *Lenz* (published 1839), a narrative depiction of an episode in the life of the 18th-century dramatist Jakob Lenz, formed the basis of operas by Sitsky (1974) and Rihm (1979).

WRITINGS

Dantons Tod (play, written 1835): von Einem, 1947
Lenz (prose work, written 1835–6, inc.): Sitsky, 1974; Rihm, 1979
Leonce und Lena (play, written 1836): Weismann, 1925; H. Simon, 1931, as Valerio; S.E. Tarp, 1955; Schwaen, 1961; P.M. Davies, 1972, as Blind Man's Buff; Dessau, 1979
Woyzeck (play, written 1836, inc.): Berg, 1925; Gurlitt, 1926

PETER BRANSCOMBE

Buchner [Buschner, Puchner], **Hans** [Johannes] [M. Hans von Constanz] (*b* Ravensburg, 26 Oct 1483; *d* ?Konstanz, 1538). German organist and composer. He belonged to a family of organists and organ builders. He took lessons from Paul Hofhaimer, living in his house for two or three years. Afterwards he may have spent several years as organist to the imperial court choir during the time that Hofhaimer was living in Passau. According to Boemus (*Liber heroicus*, 1515), he received 100 ducats a year from Emperor Maximilian – as much as Hofhaimer. When the emperor came with his choir to Konstanz for a parliamentary session, he seems to have recommended the cathedral chapter to give Buchner the post of cathedral organist, which had fallen vacant. On 19 June 1506 Buchner succeeded Johannes Gross from Basle and on 9 January 1512 he was appointed for life. When the Reformation movement spread to Konstanz in 1526, the clergy and with them Buchner moved to Überlingen. Like many of his contemporaries, he spent the next several years in comparative poverty. Among his pupils, one of his two sons, Hans Konrad Buchner, and Fridolin Sicher, organist of the collegiate church in St Gallen, became well known.

Although Buchner was highly regarded by his contemporaries as an organist as well as an organ builder and teacher, his only musical achievement recognized is his *Fundamentum*, which he wrote in about 1520. It arose out of his teaching and playing and contains an introduction to the 'ars organistarum' and a collection of examples with arrangements of vocal pieces. The theoretical part of the *Fundamentum* deals with the different skills involved in organ playing: the 'ars ludendi', in which he included fingering and explanations of the keyboard, tablature, scale and note values; the 'ars transferendi', which is concerned with the techniques of arranging vocal pieces for the organ; and the actual *Fundamentum*, which is described as 'brevis certissimaque ratio quemvis cantum planum redigendi in justas duarum, trium pluriumque vocum symphonias'. This third part is the most interesting in being the first methodic description of a method for handling a cantus firmus contrapuntally. It is followed by a collection of examples comprising some 50 liturgical compositions (the Basle copy has an additional 30) made up of ten introits, one gradual, two sets of responsories, four sequences, nine hymns, a *Magnificat* and mass sections (without the Credo). Most of the three- and four-voice examples have instructions such as 'fugat in quarta' or 'fugat in tenore cum discantu in octava'. Each of these is based on a single-line melody from the chant: in some the melody passes from voice to voice while the free parts move around it, in others it is treated imitatively.

Apart from a few compositions in the tablature books of Kleber, Kotter and Sicher and some motets and lieder, the chant arrangements in the *Fundamentum* constitute the major part of Buchner's output as a composer. Intended for teaching purposes, they have great historical value as the earliest surviving complete collection of liturgical organ music.

HANS JOACHIM MARX

Buchner, Philipp Friedrich (*b* Wertheim, 11 Sept 1614; *d* Würzburg, 23 March 1669). German composer. Grandson of the Poet Laureate and Kantor Huldrich Buchner of Wertheim, Buchner was a choirboy at first at Wertheim and then from 1625 to 1627 in Frankfurt under Andreas Herbst. In 1634 he became organist at the Barfüsserkirche, Frankfurt, a position he relinquished to his father two years later. Possibly from 1637, certainly from 1641, he was a tenor and Kapellmeister at Kraków in the service of Stanisław Lubomirski, lord of Wiśnicz; from there he visited Italy (notably Venice, where he published music) and France. He left Kraków in 1647, and about 1648 he became Kapellmeister to the Archbishop and Elector of Mainz.

Buchner is a representative composer of German Catholic church music in the mid-17th century. He published several collections of Latin sacred vocal concertos obviously under the influence of Monteverdi, Herbst, Widmann and Schütz. His instrumental works illustrate the German development of the sonata at a point midway between the works of Biagio Marini and Corelli.

JOHN H. BARON

Bucht, Gunnar (*b* Stocksund, 5 Aug 1927). Swedish composer, teacher and writer on music. After studying the piano with Y. Flyckt and theory with Eppstein, he read musicology at Uppsala University, taking his doctorate in 1953 with a thesis on the ritual of the nuns of Vadstena. He studied composition with Blomdahl (1947–51), Orff, Petrassi and Deutsch. Thereafter he was a university lecturer (1965–9) and cultural attaché at the Swedish Embassy in Bonn (1970–73). Elected a member of the Swedish Royal Academy in 1964, between 1975 and 1985 he was professor of composition at the Royal College of Music, Stockholm, and its director from 1987 to 1993. As an administrator he has served as chairman of Fylkingen (1956–9), chairman of the Society of Swedish Composers (1963–9), a director, chairman and secretary of the Swedish section of the ISCM (1960–69), and vice-president of the ISCM international presidium (1969–72). Bucht's music is marked by the contrast between a striving for purely musical form and a strongly emotional content. Characteristic works include *La fine della diaspora*, *Kattens öron* – about a lonely war veteran talking with his cat – and the opera *Tronkrävarna* ('The Pretenders'), which concerns the struggle for the Norwegian crown in the 13th century. In the mid-1960s he found a new freedom in electronic music, in which he was particularly influenced by Schaeffer; the tape piece *Jerikos murar* confronts news reports from both sides of the Middle East conflict. Since the 1970s the titles of his works have revealed much about their content. He believes, as he has said, 'in an absolute music permeated with extra-musical ideas of the world, with echoes of history, with inner pictures and visions, with wordless drama'.

WORKS
(*selective list*)

Stage: Tronkrävarna [The Pretenders] (op, after H. Ibsen: *Kongsemnerne*), 1962–5; Jerikos murar (op-orat), 1966–7
Orch: 12 syms., 1952–97; Divertimento, 1956; Couplets et refrains, 1960; Strängaspel, str, 1965; Vinterorgel, after E. Karlfeldt, 1974; Journées oubliées, 1976; Au delà–Beyond–Jenseits, 1977; Vn Conc., 1978; The Big Bang – and after, 1979; Georgica, 1980; En clairobscur, chbr orch, 1981; Sinfonia concertante, 1981–2; Musica Bothniae, wind orch, 1983; En vår gick jag ut i världen [One Spring I Went out into the World], novel in 16 chapters, 1983–4; Fresques mobiles, 1985–6; Tönend bewegte Formen, 1987; Konsert för Arholma, str, 1989; Vc Conc. no.2, 1989–90; Pf Conc., 1994; Rörelser i rummet [Movements in the Room], 1996

ROLF HAGLUND

Büchtger, Fritz (*b* Munich, 14 Feb 1903; *d* Starnberg, 26 Dec 1978). German composer, conductor and teacher. He studied the organ, the flute, voice, conducting and music theory at the Akademie der Tonkunst in Munich and from 1921 to 1923 was a composition pupil of Beer-Walbrunn and Waltershausen. Together with Carl Orff he formed a Society for the Promotion of Contemporary Music in Munich in 1927, immersing himself thoroughly in the most advanced musical developments of the period. Between 1929 and 1931 he was instrumental in performing such works as Hindemith's *Kammermusik no.5* and *Lehrstück* and Stravinsky's *Histoire du soldat* in front of a largely conservative Bavarian audience. He also assisted Hermann Scherchen with the first performance of Alois Hába's opera *Matka* ('The Mother') in 1932. With the rise of the Nazis, Büchtger felt compelled to renounce his earlier predilection for the avant garde and now composed in a nationalist style that was deemed acceptable to the new regime. After World War II, however, he once again took up the cause of contemporary music, founding the Studio für Neue Musik in Munich in 1948, and composing in a mainly dodecaphonic style.

WORKS
(*selective list*)

Choral: Der Name des Menschen, cant., choir, orch, 1933; Flamme (cant., S. George), Bar, SATB, orch, 1935; Feierstunde für die Gefallenen des 9. November 1923 (H. Rehm), SATB, orch, 1940; Drusus, dramatic scenes, solo vv, SATB, orch, 1943; Aus der 24. Psalm, SATB, orch, 1946; Der weisse Reiter, orat, Bar, choir, str, pf, timp, 1948; Das gläserne Meer, orat, Bar, choir, orch, 1953; Die Auferstehung, orat, choir, orch, 1954; Die Verklärung, chbr orat, Bar, female choir, str, 1956; Die Himmelfahrt Christi, orat, Bar, choir, str, 1956; Pfingsten, orat, Bar, choir, orch, 1957; Johannes der Täufer, orat, Bar, choir, orch, 1962; Die Botschaft (F. Kafka), Bar, choir, orch, 1969–70; Du hast den Drachen unter deine Füsse getan, 5-pt choir, 15 insts, 1970; Das Gesicht des Hesekiel, Bar, female vv, 15 insts, 1972; Sonnenwende (G. Richter), choir, insts, 1974

Other vocal: Stern des Bundei (George), 4 songs, Bar, str, 1934; Hymnen an das Licht (F. Rückert), middle v, orch, 1938; Auf einem sonnigen Feldrain (J. Weinheber), A/Bar, vn, vc, 1940; Herz werde gross (H. Claudius, J. Eichendorff, M. Mell, R. Schmid-Nörr, G.M. Nespitual, H. Grunow), 7 songs, v, pf, 1943–5; Feierstunde zum Gedenken der Machtergreifung der NSDAP am 30. Januar 1933 (H. Rehm), vv, spkr, chorus, insts, 1943; 4 Morgenstern Lieder, A/Bar, str qt, 1948; Der Tanz auf der Wolke (Li Tai Pe), v, fl, vn, va, 1949; An die Geliebte (George, Eichendorff, C. Morgenstern, E. Mörike), S, pf, 1950; Orpheus (R.M. Rilke), 4 songs, v, pf, 1951; Das Weihnachtsoratorium, solo vv, fl, ob, str, 1959; 4 Haiku, v, pf, 1959; Chansons irrespectueuses (J. Prévert), S, pf, 1962; Spiegelungen III (A. Klabund), Bar, ob, vn, vc, 1962; Vor der Tür, 23 Stücke (various authors), v, orch, 1975–6; Was Unguaz, unheimliche Geschichten (Morgenstern, H.C. Artmann), v, pf, 1976–8

Orch: Musik zu einer Feier, str orch, 1932; Musik für kleines Orchester, 1935; Kleines festliches Vorspiel, 1940; Konzert, str orch, 1952; Konzert für Orchester, 1957; Concertino I, ob, vn, vc, str, 1960; Spiegelungen II, 1961; Concertino II, pf, wind, str, vib, perc, 1962; Vn Conc., 1963; Mutazioni, fl, ob, cl, str, 1964; Tanz, fl, ob, cl, str, 1964; Stufen – Orchesterkonzert, 1966; Musik für Streicher, 1967; Schichten – Bögen, 1964, rev. 1970, 1972; Ascensio, 1973

6 str qts: 1950, 1958, 1967, 1969, 1972, 1973

Other chbr and solo inst: Kleine Sonate, vc, pf, 1930; 5 Metamorphosen, rec, str qt, 1946; Spielbuch für Ute, pf, 1946; Variations, fl, pf, 1951; Musik no.1, pf, 1953; 3 Pieces, vn, pf, 1955; Spiegelungen I, pf, 1960; Musik, vn, vib, perc, 1965; 3 Pieces, vn, org, 1965; 3 Pf Pieces, pf, 1968; Strukturen, nonet, 1968; Nyktodia, 2 ob, 2 cl, 2 hn, 2 bn, 1972; Pf Qt, 1972; Piece, va, pf/org, 1973; Pf Trio, 1974

Incid music to several plays, incl. Revolution um Luther (Eggers), 1935; Ein Spielhansl, 1946

ERIK LEVI

Buchwald, Theo (*b* Vienna, 27 Sept 1902; *d* Lima, 7 Sept 1960). Peruvian conductor of Austrian birth. He received his musical training in Vienna under Arther T. Scholz (harmony, counterpoint and composition), Guido Adler and Wilhelm Fischer (musicology) and Richard Robert (piano). Performing first as a pianist, he began his conducting career at the Stadttheater of Barmen-Elberfeld (1922). Thereafter he held conducting positions in Magdeburg, Munich, Halberstadt and Berlin, working under Kleiber at the Berlin Staatsoper (1929–30). In 1935 he moved to Santiago, where during the next two years he directed symphony concerts and an opera season; at this time he also conducted at Viña del Mar. He moved to Lima in 1937, the Peruvian government entrusting him with the creation of a national symphony orchestra. Appointed permanent director of the National SO, he conducted its first performance, in December 1938 in Lima, and, during his 20-year tenure of the post, toured with the orchestra throughout South America.

JOHN M. SCHECHTER

Bucina. *See* BUCCINA.

Buciu, Dan (*b* Bucharest, 18 Nov 1943). Romanian composer. He was educated at the Arts Lyceum in Bucharest then at the Conservatory, where he studied composition with Tiberiu Olah and Dan Constantinescu. Buciu attended new music courses in Darmstadt in 1970, 1980 and 1982, and later returned to the Bucharest Academy to study musicology with Octavian Cosma (PhD 1992). Keen to broaden his approach to harmony, Buciu explored the possibilities of modal composition. His works are characterized by a combination of modal writing with improvisational and repetitive techniques. He became head of the composition department at the Bucharest Academy in 1990, and is also vice-president of the National Romanian Choral Association.

WORKS
(*selective list*)

Choral: Triptic (E. Jebeleanu), 1968; Remember Hiroşima, 1974; The Profane Suite, 1975; Pax mundi (cant.), 1976; Reunification Songs, 1978; Guess, Guess, 1980; Manole Sann, 1981; Earth's Grass (cant.), 1982; Le Jeu de Construction (P. Eluard), 1987; Greierele [The Crickets] (T. Arghezi), 1995

Orch: Antinomies, 1971; Lespezi [Flagstones], 1977; Romanian Suite, 1984

OCTAVIAN COSMA

Buck, Dudley (*b* Hartford, CT, 19 March 1839; *d* West Orange, NJ, 6 Oct 1909). American composer and

organist. In 1855 he began to study the piano; in the same year he entered Trinity College, Hartford. Two years later he left Trinity to study music in Leipzig, where his teachers were Hauptmann, Rietz, Schneider and Moscheles. In 1860 he followed Schneider, his organ teacher, to Dresden, and in 1862, after a year in Paris, he returned to Hartford as organist at the North Congregational Church. During the next decade he toured as a concert organist, playing symphonic transcriptions and giving premières of works by Bach and Mendelssohn.

His relocation to Chicago in 1869 was cut short by the Great Fire in 1871. He moved to Boston, where he served as organist for the Music Hall Association and faculty member of the New England Conservatory. In Boston he wrote his first large-scale compositions, *The Festival Hymn*, *The Legend of Don Munio* and *The Forty-Sixth Psalm*; the last was performed by the Handel and Haydn Society in 1874. In 1875 he went to New York as assistant conductor of the Theodore Thomas Orchestra and settled in Brooklyn. He became organist and choirmaster of Holy Trinity Church and director of the Apollo Club, retiring in 1901.

Buck played a central role in the establishment of organ and choral music in the USA. He was the first American-born composer to write an organ sonata, and pedagogical works such as *Illustrations in Choir Accompaniment* instructed generations of organists. It was his choral music, however, that won him an enduring place in American music. The popularity of his 12 large-scale secular cantatas made him the leading musical voice of American triumphalism; they received more reported performances than any other American choral works during the 1880s. The invitation from the US Centennial Commission to compose *The Centennial Meditation of Columbia* for the Centennial Exposition in Philadelphia won him national visibility. *The Light of Asia* was first performed at Novello's Oratorio Concerts in London in 1885.

Buck's gift lay in his ability to compose music that held popular appeal without sacrificing artistic substance. Engaging lyricism, genteel restraint and stylistic propriety elevated many of his works into cultural icons. His music epitomized the Victorian era in American culture. In 1898 Buck was elected to the National Institute of Arts and Letters.

His son Dudley Buck (1869–1941) was a tenor and teacher in London, New York and Chicago.

WILLIAM K. GALLO/N. LEE ORR

Buck, Ole (*b* Copenhagen, 1 Feb 1945). Danish composer. He studied composition with Nørgård (1963–9) and Gudmundsen-Holmgreen (1965–9). From the mid-1960s he developed an individual serial style employing groups of notes, clusters, etc. as the fundamental units. *Kalligrafi* (1964), in which Buck's handling of the orchestra recalls Boulez, exemplifies this technique. Later works are built from repetition of small melodic or rhythmic cells within a limited register; such pieces were often suggested by other works of art or by philosophical ideas. Buck has also used aleatory or improvised forms, as in *Give me a word to sing*. His works from the 1970s and 80s show similarities with American minimalist compositions, but later works such as the series *Landscapes I–IV* (1992–5) and *A Tree* (1996) tend to emphasize contrasting elements and modes of expression.

WORKS

JENS BRINCKER

Buck, Sir Percy (Carter) (*b* London, 25 March 1871; *d* London, 3 Oct 1947). English writer on music, music editor, teacher, organist and composer. He studied at the

Royal College of Music under Parratt, C.H. Lloyd and Parry (1888–92). He held posts as organist of Worcester College, Oxford (1891–4), Wells Cathedral (1896–9) and Bristol Cathedral (1899–1901), and was then appointed director of music at Harrow School, a post that he held until 1927. In 1910 he succeeded Prout as professor of music at Trinity College, Dublin, occupying the chair until 1920. In 1925 he was appointed King Edward Professor of Music in the University of London and had meanwhile begun to teach at the RCM. When he left Harrow he became music adviser to the London County Council (1927–36). In August 1937, on his retirement from the London professorship, he received a knighthood.

Buck's book *The Scope of Music*, a recension of a course of lectures given for the Cramb Foundation at Glasgow, indicates his personal outlook towards the problems of practical musicianship that the teacher encounters. Buck accomplished much in English musical education. He took a leading part in the establishment of a teachers' course at the RCM in 1919, and his lectures in psychology contributed greatly to its success. He exerted a consistent influence in favour of the more liberal treatment of examinations in music theory. As a member of the editorial committee for the Tudor Church Music series he found scope for his careful scholarship, and his skill as a contrapuntist was invaluable in the supply of missing parts. With C. Macpherson he edited *The English Psalter* (London, 1925); his own editions include *The Oxford Song Book*, i (London, 1929) and *The Oxford Nursery Song Book* (London, 1934). Buck's unpublished compositions include a piano quintet op.17, an overture *Coeur de Lion* op.18, a string quintet op.19, a violin sonata op.21 and a piano quartet op.22; the manuscripts of his early works were destroyed during World War II. His published works include three organ sonatas, op.3 (Leipzig, 1896), op.9 (London, 1902) and op.12 (London, 1904), and various piano pieces, anthems and songs.

H.C. COLLES/MALCOLM TURNER

Buck, Zechariah (*b* Norwich, 10 Sept 1798; *d* Newport, Essex, 5 Aug 1879). English organist and choir trainer. He became a chorister of Norwich Cathedral under John Beckwith in October 1808, and later an articled pupil of Beckwith's son, whom he succeeded as cathedral organist in 1819. He held this post for 58 years, resigning in September 1877. During this long period he acquired a formidable reputation as a choir trainer and as an organ teacher. He raised the Norwich choir to a high standard of excellence well before the more general improvement of cathedral singing began, achieving this simply by total dedication. He would travel far to secure a good boy for his choir, and he originated the system of probationers who were not admitted as full members until they had proved their ability. In training the boys he 'adopted every conceivable plan likely to be productive of good results' (Kitton, p.9), and would practise a single anthem for several months before admitting it to the service. The results were acclaimed by all who heard his choir, including Jenny Lind, who said she had 'never heard children sing so well'.

Buck was also an outstanding teacher of the organ, and his pupils were to be found in the organ lofts of cathedrals, parish churches and college chapels throughout the country over a period of nearly a century – from Robert Janes, organist of Ely Cathedral 1831–66, to Arthur H. Mann, organist of King's College Chapel, Cambridge, 1876–1929; the list (Kitton, pp.53–4) includes a number of distinguished Victorian choirmasters, composers and scholars. Buck was awarded the Lambeth DMus in 1853.

As an executant and as a composer, Buck reached a respectable but not outstanding rank. In both activities he was conservative, scorning the current trends towards chromaticism and expressive organ playing and registration. He did, however, master the technique of pedal playing, although there were no pedals on the cathedral organ for some years after his appointment. He composed an Evening Service in A, settings of the Sanctus and Responses in G and F, six anthems, including *I heard a voice from heaven* (1849), five hymn tunes and 23 chants, 12 of which were published in 1824.

NICHOLAS TEMPERLEY

Bückeburg. Town in Germany, capital of the former principality of Schaumburg-Lippe. Continuous records of musical activity date from the reign of Count Ernst (1601–22), who began his rule when the flood of English musicians into Germany was at its height. The foundation of his Kapelle was a consort of English viol players including, at one time or another, William Brade, Thomas Simpson, Maurice Webster and Wilhelm Benthon. Of the German musicians heard at this court, two were former pupils of Giovanni Gabrieli and one was his ardent imitator: Heinrich Schütz was named 'Kapellmeister von Haus aus' from 1615 to 1617, Johann Grabbe was vice-Kapellmeister and then Kapellmeister, and Michael Praetorius had a tenuous connection with the court as performer and consultant in organ building. Among Count Ernst's other musicians were Michael Ulich, Nikolaus Bleier, J.M. Caesar, Johann Grosche, Konrad Hagius, Matthias Mercker, Christoph Schubhart, Caspar Textorius and J.B. Veraldi.

After the interruption of the Thirty Years War and during the first half of the 18th century the town's musical life was reduced to tower music, ad hoc ensembles and a succession of excellent but obscure organists in the local church; but with the reigns of Count Wilhelm (1748–77) and his 18th-century successors music in Bückeburg was returned to its former level of excellence. J.C.F. Bach served as chamber musician there from 1750 until his death in 1795 (for details of his activities there *see* BACH FAMILY, §III, 11). In later times important composition in Bückeburg virtually ceased, but concert life continued to

flourish, particularly under the leadership of Richard Sahla, who was appointed Kapellmeister in 1888. In 1912 the Kapelle was reduced to ten; it was active for some 30 years after World War I as the Schaumburg-Lippisches Landesorchester, but was dissolved in 1949. Since then, concerts by guest ensembles have been organized by the Kulturvereins Bückeburg. The Fürstliches Institut für Musikwissenschaftliche Forschung was founded in 1917 under C.A. Rau; in 1935 it was moved to Berlin and became the Staatliches Institut für Deutsche Musikforschung, directed by Max Seiffert (*see* STAATLICHES INSTITUT FÜR MUSIKFORSCHUNG).

Bücken, Ernst (*b* Aachen, 2 May 1884; *d* Overath, nr Cologne, 28 July 1949). German musicologist. Before he decided to become a musician he studied jurisprudence in Bonn. He then took courses in musicology, Germanic studies and philosophy at the University of Munich and concurrently studied composition with Walter Courvoisier and the piano with Anna Hirzel-Langenhan and Walter Braunfels. He was indebted principally to Sandberger and Kroyer for his education in musicology; in 1912 he took the doctorate with a dissertation on the life and works of Anton Reicha. He completed the *Habilitation* at the University of Cologne in 1920 with a work on the heroic style in opera. For a short time he taught the history of music at the Technische Hochschule at Aachen. He returned to the University of Cologne, where he was named reader in 1924 and supernumerary professor in 1939. From 1937, he also taught at the Staatliche Hochschule für Musik. He became a member of the German Academy (1933), the Vereniging voor Nederlandse Muziekgeschiedenis (1936), the Staatliches Institut für Deutsche Musikforschung (1942), and an honorary member of the Società Antonio Vivaldi in Venice. After World War II the University of Cologne dismissed him from his post, citing his past exploitation of political alliances under earlier systems.

Bücken's significance and individuality as a musicologist rest on his works on musical styles and his biographical studies. In general treatises and in his treatment of various specialized areas and phases of development in music history he departed from the older, purely formal treatment of style (exemplified by Riemann and Kretzschmar) and tried to strengthen and invigorate research by basing stylistic studies on scholarship. He attempted to integrate musical aesthetics with music history and to evolve a historical concept of style; these ideas produced pioneering research. In the important Handbuch der Musikwissenschaft (ten volumes), which he published from 1927, such topics as *Die Musik des Mittelalters und der Renaissance* (by H. Besseler) and *Die Aufführungspraxis der Musik* (by R. Haas) were presented for the first time in an academic musicological context; he himself contributed four volumes. In 1931 he edited a *Handbuch der Musikerziehung*, and from 1932 he directed an important series of editions, Die Grossen Meister der Musik, within whose framework he published biographies of Beethoven (1934) and Wagner (1934, 2/1943). In his later years, Bücken dedicated much of his writing to describing and glorifying the German musical essence, devoting three separate books to the topic.

ANTON WÜRZ/PAMELA M. POTTER

Buckinx, Boudewijn (*b* Lommel, 28 March 1945). Belgian composer. He attended the Antwerp Conservatory, and from 1964 studied composition and serial music with Goethals in Ghent. He also took courses in electronic music at the IPEM in Ghent. In 1968 he attended Stockhausen's Kompositionsstudio in Darmstadt and participated in the composition of Stockhausen's *Musik für ein Haus*. However, Kagel and Cage had the greatest influence on him, and he frequently played works by Cage with his group WHAM (a working group for modern music founded in 1963). He completed his musicological studies at the Catholic University of Leuven in 1972, with a dissertation on Cage's Variations. In 1978 he became producer of new music at BRTN (the Belgian Flemish-speaking radio and television station), and he has taught music history at the Antwerp Conservatory since 1981. In 1980 he abandoned the avant-garde music of the 1960s and came closer to postmodernist trends, with quotation

and reference to existing music in the foreground. In reinterpreting tonal and classical language Buckinx adds a humorous, ironic dimension which places him in direct line of descent from Satie and Cage. His *Negen onvoltooide symfonieën* is a reference work of musical and philosophical postmodernism. He published a book on postmodernist music, *De kleine Pomo* (Antwerp, 1994).

ERIC DE VISSCHER

Buckley, John (*b* Templeglantine, Limerick, 19 Dec 1951). Irish composer. His earliest musical studies were accordion and flute lessons. After moving to Dublin in 1969, he studied composition with A.J. Potter at the Royal Irish Academy of Music. Subsequent studies were with James Wilson, also at the Royal Irish Academy, and Alun Hoddinott at Cardiff University. After receiving a composer's scholarship from the Arts Council of Ireland in 1982, he was able to devote himself to composition full-time. In 1984 he was elected to Aosdána, Ireland's state-sponsored academy of creative artists. He is the founder of the Ennis Composition Summer School which provides training for young Irish composers.

Buckley's compositions are carefully tailored to suit the demands of their performers, resulting in what can be described as a practical musical style. *Maynooth Te Deum*, written to celebrate the bicentenary of Maynooth University, exemplifies Buckley's approach. The work is scored for a professional symphony orchestra with optional organ, four professional soloists and the combined resources of a large amateur chorus, an amateur chamber chorus and an amateur chorus of male voices. The eight movements of the work fuse the various performance capabilities of the individual ensembles in a variety of musical styles. A rich harmonic palette, vibrant rhythms and the assimilation of aleatoric techniques give Buckley's music a freedom that complements the flamboyant orchestration of works such as the Symphony no.1 and the Organ Concerto. His characteristic blend of lyrical melodies and brittle sonorities can be heard in *Boireann*, *Winter Music* and the Sonata for solo guitar.

One of the most prominent Irish composers of his generation, Buckley has received commissions from Radio Telefís Èireann (*A Thin Halo of Blue*), the National Concert Hall (Organ Concerto) and the University of Limerick (*Rivers of Paradise*). His work receives regular radio broadcasts and has been internationally performed. The Unaccompanied Violin Sonata has been included as a set exam piece in the Irish curriculum.

MARTIN O'LEARY

Buckman, Rosina (*b* Blenheim, New Zealand, 16 March 1881; *d* London, 31 Dec 1948). New Zealand soprano. She studied in England, at the Birmingham and Midland School of Music, returned home because of ill-health, and made her début in Australia with the Melba Grand Opera Company in 1911. At Covent Garden she was a flowermaiden in the first English performance of *Parsifal* (2 February 1914). Later that year she played Musetta in *La bohème* with Melba and Martinelli, and throughout the war was a leading member of the Beecham Opera Company, her performances with Frank Mullings in *Tristan und Isolde* being particularly admired; she also appeared with great success as Butterfly, Mimì and Aida. At Covent Garden in 1919 she created the title role of Isidore de Lara's *Naïl*; in 1923 she sang in the only performances there of Ethel Smyth's *The Boatswain's Mate*. Her last Covent Garden appearance was in a benefit concert for Emma Albani in 1925. She married the tenor Maurice d'Oisly, and with him undertook a world concert tour in 1922–3. Her clear, generous voice is heard on many records that enjoyed considerable popularity, notably a complete English-language *Madama Butterfly* under Goossens.

Buckwheat notation [shape-note notation, character notation]. A type of notation used for SHAPE-NOTE HYMNODY.

Bucur-Barbu, Sebastian (*b* Talea, Prahova, 6 Feb 1930). Romanian musicologist and conductor. After a period as a psalm singer and conductor at various Bucharest monasteries, he studied at the Bucharest Music Academy (1957–63) and taught in schools and colleges in the city

and in the Neamţ monastery; his posts included teaching Byzantine palaeography at the Bucharest Music Academy (1972–4, 1990–). In 1982 he received the doctorate from Cluj Music Academy, and between 1983 and 1985 continued his studies of Byzantine music with Dimitrios Sourlatzis at the Macedonian Conservatory at Thessaloniki. Bucur-Barbu has published modern transcriptions of 18th- and 19th- century neo-Byzantine notation, and numerous studies of the psalmist schools in Romania and Romanian music manuscripts at Mount Athos and on the island of Lésvos; this has led to discoveries of works by many unknown composers from the 17th–18th century and an edition (1981–2) of psalm settings by Filothei, *Psaltichie rumănească*. He has also composed religious works, and Psalmodia, his ensemble formed in 1989, has made many recordings of Byzantine and Romanian psalm music.

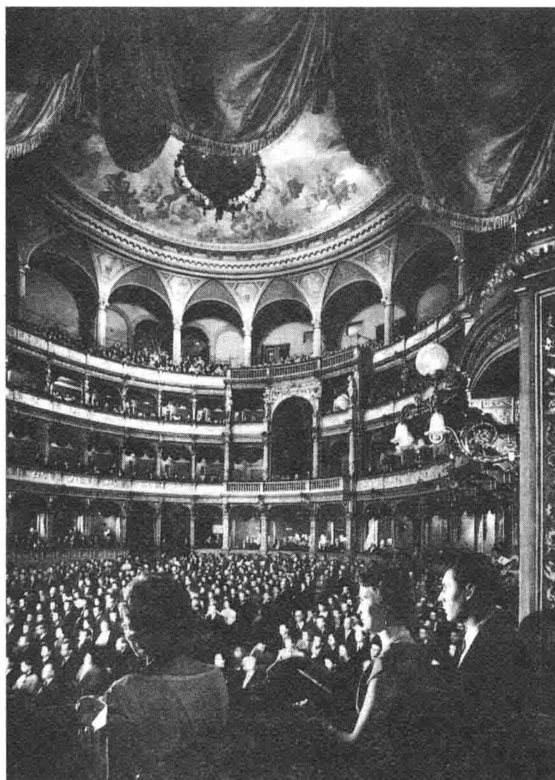
Budapest. Capital city of Hungary. It was created in 1873 by the unification of three towns: Buda, on the right bank of the Danube, which with its great castle served as the royal seat of the kingdom from the 13th century; Óbuda, north of Buda on the right bank, which as Aquincum was the capital of the province of Pannonia, part of the Roman Empire from CE 100 to 400; and Pest, opposite Buda on the left bank.

1. Early history. 2. Opera. 3. Concert life. 4. Education. 5. Institutes, libraries, associations and publishing.

1. EARLY HISTORY. The courts of King Louis the Great (1342–82) and King Sigismund (1387–1437) set a high standard of excellence, but Buda reached its first golden age of music under King Matthias Hunyadi [Corvinus] (1458–90). At the court of the great Renaissance ruler and his Italian wife, the Neapolitan Princess Beatrice of Aragon, excellent choirs performed with singers from Italy and the Netherlands, under the direction of Johannes de Stokem and Erasmus Lapicida; the court was visited by notable composers such as Verjus, Jacques Barbireau and Heinrich Finck. The viol and lute were greatly favoured, the most eminent lutenist in Buda being Pietro Bono, while fine organs of the royal palaces of Buda and Visegrád were played by Stefano da Salerno. Children's choirs also sang in the royal chapel, already under Hungarian direction long before the reign of King Matthias. Several performers of heroic songs, as well as the conductor of the royal orchestra, Miklós, and later the royal choirmaster, M. Huszti, were likewise of Hungarian origin. Printing developed in the workshop of A. Hess (*Chronica hungarorum*, 1473), but this ended after the death of King Matthias, and more and more publishers (e.g. Fegler and Pap) had the *Missale strigoniense* (the liturgy of Esztergom) printed by the south German presses or by the Venetian Giunta. Musical standards, however, did not decline significantly under the Polish Jagellon dynasty (1490–1526): Duke Sigismund Jagellon (later King of Poland) brought the virginals to Buda in 1502, and was entertained twice a day by singers from Buda schools. Around 1517 Willaert worked at court, while from 1522 to 1526 the director of the orchestra was Thomas Stoltzer. In the same period excellent organs were made at the nearby monastery of Budaszentlőrinc by the Pauline Friar János. Even after the Battle of Mohács (1526) there was still some musical life in Buda, at the court of King János Szapolyai (1526–40), but by then only native Hungarians were to be heard; the most outstanding was the lutenist Valentin Bakfark, who became famous throughout Europe. Musical culture ceased in Buda under Turkish rule (1541–1686). The three towns were devastated in the struggles leading to the recapture of Buda, and under Habsburg rule a German population eventually settled there. As a result musical life, which began to revive, was of a German character for a century and a half, and only slowly became Hungarian from the end of the 18th century onwards.



2. OPERA. Performances of opera took place regularly in Pest and Buda from 1786. At first all the companies were German; they performed in the theatre in the Buda castle, rebuilt in 1787 from the Carmelite Church, and in a theatre built in 1773 inside one of the bastions of Pest's city wall. Besides Wenzel Müller's Singspiele, operas by Dittersdorf, Haydn, Benda, Paisiello, Salieri, Sarti and, above all, Mozart formed the backbone of the programmes until about 1800. The Városi Színház (Town Theatre) in Pest opened in 1812 with two of Beethoven's overtures, *König Stephan* and *Die Ruinen von Athen*, and there the companies and their conductors (A. Czibulka, Frigyes Urbany and L. Schindelmeisser) excelled in performances of contemporary operas, chiefly those of Auber, Bellini, Donizetti and Meyerbeer. However, after the theatre burnt down in 1847 regular seasons of German opera in Pest took place only occasionally, such as those under the direction of C.E. Barbieri (1862–7); there were also great performances by companies such as the Viennese Komische Oper, and by Angelo Newmann's company touring the *Ring* in 1883.

Performances of Hungarian opera began with the acting company of László Kelemen (1790–96), who in 1793 gave a performance of the first Hungarian Singspiel, *Pikkó Hertzeg és Jutka Perzsi*, by József Chudy, the company's conductor. The company worked in difficult circumstances, often on the verge of financial disaster; despite the enthusiastic participation of the two important *verbunkos* composers Lavotta and (briefly) Csermák, as

1. Nemzeti Színház (National Theatre), Budapest, opened 1837: lithograph by F.X. Sandmann after Rudolf Alt, 1845

well as the Singspiel composer András Szerelemhegyi (1762–1826), the company did not survive. A second Hungarian company (1807–15), whose conductor Gáspár Pacha wrote Hungarian operas, was eclipsed by the success of the German company after it moved into the Town Theatre in 1812. For two decades it was relegated to giving performances in the provinces and not until 1833 did Hungarian opera return to the capital, when part of the Kassa (now Košice, Slovakia) company moved

2. Interior of the Magyar Királyi Operaház (Royal Hungarian Opera House), opened 1884

to Buda. In 1835 the best members of the Kolozsvár (now Cluj-Napoca, Romania) company were incorporated, Ferenc Erkel became conductor, and regular performances of Hungarian opera were resumed. The combined company found a home at the Hungarian Theatre, soon the Nemzeti Színház (National Theatre), when it opened in 1837 (fig.1), and moved into the new Magyar Királyi Operaház (Royal Hungarian Opera House) in 1884 (fig.2).

At the National Theatre (cap. 1460) the leading conductors of the company were Erkel (from 1838 until his retirement in 1874), Hans Richter, both during and after Erkel's term of office (1871–5), and Sándor Erkel (conductor 1874–1900; also director 1876–86). Apart from *Fidelio*, *Don Giovanni* and Hungarian operas, under Ferenc Erkel the company had a repertory of contemporary Italian and French works, the best of which usually appeared in Budapest about a year after their premières. The Royal Hungarian Opera House (cap. 1310) was designed by Miklós Ybl and opened in 1884; its company also performed in other theatres, including the Buda castle theatre until 1908 and the Town Theatre (cap. 2450) from 1921 to 1924. After World War I it was renamed Magyar Királyi Állami Operaház (Hungarian Royal State Opera House), and after World War II simply Állami Operaház. The Town Theatre was united with the Opera House in 1951 and renamed the Erkel Theatre.

Outstanding among the 19th-century opera conductors were Sándor Erkel, Mahler (1888–91), under whom the company achieved an international reputation, and Nikisch (1893–5), followed in the 20th century by Rezső Máder (1895–1907), István Kerner (1896–1915), Dezső Márkus (1903–11), Egisto Tango (1913–19), Nándor Rékai (1912–27), Antal Fleischer (1920–39) and Sergio Failoni (1928–48). A wide repertory has always been the company's aim, and the operas of Mozart, Verdi and Musorgsky, together with *Fidelio*, *Il barbiere di Siviglia*, *Carmen* and *Faust*, were always in its repertory. For some decades after 1890 Wagner's works were dominant; later music was limited to such composers as Mascagni, Leoncavallo, Puccini and Richard Strauss. In the 1920s

and 1930s Stravinsky's *Petrushka* (1926) and Falla's *El sombrero de tres picos* (1928) found an immediate and permanent place in the repertory. Bartók's *Bluebeard's Castle* had its première there in 1918, and around 1930 other modern works were also performed, such as Debussy's *Pelléas et Mélisande* (1925), Stravinsky's *Oedipus rex* (1928), Hindemith's *Hin und zurück* (1929), Wolf-Ferrari's *Sly* (1931), Milhaud's *Trois opéra-minutes* (1932) and Respighi's *La fiamma* (1935). The works of early 20th-century Hungarian opera composers (Hubay, Poldini and Dohnányi) ceased to be performed in the 1940s, but Bartók, Kodály and Ferenc Erkel (the only 19th-century Hungarian opera composer whose works have remained in favour) continue to be performed.

After World War II the first three principal conductors at the Opera House were Fricsay (1945–7), Klemperer (1947–50) and János Ferencsik (1953–83). Subsequent conductors have included Miklós Lukács, András Kórodi, Adám Medveczky, Miklós Erdélyi and Ervin Lukács. The Hungarian repertory has been supplemented by productions of numerous foreign operas, among them many 20th-century works. These have included Berg's *Wozzeck* (1964) and *Lulu* (1973), Britten's *Peter Grimes* (1947), *Albert Herring* (1960) and *A Midsummer Night's Dream* (1972), Shostakovich's *Katerina Izmaylova* (1965), Henze's *Undine* (1969), Stravinsky's *The Rake's Progress* (1978) and Prokofiev's *Betrothal in a Monastery* (1983). New Hungarian operas include works by Emil Petrovics (*C'est la guerre*, 1962; *Bűn és bűnhődés* ('Crime and Punishment'), 1969), Sándor Szokolay (*Vérnász* ('Blood Wedding'), 1964; *Hamlet*, 1968; *Samson*, 1974, *Ecce homo*, 1987), Zsolt Durkó (*Moses*, 1977), Sándor Balassa (*Az ajtón kívül* ('The Man Outside'), 1978) and Attila Bozay (*Csongor és Tünde*, 1985).

The State Opera House underwent major refurbishments in 1980–84, in which the capacity was reduced to 1261 seats. During this time the company performed in the Erkel Theatre.

3. CONCERT LIFE. Tomasini, Haydn's Konzertmeister at Eszterháza, is the first outstanding musician known to have given concerts in the capital (1789). In 1793 J. Hoffmansegg noted the high standard of domestic concerts given in the homes of such music lovers as Podmaniczky, a pupil of C.P.E. Bach. At about that time the capital heard its first oratorio performances and, with the début of Lavotta, its first Hungarian concert; however, the importance of these events was surpassed by the performance at the royal palace in Buda of *The Creation*, under Haydn's direction, and a concert given by Beethoven in the castle theatre (both 1800).

There were occasional large-scale concerts after this, particularly during the existence of the earliest music society, the Pesti Musikai Intézet (Pest Music Institute, 1818–22). In addition to local artists, Moscheles (1818) and the young Liszt (1823) were resoundingly successful. Regular seasons of concerts began in 1834 and attracted Ferenc Erkel to the capital, where he became the most influential musician for nearly four decades. From 1834 to 1846 the Nemzeti Casino (National Casino), founded by István Széchenyi, was the setting for a series of excellent chamber concerts. The city also had two first-rate string quartets, while large orchestral concerts were held between 1836 and 1851, after the creation of the Pestbudai Hangászegyesület (Pestbuda Society of Musicians) from one of the earlier societies. The beginning of the regular steamship service between Vienna and Pest was partly responsible for an increasing number of famous foreign artists arriving to give concerts, among them S. Heinefetter (1836), Vieuxtemps (1837, 1843), Lacombe (1838), Ole Bull (1839), Rubinstein (1842), Briccialdi, Molique, Alboni, Ernst, Thalberg, David (1845), Berlioz (1846) and Leschetizky (1847). During this period a number of young Hungarians gave concerts which showed their remarkable gifts, such as Heller (1827, 1833), Gusztáv Fáy (1834, 1837–41), Imre Székely (1836, 1838, 1840, 1845–6), Joachim (1839, 1846), Károly Filtsch (1841) and Reményi (1847); however, none of these could compare with the success of Liszt's concerts (1839, 1840 and 1846).

The Philharmonic Concerts, given by members of the National Theatre orchestra under Ferenc Erkel, began in 1853; they have continued to contribute to the musical life of the capital. The Filharmóniai Társaság (Philharmonic Society), however, was not legally established until 1867 because of political oppression. The orchestra's conductor until 1871 was Ferenc Erkel, and from then until 1875 Hans Richter; he was followed by Sándor Erkel (1875–1900), István Kerner (1900–18) and Dohnányi (1919–44). Between the wars the orchestra made frequent concert tours abroad: to Czechoslovakia (1925), Germany (1927–9, 1937), Paris and London (1928, 1930), Belgium (1928), Switzerland (1928, 1931), Italy (1928, 1936) and Austria (1929, 1931 and 1936). Musical

directors since World War II have included Klemperer, János Ferencsik, and András Kórody and Rico Saccani.

In the second half of the 19th century a prominent role was played by the two choral and orchestral societies, the Budai Zeneakadémia (Buda Music Academy, 1867–1914) and the Pesti Zenekedvelők Egylete (Music Lovers' Society of Pest, 1867–1906). Also of importance was the Országos Magyar Daláregyesület (National Hungarian Choral Association), an amalgamation of all the male-voice choirs, later known as Országos Magyar Dalosszövetség (Hungarian Singers' Association, 1867–1948), whose conductor from 1868 until 1881 was Ferenc Erkel. From 1869 Liszt, both through his compositions and his performances as pianist and conductor, was the leading figure in concert life, which flourished again during the period of the dual monarchy. It was partly due to Liszt's influence that from that time virtually all the leading performing artists of Europe gave concerts in Budapest, surrounded by a lively musical life supported by the large number of excellent ensembles and outstanding performers working there.

Among orchestras the Állami Hangversenyzenekar (State SO) is better known than the Philharmonic outside the country, making many concert tours abroad. It was formed from the Fővárosi Zenekar (Municipal Orchestra), founded in 1923, and gained its present name and structure in 1952, when Ferencsik became its chief musical director. He was succeeded in 1987 by Ken-Ichiro Kobayashi. In 1997 the orchestra, under its new musical director, Zoltán Kocsis, was renamed the Hungarian National PO. Another important symphony orchestra is the Magyar Rádió és Televízió Szimfonikus Zenekara (Hungarian Radio and Television SO), founded by Ernő Dohnányi as a radio orchestra in 1943. In 1992 Tamás Vásáry was appointed its chief conductor. The Budapest Concert Orchestra MÅV was founded in 1945 by the Hungarian State Railways, and accompanied the touring section of the opera from 1947 to 1953. Tamás Gál became the orchestra's principal conductor in 1988.

Iván Fischer and Zoltán Kocsis founded the Budapest Festival Orchestra in 1983. Under Fischer the orchestra has toured widely and appeared at many international festivals. Other professional symphony orchestras in Budapest include the Danube SO and the Symphony Orchestra of MATÁV (Hungarian Telecommunications). The Liszt Ferenc Kamarazenekar (Franz Liszt Chamber Orchestra), under its musical director János Rolla, has been one of the most popular orchestras in Hungary since its foundation in 1963. Violinist Miklós Szenthelyi founded the Magyar Virtuózok Kamarazenekar (Chamber Orchestra of Hungarian Virtuosos) in 1988, and has been the orchestra's musical director since 1989. Another important chamber orchestra is the Budapest Strings. The Budapest Symphonic Band was founded in 1992 to perform wind music, mostly by Hungarian composers.

The Danubia Youth SO, etablished in 1993, is the youngest independent symphony orchestra in Hungary. Most of the members are leading students at the Bartók Conservatory and the Liszt Academy. Another youth orchestra, the Dohnányi Orchestra of Budafok, was founded by László Nemes in 1970; in 1993 it became Hungary's newest professional symphony orchestra. There are also excellent orchestras in Budapest's three state conservatories (the Bartók Conservatory, the St Stephan Conservatory and the Leó Weiner Conservatory), and at the Liszt Academy of Music.

The Budapesti Kórus was founded in 1941 by Lajos Bárdos, mainly for the performance of oratorios and cantatas; it was formed by the union of the Palestrina Kórus (1916) and the Cecilia Kórus (1921), joined in 1948 by the Budapesti Ének- és Zenekar Egyesület (Choral and Orchestral Society of Budapest, 1918). Another large mixed choir is the Magyar Rádió és Televízió Énekkara, established in 1950. The Children's Choir of the Hungarian Radio and Television was founded in 1954. The Hungarian State Chorus, etablished in 1985, became the Hungarian National Philharmonic Choir in 1997, working in association with the Hungarian National PO. Other important choirs in Budapest include the Béla Bartók Choir of the Eötvös University, the Budapest Academy Choral Society, the Budapest Tomkins Vocal Ensemble, the Monteverdi Chamber Choir, the Musica Nostra Choir and the Òbuda Chamber Choir.

The Honvéd Esemble, the successor to the Hungarian Army Art Ensemble (founded in 1948), consists of a male-voice choir, orchestra, dance team and theatrical company. The Magyar Állami Népi Együttes (Hungarian State Folk Ensemble) was formed in 1951 to foster Hungarian choral music, folk music and folkdance. The ensemble has performed throughout the world. In 1984 the Hegedős Ensemble was founded by professional folk musicians to perform authentic Hungarian folk music.

The earliest known chamber music ensemble in Pest is the Urbany String Quartet, formed in 1813. Later, numerous notable string quartets played in the capital; among these the Hubay–Popper Quartet (1891–1909) and the Waldbauer–Kerpely Quartet (1910–46) were outstanding. The Lener Quartet, formed in Budapest in 1919, performed and lived mostly outside Hungary. Among more recent quartets the Bartók (1957) and the Keller (1987) are particularly renowned. There are also several chamber ensembles in Budapest specializing in contemporary music, notably the Intermodulation Chamber Ensemble, Componensemble, the Electro-acoustic Research Group (EAR) and Kortárs Zene Mûhely (Contemporary Music Studio).

The Országos Filharmónica (State Philharmonia), the state institution for organizing concerts throughout the country, began in 1949 but did not acquire its name until 1952. In 1990 the institution became the National Philharmonia, and in 1997 it was divided into three regional concert organizations, one for the capital city. The agency Interconcert deals with foreign artists and arranges concerts abroad for Hungarian singers and instrumentalists. Since 1990 several other, mainly private, concert organizations have been set up in and around Budapest.

The most important annual festivals in the city are the Budapest Spring Festival and the Budapest Autumn Festival. A series of contemporary music concerts, Music of Our Age, runs parallel with the Autumn Festival at the beginning of October. Other contemporary music events include the mini-festival of the Hungarian Music Society (held in February) and the Review of New Music at the Merlin Theatre, held in early spring. World Music Day (1 October) is always celebrated with concerts, workshops, conferences and other events.

4. EDUCATION. In the 19th century there was a school of music in the Piarist Gymnasium, where Lenau learnt

violin (1811); there were also many private music schools, one of which Joachim attended (1837–9). The Hangászegyleti Énekiskola (Singing School of the Society of Musicians) was opened in 1840 and became an important educational institution. It was established by the Pestbudai Hangászegyesület (Pestbuda Society of Musicians). Its first director was Gábor Mátray (1840–75), and from 1867 it was known as the Nemzeti Zenede (National Conservatory); in 1949 it was taken over by the state and reorganized as a secondary school, the Bartók Béla Zeneművészeti Szakiskola (Béla Bartók Conservatory of Music), under the direction of Frigyes Sándor (1949–58), Árpád Fasang (1958–72), Ferenc Halász (1972–81) and Tibor Szabó (from 1981). Two other important conservatories in the city are the Leó Weiner Conservatory of Music and the St Stephan Conservatory of Music.

A significant number of students from these institutions continue their studies at the Országos Magyar Királyi Zeneakadémia (National Hungarian Royal Academy of Music), founded in 1875 and renamed the Liszt Ferenc Zeneművészeti Főiskola (Franz Liszt Academy of Music) in 1925; it is the only institution of music education at university level in Budapest. In 1997 its Hungarian name was changed to Liszt Ferenc Zeneakadémia. Liszt was its first president (1875–86) and Ferenc Erkel its first director (1875–87); subsequent directors have been Ödön Mihalovich (1887–1918), the Dohnányi–Bartók–Kodály council of directors (1918–19), Jenő Hubay (1919–34), Ernő Dohnányi (1934–43), Ede Zathureczky (1943–57), Ferenc Szabó (1958–70), Dénes Kovács (1970–80), József Ujfalussy (1980–88), József Soproni (1988–94), István Lantos (1994–7) and Sándor Falvai (from 1997). Students can also specialize in music at the academy's training college for instrumental teachers and at Budapest University. In 1907 the academy moved to a new building, where five-year diplomas in performance, composition, musicology, church music, orchestral conducting, music teaching and choral conducting are offered. In recent years the academy has also offered PhD courses. Its old building, housing the Liszt Memorial Museum and Research Centre, has now been carefully restored.

Musical education is provided in all the city's general schools and in a number of specialist music schools. Hungarian music teaching, which draws significantly on native folk music, is based on the world-famous methods devised by Kodály and his many outstanding students and colleagues in the 1930s: Jenő Ádám, László Agócsy, Lajos Bárdos, György Kerényi, Benjamin Rajeczky and others. Almost all schools have their own choirs, and each year children's choral concerts are held as part of the Singing Youth movement started by Bárdos.

5. INSTITUTES, LIBRARIES, ASSOCIATIONS AND PUBLISHING. The Magyar Tudományos Akadémia Zenetudományi Intézete (Insitute of Musicology of the Hungarian Academy of Sciences) was formed by the union of the Népzenekutató Csoport (Folk Music Research Group, 1952), established by Kodály, and the Bartók Archive, established by Szabolcsi in 1961. Their regular publications include the *Corpus musicae popularis hungaricae* (since 1951), an edited collection of Hungarian folksongs begun by Bartók and Kodály, *Documenta bartokiana*, *Musicologia danubiana*, *Studia musicologica*, *Cantus planus*, *Zenetudományi dolgozatok* ('Studies in musicology') and *Magyarország zenetörténete* ('The musical history of Hungary').

There are four important music libraries in Budapest: the music department of the Hungarian National Széchényi Library, the library of the Liszt Academy of Music, the music department of the Ervin Szabó Municipal Library and the library of the Institute of Musicology of the Hungarian Academy of Sciences. The richest collection of music scores connected with Hungary is in the National Széchényi Library, while manuscript material is also in the Bartók Archive of the Institute of Musicology, the library of the Béla Bartók Conservatory of Music (19th-century Hungarian music), the research centre of the Academy of Music (Liszt and his contemporaries), the Kodály Archive (Kodály), and the libraries of the Academy of Sciences and the university (early Hungarian music). Other notable institutions in the city include the Liszt Museum and research centre of the Academy of Music, the Béla Bartók Memorial House (the last Hungarian home of Bartók), the Zoltán Kodály Memorial Musuem and Archives, situated in the composer's former apartment, and the Museum of Music History at the Institute of Musicology.

The Hungarian Music Council (HMC), the Hungarian section of the International Music Council of UNESCO, was set up by 20 musical associations in 1990 with the aim of promoting the development of Hungarian musical culture. Since then its membership has steadily incresed: in 1997 it had 36 member organizations, nine associated institutional members and ten elected individual members. The HMC is the official successor of the Association of Hungarian Musicians founded by individual members in 1949. It publishes a musicological journal, *Magyar Zene* ('Hungarian music'), edited by the Hungarian Musicological Society. The Hungarian Music Information Centre was established in 1973 and immediately joined the International Association of Music Information Centres. Since 1990 it has functioned under the auspices of the HMC. Based on its library and documentation centre, it provides information on all aspects of Hungarian music. The Budapest Music Centre (BMC) offers valuable information on Hungarian performers, composers and the musical life of the city. Since 1966 the younger generation of musicians has been represented by the Hungarian section of Jeunesses Musicales.

Hungarian music publishing is carried out by several companies, including Editio Musica Budapest, Accord and FAM. The record company Hungaroton has a high international reputation, above all for its recordings of music by Liszt, Bartók, Kodály as well as other native composers.

DEZSŐ LEGÁNY

Budapest Quartet. String quartet of Hungarian origin. The original members were Emil Hauser, Imre Poganyi, Istvan Ipolyi and Harry Son, all of whom played in the orchestra at the Royal Hungarian Opera House. They gave their first concert in 1917 at Kolozsvar (now Cluj-Napoca). Their European tours during the 1920s included visits to London, first in 1925 when their performances of Bartók's First Quartet and Smetana's Quartet in E minor were admired for their fine ensemble and depth of feeling. During the quartet's subsequent history, the membership changed completely. In 1927 Joseph Roisman joined as second violin, becoming the leader within a few years, and during the early 1930s Ipolyi was replaced by Alexander Schneider, and Son by Schneider's brother, Mischa. When Boris Kroyt joined as viola in 1936, the quartet became entirely Russian and Ukrainian, but its name remained the same. The character of its playing changed dramatically when the leadership passed from Hauser to Roisman. Hauser was a violinist of the old school, sparing in his use of vibrato, liberal in his use of portamento, and unhasty in his rhythms. Roisman, by contrast, was of the new generation of string players, with a faster and more continuous vibrato, and incisive in rhythm. The quartet reflected these qualities, being known for its expressive warmth under Hauser, and for its forthright brilliance and unanimity of style under Roisman – admittedly not without occasional suggestions of businesslike efficiency.

It was under Roisman that the quartet became internationally famous on both sides of the Atlantic. After extensive tours of Europe the players settled in the USA in 1938. From that year until 1962 they were quartet-in-residence at the Library of Congress, Washington. In 1962 they moved to a similar post at the State University of New York, Buffalo. During this period they continued to undertake world tours, becoming especially renowned for their interpretations of Beethoven's quartets, which they performed in their entirety almost every year, and which they recorded three times. In the string quintet repertory they were often joined by Milton Katims and, after 1955, by Walter Trampler, with whom they recorded Mozart's string quintets. The quartet made its last public appearance in 1967, after which the group was forced by illness to disband. During its last 30 years the Budapest Quartet achieved not only a high level of critical esteem but also a remarkable popular success.

ROBERT PHILIP/R

Budd, Harold (*b* Los Angeles, 24 May 1936). American composer. He grew up in Victorville in the Mojave desert, and was affected by the silence, the sounds of the wind, and country music heard on radio programmes broadcast from Mexico. During a short period in the army he played the drums in duet with the free-jazz saxophonist, Albert Ayler. Budd's earliest works, such as *Coeur d'or, the Oak of the Golden Dreams* and *The Candy-Apple Revision*, were examples of extreme minimalism that displayed elements of the styles of Terry Riley and La Monte Young; like them, his work was influenced by jazz, in particular the later ballads of John Coltrane and the lush romanticism of Alice Coltrane and Pharoah Sanders. From 1972 his composing broke avant-garde taboos with a conscious pursuit of beauty and direct simplicity, using the rich, soft timbres of celeste, harp, electric piano and tuned percussion in combinations with ethereal female voices or the jazz alto saxophone of Marion Brown.

Brian Eno's release of *The Pavilion of Dreams* (Obscure, 1978) introduced Budd's work to an international rock audience. From this point, he performed his own compositions in the recording studio, rather than notating them for concert performances. A collaboration with Eno, *The Pearl*, was heavily processed with electronic reverberation. Admiration for Budd's music from the rock world is reflected by later collaborations with the Cocteau Twins, Hector Zazou, and Andy Partridge of XTC. An interest in poetry and the spoken word also surfaced in musical settings of his own texts and the writings of American beat poets. (Recorded interviews in *US-NHoh*)

WORKS
(selective list)

Notated: The Candy-Apple Revision, any inst(s), 1970; Madrigals of the Rose Angel, female vv, hp, cel, elec pf, perc, 1972; Butterfly Sunday, Mez, hp, 1973; Le Us Go into the House of the Lord, Mez, hp, glock, vib, perc, 1974; Song of Paradise: 17 Illuminations on the Holy Koran, B-Bar, hp, glock, vib, perc, 1974; Bismillahi 'Rrahmani 'Rrahim, a sax, elec pf, cel, vib, mar, perc, 1974–5; Juno, perc ens, 1975; Basheva Songs (D.G. Rossetti and P. Bethsebe), 1978

Studio: Coeur d'or, the Oak of the Golden Dreams (Advance, 1972); The Pavilion of Dreams (Obscure, 1978); The Pateaux of Mirror (Editions, 1980), collab. B. Eno; The Serpent (in Quicksilver) (Cantil, 1981); Abandoned Cities (Cantil, 1984); Lovely Thunder (Editions, 1986); The White Arcades (Land, 1988); By the Dawn's Early Light (Opal, 1991); Music for 3 Pianos (All Saints, 1992), collab. R. Garcia and D. Lentz; Walk into my Voice (Materiali Sonori, 1996), collab. Lentz and J. Karraker

DAVID TOOP

Budden, Julian (Medforth) (*b* Hoylake, 9 April 1924). English musicologist and radio producer. He studied

classics at Queen's College, Oxford (BA 1948, MA 1951), and took the BMus at the RCM (1955), where his professors included Archie Camden, Patrick Hadley and C.T. Lofthouse. In 1951 he joined the BBC, subsequently becoming music producer (1956), chief producer of opera (1970–76) and external services music organizer (1976–83). He is a member of the editorial committee of the Verdi collected edition; he became Fellow of the British Academy in 1987 and was appointed OBE in 1991. His principal field of research is 19th-century Italian opera, particularly Verdi and his contemporaries, and Puccini. In his monumental *The Operas of Verdi* (1973–81) each work is taken in turn, first examining the framework of social conventions and historical background, then tracing the history of its composition and first performance and finally presenting a detailed critique of the music.

ROSEMARY WILLIAMSON

Buddhist music. Musical traditions associated with Buddhist culture and practices found in South, South-east and East Asian countries, and in other communities worldwide.

1. BACKGROUND. The International Buddhist Directory (1985) estimates that there are about six hundred million Buddhists around the world. The biggest communities are found in Asia (Sri Lanka, Myanmar (Burma), Thailand, Laos, Cambodia, China, Japan, Mongolia, Bhutan, Nepal, Singapore, Indonesia, the Central Asian Republics, India and Bangladesh). In Europe and North America there are communities of Buddhist Asian emigrants as well as Western practitioners of Buddhism.

A rich body of liturgical music forms the backbone of daily religious practice in Buddhist temples. Buddhist liturgy is eminently vocal, often accompanied by ritual percussion and sometimes by melodic instruments. Instrumental music, played both on wind and string instruments, is part of calendrical ceremonies (such as those for the dead) and non-calendrical ones. It often has a paraliturgical function, marking transitional points and introducing or concluding ritual events.

Buddhist music presents both regional and sectarian characteristics, and the repertories have developed in constant interaction with local musical traditions and performing practices. However, there are also significant parallels in the practices of Buddhist communities very distant in time and space from one another. The constant retrospection to the figure and teachings of the Buddha by the *saṅgha*, the community of monks and nuns, or in the broadest sense of all practitioners committed to the Buddhist faith, partially accounts for this phenomenon.

From the end of the 19th century (the first World's Parliament of Religions was held in 1893), Buddhism has gradually established itself as a 'world religion'. Its progressive cosmopolitanisation and exposure to different musical idioms has led to the emergence of 'new' Buddhist sounds. The increasing availability of recording technologies and mass media have also had an impact upon Buddhist communities in Asia and worldwide.

2. HISTORICAL CONTEXTS AND SOURCES. Scholars feel increasingly uncomfortable with unqualified statements regarding the historical facts of Buddha's life and teachings. The traditional dates of Buddha's life (563–483 BCE) have recently been questioned by many who see his activities taking place as much as a century later. However, Buddhist communities were flourishing in India during the Mauryan dynasty (324–187 BCE). By the end of the reign of the emperor Asoka, Buddhist institutions were established throughout the Indian subcontinent. Buddhist missionaries reached China, mainly from the north-west, sometime during the first century of the common era. In the late 4th century, contacts with China brought Buddhist teachings to the Korean peninsula and from there to Japan. Around the 7th century, Buddhist-influenced cultures extended from Java to Nepal and from Afghanistan to Japan.

For centuries, India was at the centre of the development and diffusion of Buddhist doctrine and religious practice. However, by the 13th century, Buddhist institutions had almost disappeared in India and Central Asia, only to be partially revived during the 20th century. After the decline of Buddhism in India, South-east Asian societies looked to Sri Lanka for doctrinal inspiration and guidance. As its notions of rulership appealed to the monarchs of Cambodia, Thailand, Burma (now Myanmar) and Laos, Buddhism was adopted as the official ideology. Until very recent times, in China as well as in Japan, Buddhism was alternatively embraced or rejected, and underwent periods of fortune as well as fierce persecution.

The teachings of the Buddha were initially preserved orally by his followers and then committed to writing from the last decades of the common era by the Sinhala buddhists. Geographical diffusion brought about ritual

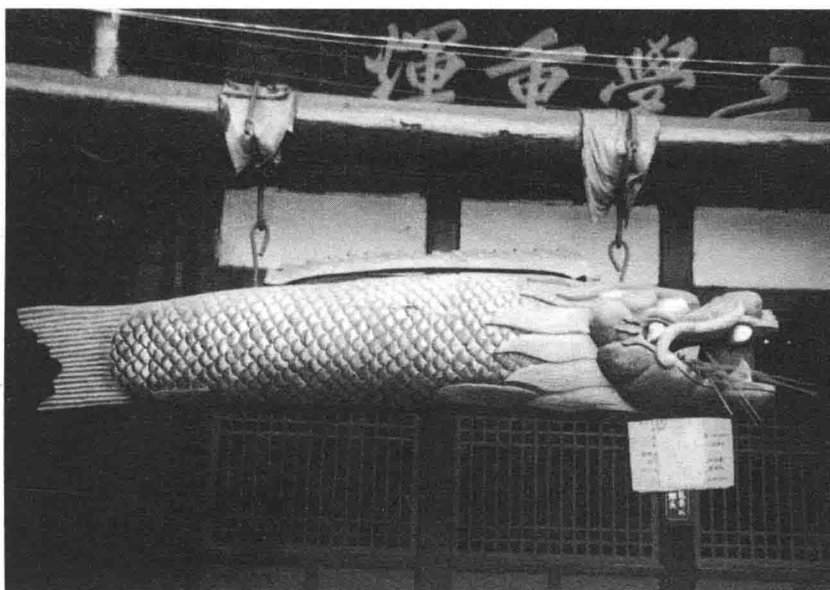
and doctrinal differentiation, and the adoption of a number of canonical languages and scripts. Pāli was and still is the canonical and ritual language of Sri Lanka and South-east Asia. Sanskrit texts spread in East and Central Asia. The ritual use of Sanskrit survives today among the Newar of Nepal. Sanskrit texts were also translated into Chinese, which became the canonical language of Korea, Japan, Vietnam and, of course, China. Finally, part of the Sanskrit canon was translated into Tibetan, which still stands as the Buddhist language of the Himalayan areas, Mongolia and Siberia. Although translation was an ever-present cultural practice, many new texts were produced at different stages and incorporated into the canons. In most Buddhist-influenced cultures, texts and rituals also developed in languages other than the canonical ones.

Although Buddhist bibliographical habits limited the number of texts specifically devoted to music to be collected in the canons, such texts exist and can be counted among the sources for the study of liturgical and para-liturgical traditions. Textual sources include ritual and liturgical manuals, encyclopedias, the accounts of Buddhist pilgrims, first-hand descriptions by local observers or foreign travellers, and iconographic and epigraphic materials.

Buddhist ideas and practices are not accounted for in the writings of musical theorists belonging to Hindu religious and cultural traditions. However, attempts at reconstructing early Buddhist vocal and melodic theories have led scholars to conclude that they were relatively similar to those found in the later treatises of the so-called Indian musical theory (Ellingson, 1979). Regarding instrumental music, one major difference between the two is a classification system found in Pāli and Tibetan Buddhist sources. Musical instruments are divided into five classes (*pañcā-tūrya-nāda*), instead of the usual four based upon the manner of construction ('solid', 'covered', 'hollow' and 'stretched'). From a theoretical point of view, it seems that Indian Buddhists' conception of sound differs from that of most traditional schools, including Vedāntic and Sāṅkhya philosophers. Whereas the latter consider sound to be a 'manifestation' (of vital breath and inner consciousness, for example) and not subject to causation, Buddhist philosophers hold that sound is subject to 'creation and destruction', with inevitable musical and aesthetic consequences.

Buddhist musical notation systems, both instrumental and vocal, are known primarily through Japanese and Tibetan sources (*see* JAPAN, §IV, 3; TIBETAN MUSIC, §II, 4), although they seem to have existed in other parts of Asia, including India (Ellingson, 1985). Two examples of Buddhist notations are the *dbyangs yig* and *meyasu-hakase* contour notations found in the Tibetan and Japanese traditions, respectively.

Modern studies of Buddhist musical traditions, their history and contemporary practice, are still fairly limited in number and scope. Some exceptions are the Japanese *shōmyō* ritual chants, carefully documented by Japanese and non-Japanese scholars, and some Tibetan and Chinese musical practices. A possible explanation for this neglect lies in the fact that, since the beginning of its academic study in late 19th century Europe, scholars conceived of Buddhism as essentially anti-musical and anti-ritual. In Asian societies, élite Buddhists' self-representations, in response to modernist ideas, tended to emphasize the individualistic and rationalist aspects of their religion over ritual and community-based practices. These misrepresentations reached well beyond the theoretical, and had an impact upon policy makers as well as upon the believers themselves, who were often persecuted and whose practices were deemed 'superstitious'.



3. LITURGICAL PRACTICES.

(i) Choral chanting. For many centuries Buddhist teachings have been preserved and transmitted through collective musical vocalizations. Although texts are used in contemporary practice, the memorization and execution of chants has retained this basic function. Ellingson (1979), for example, witnessed Buddhist monks correcting errors in print on the basis of memorized chants.

Choral chanting is fundamental to the Buddhist liturgical tradition. According to Ellingson (1986), the practice began *c*500 BCE in Indian communities and then spread throughout Asia. A text of the Pāli Canon, the *Cullavagga*, reports that after the death of the Buddha, a senior monk invited others to 'sing together the *Dhamma* (Buddhist teaching) and the *Vinaya* (monastic discipline)'. Other texts in the Pāli Canon refer to the institution of musical and ritual practices during Buddha's times. Sources relate that choral 'intoned recitation' (*sarabhañña*) was used by monks at regular calendrical occasions or as a 'protective spell' during ad hoc ceremonies.

Choral chanting is at the basis of contemporary monastic liturgical practice. At the beginning of the 20th century, special choral performances in Tibetan monasteries could involve up to 50,000 performers. In Thai Buddhist monasteries, chanting ceremonies are held twice a day by the assembly. The chants are intoned by the cantor who sings an introductory formula, followed by the chorus of the monastic assembly. The monks perform in unison, with the exception of young monks who sing at the upper octave, fifth or fourth. The texts chanted are taken from the Pāli canon and the melodic phrases begin and end together with the text phrases. In these types of chant, rhythm and melody seem to depend on the syllabic patterns of the texts. Another type of chant features in the *Paritta* protective rituals, where the performers take overlapping breaths in order not break the sonic flow (Ellingson, 1979). This particular performing practice has also been adopted in Sri Lanka and China.

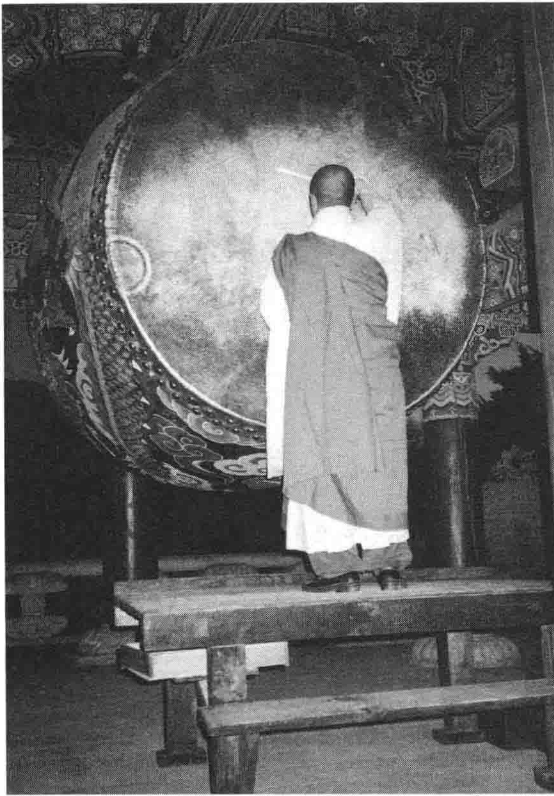
In Japan the liturgical musical repertory was codified and written down at a rather early stage, and chant schools were established in the 8th and 9th centuries. Today, different styles and performing practices exist in the *shōmyō* of the Tendai and Shingon schools. Japanese Buddhist liturgical chant is traditionally divided according to the characteristics of the text chanted. There are three distinct categories. *Bonsan* are hymns in which Chinese characters stand for transliterated Sanskrit sounds, *Kansan* are hymns with a Chinese text and *Wasan* are hymns written in Japanese. The latter are usually described as the most melodious in style. The hymns are further classified according to their place and function in the liturgy. A number of temples in Japan maintain a significant chant tradition. *Shōmyō* chants are sung at the Enryaku-ji at Mount Hiei (almost daily services), Chishaku-in in Kyōtō (frequent services) and other temples. *Shōmyō* can be made of a combination of up to 50 codified melodic formulas. The performances range from the syllabic invocation of the Buddha Amida (*nembutsu*) to the very complex and melismatic settings of the pieces transmitted esoterically within the priesthood. Recently,

1. Woodblock in the shape of a fish hanging outside the refectory at Wenshu Temple, Chengdu, Situan province, China, September 1998

the more esoteric pieces were left out from published recordings (Hill, 1982). Both Japanese *shōmyō* and *chissori* (the more elaborated chant style in the Korean Buddhist tradition) have a system of pitch scales based upon Chinese modes, whereas Tibetan *dbyangs* base the melodies upon patterns of tonal contour.

In China, the daily liturgy consists of morning, afternoon and evening prayers and meal offerings. The repertory of ordinary liturgy is fairly restricted. It is largely based on the classic collection *Zhujing risong* ('Various Sūtras for the Daily Recitations') produced by the monk Zhuhong (1535–1615). All Chinese sects share similar liturgical manuals. In addition to the texts of the Morning Lesson (*zaoke*) and Evening Lesson (*wanke*), the manuals contain texts for the purification of the altars and other calendrical ceremonies, such as Buddha's birthday. In China, the principal types of vocal delivery include reading (*du*), reciting (*song*), chanting (*yin*) and singing (*chang*).

An important hymn of the Chinese tradition is the *Baoding zan*, also known as *Xiang zan* ('Hymn to the Precious Incense-Burner' or 'Hymn to Incense'). Offering incense is a very important act of worship in Buddhist contexts. The Chinese expression 'burning incense' (*shao xiang*), for example, refers to everyday worship at a temple. Apart from its importance as a religious offering, the presence of hymns in praise of incense bears witness to its symbolic and sensorial relation to music within the ritual.



The vocal quality of Buddhist liturgical music is often natural, although restricted production is also a Buddhist characteristic. In Cambodia the voice is distinctively nasal, whereas Vietnamese monks employ falsetto in the chant type *tan*. Several types of voice are used in Tibetan ritual music. The One Voice classification system (Ellingson, 1979) is based on the *'byung gnas* ('place of origin') in the body. *Khog pa'i skad* ('body cavity voice'), for example, requires the singer to concentrate on the diaphragm, chest and abdominal muscles in order to produce a deep and resonant sound typical of most Tibetan ritual chanting. According to this system there are also 'throat', 'mouth' and 'nose' type voices.

(ii) Instruments. The use of ritual percussion is characteristic of many monastic liturgical traditions; the use of other instruments is less frequent. Notable exceptions are found in some liturgies in countries and regions like Japan, Vietnam, Tibet, Hong Kong and Taiwan. In Vietnam a lute sounded by bowing with or without a coconut sound box is occasionally played by monks. In most Buddhist traditions, monastic chant assemblies are convoked by signals played on bells, gongs, drums and other idiophones. One text datable to the first century CE already described the qualities of a wooden idiophone. The use of drums, bells and conches is also attested by early textual sources.

In modern Korean monasteries, the monks are called to prayer when the verger beats rhythmically on a woodblock (*mokt'ak*). The verger then chants the incantation from the *Thousand Hands Sūtra*, and a series of blows on the gongs, bells, drums and wooden fish from the Bell and Drum Towers signals the beginning of the day (fig.1). When the large temple bell strikes 28 times, the monks gather in the main hall of the temple for the morning service (Buswell, 1992). In Haein-sa, Kyongsang-do province, Korea, a huge drum may be used to call the monks to evening lessons (fig.2).

An ensemble of ritual percussion (*faqi*: lit. 'Dharma instruments') is used in Chinese liturgical practice. A ritual ensemble consists usually of drum (*gu*), small brass bowl suspended on a stick (*yinqing*), woodblock (*muyu*, lit. 'wooden fish'), bell (*chanzhong*), large brass bowl (*qing*), cymbals (*chazi*) and suspended gong (*dangzi*). In most Chinese liturgical manuals, on the right side of the texts, there are standard symbols indicating the coincidence of the strokes on the ritual instruments with the utterance of the words. However, the rhythmic framework is not explicit. In many contexts; although the woodblock establishes the beat, the congregation does not keep a steady tempo at all times.

In Myanmar, tempo is marked by a bell (*sì*) and clappers (*wà*) and in Laos by bells and a large suspended drum (*kong vat*). In the Sinhala tradition, the chanting is usually not accompanied by any instruments, with the occasional exception of a drum. In Vietnam, the chant type *tan* displays a very syncopated rhythm. The small gong and

2. *Sounding the drum for the evening lesson, Haein-sa, Kyongsang-do province, Korea, December 1999*

the wooden drum mark three rhythmic cycles which determine three different versions of the chant: the *tan roi*, *tan xap* and *tan trao*.

4. PARA-LITURGICAL AND RITUAL PRACTICES. Textual sources, mainly Tibetan and Chinese, together with other kinds of evidence, attest the existence of Buddhist dramas, including songs and dances, instrumental music and other types of ritual performances within early Buddhist communities in India. With the assimilation of Buddhist teachings into other cultures and the creation of Buddhist institutions there were many developments. However, in most Buddhist contexts, ritual, music and performance have always been fundamental aspects of the life of monasteries and communities at large.

From the 7th to the 9th centuries, Indian Buddhists introduced ritual and musical practices to Tibet and the interaction produced a very elaborate system of ritual music. Generally, there are many variations among the various Buddhist traditions in the numbers and types of instruments employed. In Sri Lanka, the instrumentarium is generally quite simple, whereas the music performed by the Tibetan monastic ensemble (commonly called *rolmo*) presents complex rhythmical and melodic structures. A typical ensemble usually includes two types of cymbals, double-headed frame drums, handbells with internal clappers, small hourglass drums, conch-shell trumpets, long metal trumpets, low-pitched oboes (*rgya-gling*) and bronze gongs. In Tibetan Buddhist ritual theory, musical styles and forms must be suited to the nature of the deities to which they are offered. The particular type of deity will influence the orchestration, rhythm, tempo and repertory, as well as other elements. Instrumental music is required on every occasion, whether or not instruments are played or 'mentally produced' through meditation and visualization techniques (Ellingson, 1979). In some rituals, no instruments are physically present, in some others the cymbals and drums are played. The full ensemble is present on special occasions such as the healing and propitiation rituals addressed to the deity Mahākāla.

Important observances throughout the Buddhist world are rituals of salvation and services for the welfare of the dead. In China, the sources for the ritual of salvation *yulanpen* have been traced back to the Tantric formularies translated into Chinese in the 7th and 8th centuries. Large-scale mourning rituals were codified from the 17th century onwards. Buddhist practitioners regard these services as descendents of the ritual of oblation and the 'incantation' (*dhāraṇī*) taught by the Buddha to his disciple Ānanda, who was afraid of being reborn a hungry ghost. Offerings of food and drink consecrated with music and recitation are considered necessary to ensure demise from suffering and rebirth in the Buddhist heavens. In East Asia, these rituals were (and are) of fundamental importance for the budgets of big monasteries, as members of the laity who order them pay conspicuous amounts of money for their performance. The great 'Water and Land Dharma Assembly' (*shuilu fahui*), performed in China, Hong Kong, Taiwan and elsewhere, can last up to eight days and nights, requires the presence of hundreds of officiants. The ceremony involves the use of ritual instrumental music, specially made paper props and offerings of food and drink. More common are smaller-scale versions of the 'Releasing the Flaming Mouths' (*fang yankou*) rituals performed for funerals and associated also with the Ghost festival ritual.

Buddhist monasteries have often been important centres of transmission of musical practice. The *shen-guan* musical tradition of northern China (named after the *sheng* free-reed mouth-organ and the double-reed pipe, *guanzi*), still performed at funerals and at mourning rituals, bears witness to the constant interaction between monastic and popular traditions. During the ritual, melodic and instrumental music punctuates the vocal and percussion music. The music is heterophonic, with the musicians playing different ornamented versions of the same melody.

In Vietnam, lay musicians are often asked to perform during Buddhist funeral ceremonies. In Korea, instrumental ritual music, together with dance and chanting, is performed by an outdoor instrumental ensemble (*chor-ach'i*), usually consisting of one or two conical double-reed pipes, a large gong, a barrel drum and cymbals. A long trumpet (*nabal*) and conch shell (*nagak*) are optional. The musicians of the ensemble have traditionally been lay people, whereas the chanters and reciters were ordained clergy. In Cambodia, in the early 20th century, the monasteries were training centres for classical musicians, and in Sri Lanka the clergy have sometimes been sponsors of secular music.

5. CONTEMPORARY TRENDS. In recent years, Buddhist organizations in mainland China, Taiwan, Hong Kong and other countries and areas have explored the use of recorded sound and broadcasting to disseminate Buddhist teachings and reach new or wider audiences. Performances of rituals and liturgical services take place on stage and in concert halls. An example of this was the 1989 tour by the monks

from Drepung Monastery, Tibet, of Canada, the USA and Mexico. Exponents of the Buddhist institutional world have advocated the necessity of modernising their strategies of communication. They tend to attribute to recording technologies and electronic media the same importance traditionally attributed to printing in disseminating Buddhist teachings.

Recordings of daily services, lectures by famous masters, calendrical and occasional rituals are available in many temples as well as in shops. New versions of rituals and prayers are also available on cassette tapes and CDs, featuring traditional instruments as well as pianos, guitars and synthesizers. Videos and video CDs of 'Buddhist karaoke' are produced in Malaysia and Singapore for the national and international market.

The songs written by the Chinese musician Wang Yong have recently been described as 'Buddhist rock music' because the artist tries to convey Buddhist-inspired experiences through the music. This kind of music relies on the record and media industries for its diffusion.

A number of professional composers have been involved in the production of 'new Buddhist music' with different styles and characteristics. In 1994, for example, a choral symphonic poem composed by Yao Shenchang with lyrics by the Buddhist music expert Tian Qing, was premiered in the large Chinese municipality of Tianjing.

Budweis. *See* ČESKÉ BUDĚJOVICE.

Buechenberg [Bugamberghi, Boccaber, Puchenberg], **Matteo** [Matheus] (*b* ?Büchenberg, nr Bernbeuren, *c*1566–70; *d c*1627–8). German lute maker, active in Italy. He was first mentioned in Roman sources in December 1591, when he married Virginia, daughter of the luthier Pietro Alberti; the last reference to him is in 1626. His workshop in Rome included Magno Graill from 1599 until 1626. Baron (1727) wrote that Buechenberg 'was German by birth but worked after the Italian fashion with small staves'. This refers to the bodies of his instruments, which are usually of multi-rib construction, using striped heartwood and sapwood yew. His handwritten labels, in a flowing italic script, bear the wording 'Matheus Buechenberg/Roma' with the date. He also used a brand-mark consisting of a tree resting on a triple mountain (Büchenberg = beech-mountain). This brand is clearly visible on a theorbo in a portrait by Luciano Borzone in the Palazzo Bianco, Genoa. His theorbos include some of the largest surviving specimens, some of which are fitted with single fingerboard courses.

Buechenberg instruments survive in the following museums: Barcelona, Museu Municipal de Musica (10-course lute, no.409); Brussels, Musée Instrumental (theorbo no.1570); The Hague, Gemeentemuseum (a theorbo back converted to a 13-course lute, no.Exl-55, and an archlute, no.878); Edinburgh, University Collection of Historic Musical Instruments (lute attributed to Buechenberg but much restored, no.3249); Florence, Museo Bardini (theorbo no.142); Lisbon, Conservatório Nacional (an archlute); London, Victoria and Albert Museum (one complete theorbo, no.190–1882, and a cut-down theorbo body, no.218–1882); Oxford, private collection (a theorbo back with new neck and soundboard); Paris Conservatoire (a composite archlute, no.E 1557).

LYNDA SAYCE

Buel [Büel, Buhel, Buhl, Bul, Bull, Puel, Puhel], **Christoph** (*b* Nuremberg, bap. 9 Jan 1574; *d* Nuremberg, bur. 17 May 1631). German composer. He entered the University of Altdorf to study theology in 1588 and then went on to study jurisprudence. In 1598 he became registrar in the so-called 'Grosses Registratur' at Nuremberg and he held this position until a few months before his death. He also assisted the civic authorities as a music expert and formed a choir at the Frauenkirche of which he became the conductor in about 1615. In 1600, 1608 and 1613 he was given leave to help organize the music at the court of the Palatine Electors Friedrich IV and V at Heidelberg and his first individual print (1615) was dedicated to the latter and his wife, the English Princess Elizabeth. In 1614 he helped to get his friend J.A. Herbst appointed Kapellmeister to the Landgrave of Hesse at Butzbach. Like others at Nuremberg at the time he was essentially an amateur musician. He probably turned to music relatively late in life, when he may have had some lessons with H.L. Hassler: a few isolated pieces appeared in anthologies in and shortly after 1600, but his music appeared regularly in print only after about 1610. On the whole it shows the influence of Hassler and other south German composers of the period, and there are impressive sonorities in the works for eight or more voices. That Buel was highly regarded by his contemporaries is suggested by the frequency with which he was represented in anthologies. Krautwurst saw him as the most important Nuremberg musician between Hassler and Johann Staden, and his music, which is little known, will no doubt repay further study.

MIROSŁAW PERZ

Buelow, George J(ohn) (*b* Chicago, 31 March 1929). American musicologist. He received the BM in 1950 and the MM the following year from Chicago Musical College, where he studied piano with Rudolf Ganz. In 1951 he began graduate studies in musicology at New York University under Martin Bernstein, Reese and Sachs; he took the PhD there in 1961. From 1961 to 1968 he taught at the University of California at Riverside. He was then professor of music and chairman of the department at the University of Kentucky from 1968 until 1969, when he was appointed professor of music at Rutgers University. In 1977 he was appointed professor of musicology at Indiana University. He has served as president of the American Bach Society (1987–92), a director of the IMS (1987–97) and vice-president of the American Handel Society; he was also founder and editor of the series Studies in Musicology (1977–90) and a member of the commission for RISM.

Buelow specializes in German music of the 17th and early 18th centuries, with emphasis on performing practice, theory and opera. His study of Heinichen's treatise on thoroughbass accompaniment, one of the principal works in English on German Baroque theory, provides a concise exposition of the relationship between the performing practice and music theory of the time. His studies of operas by Mattheson include an edition of *Cleopatra* (EDM, 1st ser., lxix, 1975).

PAULA MORGAN

Buenaventura, Alfredo S(antos) (*b* Santa Maria, Bulacan, 14 Oct 1929). Filipino composer, conductor and teacher. He studied at the universities of S Tomas and Centro Escolar, and at the Gregorian Institute. Teaching appointments followed at the Philippine Women's University, St Scholastica's College and other institutions. For a time he was the organist of Manila Cathedral, and he has also been active as the director of several bands and of the glee club of Ateneo University, Loyola. He became dean of the Centro Escolar University Conservatory and received the Republic Cultural Heritage Award twice (1964, 1972); he was awarded an honorary doctorate from the Philippine Women's University in 1989. His compositions, often based on Philippine legend and history, use Romantic, Impressionist and contemporary idioms.

LUCRECIA R. KASILAG

Buenaventura, Antonino (*b* Baliuag, Bulacan, 10 May 1904; *d* Manila, 25 Jan 1996). Filipino composer and conductor. He graduated in composition and conducting from the Conservatory of the University of the Philippines in 1929, after which he joined the staff of that institution and then went into the armed forces. In 1948 he was made co-conductor of the Manila Municipal SO, with which he toured Hong Kong, Yokohama, Guam and Hawaii, and in the next year he received a UNESCO study grant to travel to the USA. On retiring from army service he was appointed director of the University of Santo Tomas Conservatory (1961–4). He was president of the National Music Council of the Philippines, and later founded the school of music and arts at the University of the East, directing it until 1981. He was awarded the Republic Cultural Heritage Award in music in 1961 and in 1985 was named National Artist for Music. He wrote in a neo-classical and neo-romantic style, and used elements of traditional Filipino music.

LUCRECIA R. KASILAG

Buencamino, Francisco (*b* San Miguel, Bulacan, 5 Nov 1883; *d* Milan, 16 Oct 1972). Filipino composer and conductor. He learnt the rudiments of music from his father and, at the age of 13, was sent to the Liceo de Manila to study composition and harmony with Adonay. After graduating from the Liceo (BA 1904) he worked in the theatre and composed zarzuelas and orchestral pieces. He taught at the Ateneo de Manila, Centro Escolar University and then at his own music academy, where he was assisted by his children, Pilar, a concert pianist, and Francisco, a popular pianist-arranger and orchestra leader. In later years he was music director for several Manila film companies. His compositions are in a distinctly romantic folk vein.

LUCRECIA R. KASILAG

Buenos Aires. Capital city of Argentina. Sacred music was first used in the church of the Jesuit College about 1611 and at the cathedral, which was completed in 1622. In that year a primitive organ was installed at the Jesuit College church; the cathedral had a similar one. The missionary Jesuit priests taught music, and from the late 17th century their church had a rudimentary choir of black American slaves. The cathedral choir was supplemented by an orchestra of 14 players, and the earliest local compositions are those of the first known organist and *maestro de capilla* Juan Vizcaíno de Agüero (*b* Tucumán, Argentina, 1606); they date from 1628, the year of his arrival in Buenos Aires. He was succeeded at the cathedral by his pupil Juan de Cáceres y Ulloa and later by Francisco Vandemer (1756), Antonio Beles (1775–90), Bernabé de San Ginés (1775), Francisco del Pozo (1780), Mario Cabral (to 1785), Teodoro Guzmán (*fl* 1750–1820), Ambrosio Belarde (*fl* 1760–1815) and Tiburcio Ortega (1759–1839). The Portuguese musician Salinas de Lima played there in 1806 and the Italian Gaetano Lino Loforte in 1810. From 1785 to 1813 the organist was Bautista Goiburu, a noted teacher who guided local musical activity during this period. Music books of the period 1617–1809 are in the Universidad del Litoral, Santa Fé, the Museo Histórico, Córdoba, the

Biblioteca Nacional, Buenos Aires, and the Archivo General de la Nación, Buenos Aires. The early colonial works clearly show Spanish influence, whereas the more elaborate settings of the mass written after 1800 attest to some Italian influence.

The first public theatre, the Teatro de Operas y Comedias, opened in 1757; its productions included puppet shows, *tonadillas escénicas* (musical intermezzos) and a few short plays. The Teatro de la Ranchería (1783) presented *tonadillas*, zarzuelas and later the major Italian operas of Rossini, Bellini, Donizetti, Mercadante and others. The period of the viceroyalty (1776–1810) was characterized by lively musical activity in the salons of the colonial mansions, where parts of *tonadillas* and zarzuelas were staged. Italian opera became overwhelmingly popular in the early 19th century and during the century led to the opening of many more theatres, including the Coliseo Provisional (1804, where the first complete opera heard in Buenos Aires, Rossini's *Il barbiere de Siviglia*, was performed in 1825 – the Argentine national anthem being performed for the first time on the same occasion), the Teatro de la Victoria (1838), the Teatro del Buen Orden (1844) and the Teatro de la Federación (1845). The first Teatro Colón, built in front of the Plaza de Mayo, was inaugurated with *La traviata* with Sofia Vera Lorini and Enrico Tamberlik in 1857. It had 2500 seats but a short life as an opera house; the building became the Banco de la Nación Argentina in 1888. The leading opera season was transferred to the Teatro de la Opera (1872), which held the Buenos Aires premières of Verdi's *Don Carlo* (1873) and Gomes's *Il Guarany* (1874), and the world première of *Pampa* (1897) by the Argentine Arturo Berutti. Caruso sang there for the first time in Giordano's *Fedora* in 1899; the theatre's highpoint was in 1901 when he sang in *Tosca* with Hariclea Darclée, conducted by Toscanini. The new Teatro Colón, now Buenos Aires's principal opera house (see illustration), opened in 1908 with *Aida* under Luigi Mancinelli. The house seats around 4000 (2500 at the time of its opening). The new Colón became the biggest and most prominent opera house in Latin America and one of the leading in the world. It has staged 58 premières of Argentine operas, among them Héctor Panizza's *Aurora* (1908), Felipe Boero's *El matrero* (1929), Juan José Castro's *Bodas de sangre* (1956), Alberto Ginastera's *Don Rodrigo* (1964) and Mario Perusso's *La voz del silencio* (1969) and *Escorial* (1987). As well as the traditional repertory the Colón has given the South American premières of operas by such composers as Berg, Stravinsky, Janáček, Dallapiccola, Pizzetti, Schoenberg, Milhaud and Poulenc. A highpoint was the completed version of Manuel de Falla's *Atlántida* sung in Catalan (1963); a rarity was the production in 1982 of the earliest surviving Spanish opera, *Celos aun del aire matan* (1660) by Juan Hidalgo. The Colón is also used for symphonic concerts, solo recitals and ballet seasons.

Concert life began likewise in the colonial salons, where the favourite form was the popular song with guitar accompaniment. Simple song genres of Spanish origin ranged from the *salve* (song of praise), *saeta* (hymn to the Virgin), *alabanza* (chant of praise) and *rogativa* (chant of supplication) to lovers' songs and Christmas carols. The most notable salon was that of the composer and statesman Amancio Alcorta (*c*1850).

The musical life of the new capital was dominated by the composers Juan Bautista Alberdi and Amancio Alcorta, who wrote mainly chamber works for piano and some Romantic songs, and Juan Pedro Esnaola, who wrote works for voice and for piano and some chamber and orchestral music, also in the European Romantic idiom.

Throughout the 19th century philharmonic societies were founded to perform symphonic and chamber music; more than 20 remain, of which the most important are the Sociedad Filarmónica (1822), the Escuela de Música y Canto (1822), another Sociedad Filarmónica (1823) and the Sociedad de Mayo (1854). The repertory of chamber music alternated with symphony concerts and concertos performed by visiting foreign soloists; small instrumental concerts were given by local players, supplemented when necessary by players from elsewhere. The Orquesta Filarmónica of the Asociación del Profesorado Orquestal was founded in 1919; its first conductors were Ernesto Drangosh, Ferruccio Cattelani, Georges Zavlawsky and, in 1924, Ernest Ansermet. It performed the symphonic repertory, giving first performances in Buenos Aires of works by Stravinsky, Honegger, Falla, Malipiero, Debussy, Ravel and Prokofiev and by young Argentine

Teatro Colón, Buenos Aires, designed by Vittorio Meano, opened 1908

composers. This association and others like it (the Asociación Wagneriana, 1912, the Amigos de la Música, 1946 and especially the Grupo Renovación, 1929) did much to promulgate new works and unfamiliar genres (e.g. lieder) as well as the standard repertory. The present orchestras are that of the Teatro Colón (1924), the Orquesta Radio El Mundo (1930), the Orquesta Sinfónica Nacional (1948), the Orquesta Filarmónica (1949) and the Orquesta Radio Nacional (1951), all of which have had native and foreign conductors. Smaller groups formed in the 1960s include the Camerata Bariloche (1966, founded by the violinist Alberto Lysy), the Ensemble Musical de Buenos Aires (1968, founded by Pedro Calderón) and the Orquesta de Cámara Juvenil (1970, founded by the composer, cellist and conductor Washington Castro). Other orchestras are the Sinfonieta Omega Seguros, founded and conducted by Gerardo Gandini; the Orquesta San Isidro Labrador, under Charlotte Stuijt; and the Orquesta de Mayo and the Orquesta Juvenil (founded 1995), both conducted by Mario Benzecry.

The concert-promoting organizations, the Asociación Amigos de la Música, Asociación Amigos del Arte, Asociación Argentina de Compositores, Asociación de Conciertos de Cámara, Asociación de Jóvenes Compositores de la Argentina and Asociación del Profesorado Orquestal, all organize annual concert seasons (from April to October) including solo recitals, chamber music cycles and symphony concerts. The Agrupación Nueva Música is directed by Francisco Kroepfl and Lucía Maranca. Many organizations (e.g. the Asociación Amigos de la Música) have their own concert halls; others use rooms in the Museo Nacional de Bellas Artes, the Museo de Artes Decorativas, the Biblioteca Nacional and the great hall of the Facultad de Derecho (school of law, cap. 1500), the hall of the Editorial Argentina de Musica, the Teatro Cómico (cap. 1200) and the Municipal S Martín which has three halls, Martín Coronado (2000), Lugones (1000) and Casacuberta (700).

The first public institution to provide music instruction was the Colegio Real de S Carlos, now the Colegio Nacional, founded by Juan José Vertiz (viceroy 1778–84); the influential Juan Bautista Goiburu was professor there. The Spanish priest José Antonio Picazarri founded the Escuela de Musica y Canto in 1822 and the Argentine composer Juan Pedro Esnaola was the first president of the Escuela de Música de la Provincia founded in 1875. The city also has a Conservatorio Municipal de Música and the Conservatorio Nacional de Música. The municipal radio broadcasts cultural programmes. The Centro Latinoamericano de Altos Estudios Musicales at the Instituto Torcuato di Tella, founded in 1962 and directed by Ginastera, no longer exists. The Facultad de Artes y Ciencias Musicales of the Universidad Católica Argentina (UCA) was established in 1958 with Ginastera as dean. It has departments of composition, musicology and criticism, sacred music, music education, orchestral conducting and choral conducting. Roberto Caamaño was dean until his death in 1993; he was succeeded in 1994 by Marta Lambertini. The UCA also has a symphony orchestra and centres of electro-acoustic music (directed by Pablo Cetta), contemporary music (Gerardo Gandini) and early music (Clara Cortázar). In 1994 the UCA and the Academia Nacional de Bellas Artes together established the Premio Nacional de Piano Roberto Caamaño. The Centro de Experimentación de Opera y Ballet (CEOB) was created by Gandini in 1994 as an experimental group, with regular performances in three small halls: the Centro Cultural Recoleta, an auditorium of the Teatro S Martín, and one of the secondary stages of the Teatro Colón. Each year one of the productions is selected to have its première on the principal stage of the Colón.

SUSANA SALGADO

Buescher. American firm of band instrument manufacturers. It was founded in Elkart, Indiana by Ferdinand August 'Gus' Buescher (*b* Elk Township, Noble County, OH, 26 April 1861; *d* Elkhart, 29 Nov 1937). Buescher worked first for Conn from 1876, becoming foreman in 1888. In 1894 he established the Buescher Manufacturing Co. to make band instruments and metal tools in partnership with John L. Collins, a clothing merchant and Harry L. Young, a salesman. In 1904 the firm was reorganized as the Buescher Band Instrument Co. and in 1916 Buescher sold the company to five Elkhart businessmen, remaining as the manager and later as an engineer. In 1928 the Elkhart Band Instrument Co. bought the Buescher firm and continued manufacturing under the Buescher name until 1963 when it was sold to H. & A. Selmer. From 1932 to 1937 Buescher was a partner with Harry Pedler (1872–1950) of Art Musical Instruments Inc. of Elkhart, a manufacturing company which supplied brass instruments and parts to other businesses.

The Buescher company specialized in saxophones (which were particularly popular in the USA) and all types of brasswinds. The company also manufactured some flutes and clarinets and between 1910 and 1920 the 'clariphon', a clarinet with a curved metal barrel and a curved metal bell pitched in A, B♭, C or E♭. Buescher was probably the earliest American manufacturer of saxophones; he developed the technique of drawn tone-holes on the metal body, an improvement over the process of soldering a connecting ring to the tube. Buescher instruments bore the trademark 'True-Tone' and competed successfully with the rival Conn company's products; however, both firms shared parts and designs. Buescher introduced off-set middle valves for cornets, an air cushion valve mechanism, snap-on saxophone pads, and developed a seamless tube leadpipe for cornets and trumpets.

ALBERT R. RICE

Buffalo. American city, in western New York state. In 1808 the frontier village of Buffalo recorded its first musician and its first music critic. A contemporary writer noted 'how hearts leaped' when the fiddler Russell Noble came over the hill 'to set the tune for the country dance', and added: 'He had no more regard for time than eternity'. In 1827 the city's first three pianos were towed to Buffalo on the Erie canal's mule-drawn barges. They were ordered by James Sheppard for his pioneer music shop, headquarters from 1838 of the Handel and Haydn Society, and the ancestor of one of the city's most important musical institutions for over 100 years, the firm of Denton, Cottier & Daniels. The city's first organ was placed in St Paul's Church in 1829. Early musical life was dominated by German settlers; the Buffalo Liedertafel was established in 1848 and lasted well into the 20th century. In 1883 a music hall was built. Victor Herbert and his orchestra were a major attraction of the 1901 Pan-American Exposition. From 1908 to 1917 the Philharmonic Society of Buffalo organized an annual May Festival featuring the Chicago SO under Frederick Stock, but the city had no official resident professional orchestra until the Buffalo PO was founded in 1935. Franco Autori was its first conductor and William Steinberg took over the post in 1945. He was followed by Josef Krips (1953–63) and Lukas Foss (1963–70). Under Michael Tilson Thomas, conductor from 1971 to 1978, the orchestra presented 32 concerts in series subscription form and many other popular and school concerts outside Buffalo.

The succession of Buffalo PO music directors continued with Julius Rudel (1978–85), Semyon Bychkov (1985–9) and Maximiano Valdes (1989–98). This was generally a period of strained finances and diminishing personnel which saw the orchestra's very existence in peril. But the ensemble was able to maintain high artistic standards, and the tenure of Bychkov was a period of great optimism and vitality which reached its peak with the orchestra's first European tour in 1988. When JoAnn Falletta was named music director in 1998, it was considered the most prestigious American orchestral appointment held by a woman, and optimism again rose.

Kleinhans Music Hall, designed by the architect Eliel Saarinen and built in 1940, is the orchestra's home and provided the model for the Israel PO's auditorium in Tel-Aviv. The adjoining Mary Seaton Room is one of the city's principal recital rooms. In 1958 the orchestra purchased the NBC Symphony-Toscanini Library of scores containing 2000 titles, including the first editions and many others with notations by Toscanini on technical and stylistic matters.

The Buffalo Chamber Music Society is one of the oldest and most successful organizations of its type in the country, presenting an annual series of eminent chamber ensembles. Founded in 1924, the series hosted no fewer than 66 performances by the legendary Budapest String Quartet from 1931 to 1965. The city has not, however, enjoyed the same history of success in supporting locally produced opera. In 1988 several smaller companies merged into the regional Greater Buffalo Opera Company, but in 1998, during its tenth season, finances faltered and the company ceased operation.

Buffalo has a long tradition of fine music instruction, and has produced such national and international musicians as the soprano Rose Bampton, the pianist and pedagogue Guy Maier and the pianist Leonard Pennario. The First Settlement Music School was established in 1924. Paul Hindemith was brought to the city as a resident teacher in 1939 under the auspices of Cameron Baird, the music patron and founder of the University of Buffalo (since 1962, State University of New York at Buffalo) music department. The Budapest Quartet became the university's resident chamber group in 1965, but the illness and death of the violist Boris Kroyt suspended the quartet's activities a few seasons later. The Cleveland Quartet became the resident ensemble in 1971.

The Slee Beethoven Cycle is an unusual tradition which started in 1956. Frederick and Alice Slee left a bequest yielding some $40,000 annually, in part for a yearly presentation 'in perpetuity' of all 17 Beethoven works in quartet form, in a series of six concerts, in which the Budapest, Juilliard, Guarneri, La Salle and other leading quartets have taken part over the years. The university's Slee Professorship, an endowed chair which is part of the bequest, provides for a leading composer to establish residence for an academic year, give lectures and supervise performances. Among Slee Professors since 1956 have been Carlos Chávez, Aaron Copland, Leon Kirchner, Ned Rorem, Mauricio Kagel, David Diamond, Henri Pousseur, Alexei Haieff, George Rochberg, Leo Smit, Virgil Thomson, Nicolas Nabokov and Lejaren Hiller. Hiller was also co-director with Lukas Foss of the Center of the Creative and Performing Arts, which has its headquarters in the university. Founded in 1964 by Foss and Allen Sapp, then chairman of the university music department, the centre has brought young composers and instrumentalists to Buffalo from many countries, usually for one-year residencies. Their functions are to compose and perform; they have no teaching duties. Among them have been Sylvano Bussotti, Niccolò Castiglioni, Cornelius Cardew, Vinko Globokar, Yuji Takahashi, Paul Zukofsky, Terry Riley and George Crumb. They have given annual series in Carnegie Hall, New York, and on several campuses in the eastern USA.

The attention generated by these activities made Buffalo one of the world's leading centres for new music during the 1960s and 70s. When funding for the Center of the Creative and Performing Arts eventually dried up, the momentum it had established allowed the university at Buffalo to continue its prominence with two new annual events, the North American New Music Festival (1983–96) and the June in Buffalo Festival, with emphasis on the work of young, emerging composers, founded in 1975 by Morton Feldman and still thriving in 1999 under the direction of David Felder.

The Buffalo and Erie County Library (incorporating the Grosvenor Library founded in 1836) contains a small but important collection of musical Americana, including sheet music and tunebooks. Among the internationally known musicians who have been Buffalo residents are the baritone Heinz Rehfuss, Morton Feldman, who was appointed Edgard Varèse Professor at the University in 1976, Lejaren Hiller, a pioneer in computer music, and the pianist and composer Leo Smit (ii).

JOHN DWYER/HERMAN TROTTER

Buffalo Springfield. American country rock and folk rock group. It was formed in Los Angeles in 1966 by Neil Young (*b* Toronto, 12 Nov 1945; vocals, guitar), Bruce Palmer (*b* Liverpool, NS, 9 Sept 1946; bass guitar), Stephen Stills (*b* Dallas, 3 Jan 1945; vocals, guitar) and Richey (Paul Richard) Furay (*b* Yellow Springs, OH, 9 May 1944; vocals, guitar). Other members have included Dewey Martin (drums, vocals) and Jim Messina (guitar). Their first album *Buffalo Springfield* (Atco, 1966) featured Young's introspective ballads contrasted with Stills' folk rock songs including the latter's *For What It's Worth*, an evocation of an anti-Vietnam student demonstration, which became an anthem for West Coast youth. *Buffalo Springfield Again* (Atco, 1967) contains some of the group's best songs, including Stills' *Bluebird* and *Everyday*, Young's *Broken Arrow* and *Expecting to Fly*, and Furay's *A Child's Claim to Fame*. Often seen as their seminal work, this album is more a collection of individual songs than a cohesive whole.

A transatlantic success, the group undertook a series of high-profile concerts, culminating in their performance at the 1967 Monterey International Pop Festival, one of the event's highlights. Short-lived, but extremely significant within their field, Buffalo Springfield were heavily influenced by the Byrds and, like them, often seen as America's answer to the Beatles. They split up shortly before the release of their third album, *Last Time Around* (Atco, 1968).

Essentially a hybrid, mixing Greenwich Village's folk derivatives with mainstream pop, Buffalo Springfield was a catalyst in the development of folk rock and country rock.

LIZ THOMSON

Buffardin, Pierre-Gabriel (*b* Provence, *c*1690; *d* Paris, 13 Jan 1768). French flautist and teacher, active in Germany. Marseilles is sometimes cited as his native city, but 18th-century sources indicate only that he came from Provence. As a young man he was taken to Constantinople by the French ambassador, and there, sometime before 1712, taught Johann Jacob Bach, J.S. Bach's younger brother. In November 1715 Buffardin entered the service of Augustus II in Dresden, and was soon regarded as one of the outstanding players in the court orchestra. Under Augustus III his stipend of 500 thalers was raised to 1000, and in 1749 he was pensioned. During his years in Dresden he maintained contacts with his homeland, and in 1726 and 1737 performed in the Concert Spirituel in Paris. He returned to France in 1750 and on 24 July of that year performed for the Dauphine. A letter by Buffardin concerning the use of quarter-tones on the flute appeared in the September 1764 volume of the *Mercure* (pp.186ff; discussed by Reilly and Solum).

For four months Buffardin was the teacher of J.J. Quantz, and also of F.J. Götzel and P.G. Florio. Quantz indicated that his special skill lay in the performance of quick pieces. The Dutch flautist A. Mahaut credited him with the invention of a divided foot-piece with a tuning slide for the flute. Buffardin was not well known as a composer, and only two of his compositions appear to survive: a trio-sonata in A for flute, violin and continuo (*F-Pn*; facs., Banhagen, 1989) and a flute concerto in E minor (*D-SWl*; ed. H. Augsbach, Leipzig, 1984). The latter is also credited, probably mistakenly, to Quantz (*B-Bc*) and to Scherer (*S-Skma*). A set of sonatas is listed in a 1742 catalogue of Leclerc, but no copy has been traced.

EDWARD R. REILLY

Buffet, Louis-Auguste [*jeune*] (*b* La Couture, nr Dreux, 6 Aug 1789; *d* Anet, 30 Sept 1864). French maker of woodwind instruments, brother of Denis Buffet-Auger (founder of the BUFFET-CRAMPON firm). He was born into a family of woodturners, and by the time of his marriage in 1813 he was already working in La Couture as a wind instrument maker (although he was living in nearby Anet). By 1830 he had established a workshop in Paris, where he continued to specialize in making woodwind instruments. In about 1834 he made a 15-key bass clarinet in C for the clarinettist I.-F. Dacosta, and a little later he made another, this time in B♭. Buffet went on to work with the flautist Victor Coche and in 1838 their work culminated in an improved Boehm flute (*see* FLUTE, §II, 4(iii)). However, Buffet is best remembered for his work with the clarinettist H.E. Klosé, which resulted in an improved clarinet exhibited at the 1839 Paris Exposition. The clarinet's keywork incorporated ring keys similar to those on the Boehm flute, and Buffet's design later became known as the Boehm clarinet (*see* CLARINET, §II, 4). This system is still the one most widely used on clarinets, and has been little altered from Buffet's original design. Working with the Spanish oboist P.J.R. Soler, Buffet also exhibited a Boehm system oboe at the 1844 Paris Exposition, but his work in this direction was not so successful.

By 1845 Buffet *jeune* had been joined in his workshop by his son (Louis-)Auguste Buffet (*b* Anet, 15 July 1816; *d* Paris, 7 April 1884), their signatures appearing that year on a letter protesting about the activities of Adolphe Sax. The son signed the letter Auguste Buffet, while the father continued to call himself Buffet *jeune*. Between 1859 and 1862, Auguste took out several patents concerning woodwind instruments. He took over the business on the death of his father, and exhibited at the Paris Exposition of 1867.

ANTHONY BÉTHUNE, WILLIAM McBRIDE

Buffet-Auger, Denis (*b* La Couture, 28 July 1783; *d* Paris, 24 Sept 1841). French woodwind instrument maker. He was the founder of the firm that later became known as BUFFET-CRAMPON.

Buffet-Crampon. French firm of woodwind instrument makers. It was founded by Denis Buffet [Buffet-Auger] (*b* La Couture, 28 July 1783; *d* Paris, 24 Sept 1841), elder brother of LOUIS-AUGUSTE BUFFET [Buffet *jeune*] (whose own business was wholly independent). After his marriage to Marie-Anne Auger, Denis became known as Buffet-Auger. In 1825 he set up a workshop at 22 passage du Grand Cerf, Paris, where he made both string and wind instruments. Later 19th-century advertising states that the business was founded in 1830, not 1825, and this probably signifies that from 1830 onwards, Buffet-Auger's son Jean-Louis (*b* La Couture, 18 July 1813; *d* Paris, 17 April 1865) gradually took over the running of the firm. In 1836, Jean-Louis married Zoë Crampon. At the Paris Exposition three years later, the business obtained a *mention honorable*. When Buffet-Auger died, Jean-Louis was left in charge of the business, taking the name Buffet-Crampon by 1844.

Buffet-Crampon were awarded bronze medals at the Paris Expositions of 1844 and 1849. One exhibit at the latter was probably the firm's 'omnitonic' clarinet, based on Iwan Müller's 13-key model (with added left- and right-hand ring-keys), developed in consultation with the clarinettist Victor Blancou and patented in 1845. The firm's advertising for that year also featured the new ring-keyed clarinets (later known as Boehm clarinets), as well as more usual 13-, 14- and 15-keyed clarinets, and a selection of Boehm flutes and piccolos. It is clear that Buffet-Crampon must have had some sort of commercial arrangement with his uncle's firm for, at that time, the Boehm clarinet was still the patent-protected property of Louis-Auguste.

Having gone into partnership with his younger brother Louis (*b* Anet, nr La Couture, 10 March 1823) and F. Tournier (*d* 1859), Buffet-Crampon established a second workshop in Mantes-la-Ville in 1850. Within five years the workforce had grown to about 15 employees. At some stage Louis left to set up his own company, Louis Buffet & Cie, at a different address. A few instruments bearing the name of Louis Buffet have survived. Louis was replaced in his brother's business by (Jean-)Pierre(-Gabriel) Goumas (*b* Mesnil-sur-l'Estrée, nr Dreux, 2 Jan 1827), the husband of a niece of Buffet-Crampon, who had joined the firm in 1851 and became a partner in 1855. Following Tournier's death, Buffet-Crampon and Goumas formed a new company, named Buffet-Crampon & Cie, with Adolphe-Marthe Leroy. The death of Buffet-Crampon left Goumas solely in charge and he lost no time in diversifying the company's activities. A steam-engine was installed in the Mantes factory in 1866, perhaps necessitated by the introduction of saxophones to their product line.

Goumas formed a new partnership, called Goumas & Cie, with his sons-in-law Léon Leguay and Léon Crampon in 1870 although they continued to use the Buffet-Crampon & Cie trademark. In 1874 Goumas & Cie began to publish military music. In 1875 they patented a modification to the saxophone's left-hand keywork (with further modifications over the succeeding four years), allowing the mechanism to function in a similar way to that of the Boehm clarinet. Many saxophones were ordered for French regimental bands, and they also received regular orders from other instrument makers, among others Lecomte, Mahillon, Besson, Gautrot and Romero.

Goumas sold his share of the business to former pupils Paul Evette (*d* 25 March 1918) and Ernest Schaeffer in January 1885. During the year 1888 Evette & Schaeffer exhibited at international expositions in Barcelona, Bologna and Melbourne. During the next 40 years or so more than a dozen Evette & Schaeffer patents were obtained, primarily concerned with saxophone developments. Several of their innovations have become standard features on the modern saxophone. In 1896 they began to manufacture brass instruments. By the end of the century their catalogue of published music included about 2000 titles. Between 1885 and 1927 Evette & Schaeffer had offices in London.

Paul Evette was succeeded on his death by his son Maurice (*d* 1929). The partnership of Evette & Schaeffer ended in 1926, and Maurice continued to run the company on his own until his retirement in 1929. That year also saw the creation of a new company under the name of Buffet-Crampon, by Paul-Eugène Leseigneur, Gabriel Franot (*d* 1938) and Paul Lefèvre. The new company suffered a serious decline in the 1930s, but after World War II they introduced a new range of 'Dynaction' saxophones. In 1953 Robert Carrée took over factory management, and the following year introduced a range of clarinets with the so-called 'Continentale' bore. Leseigneur was succeeded in 1959 by his nephew Jean Blondelet. In 1963 Buffet-Crampon introduced three ranges of clarinets with different bores, one intended for classical music, another for chamber music and the third suited to jazz. Buffet-Crampon continued to manufacture a complete range of woodwind instruments, although they stopped making flutes in 1965.

In 1970 Buffet-Crampon were bought by the American group, Tolchin Instruments Inc. About the same time, the Buffet-Crampon company introduced less expensive ranges of clarinets and saxophones under the name of Evette. They also introduced new alto and tenor saxophones, designated S1, for the top end of the market in 1974. In 1975 they released the 'RC' range of clarinets, and Hugo Schreiber became vice-president of the company. Towards the end of the 1970s, Buffet-Crampon revived the Evette & Schaeffer name for a range of Japanese-made flutes intended for students. During 1981 the Tolchin Group was bought by Boosey & Hawkes, and seven years later, Michael Winter and Paul Baronnat took over management of Buffet-Crampon in France. In 1994 the company introduced 'Green Line' clarinets and oboes, made of a synthetic material composed of grenadilla wood powder and carbon fibre.

ANTHONY BÉTHUNE, WILLIAM McBRIDE

Buff stop [harp stop and (erroneously) lute stop] (Fr. *registre de luth*; Ger. *Lautenzug*; It. *sordino*, *liuto*). A device found on harpsichords of most periods and schools (though more rarely on Italian instruments) as well as on some pianos, especially square pianos of the 18th and early 19th centuries. It mutes the tone by lightly pressing a piece of buff leather, cloth or felt against the strings near the nut, and has the effect of damping the vibrations,

especially the high harmonics, so that the sound takes on a duller, pizzicato quality. In harpsichords, the buff stop usually consists of a sliding batten fitted with a small block of material for each note. Sliding the batten to one side brings the blocks against one register of strings, usually at 8′ pitch. In harpsichords by members of the Ruckers family, the buff batten was usually divided into separate treble and bass sections. Occasionally in harpsichords but normally in pianos the buff-stop batten is covered with material along its entire length, so that all the unison strings are damped when the batten is raised or (if placed over the strings) lowered against them. The buff stop should not be confused with the PEAU DE BUFFLE register, which is a row of jacks equipped with soft leather plectra, nor with a LUTE STOP, which is a row of jacks plucking close to the nut.

See also REGISTRATION, §II.

EDWIN M. RIPIN/JOHN KOSTER

Bugamberghi, Matteo. *See* BUECHENBERG, MATTEO.

Buganda. *See* UGANDA, §III.

Bugeja. Maltese family of composers and church musicians. Together with the Nani family they dominated Maltese ecclesiastical music during the 19th and early 20th centuries. Many Bugeja manuscripts are in the Maltese Dominican Province music archives and Mdina Cathedral Museum.

(1) **Pietro Paolo Bugeja** (*b* Valletta, 29 April 1772; *d* Valletta, 12 June 1828). He studied with Francesco Azopardi and with Insanguine, Furno and Respoli at the Conservatorio di S. Onofrio in Naples (1791–9), where he was also *maestro di cappella* of the church of S Ivo, for which he composed his first masses. In 1798 he became assistant to Azopardi, working mainly in St John's Co-Cathedral in Valletta during the French blockade.

On Azopardi's death in 1809, Bugeja was appointed *maestro di cappella* at the cathedrals of Mdina and St John, where he worked for the rest of his life. The quality of his performances and compositions induced other churches to seek his services, and to meet these demands he established his own *cappella*. His compositions are based in the Classical style, although there are indications of earlier idioms, especially in his liturgical music. His settings of Jeremiah's lamentation *Recordare* and the Benediction hymn *O salutaris hostia*, still justly popular, are outstanding examples of the late 18th-century Italian *cantata da chiesa*. Pietro Paolo was also an accomplished conductor, and from the 1806–7 season was engaged at the Manoel Theatre, where he directed operas by Paisiello and Cimarosa, among others.

WORKS
(*selective list*)

Sacred vocal (all with orch): Gioas, re di Guda (orat, P. Metastasio), 1813; Messa breve, 1811, Messa Pastorale, F, 1814, Messa (Kyrie and Gloria), E♭, Messa dei morti, mass movts; many other liturgical works and hymns, incl. Laudate Pueri, 1797, Ave Maris stella, 1798, Recordare, 1800, Improperi per il Venerdì Santo, 1804, Salve regina, 1805, Miserere, 1817, Responsori del Giovedì Santo, 1819, Laudate Pueri, 1820, Dixit Dominus, 1825, Tantum ergo, TeD, Mag, Stabat mater

Other: 9 sinfonias, orch, lost; qnt, fl, str

(2) **Vincenzo Bugeja** (*b* Valletta, 29 Oct 1805; *d* Valletta, 20 June 1860). Second son of (1) Pietro Paolo Bugeja. He studied with his father and with Furno and Zingarelli at the Naples Conservatory (1829–31). On 15 June 1828 he succeeded his father as *maestro di cappella* of the cathedrals of Mdina and St John. It is likely that in Naples he started working on *Lodoviska*, which became the first work presented during the Manoel Theatre's 1832 spring season; despite its warm reception and musical merit it was the only opera that he completed. After his father's early death Vincenzo, in addition to his cathedral duties, inherited the rapidly expanding Bugeja *cappella*, and he was fully occupied not only with composition but also with the *cappella*'s management. Moreover he was now facing tough competition from the newly instituted Nani family *cappella*, a rivalry that spilled over into several directions, not least the formation of two powerful groups of supporters.

Apart from *Lodoviska* and six short sinfonias which were probably intended for church use, Vincenzo wrote only sacred vocal music; his *festa* antiphons were renowned, and are still popular. He wrote in a bel canto style reminiscent, according to Caruana dei Conte Gatto, of *Norma* and Donizetti's *Lucia*; although clearly operatic, his music is spontaneous and appropriate to its liturgical context.

WORKS
(*selective list*)

Stage: Lodoviska (op, 2, F. Malagricci), Malta, Manoel, 15 March 1832

Sacred vocal: Masses and mass movts; ants, incl. Beata mater, 1836, Ingresso Zacchariae, 1839, Sancte Paule, 1839, Hodie egressa est, 1846, Pie Pater, 1848, Nativitas tua, 1853, O Melitae, 1860; *c*14 hymns, incl. 2 Ave maris stella, 1836, 1853; 8 Tantum ergo, Requiem aeternam, 1854, Laudate Dominum, Lauda Jerusalem, Dixit Dominus

Orch: Sinfonia ('Il torneo'); Sinfonia no.2; 4 others, lost

(3) **Filippo Bugeja** (*b* Valletta, 23 Jan 1808; *d* Valletta, 8 Oct 1891). Third and youngest son of (1) Pietro Paolo Bugeja. He was well known as a pianist, organist and conductor, and took over the Bugeja *cappella* after the early death of (2) Vincenzo Bugeja until (4) Riccardo Bugeja was ready to assume its directorship. He refused a similar temporary engagement as the Cathedral's *maestro di cappella*, which would have kept that prestigious post within the Bugeja family. Composition did not interest him and his few extant works, distinguished by good vocal writing, were dictated by *cappella* requirements.

(4) **Riccardo Bugeja** (*b* Valletta, 25 Oct 1844; *d* Floriana, 8 Oct 1926). Son of (2) Vincenzo Bugeja. He studied with his father and from 1862 to 1869 at the Naples Conservatory, where according to Mifsud Bonnici he studied with Mercadante. In 1870 he assumed full responsibility for the Bugeja *cappella*; its continuing popularity prompted new commissions which produced the writing of a number of admirable antiphons, hymns and psalms. His musical style is based on his father's but the orchestration tends to be heavier and more operatic. Mainly, however, he relied on his forefathers' output, and completed only one mass.

Riccardo was slow to respond to Pius X's *Motu proprio* of 1903, and only after 1906 did he take steps to conform. This delay gave other *maestri di cappella* working in accord with the *Motu proprio* the chance to encroach upon the domain of the Bugeja *cappella*, and by the time of Riccardo's death in 1926 it was much reduced. This diversity was actually beneficial for Maltese liturgical music, and helped to revitalize it.

WORKS
(*selective list*)

Sacred: Messa in omaggio alla Immacolata Maria, 3vv, 1907; Off, Sanctus, Agnus Dei, Libera me, 1886; mass movts; psalm settings, incl. Juravit Dominus, Laudate Dominum, Dixit Dominus, Virgam virtutis, De torrente, Gloria Patri, Deus in adjutorium, Laudate Pueri; 6 ants

Orch: Sinfonia ('Cordelia'); Marcia trionfale ('La vittoria')

(5) **Censinu** [Vincenzo, Vincent] **Bugeja** (*b* Rabat, 24 May 1910; *d* Sliema, 25 Jan 1967). Son of (4) Riccardo Bugeja. He studied with Luigi Vella and Giuseppe Abdilla and, between 1927 and 1934, mainly with Paolo Ferretti, Casimiri and Refice at the Pontificio Istituto di Musica Sacra in Rome. On his return to Malta, he started reorganizing and revitalizing the family *cappella*, though radically changed liturgical and social conditions after the *Moto Oroprio* of 1903 and World War II resulted in a reduced level of activity. His compositions, though technically sound, only sporadically show high imagination.

In 1939, to fill the void created by the non-availability of Italian singers and musicians in Maltese theatres during World War II, he brought together Maltese substitutes to form the Malta Amateur Theatricals Company and, except for an interval when hostilities were at their height, continued to direct and produce operas till 1948, when the cessation of war saw the return of predominantly foreign casts.

Censinu's marriage was childless and, although the two-centuries-old *cappella* Bugeja continues to function and still uses compositions of the Bugeja family, it has passed outside family control, its present *maestro* being the Dominican monk Salv Galea.

WORKS
(*selective list*)

unless otherwise stated, with 1–4 voices and orchestra

Masses: Messa 'Beate Marie Virginis' (1931–32); Messa 'San Publii' (1934); Messa solenne no.3 (1935); Messa, children's vv, orch; Messa (Kyrie and Gloria)

Pss: Confitebor tibi, Domine (Ps cx), 1932; Domine probasti me (Ps cxxxviii), 1932; Beatus vir (Ps cxi), 1933; Dixit Dominus (Ps cix), 1933; Lauda Jerusalem (Ps cxlvii), 1933; Deus in adjutorium (Ps lxix), children's vv, orch, 1934; Laudate Dominum (Ps cxvi), 1936; Laudate pueri (Ps cxii), 1936; Laetatus sum (Ps cxxi); Nisi Dominus (Ps cxxvi)

JOSEPH VELLA BONDIN

Bugel (Ger.). *See* BOUTS.

Bughici, Dumitru (*b* Iaşi, 14 Nov 1921). Romanian composer,teacher and musicologist. He studied with Zirra (harmony), Antonin Ciolan (conducting) and Constantinescu (piano) at the Iaşi Conservatory (1935–8), and with A. Dimitriyev (counterpoint), Schnittke (form) and Voloshinov (composition) at the Leningrad Conservatory (1950–55). In 1955 he was appointed to teach form at the Bucharest Conservatory. His compositions show a dramatic temperament and an inclination towards symphonic music of significant proportions, both coming together in his many programme works. Concern with instrumental colour and improvisation led him to use jazz in some pieces, but in an entirely serious manner; his late Romantic style, showing, particularly in choral music, a preference for linear polyphony, includes allusions to folk material. His musicological work is concise and rigorously analytical. From 1985 he has been resident in Israel.

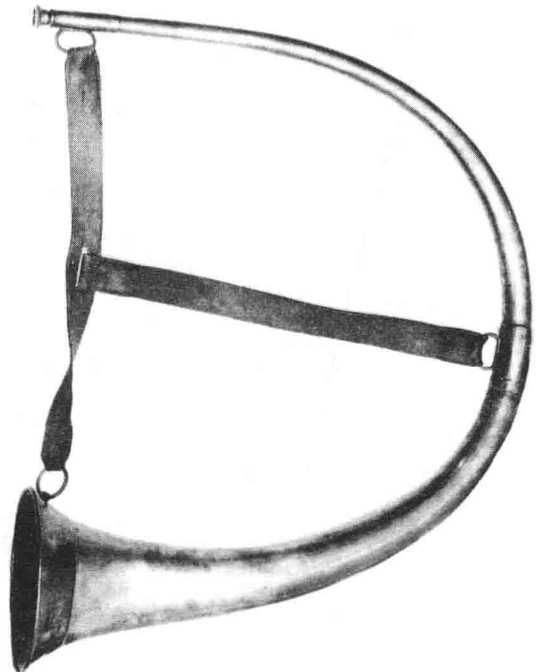
VIOREL COSMA

1. *British regimental bugle*

Bugle (i) (Fr. *clairon*; Ger. *Signalhorn*; It. *corna da segnale*; Sp. *corneta*). In the Middle Ages a not very common Old French word (also *cor buglèr*, *bugleret*) for a small bovine signalling horn, derived from the latin *buculus* ('bullock'); in Old English the term seems clearly to be derived from *bugle* ('wild ox'). The modern bugle of copper or brass, used by the armed forces of most countries and by civilian boys' bands in Britain, has a wide conical bore and pitch of B♭ (on the Continent often C) like the ordinary modern trumpet. The relatively wide, rapidly expanding bore of bugles gives a short series of modes of vibration of the air column, resulting in a concentration of the sound energy in the fundamental and lower overtones, a small useful compass, and often poor intonation. The regulation British bugle (fig.1) has the compact twice-wound form with small bell, first authorized in 1858. Other countries use variants of this or else keep the larger once-wound model, usually with wide bell, made first in London about 1800 (bugle horn) and officially adopted throughout the British army in 1812 (and by the French in 1822). Bugle calls employ harmonics from the 2nd to the 6th, written *c'* to *g''*. The British calls are given in *Trumpet and Bugle Sounds*.

Some calls originated in the late 18th century, when they were sounded on the large semicircular bugle horn with leather harness, which was the original military bugle introduced in Germany during the Seven Years War as a distinguishing instrument for *Jäger* battalions and other light troops (fig.2). Known as *Halbmond* this had the general form of the older *Flügelhorn* of the German hunt. A. and R. von Sichart in *Geschichte der Königlich-Hannoverschen Armee* (Hanover, 1866) mentioned it as used by the Hanoverian forces in 1758. By 1764 it reached the English Light Dragoons as 'bugle horn'. The Grenadier Guards adopted it in 1772, the light artillery in 1788 and the light infantry meanwhile. By a War Office order of 1814 light infantry and rifle regiments were granted the design of a bugle horn as a badge, though it was already worn by the 60th Royal American, later the King's Royal Rifle Brigade. Also in infantry use during this period was a small circular horn. The 'German post horn' mentioned in English inspection reports of 1774 was presumably this, which was also used by some Hanoverian regiments, and by French and Dutch chasseurs during the Napoleonic wars.



The *Halbmond* type of bugle horn was normally pitched in D, often sounded with a C crook. Its calls are published in John Hyde's *New and Compleat Preceptor*, and some of them were quoted in operas by Bishop. Continental calls for this and for the subsequent bugles are in Georges Kastner's *Manuel général* (Paris, 1848). Some German and Russian regiments retained the *Halbmond* until past the mid-19th century and today it lives on in parts of north Germany such as Sauerland, serving in the *Brackenjagd* in its original capacity as a hunting horn.

In America, the terminology is less straightforward: the British type of bugle is sometimes known as the 'cavalry bugle' while the word 'bugle' is often for a trumpet-like instrument of brass pitched in G and usually provided with a piston valve to lower the pitch by a 4th whereby the written *b'*, *d''* and (flat) *f''* can be added to the natural C chord. This idea was known in France by 1912 and it is probably from there that it spread also to Italy, in the one- to three-valve bugle known as the BERSAG HORN. Combination bugle-trumpets with two bells and switch valve were patented in England and France between 1855 and 1873, but did not win success.

Buglhat [Boglhat, Bulhat], **Johannes de** (*fl* 1528–55). Music printer. He joined the chapel of Renée of France, Duchess of Ferrara, as a clerk between 1525 and 1528, and probably travelled with her household from Paris to Ferrara in September 1528. A Ferrarese document of 1549 describes him as a priest of the diocese of Clermont and almoner to Renée, and he also served there as clerk of the chapel and surgeon to Renée until 1555 or later. Together with his associates Henrico de Campis and Antonio Hucher, he was one of the first to use the single-impression method of music printing in Italy, a technique introduced to Paris early in 1528 by Attaingnant, which Buglhat may have learnt before leaving France. Campis, possibly related to the Lyonnaise music printer Jannot de Campis (*fl* 1504–10), is listed on the rolls of the Ferrarese court chapel as a singer from 1534 until 1549. Hucher was a wood engraver, to whom the illustrations in Messi Sbugo's *Banchetti* (Ferrara, 1549) have been attributed.

Their earliest publication, *Liber cantus* (1538), was printed by Francesco Rossi (Rubeus), with Buglhat, Campis and Hucher providing 'expensis & labore'. In 1540 Campis published Alfonso della Viola's second book of madrigals and then seems to have withdrawn from publishing. Buglhat and Hucher continued as partners, printing non-musical works and two more books of madrigals (1548 and 1550). A 1558 reprint of one of the madrigal books was described by Vogel, but no copy is known to survive.

In the dedication to Antonio Gardano's *Mottetti del frutto a sei voci* (1539), Buglhat, Campis and Hucher were attacked for impinging on Gardano's rights, but the exact nature of the rivalry is unknown, as there seems to have been no direct piracy. The two publishing houses may have been competing for the right to use the new printing process, which was just becoming established in Italy. Buglhat's first publication, the *Liber cantus*, had appeared in March 1538, one month before Gardano's earliest surviving publication, but the lack of a precise date for Gardano's lost first edition of Arcadelt's madrigals prevents definite priority being assigned to Buglhat.

MARY S. LEWIS

Buhel, Christoph. *See* BUEL, CHRISTOPH.

Buhl, Joseph David (*b* nr Amboise, 1781; *d* after 1828). French trumpeter. He was successively a member of the band of the Garde Parisienne (organized 1792) and of the Consuls' Grenadiers de la Garde, and had charge of the short-lived Ecole de Trompette at Versailles for the cavalry (1805–11). In 1814 he was appointed conductor of the band of the Gardes du Corps by Louis XVIII, and was decorated by the Légion d'Honneur; he was also first trumpet at the Paris Opéra and the Théâtre Italien (1816–25).

Buhl, whom Dauverné called 'the outstanding trumpeter of his age', lived in the period immediately preceding the advent of valves, a dim period for trumpeters. His *Méthode de trompette* (Paris, 1825), according to its author the first elementary method, was written both for the *trompette d'harmonie* or orchestral trumpet in G, which employed crooks and for which he gave a table of stopped notes (a semitone below the notes of the harmonic series), and for the *trompette d'ordonnance* (*trompette de fanfare*) or cavalry trumpet, which was in E♭ and did not make use of stopping. The method was plagiarized by José de Juan Martinez. Buhl is best known, however, for revising the traditional French military signals (1803–29); even today, his *Ordonnance de trompette pour les troupes à cheval* forms the principal body of signals of the French cavalry.

EDWARD H. TARR

Bühler [Bihler, Pühler], **Franz** [Gregor] (*b* Unterschneidheim, nr Wallerstein, 12 April 1760; *d* Augsburg, 4 Feb 1823). German composer. He received his musical education at the minorite monastery of Maihingen, at the Benedictine abbey of Neresheim and at the Jesuit school in Augsburg in 1777. In 1778 he entered the Benedictine abbey of Donauwörth; he took vows in 1779, adopting the monastic name of Gregor, and was ordained priest on 5 June 1784. After obtaining permission to live outside the community in 1794, he became Kapellmeister and composer at the Palazzo Menz in Bolzano, and in 1798 at the latest assistant organist at the parish and collegiate church there. From 1801 to 1822 he was Kapellmeister of Augsburg Cathedral. As a composer Bühler was influenced especially by J.M. Demmler and Antonio Rosetti. Settings of the mass are at the heart of his extensive output, which ranges from simple hymns to the monumental Passion oratorio *Jesus, der göttliche Erlöser*

and includes over 100 publications; careful instrumentation, attention to the interpretation of words and distinct early Romantic tendencies are notable features of his music. After the secularization of 1802–3, Bühler composed sacred works (mostly published by Lotter and Böhm of Augsburg) suitable for simple circumstances. Interest in his sacred music was aroused in America and England when a transcription of a Mass in F was published by the Handel and Haydn Society of Boston in 1832. Between 1840 and 1876 other arrangements and vocal scores were published in London, Paris and Cincinnati, and were distributed in Boston, New York and Mexico. Bühler also wrote several pedagogical and theoretical works.

WORKS

HERMANN ULLRICH

Buhlig, Richard (*b* Chicago, 21 Dec 1880; *d* Los Angeles, 30 Jan 1952). American pianist. After early training in his native Chicago, he completed his studies in Vienna with Leschetitzky from 1897 to 1900. His début took place in Berlin in 1901, following which he undertook an extensive tour of Europe, including a series of concerts in London in 1906. The following year he made his mature American début with the Philadelphia Orchestra in New York. In 1918 he joined the staff of the Institute of Musical Arts in New York to teach the piano, a post he held for a short period before returning to Europe. He later settled in Los Angeles, where he devoted much of his time to teaching, his pupils including the composers Henry Cowell and John Cage as well as Leon Kirchner.

Although Buhlig gave the American première of Schoenberg's *Drei Klavierstücke* op.11 and was the dedicatee of the third version of the *Fantasia contrappuntistica* by Busoni, whom he had met in Berlin during his first European concert tour, it was as a performer of Bach, of whose works he made transcriptions, the late sonatas of Beethoven and, especially, the works of Brahms that he was most highly regarded; he also had an affinity with the music of Franck. Private recordings made in Los Angeles in 1938 of Beethoven's Hammerklavier and op.109 sonatas as well as Bach's Chromatic Fantasy and Fugue, reveal a powerful technical and intellectual command underpinned by a strong rhythmic control and a rich variety of timbre and deep tone.

CHARLES HOPKINS

Bühmler, Georg Heinrich. *See* BÜMLER, GEORG HEINRICH.

Buhr, Glenn (Arthur) (*b* Winnipeg, 18 Dec 1954). Canadian composer and pianist. He studied at the University of Manitoba (MusB 1979), the University of British Columbia (MM 1981) and the University of Michigan (DMA 1984); his principal teachers included Casey Sokol, Lawrence Ritchie, William Benjamin, Stephen Chatman, Leslie Bassett, William Albright and William Bolcom. He was appointed professor at Wilfrid Laurier University (Ontario) in 1984. He has served as composer-in-residence for the Winnipeg SO and as curator of its New Music Festival (1990–96), which he co-founded with Bramwell Tovey in 1990.

Buhr's music is largely tonal in orientation but frequently includes unconventional juxtapositions of complex chords; ostinato figures often anchor harmonic constructions. *Beren and Lúthien* (1984) and *Lure of the Fallen Seraphim* (1986) exhibit his brilliant orchestral imagination and his ability to plan distinctive large-scale forms. *Musikalisches Opfer* (1988) shows the influence of jazz (Buhr sometimes performs as a jazz pianist). His handling of large forces and his control of sonority and timbre are particularly evident in the *cathedral songs* for children's chorus, brass, orchestra and percussion (1995). Also notable are the solo concertos for piano, bassoon, viola and trumpet, the double concerto for flute and harp, and the triple concerto for violin, clarinet and piano.

CARL MOREY

Buini [Bovina, Buina], **Giuseppe Maria** (*b* Bologna, 2 Feb 1687; *d* Alessandria, 13 May 1739). Italian opera composer and librettist. Of humble Bolognese origin, he was first trained as an organist. In 1718 he was active as an impresario with G.M. Alberti in Lugo di Romagna. He was admitted to the Accademia Filarmonica as an organist on 11 December 1721 and promoted to the rank of composer on 21 May 1722. Between 1716 and 1737 he composed nearly 40 operas, writing his own librettos for several of them. In 1720 he published a collection of chamber sonatas, practically his only surviving music. He married a singer, Cecilia Belisari, daughter of the famous *buffo* singer Francesco Belisari. In 1723 he became manager of the Teatro Formagliari in Bologna (a copy of the lease is in *GB-Cfm*) where he produced his own operas and those of other composers. With his wife, he went to Mantua in 1729 in the service of the Landgrave of Hesse Darmstadt; he returned to Bologna in 1730, serving the Accademia Filarmonica as *principe* that year and also in 1735.

Only two arias from his considerable operatic output have survived. However, several librettos exist (*I-Bc*, *US-Wc*). These reveal an original flair, particularly for comic opera. He often wrote in Emilian (Bolognese) dialect, which confers a certain provincialism on the works but at the same time helps towards a vivid delineation of the comic characters. Probably he was influenced by Benedetto Marcello's satire *Il teatro alla moda*, for many of these librettos are caricatures of the world of serious opera, and ironic and satirical exposures of its foibles. Buini's versification is frequently careless, and his plots puerile; but this is unsophisticated comedy on a level with the French vaudeville. Especially notable is his satirical *Il Malmocor* (later version entitled *Artaganamennone: tragichissimo dramma per musica*), which is a direct parody of the heroic melodrama. His direct simplicity and effective use of dialect may well have influenced the librettos of Goldoni, since many of Buini's operas were produced in Venice. As to his musical language, one can only make hypotheses based on a few secondary sources. Penna relates that 'a rare eccentricity and invention, and an excellent natural aptitude for composing won him universal esteem', while a contemporary satire characterized Buini's stage music by his use of 'tarantella airs easy to the ear' (the same source suggests also that many of the operas for which he composed music were actually pasticcios, which would partly explain the rare survival of scores). Such comments would suggest the frequent use of simple song structures and an attractive, catchy and effective idiom. It is probable that Tosi's polemic against composers of 'canzonette' was aimed at Buini, among others. In such a context his presentation of a difficult and erudite composition for admission to the Accademia Filarmonica could be interpreted as an attempt to silence possible accusations of incompetence.

His op.1 is a collection of ten sonatas in binary form, each with three or four movements. Some are written idiomatically for strings; others are definitely in a harpsichord style. The *stile galante* of these sonatas is noticeable in the absence of counterpoint and in the clear opposition between sweet melodies and accompaniment.

WORKS

OPERAS

drammi per musica in three acts, unless otherwise stated, all lost

BF – Bologna, Teatro Formagliari
BMR – Bologna, Teatro Marsigli-Rossi
VM – Venice, Teatro S Moisè

L'ipocondriaco (G.C. Villafranchi), Florence, Pratolino (Villa Medici), 1695
Armida abbandonata (F. Silvani), BF, 16 Aug 1716
Il mago deluso della magia (divertimento per musica, A. Zaniboni), BF, carn. 1718
La pace per amore (A. Schietti), VM, carn. 1719, collab. F. Chelleri; rev. as Il nemico amante, VM, carn. 1724
La caduta di Gelone (F. Rossi), Venice, S Angelo, aut. 1719
Armida delusa (Buini), Venice, S Angelo, carn. 1720
Gl'inganni fortunati (pastorale per musica, B. Valeriani), VM, May 1720
Apollo geloso (pastorale per musica, P.J. Martelli), Lugo, Aug 1720
Il filindo (pastorale eroica, P. d'Averara), VM, 19 Oct 1720
Cleofile (A. Zaniboni), VM, carn. 1721
Amore e maestà (A. Salvi), BMR, 26 Dec 1721
Pithonessa sul Monte Olimpo, BMR, carn. 1722
Gl'inganni felici (A. Zeno), Vm, aut. 1722
La fede ne'tradimenti (G. Gigli), Faenza, Accademia de'Remoti, 21 June 1723
Amor non vuol rispetti, BMR, carn. 1724
La ninfa riconosciuta (Silvani), BF, carn. 1724
Il Tolomeo re d'Egitto (Silvani), Verona, Accademia, carn. 1724
La vendetta disarmata dall'amore (A. Passerini), BF, carn. 1724
L'Agrippa tetrarca de Gerusalemme, Milan, Regio Ducal, 1724
La Cleonice, BF, carn. 1725
Li sdegni cangiati in amore (Silvani, rev. ?Buini), VM, carn. 1725
L'Adelaide (Salvi), BF, spr. 1725
Il savio delirante (divertimento comico per musica, Buini), BF, carn. 1726; as Le frenesie d'amore, VM, May 1726
Albumazar (Buini), BF, carn. 1727
Il potestà di Colognole (G.A. Moniglia), Florence, 1727
Il Malmocor (dramma tragichissimo per musica, Buini), BMR, carn. 1728; as Artaganamennone, VM, Ascension 1731
La forza del sangue (?Buini), BMR, spr. 1728
Teodorico (Salvi), BF, aut. 1728
Chi non fa non falla (divertimento comico per musica, Buini), BMR, carn. 1729
I diporti d'amore in villa (scherzo drammatico, A.N. Monti), BMR, carn. 1729
Endimione (F. Mazzari), BF, Aug 1729
Amore e gelosia (dramma pastorale per musica, A. Aureli), S Giovanni in Persiceto, Accademia dei Candidi Uniti, aut. 1729
La maschera levata al vizio (Silvani), BMR, carn. 1730; as Il filosofo ipocrita, BF, carn. 1735
Fidarsi è bene, ma non fidarsi è meglio (divertimento comico per musica, Buini), VM, Ascension 1731
Gli amici (pastorale per musica, P.J. Martelli), Bologna, spr. 1734
La Zanina maga per amore (dramma comico per musica, Buini), S Giovanni in Persiceto, Accademia dei Candidi Uniti, aut. 1737
2 arias, 1720, *D-Mbs*
Doubtful: Andromaca, Ferrara, Scroffa, carn. 1723; Al fatto ci vuol pazienza, Rome, Tordinona, 1753, according to Mamczarz
Collaborations: L'ortolana contessa, Venice, S Angelo, Ascension 1732, collab. others; Il Regno posposto ad Amore (dramma pastorale), Reggio, carn. 1732; Il protettore alla moda (Buini), VM, aut. 1747, collab. B. Galuppi and others; Il re dispietato (Buini), Venice, S Angelo, 1747

OTHER WORKS

Suonate da camera, hpd/(vn, vc), op.1 (Bologna, 1720)
Laudate Dominum, 1721; examination piece for Accademia Filarmonica, cited in *Catalogo del archivio della R. Accademia filarmonica, I-Bc*
S Petronio vescovo e protettore di Bologna (orat, A. Zaniboni), Bologna, 1721; cited by U. Sesini in catalogue, *Bc*
Chi ben ama ben sceglie (cant., Catena), Ravenna, 1722, lost
Il giocatore (int), Bologna, Formagliari, spr. 1725, collab. others
1 canzona in La ricreazione spirituale (Bologna, 1730)

ANNE SCHNOEBELEN/SERGIO DURANTE (with MARC VANSCHEEUWIJCK)

Buini, Matteo (*fl* Bologna, 1748–9). Italian singer and composer. This minor figure in 18th-century comic opera is noted here mainly to distinguish him from his more illustrious predecessor, Giuseppe Maria Buini. Librettos refer to him as 'bolognese', but no relationship has been traced to either G.M. Buini or the singer Rosalba Buini. He sang in the 1748 production of Cocchi's *La maestra* in Modena. For Carnival 1748–9 in Bologna he reset the recitatives and 'almost all' of the arias in *La virtuosa corteggiata da tre cicisbei ridicolo* for performance at the

Teatro Formagliari; the original opera was *Li tre cicisbei ridicoli* (text, V.A. Vasini; music, N. Resta; Bologna, 1748). The following autumn he did the same for Parma with *Lo scolaro alla moda* (apparently from the original A. Palomba–Latilla–Pergolesi work *Orazio*, Rome, 1738). He did not sing in either of these productions, the music of which has been lost. The attribution sometimes made to Matteo Buini of *Il protettore alla moda* (Venice, 1747) is mistaken: it was a whole or partial resetting by Galuppi of G.M. Buini's *Chi non fa non falla* (Bologna, 1729).

JAMES L. JACKMAN

Buisine [buysine, buzine, busine, etc.]. Medieval name for a herald's trumpet; it was long and straight with a cylindrical or slightly conical bore. Pictures indicate that the instrument was often one to two or more metres long, and that its tube of brass or silver was made up of several joints, their junctions concealed by ornamental bosses. The bell joint was flared to varying degrees. Buisines are frequently shown bearing the banner of a noble person.

The instrument was apparently introduced into Europe from the Islamic world as a result of contact between Christians and Saracens during the Crusades. In literature before the 13th century the word 'buisine' seems to have had a general meaning. It first appears in the *Chanson de Roland* (*c*1100); the line there, 'Si fait suner ses cors et ses buisines', suggests that the author was distinguishing between horns and trumpets. More probably, however, buisines referred to both types of instruments, and perhaps particularly to the long heavy war-horns made of animals' horns, wood, bronze or iron. It obviously relates to the earlier word, BUCCINA.

Associated with drums, and particularly with small kettledrums (NAKERS), or with shawms, buisines – often in pairs – were probably used to play fanfares and simple melodies at military functions, meals and for ceremonial occasions, but we have no certain knowledge either of their repertory or of their playing technique. Buisines continued to be made into the 16th century, by which time they had probably become mere symbols of social prestige, traditional adjuncts of courtly ceremony. The German word for trombone, *Posaune*, is a corruption of 'buisine', by way of 'busaun'.

HOWARD MAYER BROWN

Buisson, Du [Buissons, Des]. *See* DU BUISSON.

Bujarski, Zbigniew (*b* Muszyna, 21 Aug 1933). Polish composer. He studied composition with Wiechowicz, graduating from the State Higher School (now the Academy) of Music in Kraków in 1960. In the early 1970s he started teaching at the school and from 1978 to 1986 he was dean of composition; he was appointed full professor in 1992. He has won prizes at the UNESCO International Composers' Rostrum (for *Contraria* in 1967 and *Musica domestica* in 1978) and in 1991 received the award of the Alfred Jurzykowski Foundation of New York. In 1958, while still a student, Bujarski became the first Polish composer to investigate microtonal clusters, the harmonic and melodic properties of which he termed 'synthetic monophony'. Subsequently he adopted a more conventional Polish response to Western serial and aleatory practices, namely an expression based on sound effects and textural writing that became collectively known as 'sonorism'. *Contraria* (1965), however, demonstrates Bujarski's individual approach: seductive rather than aggressive, its extended instrumental techniques and swirling clouds of sound form an impressionistic tapestry of several layers. His *Musica domestica* and *Concerto per archi I* are intimate, lyrical pieces, partly on account of their quasi-modal or -tonal material. In *Ogrody* ('Gardens'), written as a distraction from the political upheaval in Poland during the early 1980s, Bujarski recaptures the sensuality of Szymanowski's song cycles. Other vocal-instrumental works place an emphasis on expressing a humanitarian or spiritual dimension, particularly in works such as the large-scale oratorio *El hombre*. The passion of his convictions and the luminosity of his musical vocabulary – often heterophonic and arguably descended from technical experiments he made in 1958 – characterize much of his output. Bujarski's parallel activity as a painter is reflected in a number of works, notably *Similis Greco I*, a tribute to the visionary Greek artist.

ADRIAN THOMAS

Bukofzer, Manfred F(ritz) (*b* Oldenburg, 17 March 1910; *d* Oakland, CA, 7 Dec 1955). American musicologist of German birth. He entered Heidelberg University to study law but also took music courses under Besseler and soon

decided on musicology as a career. In 1930 he went to Berlin to further his musical studies at the Stern Conservatory and at the Hochschule für Musik under Schering, Wolf, Sachs and Blume (musicology) and Hindemith (composition). In 1933 he entered Basle University, where he took the doctorate under Handschin (1936). In 1937 he was lecturer at the Volkschule of Basle University. He emigrated to the USA in 1939, later becoming an American citizen. After a year as lecturer at Western Reserve University in Cleveland (1940–41), he was appointed assistant professor of music at the University of California, Berkeley, in 1941. He was made associate professor in 1944 and full professor in 1946.

Bukofzer's doctoral dissertation firmly established his reputation as one of the most brilliant scholars of his generation. Based on the writings of English and continental theorists of the 15th century, it showed that a style of improvised singing practised in England was distinct from the continental fauxbourdon practice and that this practice strongly influenced the art music of English composers, who created a style recognized as distinctively English by contemporary continental musicians. There followed many other pioneering studies on English music of the 14th and 15th centuries. Bukofzer was the first to point out the pre-eminence of Dunstable in the first half of the 15th century and produced the first complete edition of his works. He devoted intensive study to documents of pre-Tudor English polyphony, amplifying and in some cases revising earlier views. The first four essays of his *Studies in Medieval & Renaissance Music* (1950), together with his chapters in *The New Oxford History of Music*, constitute a valuable account of musical style in England from the 14th century to the mid-15th.

Bukofzer's interests extended well beyond English music of the Renaissance. His first article, published when he was only 19, dealt with jazz, and he also did research in ethnomusicology. He was a capable conductor and directed many performances of little-known music of all periods in Berkeley. Although he disclaimed being a specialist in Baroque music, his *Music in the Baroque Era* (1947) was long a standard survey. Like his shorter studies, it shows an ability for clear organization and for establishing systems of classification which are still valid because based on a highly informed knowledge of musical style. Four sentences from the preface precisely state his general objectives in writing about music:

> The ideas that underlie musical styles can only be shown in a factual stylistic analysis that takes music apart as a mechanic does a motor and that shows how musical elements are combined, how they achieve their specific effect, and what constitutes the difference between externally similar factors. This analysis is at once historical and 'technological' and takes beauty for granted. Those writers to whom the description of music is no more than a matter of elegant variation in judiciously chosen adjectives may be shocked to learn that the word 'beautiful' does not occur in this book. My aim has been not the expatiation on the obvious but the explanation of the specific musical results of baroque style.

This 'stylistic' approach was highly influential in musicological writing, to the considerable benefit of the discipline, and is well demonstrated in 'Caput: a Liturgico-Musical Study' (*Studies in Medieval & Renaissance Music*, 217–310). Starting with an apparently small and specialized topic, an unidentified cantus firmus used in three masses, this study expands to illuminate virtually every important musical aspect of the last half of the 15th century.

Bukofzer was keenly interested in the nature and purpose of musicology and its relationship to other academic disciplines. At the end of his life he presented to his doctoral seminars the first stage of a large-scale outline of the field, setting forth its major divisions and subdivisions and discussing their relationship and relative importance; some of this work appears in *The Place of Musicology in American Institutions of Higher Learning* (1957). Throughout his career he was concerned with promoting the activities of musicological organizations from the local to the international level; he was the first American chairman of the committee for the publication of RISM, helped to found the yearbook *Annales musicologiques* and represented musicology in the American Council of Learned Societies.

The Bukofzer Collection of the Music Library of the University of California, Berkeley, contains many of his unpublished notes and transcriptions.

SYDNEY ROBINSON CHARLES

Bukoreshtliyev, Angel (*b* Plevnya, nr Drama, 31 Jan 1870; *d* Plovdiv, 3 Jan 1950). Bulgarian composer, conductor, pianist and ethnomusicologist. He received his musical training at the Prague Organ School, where he graduated in 1890. He was among the first musicians to work professionally after Bulgaria's liberation from the Ottoman empire in 1876. Like Dobri Khristov and other composers he collected previously unresearched folksongs from various regions of the country. These collections played an important role in popularizing traditional music among the urban middle classes, but they were also a significant source for Bukoreshtliyev's own creative work. The most important of his compositions were the ten choral suites of the type known as *kitki* (garlands); these depended for their effect on the contrasts between folksongs and were widely disseminated in the late 19th century.

Bukoreshtliyev was also a prominent choral conductor, who made an important contribution to the spread of Bulgarian choral music through the choir he founded in Plovdiv. Among his compositions also are *Elf Lieder* for male chorus (1927) and *Zwei Lieder* for female chorus (1945–6).

Bulgaria (Bulg. Republika Bulgaria). Country in south-eastern Europe. Bulgaria is a country of 110,994 sq. km with a population of approximately 9 million people, over 60% of whom live in urban centres. The national language is Bulgarian, a south-Slavic language. Orthodox Christianity is the official religion. Minority groups include Pomaks (Slavic Bulgarian Muslims), ethnic Turks, Macedonians, Christian and Muslim Roma, Jews, Albanians, Vlachs and Armenians.

I. Art music. II. Traditional music.

I. Art music

Bulgarian musical culture began to take shape when the Bulgarian state was founded in 681, and its character was initially determined by the interaction of three fundamental ethnic groups: the Slavs (who were in the majority), the Proto-Bulgarians and the remnants of the assimilated ancient Thracian population. After the introduction of Christianity in 865 the *starobalgarskiyat napev* (old Bulgarian church chant) came into being, at first influenced by Byzantine chant. Kliment, Naum and several other followers of SS Cyril and Methodius restored the Slav chantbooks which had been destroyed in Moravia, and created new ones.

The musical traditions were handed down from generation to generation and the old Bulgarian chant was gradually formed: it took on certain distinctive characteristics, primarily because of the discrepancy between the number of syllables and the differences of stress in the Greek and Bulgarian languages, and also because of the influence of folk music. Among the few musical works to have survived are the 9th-century *Keramichna plochka* ('Ceramic tile') from Preslav, the 11th-century *Kupriyanovi listove* ('Kupriyan's sheets'), the 12th-century *Bitolski triod* ('Bitolya triod'), the 13th-century *Bolonski psaltir* ('Bologna psalter') and *Draganov miney* ('Draganov's menologion'; also known as the *Zografski trifologii*, 'Zograph triphologion'), and the *Moldavski rakopis* ('Moldavian manuscript'), dated 1511. The Bulgarian monasteries on Mount Athos, such as Zograf and Pavel, played an important part in the cultural collaboration with Byzantium; musically gifted children from the lands north of the empire were trained in Constantinople and often stayed on in the service of the Greek churches and monasteries (a notable example is JOANNES KOUKOUZELES).

Until the 19th century secular musical culture in Bulgaria was dominated by folk music, but after the liberation of Bulgaria in 1878 from the Turks, who had ruled the country since the late 14th century, professional music-making developed rapidly. The first Choral Society, Balgarski Pevcheski Tsarkoven Khor (Bulgarian Church Choir), which had been established in Ruse in 1870, was the expression of a protest against the Greek church-singing tradition. Musical activities were unified by Balgarskiyat Muzikalen Sayuz, the Bulgarian Musical Union (1903–41). In 1901 the first professional union of musicians was established. Balgarskiyat Pevcheski Sayuz, the Bulgarian Choral Union, formed in 1926, organized the country's amateur choir activities. It also funded the activities of the national choirs, orchestras and chamber ensembles.

Cultural clubs, which had been of considerable importance up to the liberation, went on playing an important role in amateur musical activities. Concerts by Bulgarian and foreign performers were organized by private bureaux called 'kontsertni direktsii' (concert management boards). Between 1933 and 1944 Bulgarian composers were linked through the association Savremenna Muzika (Contemporary Music). The first music school in Sofia was opened in 1904, becoming the Darzhavna Muzikalna Akademiya (State Music Academy) in 1921; the Operna Druzhba (Opera Society), founded in 1908, became the Sofiyska Narodna Opera (Sofia National Opera) in 1921. Military bands, amateur choirs and various professional orchestras were founded, notably the Balgarska Narodna Filkharmoniya (Bulgarian National Philharmonic, 1924), the Darzhaven Simfonichen Orkestar (Academic SO, 1928; renamed the Tsarski Voenen Simfonichen Orkestar, Royal Military SO, 1936) and the Sofiya Darzhavna Filkharmoniya (Sofia State Philharmonic, 1946).

Although Bulgarian music has not been as widely disseminated abroad as the music of most other eastern European countries, it has flourished domestically since

the late 19th century, when Nikolay Atanasov (1886–1969) composed the first Bulgarian symphony and such composers as Georgi Atanasov (1882–1931) and Panayot Pipkov (1871–1942) produced operas, and solo and choral songs on folk subjects. After World War I and the September Uprising (1923), a new stage in the development of Bulgarian music began. Composers professionally trained in Germany, France, Austria and Italy, who had assimilated the European tradition, returned to Bulgaria in order to found a Bulgarian musical tradition. They made it their aim to create a national Bulgarian style, drawing both on contemporary trends and the folklore traditions of the country. Composers such as Pancho Vladigerov, Lyubomir Pipkov, Marin Goleminov, Veselin Stoyanov, Dimitar Nenov, Parashkev Khadzhiev, Petko Staynov and Georgi Dimitrov created the basis of the Bulgarian musical tradition in all genres, and through their teaching were a prime influence on the generation of composers after World War II.

After the socialist revolution in 1944, the new social and cultural situation led to changes in the development of Bulgarian musical life. All cultural activities were centralized and acquired a strong ideological orientation. Socialist realism and the slogan 'The more among the people, the closer to life!' became the order of the day. The new state performing institutions were responsible for organizing concerts and popularizing music. Composers and musicologists, all belonging to the Union of Bulgarian Composers, consolidated the new socialist musical culture and organized festivals of Bulgarian music, as well as musical education and criticism sessions. State opera and operetta companies and symphony orchestras (foremost among them the Simfonichem Orkestar na Balgarskoto Radio i Televiziya (Bulgarian Radio and Television SO, 1949)) were subsidised by the state, and their activities were directly under state control.

The Committee of Culture and the Arts presided over the work of musical educational establishments such as the Balgarska Darzhavna Konservatoriya, or BDK (Bulgarian State Conservatory), and state music schools. Amateur groups received support from trade-union funds, community centres and the Committee of Culture and the Arts. The state also controlled other activities, such as the production and distribution of records and music scores.

The development of Bulgarian music between 1944 and the beginning of the 1960s was determined by the imposition of a new model of national culture. This was the time of revolutionary change, of realism. The neo-Romantic pathos found in Bulgarian music of the 1930s and 40s was replaced by an emphasis on folklore as the expression of a democratic aesthetic, particularly in genres such as cantatas, oratorios and other choral work. Most young composers were unable to study abroad, and contact with contemporary European trends was inevitably limited. Leading representatives of new trends in Bulgarian music included Konstantin Iliev, Lazar Nikolov, Alexandar Raychev, Simeon Pironkov, Krasimir Kyurkchiyski, Vasil Kazandzhiev and Ivan Spasov.

With the relaxation of the political situation in the 1960s, composers enjoyed greater aesthetic freedom. The reinterpretation of folklore and the adoption of many of the experiments carried out in the 1960s and 70s led to a new stage in the development of Bulgarian music. The analytical, anti-Romantic aesthetic also characterized the generation which emerged at the end of the 1970s and in the 1980s, including Stefan Dragostinov, Emil Tabakov, Plamen Dzhurov, Bozhidar Spasov, Alexandar Kandov, Rumen Baĭozov, Yuliya Tzenova and Neva Krasteva. Familiar with modern trends, the majority of these composers were able to create an individual style, independent from the totalitarian regime's realist aesthetic. Their work appeared in contemporary music forums around the world and won prestigious prizes.

During the 1970s and 80s several Bulgarian choirs achieved international fame, while singers such as Nikolay Gyaurov, Rayna Kabaivanska, Anna Tomova-Sintova and Gena Dimitrova were among the leading names in the international opera world. The Sofiyskata Filharmoniya (Sofia Philharmonia), Sofiyski Solisti (Sofia Soloists) and many individual soloists were enthusiastically received abroad, as were numerous folk ensembles.

After 1989 the centralization of the totalitarian regime was replaced by a democratic system. The state could no longer subsidise the many institutions and activities, and could only provide modest funds for education and a few national institutions. Nevertheless, private initiatives developed and sponsorship became the chief means of subsidy in the music profession. Foundations now supported activities which under the former regime had encountered ideological opposition.

With the lifting of travel restrictions many young artists chose to work abroad; these included Bozhidar Spasov (Germany), Alexandar Kandov (Spain), Simeon Pironkov jr (Austria) and Tsvetan Dobrev (France). Others remained in Bulgaria, notably the composers Georgi Arnaudov and Petar Petrov.

II. Traditional music

The hilly and mountainous topography of Bulgaria made contact between villages difficult and at certain times of year impossible. Thus communities evolved in relative seclusion. This, coupled with the country's long rule by, and isolation in, the Ottoman Empire, aided both the preservation and development of great cultural diversity. The country is divided into six ethnographica regions: the Shop, or Sofia district; Pirin-Makedoniya in the south west; Rodopa, comprising the Rhodope Mountainregion along the southern border; Trakiya, the central Tracian plain, Dobrudzha, in the north east; and the area known simply as 'Northern Bulgaria' in the north west.

1. THE NATIONAL RENAISSANCE AND DEVELOPMENT OF MUSIC ETHNOGRAPHY. Bulgarian musical ethnography originated in the *Vazrazhdane*, the 19th-century cultural renaissance which helped form a unified Bulgarian nationalist ideology. This period witnessed the institutionalization of education, the standardization of literary Bulgarian and the establishment of the periodical press, local library clubs and reading rooms whose activities facilitated later developments in music and theatre. Major literary figures of the time collected and used folkloric materials in their writings. Several, like the brothers Dimitar Miladinov (1810–62) and Konstantin Miladinov (1830–62), published song text compilations that were characteristic of Bulgarian scholarship up to the late 1980s: the collection, documentation and systematization of *narodni pesni* ('folk songs').

By the early 1900s scholars began publishing the melodies of *narodni pesni* together with their texts, which in turn promoted theoretical studies of their musical characteristics by academics such as Dobri Khristov (1875–1941). In 1926 Sofia's ethnographic museum established a department of *narodna muzika* ('folk or traditional music') directed by Vasil Stoin (1880–1938) who, with such co-workers as Stoyan Dzhudzhev (*b* 1902) and Raina Katsarova (1901–84), instigated the systematic collection, documentation and analysis of *narodna muzika* throughout Bulgaria. Beginning in the late 1920s their findings were published in volumes called *sbornitsi* (sing. *sbornik*). Although scholars began to use recording devices in 1939, they did not employ tape recorders widely for collection purposes until 1954. In 1948 the Institute for Musicology was founded within the Bulgarian Academy of Sciences incorporating the ethnographic museum's music department and personnel two years later.

The institute's *sbornitsi* are the cornerstone of 'musical folkloristic science' as ethnomusicology was known until the late 1980s, and were used extensively by contemporaneous composers to form a national school of composition. The collections also generated important studies of indigenous music theory, including rhythmic patterns, diaphony and pentatonicism; specific genres such as epic recitative; organology; and the music of expatriate Bulgarian communities and Bulgarian Muslims. By the mid-1960s numerous publications addressed topics such as state-sponsored folk ensembles, their festivals, repertory and relationship to the mass media. Concomitantly, this period witnessed the foundation of Bulgarian ethnochoreology. These themes prevailed until the mid-1980s, when the scope of publications broadened to include such subjects as urban musics, popular culture and the music of minority communities.

Ethnomusicological scholarship has long been supported by two archival collections housed within the Institute for Musicology: a large library of scores, books and periodicals; and an ethnographic archive containing more than 300,000 notated or mechanically recorded songs and instrumental melodies, and 6000 videotaped examples of indigenous dances and customs accompanied by music. As a result of perestroika, the institute was renamed the Musical Sector of the Institute of Art Studies in 1990, but still retains its ethnographic archive.

2. CHARACTERISTICS OF PRE-SOCIALIST MUSICAL CULTURE, 1800–1944. Despite its diversity, certain basic characteristics typify the performance practice of 19th- and early 20th-century village music throughout Bulgaria. This music was an oral tradition performed for calendrical and life-cycle rites, during work and for entertainment. Contemporary scholars and musicians describe such music as 'authentic', and 'traditional', and although Bulgarian society experienced many changes after 1944, elements of traditional music continue to underlie contemporary music-making.

(i) Gender, genre and labour. Songs formed the basis of village musical culture. Bulgarians believe that their instrumental traditions developed in emulation of singing. This belief was expressed metaphorically and in song texts that praised the vocal quality of instrumental performance, such as *Kavalat sviri, govori* ('as the flute plays, it speaks'). Playing instruments and singing were otherwise considered separate, gender-specific activities. Instrumentalists almost never accompanied singers; while a singer sang songs (*pevitsa pee pesni*), a village musician played instrumental tunes (*svirach sviri svirni*), melodies (*melodii*), pieces (*piesi*) or dance music (*khora*). Women rarely played indigenous instruments, a convention still prevalent. Although it was not uncommon for men to sing, women acted as the primary bearers of the singing tradition.

The reason for this gender specificity derives from the division of labour in village life, which in turn prescribed the context and manner in which musical skills were acquired. Men were engaged predominantly with animal husbandry; women with domestic and agricultural work. As herders followed their livestock from pasture to pasture, they entertained themselves by playing music, especially on aerophones like the *kaval* or *duduk*, considered shepherds' instruments. Their melodies blended with the tinkling of bells (*zvantsi*) hung around the necks of their animals. Carefully chosen by shepherds for their clear tone in a range of sizes, these bells not only identified one herd from another but formed an integral part of the pastoral soundscape. As one song text states, 'He played on a mellifluous *kaval*, his silvery *zvantsi* accompanying him'.

Herding left men's hands relatively free to play instruments. Boys absorbed instrumental technique through individual experimentation, initially with whistles and then with more complex instruments. They observed older, more experienced musicians, eventually learning enough to play along with them at local celebrations such as weekly dances.

Women's hands, however, were continually occupied with housework, food preparation, textile production and work in the fields. They utilized their voices to accompany their work and express their emotions. Girls mastered songs by listening to other women, especially their older female relatives, following the lyrics and embellished contours of unfamiliar songs until they, too, could perform them.

(ii) Seasonal musics. For villagers musical performance was not a profession but an integral aspect of everyone's daily experience inseparable from the community's social life. Music accompanied every aspect of labour. Women sang songs while cultivating produce, as they walked to and from the fields or orchards, during short breaks and at lunch. Songs performed while doing field work were usually slow, sustained, non-metrical and executed with

an open throat so that the resultant intense, ringing sound would reach women working in neighbouring plots. Songs performed during periods of rest, on the other hand, were often rhythmic, lively and humorous. In both cases the songs' lyrics were frequently related to some aspect of the work process (ex.1).

Ex.1 Harvest song (from Todorov, 5/1976)

['Did you reap today all by yourself, little girl?']

During the evening hours of autumn and winter women attended 'bees' (*sedenki*, *tlaki*); in the former to work on their individual handiwork, often spinning or needlework, in the latter to help their host with a particular task, such as shucking corn or stringing tobacco. While working they sang songs and ballads, some of which referred to the specific events of the *sedyanka* (ex.2). Later in the evening the young men of the village joined them, and the *sedyanka* or *tlaka* became an occasion for flirtation and courtship. Young men and women engaged in singing competitions (*nadpyavane*) in which teasing songs (*pripevki*) singled out potential couples. The youths also danced ring, line or chain dances (*khora*, sing. *khoro*) to the accompaniment of their own energetic *khorovodni pesni* ('dance songs'), or instrumental tunes played by the young men.

Ritual songs and dances celebrating calendrical- and life-cycle events were usually performed by groups of singers. Important occasions for male singing were *Badni Vecher* (Christmas Eve) and *Koleda*, when the village men travelled from home to home in festive dress singing antiphonal carols that blessed the livestock, the household or specific members of the family. Stereotypical refrains such as *'koledo le'* or *'oy, koledo, moy koledo'* ('Oh, *koleda*, my *koleda*') distinguished *koleda* songs. Most were also typified by an asymmetrical metric structure, usually 5/16, 7/16 or 9/16 (ex.3).

Koleduvane (the performance of *koleda* traditions) was part of a larger group of mid-winter mumming customs enacted to bring good health, fertility, abundance and luck to the surrounding community. In some of these traditions (*Surva*, *Kukerovden*) men dressed in elaborate masked costumes decorated with sheep- and cow-bells, some of which were enormous. As the participants

Ex.2 *Sedyanka* dance-song (from Todorov, 5/1976)

Ex.3 Christmas song showing the entry of the second group
Antiphonal *Koleda* song with refrain.

(*survakari* and *kukeri*) moved or danced, the cacophony produced by the ringing bells expelled any evil spirits in the vicinity.

Another substantial body of beneficial ritual customs surrounded Lent and Easter. On Lazarus Saturday and Palm Sunday teenage girls wandered throughout the village singing and dancing brisk, laudatory *lazarski pesni* ('Lazar songs'). These *'lazarki'* dressed ornately in costumes symbolizing blooming flowers, a metaphor of their own budding beauty and the healthful good wishes they spread. This custom (*lazaruvane*) was also part of the courtship process, for the *lazarki* made eligible men the target of special singing games in which participants obliquely expressed their interest.

Songs also marked the calendar year in various ways. Some commemorated important Christian holidays, such as the feast day of St George. In Strandzha the feast of St Constantine and St Helena (3 June) was celebrated with a two-day ritual called *Nestinarstvo* that culminated in fire-dancers (*nestinarki*) walking through hot coals in an ecstatic state, bearing icons of these holy figures above their heads. During Lent, when dancing was proscribed, young men pushed girls in swings while they sang songs connected with courtship, good health and a rich harvest. The higher a girl was swung, the higher the wheat would grow. Magical songs likewise brought rain during periods of drought (*Peperuda*) or protected the community from inclement weather in general (*German*). Songs connected to divinatory customs practised by young women foretold whom they would marry.

Music and dance enhanced village weddings, which occurred during winter months when the community, free of the burden of agricultural work, had more time to celebrate. The wedding process, a week-long affair, comprised more than 30 episodes. The bride was fêted by her female friends and relatives throughout the festivities with songs that described her wedding preparations, extolled her beauty, offered her advice or expressed her sorrow at leaving her natal family for a new life (see ex.4). Musical activity accompanied the creation of the wedding banner, shaving the groom, the fetching of the bride by the groom's entourage, the procession to the church and celebratory banquets held after the wedding ceremony.

Deaths, too, were greeted musically. Women improvised laments (*oplakvaniya*) from the moment of death to that of interment. These commented on the life of the

deceased, his or her relationship with the village community and the pain of the lamenters (*oplachki*). Particularly gifted lamenters were prized by the community and sometimes led the other women. Although spontaneous laments were, like the epic songs to which they are related, non-metrical and recitative-like in character, particularly fine examples were sometimes transformed into more lyrical mourning songs or instrumental melodies.

Selections from the Bulgarian epos, a genre that includes heroic epics, and historical and *khayduk* ballads, regaled guests at banquets held in honour of holidays, weddings, engagements, christenings and other important community events. For this reason they were also known as songs performed 'at the table' (*na trapeza*), or for enhancing conviviality (*na moabet*).

The heartland of epic singing was western Bulgaria. Sung by male or female solo vocalists, commonly to the accompaniment of a single instrument (often a *gayda* or *gadulka* that heterophonically imitated the voice by following slightly behind it), heroic epics recounted the legendary escapades of Momchil or of Krali Marko, who fought against the Ottomans in the 14th century. Such epics contain hundreds of lines; these were improvised to a small number of similar, non-metrical melodies falling within the range of a 5th called *epicheski rechitativi* ('epic recitatives') or *trapezni melodii* ('table melodies'). Each verse was distinguished by three features: an introductory, embellished flourish on the syllable *e* or *khey* starting on the melody's highest pitch; several lines of text performed in recitative fashion to sequential, often descending passages; and a melismatic, concluding phrase that, like the introduction, was sometimes marked by a trill-like shaking of the voice called *tresene* (ex.4). The instrumentalist provided an interlude between verses, improvised from the song's melody.

Ex.4 Shop epic song *na trapeza* with wedding text

e, *e*. (i) Zhal-na
go-ro zhal mi e na te - be em na te - be em na mo-ya may-ka
za-shtome e mla-da yo-zhe-ni - la (i) yo - zhe-ni -
- la na da - le-ko da - la.

['E — Sorrowful forest, how unhappy I am to you, and to my mother, because they married me young, to a place far away.']

Historical ballads took figures and events from Bulgaria's more recent past, particularly the struggle for liberation from Ottoman forces. They described the fall of Tsarigrad, presented episodes from the reigns of specific tsars and related tales of forced conversion to Islam. A significant portion of historical ballads portrayed the deeds of *khaydusti* (sing. *khayduk*) or *voyvodi* (sing. *voyvoda*: 'leader', 'chieftain'), rebel fighters who launched attacks against Ottoman brigades from the hidden recesses of Bulgaria's forested mountains (ex.5). Historical ballads were performed to epic, harvest and dance-song melodies

Ex.5 *Khayduk* ballad from north-west Bulgaria (from V. Stoin, 1928, no. 2963)

Za - pla - ka - la e go - ra - ta,
go - ra - ta i pla - ni - na - ta

['The forest is crying, the forest and the mountains']

and usually exhibited a wider vocal range than heroic recitatives.

In addition to these heroic and historical songs, village lore included mythological ballads that told of dragons and their human lovers, wood and water sprites, demons and fairies, human heroes endowed with superhuman qualities and other miraculous or supernatural phenomena. Some of these were part of larger ballad families found throughout the Balkans.

(iii) Instruments. Village life embraced several indigenous instruments whose distribution was regionally differentiated. Originally constructed by the musicians themselves or by master craftsmen, the size and tuning of these instruments were not standardized until the mid-20th century, when the creation of ensembles demanded precise pitch.

Four aerophones were found throughout the country with some local variation: the KAVAL (semi-traverse, rim-blown wooden flute), *ovcharska svirka* or *tsafara* (shepherd's pipe), *duduk* (vertical wooden flute), and *gayda* (*see* BAGPIPE, §7(vi)). The *kaval*'s large range and its timbre, said to resemble the human voice, made it suitable for playing inside the home, at the *sedyanka* and in the pasture (fig.1).

While there used to be several styles of *kaval* playing, the Thracian style, with articulation and vibrato produced by the fingers, is prevalent today.

1. Kaval (rim-blown flute)

The *svirka* or *tsafara*, a smaller version of the *kaval*, was played in a similar manner. Once fashioned from the bones of eagles' wings, the traditional instrument was made from a single piece of wood or reed. Contemporary *svirki* may be constructed of metal and are often considered children's toys.

The *duduk* (also *dyuduk*) was a shepherd's plugged whistle flute blown through an apical slit, constructed in one to three sections in a range of sizes. The large, three-piece *dudutsi* of central western Bulgaria had a three-octave range; the single-piece instruments encompassed two octaves. Usually made of reed or wood, *dudutsi* possessed six finger-holes spaced equally or arranged in two groups of three along the instrument's face. In north-western Bulgaria the *duduk* was once the most popular instrument; it is now nearly obsolete.

The favourite instrument for accompanying weddings and outdoor celebrations was the *gayda*. This is a bagpipe with a single chanter (*gaydanitsa*) and drone (*ruchilo*). Three sizes of *gaydi* exist, the most widespread being the middle-range Thracian bagpipe (fig.2).

Two other wind instruments popular in pre-socialist Bulgaria were the *dvoyanka*, a wooden, double fipple block flute characteristic of western Bulgaria, and the *zurna* (also *zurla*), a double-reed wooden aerophone that existed most prominently within Pirin's Muslim Rom communities and the towns of Ludogorie, Shumen, Razgrad and Kardzhali. Both instruments were played to produce diaphony. Finger-holes were drilled into only one of the *dvoyanka*'s two pipes, allowing the instrumentalist to play a melody while simultaneously blowing into the second pipe, which produced a drone. Likewise, musicians always played *zurni* in pairs, one sounding a melody, the other a drone, to the accompaniment of one or two circular, double-headed, wooden frame drums called *tapani*. Such ensembles only played outdoors due to their raucous sound.

2. *Gayda (bagpipe)*

The *tapan* is the most widespread membranophone, used throughout Bulgaria in varied performance contexts. The drum's heads traditionally were fashioned from sheep or dog skin and secured with hemp cords. In performance the *tapan* is suspended from the left shoulder with string or a belt, and is played with two drumsticks: a thick, slightly curved stick (*kiyak* or *tokmak*) that accentuates strong metric pulses, and a long, thin willow or apple switch (*shibalka*, *shibka*), played with the left hand to mark weaker beats. In village life the *tapan* was considered important for wedding processionals, celebrations and dances.

Pirin is home to two other membranophones that are linked to Macedonian and Middle Eastern culture. The *tarambuka* (*tarabuka*, *darabuka*) is a goblet-shaped drum with a terracotta base and a single drum head of cat or lamb skin. The drum is held under the left arm or placed between the knees and struck with both hands. The *dayre* is a small wooden frame drum with a single kid-skin head that, like the *tarambuka*, provided rhythmic accompaniment for singing, instrumental music and dancing. The modern *dayre* also has pairs of round metal plates (*zilove*) inserted in slits in the drum's frame.

Until the creation of folk ensembles in the 1950s the *tambura*, a strummed long-necked fretted lute with a rounded back, was found only in Pirin-Macedonia and among the Muslim population of Rhodope, where it functioned as both a solo and accompanying instrument. *Tamburi* once existed in several sizes with two, four, six, eight, or twelve metal strings. The four-string *tambura* was the most common beofre 1950; the eight-string (arranged in four double courses) dominates today. In pre-socialist Bulgaria three of the four strings were tuned as unison drones; the fourth, or melody string, was pitched a 4th or 5th away. The courses of the contemporary *tambura*, however, are tuned *d–g–b–e′*, which enables the production of chords. The *tambura* and *dayre* are the only indigenous instruments sometimes played by women.

The GADULKA is a bowed, three-string short-necked wooden lute, with a pear-shaped rounded or, less frequently, flat body, found everywhere except Pirin and Rhodope. The instrument is played vertically, resting on the knee or on a belt (fig.3). Previously the *gadulka* existed in several forms, the standard instrument today being the large Thracian *gadulka*.

Until the early 20th century Bulgarian musicians rarely combined different indigenous instruments together in groups. There were some regional exceptions: the *zurna* and *tapan* ensembles of south-western Bulgaria; orchestras of variously sized mandolins and *tamburi* that appeared in Pirin-Macedonia in the mid-19th century; and the so-called Dobrudzhan trio, of the small *dzhura gayda*, *kopanka* and the *(fiz)kharmonika*, an instrument resembling a button accordion that probably came to the Danubian area from Russia. These groups performed melodies in unison or with a drone.

(iv) The khoro. Few festive events were complete without communal dancing. In addition to *sedenki* or *tlaki*, weddings and calendrical rites, villagers performed a wide variety of *khora* at community dances held every Sunday afternoon (except during Lent) on the village square or green. They danced at evening parties called *vecherinki*,

3. *Gadulka (short-necked bowed lute)*

and at summer fairs termed *sborove* or *panairi* that commemorated the patron saint of the community's church.

Khora were executed in closed or open circles, spirals, a single long line or several short, straight rows. Dancers clasped each other by the hand, belt, shoulder or around the waist to produce human chains. Dance gestures involved primarily foot and arm movements, especially steps on the heel, toes or whole of the foot; slides, hops, squats and knee bends. The torso and head remained comparatively fixed. Characteristic dance movements often emulated animal behaviours or the motions of work, such as churning butter, in a stylized fashion. These had descriptive names that could be shouted as commands during the dancing. Each *khoro* combined such gestures in specific figures that varied in number.

Every *khoro* possessed a head, middle and tail. The best dancers joined at the head to lead the *khoro*, while girls, boys and children learning to dance made up the tail. Those at the front were free to extemporize their movements. Likewise, good dancers sometimes attached themselves to the tail to energize the dance line or make it twist. The structure of the dance line reflected the community's social order in that the men were usually at the head, the women in the middle and the children at the end. For a bachelor to join the *khoro* next to a young woman was a public expression of interest and sometimes a sign of betrothal.

Most *khora* were performed to *khorovodni pesni* ('dance-songs') sung by the dancers themselves, one after the other for hours on end (see ex.2). Customarily these dance-songs were sung antiphonally by two pairs of women located near the front of the line, but could include larger groups of singers. Most were in duple metre, but many also had asymmetrical rhythmic patterns. Tempos ranged from sedate to very fast.

A single instrument, often a *gayda* or *gadulka*, also commonly accompanied dancing. The musician stood near the *khoro*'s centre and spontaneously improvised a dance-tune from brief melodic fragments (*persenkove*) that he developed into longer phrases called *kolena* (sing. *kolyano*), usually within the interval of a 5th. These *kolena* were irregular in length due to their improvisatory character and because their substance was linked to the dancers' actions. Sometimes an entire *khoro* resulted from extemporization on one *persenk*. Other *khora* comprised variations on three or four *kolena*, but in all cases the melodic material developed organically throughout. Repetition of a single motif, movement to a new pitch area, the instantaneous working out of fresh material and tempo increases all heightened the musical tension and inspired dancers.

Under the influence of emerging urban ensembles in the 19th and early 20th centuries, two or three *svirachi* began playing *khora* together in unison to ease the strain of lengthy solo performance. Instrumentation depended on local availability, but typical combinations included homogeneous ensembles of two or three *gadulki*, *gaydi* or *kavali*, and mixed ensembles of *gadulka*, *gayda* and *kaval*, or, *gayda* and *tapan*. Along the Danube small groups of Western and central European string instruments fulfilled the same function. Like the Dobrudzhan trio and *zurna* and *tapan* ensembles mentioned above, these groups performed melodies in unison or with drone, although intonation was not uniform.

(v) Texture and timbre. Both instrumental music and singing were predominantly monophonic, solo traditions that emphasized the unfolding of intricately embellished melodic lines. When women or men sang together they usually sang in unison. Such songs were often performed antiphonally by two soloists or two groups of voices that repeated or alternated verses. Repeating verses gave novices a chance to learn unfamiliar texts and lengthened a song's duration. Antiphony gave singers a chance to catch their breath while dancing or cultivating crops. It was customary for the first group to sustain its last pitch while the second group began to sing a new verse, creating a momentary diaphonic texture.

Although monophony prevailed, diaphony (*dvuglas*) existed throughout Bulgaria and was especially strong in the west. Every indigenous instrument produced two-voiced textures except the *duduk*, *svirka* and *kaval*; the *dvoyanka*, *gayda*, *tambura*, *gadulka*, *chift kavali* (a pair of *kavali*) and *zurna* were either designed, tuned or customarily played to yield a melody and drone simultaneously. In the north-west musicians even growled a drone while playing *duduk*, a technique termed *ramzhene* ('grumbling').

Moreover, songs in the Shop and Pirin regions were distinguished by unique diaphonic styles linked to similar traditions in the Former Yugoslav Republic of Macedonia, Serbia, Bosnia-Hercegovina, Croatia and Albania. In both districts this *dvuglas*, sometimes also called *mnogoglasie* ('many voices', part singing), consisted of a solo upper voice and a lower, drone voice traditionally executed by one or two singers, but sometimes more. Singers characterized the two parts with terms that metaphorically described their movement, timbral quality or function:

the first voice *izvikva* ('cries out'), *izviva* ('winds'), *vodi* ('leads'), *diga* ('rises') or *trese* ('shakes'), while the second voice *slaga* ('lays'), *vlachi* ('trails behind'), *buchi* ('roars'), and occasionally *trese* ('shakes'). These terms also indicated the physical stance of the singers, as the melody bearer sometimes positioned herself slightly ahead of the droners. Here the first voice was said to go *napred* ('in front'), while the drone voice followed.

The types of songs performed diaphonically varied from village to village, but generally included harvest, dance, *sedyanka*, wedding, calendrical and all-occasion lyric songs. Textual and rhythmic precision were vitally important. Once they had learnt the lyrics and parts from older women, girls formed duos and trios to practise songs on their own. Some of these singing partnerships lasted a lifetime.

Vocal colour and blend were also significant. Women described two basic categories of timbres: voices that were *chist* ('clean') or *piskliv* ('reedy'), and those that were *debel* ('thick'), *mazhen* ('buttery') and *maten* ('muddy'). Singers preferred not to mingle the two timbres. When singing antiphonally a 'reedy' group was often juxtaposed with a 'buttery' group. This differentiation was also associated with age, as an older woman's voice tended to be thicker than that of a teenage girl. In both cases women projected their voices to produce an open-throated, focussed and intense sound that could be heard some distance away.

Within western Bulgaria the movement of the drone voice, degree of pitch manipulation, cadential formulae, ornamentation practices and even the number of women singing all varied from one village to the next. Diaphonic songs from the Shop district were marked by arched contours, antiphonal performance and a constricted range, usually a minor 3rd, resulting in a plethora of narrow interval simultaneities. One woman ordinarily sang the first voice, and two or three the underlying tone. Shop diaphony was particularly loud and powerful; women preferred the drone to nearly overwhelm the melody. The melody bearer thus often ended sustained tones with a glottal stop, a result of the vocal tension caused by this forceful singing.

The drone voice, while variable in this region, typically followed one of two patterns: it either sang the text on a tonic drone, dropping to the sub-tonic together with the first voice at certain moments; or it moved to the sub-tonic whenever the melody voice descended to the tonic. The latter practice created occasional parallel motion between the voices and a preponderance of 2nds. Moreover, singers often manipulated pitches so as to further close the distance between them, causing them to 'ring like bells', perhaps referring to the pulsation of the resultant difference tones. Singers frequently prolonged a song's final tone, dwelling on the ringing sound. In harvest songs performed during rest periods, the first voice enhanced such moments with *tresene* ('shaking'), a vocal technique comprising a trill-like succession of glottal stops. This was often followed by a cadential formula called *izvikvane* that entailed a 'unison leap of a minor 7th or octave on the vowel sound "eee" followed by descending glissando and decrease in volume' (Rice, 1977). This technique dissipated the singers' accumulated vocal and respiratory tension and intensified the sonic collision created when two groups of singers overlapped (ex.6).

Ex.6 Shop diaphonic song excerpt with *tresene* and *izvikvane* (from Kaufman, *Balgarskata mnogoglasna narodna pesna*, 1968)

♩ = 104

(I) O - gre - ya - la me - se - chi - na,
San - der el - ko, pi - ri mel - ko San - gu - bi,
an - gu - be chi - ris me - te, na - me - te
tu - tu - ne, bu - tu - ne, ka - rai ko - nya
na o - na - ya stra - - a - - -
- na

The diaphonic songs of Pirin and Velingrad were more lyrical than Shop songs. Melodies contained wider ranges, could begin on any scale degree and were sung with much lighter voices. Antiphony occurred less frequently. *Tresene* and *izvikvane* were also atypical. Songs were performed by the traditional trio of women, but also by groups with six or seven singing a drone. In Muslim communities pairs of girls sang diaphonically, as did large groups of men. In Bansko a Christian male ensemble performed a similar style of *dvuglas*. Such male ensembles were exceedingly rare elsewhere.

Songs frequently began in unison and then split into the characteristic drone and melody. Two types of drone movement distinguished Pirin diaphony: the second voice remained on the tonic, sometimes dropping to the sub-tonic in unison with the upper voice; or it moved in accordance with the melody to produce as many 2nds and 3rds as possible. In the latter case the drone fell on any pitch from the sub-tonic to the dominant. Voice crossings were common in both song types (ex.7).

A distinctive corpus of vocal diaphony in Bansko called *na atsane* was typified by a first voice that frequently swooped up to the octave, moved to the sub-tonic and then descended to the tonic in a glissando. The octave swoops were further demarcated by a sustained vocal clucking in the high register.

Styles of performance in the Pazardzhik-Ikhtiman area marked a shift from western Bulgarian diaphony to the monophonic singing of eastern Bulgaria. There were several styles of *dvuglas*. As elsewhere, a tonic drone sounded constantly or occasionally dipped to the sub-tonic, usually in unison with the first voice. In many villages, however, the upper voice performed an elaborately embellished melody whose basic skeleton was sung

Ex.7 Diaphonic song excerpt from Pirin-Macedoniya (from Kaufman, *Balgarskata mnogoglasna narodna pesna*, 1968)

by the second voice in long, sustained tones, producing a heterophonic texture. Moreover, in towns like Ikhtiman the lower voice, rather than the lead singer, performed *tresene* in both heterophonic or the more usual melody-drone song types.

Performers in the villages west of the Struma river used the second voice to maintain a tonic drone on the vowel sound 'eee' throughout a song. When cadential *izvikvane* occurred the first voice sustained a minor 7th above the drone voices. Other songs cadenced on tonic and subtonic together. Songs in this area generally had a slightly wider range, lacked *tresene*, and frequently opened with an ascending 4th, setting them apart from those of the Shop district.

Outside western Bulgaria, *dvuglas* was practised only in the Rhodope village of Nedelino and its environs. Unique styles of narrow-interval three-voice singing existed in the Pirin town of Kostursko, near Petrich, where the voice movement resembled that of Albanian polyphony, and in villages surrounding Sofia, where the voices frequently produced three-note clusters of adjacent pitches, an intensification of the parallel 2nds found in Shop diaphony.

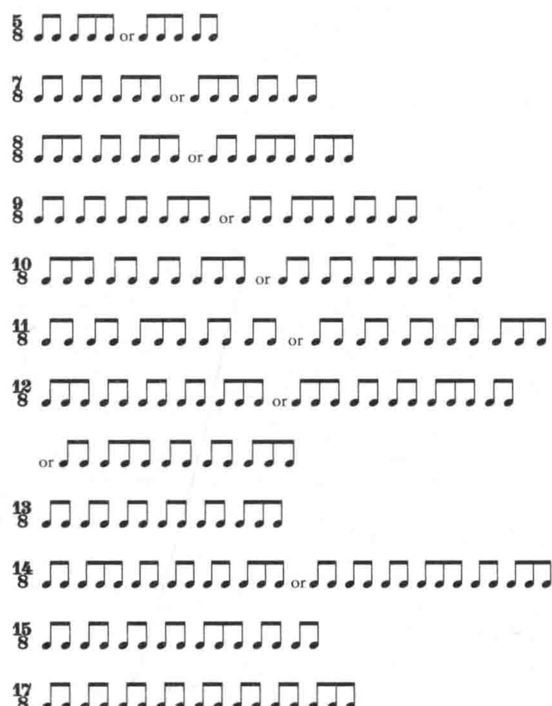
(vi) Structure, form and mode. Bulgarian melodies usually move by step and frequently have a narrow compass, often within an octave. Two to five pitch melodies are the norm; these regularly drop one whole step below the tonic. Songs are structured in verses containing one to three lines of text. Each line usually comprises six, eight, ten or twelve syllables, divided into two syllabic groups by a caesura. Within a single song the placement of the caesura may be inconsistent. Phrase structure and rhythm generally follow the text's syllabic structure and phrases do not always contain the same number of bars. Refrains of one to three lines are common. Vocables, expressive variations of names or common nouns and other evocative interjections frequently fill out text phrases. Such poetic devices can create full lines or an entire verse; these often function as refrains.

Five varieties of anhemitonic pentatonicism exist in Rhodope and Thrace, but songs do not always feature all five requisite tones. The intonational system of pre-socialist village music was untempered, nonstandardized and frequently employed untempered intervals, including microtones, making any discussion of modality problematic. Melodies are generally constructed within diatonic tetrachords or pentachords. However, innumerable melodies display underlying chromatic tetrachordal, pentachordal, hexachordal or heptachordal structures distinguished by the presence of augmented 2nds between any two successive scale degrees except one and two (see exx.9, 10 and 11). Some of these structures may be related to Middle Eastern modal configurations, or the old Bulgarian or Byzantine church modes.

(vii) Rhythm and metre. A large repertory of unpulsed rubato, improvisatory, densely ornamented songs generically termed *bavni pesni* ('slow songs') exists throughout Bulgaria. These can include harvest and other agricultural work songs performed to extended, sustained 'long melodies' (*dalgi glasove*); lyric songs and ballads performed to more moderate tempo, parlando rubato 'drawn-out melodies' (*vlacheni glasove*; see ex.1); and songs performed to 'broken' or 'chopped-up' melodies (*secheni glasove*), a phrase that describes the rapidly flowing, recitative-like character of many laments and 'table' songs (see ex.4).

Musicians perform similar non-metrical solos called *bavni melodii* ('slow melodies') or *svirni* (sing. *svirnya*). Some are shepherds' melodies, freely improvised from idiomatic motifs and phrases; others are instrumental renditions of slow songs (ex.8), which musicians contend thay cannot play well unless they know the associated texts.

The terms used to specify pulsed rhythmic patterns also designate particular types of *khoro* melodies and dance steps. The most popular and widespread duple metre dance is the *pravo khoro* ('straight dance'). Although described and written by contemporary musicians as 'in two', this dance has the underlying compound duple character of 6/8 (ex.9). Other common duple metre dances include the *buenek*, a moderate tempo *khoro* found in



Ex.8 *Svirnya* for *kaval* based on song motifs (from Todorov, 5/1976)

Ex.9 *Pravo khoro* (from Krastev, *Entsiklopediya*, 1967)

Ex.10 Frequently used rhythms in Bulgarian folk music (Dzhudzhev, 1931) (examples in 5/8, 7/8 etc may also be in 5/16, 7/16 etc)

Strandzha; the lively *trite pati* (lit., 'three times') of eastern Thrace, in which a sense of four semiquavers underlies every beat; and *lyavata* ('to the left'), another Thracian *khoro* in which the dancers move anticlockwise. Melodies in triple metre are rare except in Pirin.

Bulgaria's asymmetrical rhythms may be thought of as combinations of duple and triple metres strung together to create heterometric patterns. Ex.10 illustrates many commonly performed heterometres. Each pattern serves as the basis for one or more dance types, which may be differentiated by region and choreography. *Khoro* melodies may be named after their associated locales (e.g. *Makedonsko khoro* and *Shopsko khoro*), after a musician who creates or favours a particular melody or after distinguishing elements of the dance itself (e.g. the *kalaydzhiysko khoro* from Pirin is danced by turning the body to the right and left, causing the dancer to 'spin like a *kalaydzhiya*', or 'dried pea' – a name for a fidget).

The most popular heterometric dance is the *rachenitsa*, an energetic *khoro* in 7/16 (2 + 2 + 3) with various local names (ex.11). It is performed individually, by couples or

Ex.11 *Rachenitsa* (from Dzhudzhov, 1970-75)

in groups, indoors or outside, especially during weddings and other celebrations. In Pirin the *khoro* subdivided 3 + 2 + 2 is named *pravo makedonsko* ('straight Macedonian') and *mazhka rachenitsa* ('men's *rachenitsa*'). The *kalaydzhiysko khoro* mentioned above and the *paydushko* (ex.12) are dances in 5/16 (2 + 3).

Melodies in 9/8 (or 9/16) when divided 2 + 2 + 2 + 3 are known as *daychovi khora* (see ex.2). The *daychovo* is associated with northern Bulgaria, where it is usually a quick dance accompanied by an instrumental ensemble, often a wind band. It is also encountered in other areas, but under different names. A favourite dance of central and western Bulgaria is the *kopanitsa* in 11/16 (2 + 2 + 3 + 2 + 2). This is known by various local names, including *gankino khoro* in the Shop area and *krivo* ('crooked') *khoro* in Pazardzhik, western Thrace. Numerous dances in increasingly complex asymmetrical patterns, such as the *petrunino khoro* in 13/16 (2 + 2 + 2 + 2 + 2 + 3) of the Shop region and the *buchemish* in 15/16 (2 + 2 + 2 + 2 + 3 + 2 + 2) from western Thrace, are found throughout the country.

Although these heterometres, of which there are many more than mentioned here, were termed 'Bulgarian' by Béla Bartók (1938); they are linked to similar patterns found in Greece, the Former Yugoslav Republic of Macedonia, Turkey and the Caucasus.

3. Urban musics, 1850–1944. The late 19th century witnessed the emergence of a vibrant musical life in towns and cities that differed substantially from older village traditions. These new urban styles derived from the musics of neighbouring peoples. During the last years of Ottoman rule Turkish administrators, Balkan merchants, and emigrant workers maintained continuous inter-city contact, spreading new styles throughout the Balkans. Their popularization marks the beginning of both professional and amateur institutionalized musical activity.

Gradski pesni ('urban songs') became important even before the Liberation (1878), when residents of larger cities began to favour songs imported from Greece, Turkey, Russia and Germany, with translated or new Bulgarian texts. Other new *gradski pesni* appeared soon afterwards, based on local melodies but modelled on the foreign songs. Unlike village songs, *gradski pesni* had known authors, including famous Bulgarian, Russian or German poets; their lyrics were composed in rhymed couplets; their melodies were metred, often in 6/8, 3/4 or 4/4, displayed wide ranges, and had pitch movements that implied functional harmony; and they were published as part of the *Vazrazhdane*'s literacy movement.

By 1900, as villagers sought employment in cities, town and village culture intermingled. Two urban song types became widespread in both venues: lyrical love songs with poetic texts by well-known literary figures performed to Greek or Turkish melodies, romances, waltzes, tangos and German *Schlager* tunes; and songs with patriotic or revolutionary texts, sung to marches and other militaristic

Ex.12 *Paydushko khoro*

Played on the violin by S. Gheorghiev, *act* 50, Loukovit, Nov. 1951

or nationalistic genres. These included songs of the *Vazrazhdane* and Liberation, soldiers' songs, workers' songs, which first appeared in Bulgaria during the 1890s and gained popularity with the rise of socialism and, as institutionalized education developed, school songs. These genres were performed by amateur civic and military choirs established in the 1890s in emulation of similar Russian groups that arose along the Danube in connection with the Liberation's military campaigns.

During the 1930s and 40s sentimental, melancholic love songs from Macedonia, which contemporary Bulgarians call *starogradski pesni* ('old urban songs'), acquired great popularity. These songs were composed in regionally specific metres to Greek- and Turkish-influenced melodies, and frequently performed as duets in parallel 3rds with orchestral accompaniments. They were disseminated through a growing recording industry and by professional (often foreign) musicians who sang at restaurants and taverns.

The Liberation era also saw radical developments in instrumental performance practice. By the late 19th century five types of non-indigenous instrumental ensembles existed in Bulgaria: symphonic chamber groups established by immigrants in the Danubian region; Ottoman Turkish Janissary orchestras; Czech wind bands; urban ensembles of minority musicians, often Christian and Muslim Roma, called *svirdzhii* or *chalgadzhii*; and small bands of foreign musicians from Serbia, Romania, Turkey and Bohemia. Together with the civic choirs mentioned above, these introduced Bulgarians to western European instruments, notation and collective musical performance. By 1911 wind bands directed by Czech Kapellmeisters existed throughout the country, performing brass band arrangements of symphonic works, operatic overtures, marches and medleys of Bulgarian folk tunes (*kitki*, 'bouquets'). Such groups influenced local musical practices significantly, inspiring village musicians to form small ensembles of mixed instrumentation.

The *svirdzhii* and foreign bands constitute early examples of semi-professional musicianship in Bulgaria. Although often employed as labourers, they travelled from town to town according to the calendar of local festivities, providing music for engagements, weddings, fairs and even upper-class Macedonian balls to augment their incomes. The *svirdzhii*'s repertories and instrumentation were eclectic, often combining indigenous and Western European instruments and genres. *Svirdzhii* who played clarinet, bass, double-bass and drums became widespread around 1900, especially in north-western Bulgaria. A villager's ability to hire such groups as wedding entertainment enhanced his social status. The players were highly talented musicians whose repertories included *narodni pesni*, *gradski pesni*, *khora* and *svirni*, the music of ethnic minorities and neighbouring Balkan peoples, and popular Western European dances, like waltzes and mazurkas. This reflected the increasingly international and syncretic Balkan music scene. The *svirdzhii*'s performance of these genres emphasized virtuosic, improvisatory, highly embellished solo or heterophonic playing, sometimes over a rudimentary bass line; an idiomatic style called *chalga*.

By the 1920s and 30s, therefore, major cities possessed a thriving, cosmopolitan population of musical ensembles. The small foreign orchestras performed for occasions similar to those of the *svirdzhii* and these groups influenced each other's repertory. During the early 20th century such ensembles were hired in restaurants, taverns and cinemas, where they became known as salon orchestras (*salonni orkestri*). These orchestras performed *Schlager*, celebrated symphonic works, *khora*, *kitki*, *narodni pesni*, patriotic songs and many imported American dances then fashionable in Europe. Urban Slavic Bulgarian musicians soon formed similar ensembles to perform indigenous music; these groups were important forerunners of later, state-sponsored folk orchestras.

4. Institutionalized neo-traditional music after 1930. The Bulgarian National Radio (established 1929) promoted live performances of *khora* and *narodni pesni* with instrumental accompaniment by small ensembles of well-known musicians and singers. These groups, such as the Bistrishka Chetvorka (Bistrista Quartet, established 1936; *gayda*, *kaval*, *gadulka* and *tambura*), were basically salon orchestras of indigenous instruments. The Ugarchinska Narodna Grupa (Ugarchinska Folk Group) (established 1939; *kaval*, *gayda*, *tambura*, *gadulka*, *tapan* and cello *gadulka*) also performed under the name Tsvyatko Blagoev using Western European instruments (clarinet, trumpet, trombone, violin, accordion and *tapan*), illustrating the musicians' abilities to adapt to varied performance contexts. Such ensembles were eventually designated 'modern orchestras' because of their non-indigenous instrumentation; *bitovi narodni orkestri* ('traditional folk orchestras') described groups like the Bistritsa Quartet.

The collective playing fostered by the Radio altered village musical practices considerably. Musicians learned to play *khora* more or less in unison, each performing the melody in a manner idiomatic to his instrument, with slight differences in ornamentation. They structured their *khora* in a new, sectional format known as the *kolenna forma*, in which each successive phrase derived from the last. Every phrase was repeated, and as the years passed, became equal in length, so that the *khoro*'s phrase structure became regularized. Instrumentalists interspersed solo improvisations on fragments of the *khoro* melody within the larger group structure while the other musicians vamped on the tonic pitch. When accompanying singers the musicians improvised an appropriate introduction and refrain, called a *pripev* or *otsvir*. During the sung verses one or two instruments, generally the *kaval*, *gayda* or *gadulka*, followed the melody heterophonically, while the others played a drone or ceased playing. Whether a song or instrumental piece, the *tambura* accentuated metric patterns through rhythmic strumming, followed the melody, or provided an underlying drone or rudimentary chordal accompaniment.

The political events of 1944 resulted in the total institutionalization of all musical activities within a monolithic network of state administrative organs whose representative bureaus extended into every city, town and village, and whose structure and ideals emulated those of Soviet cultural development. The *Vazrazhdane*'s civic choral and instrumental groups were incorporated into the larger, state-directed programme of *khudozhestvena samodeynost* ('amateur artistic creativity'), which dictated the collectivization of musical performance in *kolektivi* ('collectives') and *ansambli* ('ensembles') for song and dance. By 1950, 3400 such groups existed in association with labour unions, agricultural cooperatives, factories, schools, local libraries, communist youth organizations and houses of culture. The groups' activities were closely associated with political life; the development of *khudo-*

zhestvena samodeynost fell directly under the government's Agitation and Propaganda department until 1954, when a separate administrative bureau, the centre for *khudozhestvena samodeynost*, was established in Sofia.

One chief function of these *kolektivi*, whose numbers had swelled to 22,760 by 1987, was to popularize socialist mass songs. These included songs in praise of the September Uprising of 1923, the Bulgarian army, Bulgarian–Soviet relations and political figures such as Joseph Stalin and Georgi Dimitrov; partisan and revolutionary workers' songs, many of which substituted new names and events into the basic structure of pre-existing heroic, *khaiduk* or soldiers' song texts; and songs 'for the new village' (ex.13), whose melodies are in folk style but whose texts celebrate the building of socialism. New work songs commented on agricultural collectivization, the activities of work brigades and the construction of reservoirs or similar projects.

During the late 1940s amateur ensembles promoting more traditional presentations of folklore arose, among them the Ensemble for Macedonian Folk Songs and Dances Gotse Delchev (Sofia, 1945) the Ensemble for Folk Songs and Dances Yane Sandanski (Gotse Delchev, 1946) and the Plovdiv Folk Ensemble for Songs and Dances (1948). Unlike other ensembles these groups employed regionally specific orchestras of indigenous instruments. The popularity of these amateur ensembles, coupled with a visit from the USSR's folk choir Pyatnitski in 1949, inspired the Council of Ministers and composer Filip Kutev (1903–82) to establish the first professional folk song and dance ensemble in 1950–51.

The primary objective of the National Folk Song and Dance Ensemble Filip Kutev was the preservation and performance of village music from all over Bulgaria, but in a contemporary format representative of the new socialist state. Kutev travelled widely, auditioning the best performers from every ethnographic region to build a women's folk choir, a mixed dance troupe and a (male) folk orchestra constructed from the five most prevalent indigenous instruments (*kaval*, *gaida*, *gadulka*, *tambura* and *tapan*). Leading composers produced polyphonic arrangements of folksongs and *khora*, termed *obrabotki*, for these groups, while choreographers designed similarly complex presentations of dance figures. Together the three units enacted theatrical, stylized renderings of traditional lore called *postanovki* on concert stages at home and abroad. In 1952, shortly after the Kutev Ensemble's first concerts, the Ensemble for Folk Songs of the Bulgarian Radio and Television was established in Sofia to popularize new *obrabotki* through the mass media. Several other professional *narodni ansambli* with regional foci soon arose in major cities. These included Ensembles Pirin (Blagoevgrad, 1954), Rodopa (Smolyan,

Ex.13 Song for the new socialist village (from E. Stoin: *Savremennata balgarska narodna pesen* [The contemporary Bulgarian folksong], *IIM*, (1952), 131)

['Damyan said to his mother, "Why, mother, are you worried"]

1960), Dobrudzha (Tolbukhin, 1970), Trakiya (Plovdiv, 1974) and the Severnyashki Ensemble (Pleven, 1970).

Initial members of early folk ensembles were villagers who possessed no formal musical training. While participants learnt how to read notation and follow a conductor, performing *narodna muzika* in a collective fashion posed significant obstacles whose solutions dictated drastic modifications in traditional performance practice. Vocalists, for example, learnt to sing together in multiple parts and with orchestral accompaniment. Although two or three lines characterized early choral *obrabotki*, over the next 40 years they became steadily more contrapuntal, complex and classical in nature, employing four to ten parts.

Contemporary folk orchestras expanded the instrumentation of earlier *bitovi narodni orkestri* into a larger symphonic scheme. Kutev enlisted master craftsmen to construct standardized families of neo-indigenous instruments, including new bass, cello, and viola *gadulki* and *tamburi* modelled on the Western European viola, cello, and double bass. Intonation subsequently became more precise, but the new instruments required special instruction. Ensembles therefore often employed conservatory-trained musicians to play the newly-designed strings, which supplied the bass lines and inner parts of polyphonic arrangements. The *gayda* was utilized without its *ruchilo*, so that its drone would not interfere with an *obratbotka*'s harmonic scheme. The large *kaba gayda* and Dobrudzhan trio were utilized primarily in appropriate regional ensembles, while the *dvoyanka*, *duduk* and small Shop *gadulka* fell into virtual oblivion. The *tambura*, however, became part of every folk ensemble despite its localized distribution.

Although folk orchestras initially performed melodies in a style similar to *bitovi narodni orkestri*, in succeeding years orchestral *obrabotki* featured multiple parts, large-scale forms, chromatic harmonies, countermelody, imitation and symphonic playing techniques. While the *kolenna forma* still provided a structural basis, contemporary *obrabotki* exhibited many more *kolena* than a traditional *khoro*; these were often unrelated in substance, incorporated modulations to different key areas, and displayed marked registral contrasts.

By 1988 the state supported 14 professional folk ensembles and hundreds of similar, amateur formations. These became the principal vehicle through which traditional music and customs were experienced. Secondary schools providing intensive training in *narodna muzika* were established at Kotel and Shiroka Laka; a third school for choreography and 'traditional dance' was founded in Sofia. The *Vissh Muzikalno Pedigogicheski Institut* (Higher Musical Pedagogical Institute), located in Plovdiv, furnished Kotel and Shiroka Laka graduates with additional instruction at the collegiate level. These institutions equipped professional ensembles with a ready supply of qualified personnel, and amateur ensembles with skilled directors. They also affected conventional modes of performance greatly, for younger people no longer acquired knowledge of *narodna muzika* within the course of daily life, but in a structured environment from notated materials written specifically for this purpose: *obrabotki* for folk choir and orchestra, scale and technical studies for each instrument and chamber works for soloists with folk orchestra accompaniment. Numerous juried competitions and festivals for both amateur and professional

groups (a contemporary manifestation of pre-socialist village fairs) allowed panels of official adjudicators, usually folklorists, government officials and folk ensemble directors, to supervise the shape of folk music performance through their awards, and through lectures following the staged events.

As their repertories became further divorced from their village roots, folk ensembles grew less popular. The *glasnost* era, however, prompted an increased number of international tour and recording invitations for prominent groups. Foreign impresarios sponsored governmentally selected concertizing formations derived from major ensembles, especially choirs performing multipart *obrabotki* and more conventional instrumental groups of three to five musicians. After 1989 ensemble members established privately sponsored chamber and choral groups seeking international contracts. Intense competition arose between them, as each strove to devise a unique creative identity. Moreover, the personnel ranks of large folk ensembles were weakened as major artists resigned to perform in private organizations. These factors, together with a sharp decrease in state funding, caused many ensembles to disband in the 1990s. Some persevere with financial backing from diverse public and private sources, adapting their concert programmes to contemporary circumstances.

5. NEO-TRADITIONAL POPULAR MUSIC. During the 1970s an eclectic non-state-sponsored genre termed *svatbarska muzika* ('wedding music') rose quickly to popularity. This genre, which blends *narodna muzika* with other Balkan styles and pop music elements, is performed by *svatbarski orkestri* ('wedding orchestras'), bands of four to ten professional musicians, usually of minority heritage, which developed from the *svirdzhii* and salon orchestras of the early 20th century. Instrumentation varies, but often includes accordion, clarinet, electric bass guitar and drum kit. To this configuration electric guitar, synthesizer, trumpet, violin, saxophone, *kaval*, *gayda* and *gadulka* are added. The clarinet is generally the lead melody instrument; accordion, saxophone or violin also perform this function. Most bands include a female vocalist who characteristically employs a wide vibrato.

Wedding orchestras perform at weddings, christenings, holiday celebrations and farewell parties commemorating a young man's departure for military service. Their repertory comprises *khora* and *svirni*, and Greek, Macedonian, Serbian, Romanian and Turkish melodies, especially the *kyuchek*, a Turkish Rom solo dance in 2/4 or 9/8 with undulations of the hips and arms. These are performed in the *chalga* style typical of Rom musicians, frequently with Turkish nuances. The influence of American jazz and rock is evident in certain chord progressions, the use of electric instruments and the emphasis on solo improvisation.

The musician credited with originating wedding music is Ivo Papazov (Ibrahim Hapasov), a clarinettist of minority extraction who founded his band, Trakiya, in Stara Zagora in 1974. During the 1980s, when hundreds of bands emulating Trakiya formed throughout Bulgaria, the government censured this genre harshly for three reasons. Firstly, it evolved and was performed outside the state-sponsored music industry. Non-professional, privately made cassette recordings of wedding bands were duplicated and passed from person to person in an informal, grassroots music economy. Secondly, many wedding musicians were from minority groups. During the 1980s they were therefore targeted by the Zhivkov administration's campaign to eradicate all vestiges of Turkish culture from Bulgarian society. Thirdly, government authorities believed that wedding music's amalgamated nature threatened *narodna muzika*'s purity. Wedding musicians were consequently taxed heavily and denied certain civil liberties.

In the late 1980s the government established control over wedding orchestras by incorporating them into the state network of adjudicated festivals and competitions. Scholars reversed their position on the value of wedding music by valorizing its links to *narodna muzika*. By 1990 it had become an acceptable musical style whose influence was evident even in folk ensemble *obrabotki*.

In the late 1980s prominent members of the Bulgarian Radio's folk ensemble, together with composer Dimitar Penev, produced studio recordings that set traditional music to a disco beat, a genre termed *disco folk*. At the same time, rock bands started incorporating digitally sampled snippets of *narodna muzika* into pop songs or performing rock ballads with a folk flavour. Other groups produced political pop that satirized the events and results of the 1989 political transition. Western pop musicians sampled or otherwise utilized Bulgarian musicians or repertory in their creative work. These trends continue to evolve in the late 1990s, although their popularity is overshadowed by three other genres: wedding music, 'Pirin folk', and pan-Balkan ethnopop.

Pirin folk music, also called 'authored Macedonian music', is performed largely by amateur musicians who present *starogradski pesni* and Macedonian urban songs in updated pop or wedding music formats. This genre developed in Pirin-Macedonia during the early 1990s under the influence of ethnopop from Serbia, Greece and the Former Yugoslav Republic of Macedonia, and is performed and recorded at annual festivals called *Pirin fest*, held in Blagoevgrad, and *Pirin folk*, held in Sandanski.

Since about 1993 numerous bands have promoted pan-Balkan songs that put various components of Turkish, Arab, Macedonian, Greek, Serbian, Bulgarian and Rom musics together in a pop music context. Both the bands and their repertories are linked to wedding music, Pirin folk, and the 'newly composed folk music' of Serbia and the former Yugoslav Republic of Macedonia. Many performers of this trend are Rom or Turkish. Song lyrics appear in various Balkan languages, and are often sung with the vocal inflections of Rom, Turkish and wedding music. Instrumentation is variable but may include electric bass, synthesizer, drum machine and electric guitar. Many groups also feature a clarinet or saxophone, played in the Rom style. Songs abound with Middle Eastern idioms: musicians utilize synthesizers imported from Arab countries, which facilitate the use of *makamlar* or the timbres of Turkish or Arab instruments; lead instruments perform *taksims* during instrumental breaks; and percussion patterns and bass lines incorporate common Turkish or Arab rhythms. While such ethnopop styles signify Bulgaria's strategic position within Balkan geography, they have essentially replaced the indigenous music-making of the country's heritage.

STOYAN PETROV/MAGDALENA MANOLOVA (I), DONNA A. BUCHANAN (II)

Bulhat, Johannes de. *See* BUGLHAT, JOHANNES DE.

Bull, Christoph. *See* BUEL, CHRISTOPH.

Bull, Edvard Hagerup (*b* Bergen, 10 June 1922). Norwegian composer. Son of a well-known writer on music who also composed, he moved to Paris after studies in Oslo and studied at the Conservatoire (1948–53), winning a prize for composition. His teachers were Milhaud and Rivier, and he also attended Messiaen's analysis class. Later he studied with Blacher at the Hochschule für Musik in Berlin.

His works from the early 1950s exhibit a variety of styles, including atonality in the manner of Alban Berg. Gradually his own stylistic preferences came to the fore, and his trumpet concerto (1950), still one of his most performed works, has clear and free tonal lines welded together in a strict form. His personal stamp came to be heard in every work – the powerful and langorous contour of his melodies combined with a rhythmical vigorous drive creates a pronounced force which is contrasted with softer lyrical passages. His music is almost Germanic in its strong expression. For more than 30 years Bull lived mostly in France, where he received several commissions, including one from the Ministry of Culture, a rare honour

for a foreigner. But his exile may explain the slow acceptance of his music in Norway. His music has, however, been performed by leading artists and orchestras, and gradually masterpieces such as *Air solenelle* (1972) and *Chant d'hommage à Jean Rivier* (1976) have also become known in Norway.

WORKS

[(*selective list*)]

Dramatic: Den standhaftige tinnsoldat (Le soldat de plomb) (ballet, after H.C. Andersen), op.6, 1949; Portrait Münchausen (ballet), op.25, 1961; Fyrtøjet (Le jeu de feu) (op, 1, Andersen), op.44a, 1974; Den grimme aelling (Lamentation pour un cygne maudit) (op, 1, Andersen), op.48a, 1977

Orch: 3 morceaux rapsodiques, op.7, 1950; Serenade, op.8, large orch, 1950; Tpt Conc. no.1, op.9, 1950; Sinfonia di teatro, prélude symphonique, op.10, 1950; 3 mouvements symphoniques (Sym. no.1), op.16, 1955; Sym. no.2, op.21, 1958; Cassation, op.22, chbr orch, 1959; Epilogue, op.26, str, 1961; Sym. no.3 'Sinfonia espressiva', op.30, 1963–4; Sinfonia humana, op.37, 1968; Sinfonia in memoriam, op.41, 1972; Posthumes (in memoriam Jan Øvsthus et Edvard Fliflet Braein), op.47, wind orch, 1977; Lamentazione, sinfonia da camera, op.54, 1981–2; Postlude – pour l'épilogue d'un monde, op.58b, 1984; Hommage à George Gershwin' avril 1998 – Rhapsody in Rag, tpt, orch, 1998; sym. movts., suites, works for solo inst and orch (for vn, trbu, fl, pf, a sax, tuba)

ARVID O. VOLLSNES

Bull [Boul, Bul, Bol], **John** [Jan] [Bouville, Bonville, Jean] (*b* ?Old Radnor, Radnorshire, ?1562–3; *d* Antwerp, 12–13 March 1628). English composer, organist, virginalist and organ builder, probably of Welsh birth, active also in the southern Netherlands. He was one of the leading keyboard virtuosos of his time and an important composer of keyboard music.

1. Early years to 1597. 2. Middle years, 1597–1613. 3. In the southern Netherlands, 1613–28. 4. Library; portraits. 5. Works.

1. EARLY YEARS TO 1597. The date of birth above derives from the Oxford portrait of Bull (see fig.1 and §4 below) and is probably more reliable than the one some three years earlier deducible from his marriage licence in 1607 (see §2 below). Wood stated that Bull was descended from a Somerset family but provided no evidence. It is more likely that he was born in Radnorshire, where, in and about Harpton (or Herton), several families with the surname Bull resided. This assumption is based on the existence of his petition to the queen in 1589 for a lease in reversion of Radnor Forest (see below) and of a pedigree submitted in the Court of Chancery in which one party claimed to be descended from 'the musician, Dr. John Bull of Old Radnor', which may well refer to him.

Bull entered the choir of Hereford Cathedral in 1573 – the relevant entry in the cathedral records is dated 31 August – and worked there under the cathedral organist, John Hodges. He had probably joined the Children of the Chapel Royal in London by 8 February 1574, the date on which a vacancy in the Hereford choir was filled. His music teacher was John Blitheman (whose epitaph mentioned him), and the Master of the Children was William Hunnis.

One of the patrons of the children was the Earl of Sussex, the Lord Chamberlain, who was an honorary freeman of the Merchant Taylors Company and made Bull his apprentice on 24 January 1578. Sussex's second wife, Frances, was the younger sister of Sir Henry Sidney, the President of the Marches, who recommended Bull for the position of organist at Hereford Cathedral. He was appointed on 24 December 1582, at first jointly with the elderly Hodges. On 21 January 1583 he was also appointed master of the choristers. He was never a vicar-choral, but the new cathedral statutes allowed him to combine the posts of organist and master of the choristers. He now had to divide his time between London and Hereford. The cathedral chapter noted on 1 February 1585 that he had been absent longer than he had been allowed and therefore declared his offices vacant. This declaration was not carried out, but on 5 June 1585 he appeared before the dean and chapter on a complaint by the precentor that in his capacity as organist he was not following instructions and was in contempt of the precentor. He was first suspended from his offices and benefice and then dismissed, but he was allowed to retain his rooms at the college of vicars-choral. In January 1586 he was sworn a Gentleman of the Chapel Royal, and his fast-growing reputation there probably made the custos of the college of vicars-choral in Hereford grant him improved accommodation on 16 September 1587. On 18 January 1591 he was allotted better rooms still, at the request of the Archbishop of Canterbury; it is not known how long he held them.

Little is known about Bull's university career. As a very experienced musician and a member of the Chapel Royal he did not need to matriculate, and the only reference to his connection with a college occurs in a minute of 23 March 1597 in the Common Council Journal Book of the City of London, where he is described as being of King's College, Cambridge. An entry in the Oxford University Register relates to his Oxford DMus of 7 July 1592, and Wood stated that he 'practised [in] the Faculty of Music for 14 years', supplicated for the BMus at Oxford on 8 July 1586 and was admitted to the degree the following day. Wood added that he would have proceeded to the doctorate at Oxford 'had he not met with Clownes & rigid Puritans that could not endure Church music'. He therefore supplicated for the MusD at Cambridge (which enabled him to obtain the Oxford DMus by incorporation in 1592): that he was awarded this degree by 1589 can be assumed from the reference to him as 'doctor' in his certificate of residence in connection with an assessment for the lay subsidy taken in the queen's household in that year. On 4 July 1592 he contributed to the steeple fund of St Mary the Great, Cambridge. Earlier that year he was a victim of highway robbery: an entry in the Old

Cheque Book on 29 May 1592 (see Rimbault), relating to the admission of one William Phelps of Tewkesbury as an extraordinary Gentleman of the Chapel Royal, gives as one reason for this 'that he dyd show a most rare kyndness to Mr. Doctor Bull in his great distress, being robbed in these parts'.

That Bull was poor can be gathered from his petitions to Elizabeth I. The free university education allowed to former Children of the Chapel Royal was discontinued in her reign. Moreover, the wages of those serving in the royal household were very rarely increased, but the Tudor monarchs had other ways of making rewards, such as the granting of leases in reversion of crown land. Two petitions by Bull to the queen for such a lease survive at Hatfield House, Hertfordshire (Cecil Papers 165/140, 615, 818). The first, undated but endorsed on 7 February 1589, relates to Radnor Forest; although the queen was sympathetic, it was not granted. She did, however, decide to give him a 'thinge' about the value of £10 or £12 yearly. As the promised reward did not materialize, he had to petition again, this time for a lease in reversion amounting to the value of £30 without fine or an increase of his wages, so that 'his great poverty, which altogether hindereth his studies, shall be relieved'. The petition, endorsed on 20 April 1591, was successful, and Bull was granted 'a lease in Reversion for 21 yeares of Twentie Marks by the yeare ... without fyne'. He did not receive his gift until 12 July 1592, and even then it amounted to barely half the amount he had requested; a number of properties in several counties – all former monastic lands and now crown lands – are mentioned in the letters-patent. On 31 March 1597 a lease in reversion was granted to Robert Holland 'at the humble suite and in consideration of the service of John Bull, Organist of her Majesty's Chappell'; Holland no doubt rewarded Bull suitably.

2. MIDDLE YEARS, 1597–1613. Bull's financial position had now improved, however, for on 6 March 1597 he was elected the first Public Reader in music at Gresham College, London, with an annual salary of £50. The queen had recommended him in a letter to the mayor and aldermen of the city, who administered the bequest of the late Sir Thomas Gresham through a committee jointly with the Mercers Company. The committee appointed seven unmarried learned readers from the universities of Oxford and Cambridge in divinity, astronomy, geometry, music, law, medicine and rhetoric respectively. The readers had to obey the committee's ordinances, lodge at Gresham House and give public lectures in Latin and English. Bull received the queen's special permission to give all his lectures in English. On 8 June 1597 the readers were ordered to deliver their inaugural lectures the following week in the presence of the mayor, the aldermen, the Bishop of London and the master and warden of the Mercers Company. Bull, however, had not yet been able to move into his rooms at Gresham House, as they were still occupied by William Reade, Gresham's stepson; fearful of losing his readership through not living there, he engaged a mason and went with friends (including the City Chamberlain) to the part of the house where Reade lived, broke down a wall and forced an entry into his rooms. This led to an action in the Star Chamber, the outcome of which is unknown. In the event Bull did not deliver his lecture until 6 October 1597. It was printed soon afterwards, but the title-page (*GB-Lbl* Harl.5936) is all that survives; the offset of the first page is visible on the reverse, however, and this has been reconstructed (see King, 270–71).

Bull had further troubles at Gresham College. He was one of the readers who refused to sign the ordinances, and his salary was consequently withheld. He complained to the Privy Council, who in a letter of 4 November 1599 to the mayor and committee ordered it to be paid. In June 1601 he asked for leave of absence, eventually granted on 5 February 1602. According to the relevant minute he was 'visited with sicknes', and Thomas Byrd (son of William) was ordered to replace him during his leave and sickness. Bull's movements during much of his leave are uncertain. No documentary evidence has yet come to light to confirm Wood's reports about travels abroad, including an episode at St Omer, where, when travelling incognito, Bull was allegedly challenged by a musician to add one part to a composition and added 40. He was certainly present at the queen's funeral on 24 March 1603 when, according to the Lord Chamberlain's accounts, his name stood at the head of the list of the Gentlemen of the Chapel Royal. He had served the queen well and had played the organ for festivals and state receptions for royal visitors and foreign envoys. He was not one of the queen's private musicians as has generally been assumed, and there is no record of his being paid for playing the virginals to her (her virginalist was Walter Earle). On 29 June 1603 he applied for readmission to his readership at Gresham College and was accepted. He also continued in royal service under the new king, James I. On 5 December 1604 the king ordered that the salaries of the Gentlemen of the Chapel Royal be increased from £30 to £40 annually. In April 1605 the king granted Bull a pension of £40 in consideration of his past and future service; this sum compares unfavourably with those awarded to several other musicians. On 15 December 1606 Bull was admitted into the freedom of the Merchant Taylors Company. On 16 July 1607 the company gave a sumptuous banquet for the king and Prince Henry; Bull played the organ throughout dinner, and Nathaniel Giles and Children of the Chapel sang. The following day both men were accepted into the livery of the company and were excused any payment because they had performed at the banquet without being paid. Under the statutes of Gresham College, Bull had to resign his readership on 20 December 1607, for he had fathered a child with one Elizabeth Walter and had to marry her (his petition for a licence to marry, dated 22 December 1607, survives in the registry of the Bishop of London). He was thus deprived of his most lucrative source of income as well as his quarters there and had to look for other income. He had built instruments for the queen in 1599, and in 1609 he was active as an organ builder. His name appears in the diplomatic correspondence of 1609–10 (Österreichisches Staatsarchiv, Vienna) between the secretary of the Austrian Archduke Albert, Governor of the Spanish Netherlands, and his envoy in England. The archduke wanted to buy an organ in England, and his envoy suggested that he approach Bull (who wished to be known as Jean Bouville or Bonville). The organ was to be of the same size and tone as one that the archduke had presented to a convent in Madrid. Bull was to be paid £2000 (or 6000 reales), but before half of this sum was paid to him in advance – so that he could buy the necessary materials, such as English tin – he was asked to find guarantors. He

could not do so and at one stage offered to give the archduke one of his organs as a surety, but when the instrument was examined by several musicians, including Byrd, it was pronounced to be not worth the £1000. He then proposed to build the organ using his own resources and went to Madrid, but on his way home he was attacked by pirates, who seized his money. The archduke, who had waited patiently for the organ for a year and a half, had finally to engage another builder. Among the interesting sidelights in the correspondence are comments on Bull's property (including references to a house near Plymouth) and his friendship with Peter Philips.

Bull's occasional absences from England did not interfere with his duties at the Chapel Royal as the king's organist. He had joined the musical establishment of Prince Henry probably by 1610; he is nowhere mentioned as the prince's music master, but he was charged with buying music books for him. After the prince's death on 6 November 1612, he received a pension of £40 a year for two years. Early that year he had been appointed music teacher to the 15-year-old Princess Elizabeth. It was to her and her betrothed, Prince Friedrich, the Elector Palatine, that the first printed volume of virginal music, *Parthenia, or The Maydenhead*, was dedicated. Its publication can therefore be dated between 27 December 1612, the date of their engagement, and 14 February 1613, when they were married. The dedication refers to the 'three famous Masters' Byrd, Bull and Orlando Gibbons, who had written the pieces in it, 'whereof one had the honor to be your teacher ... and (had he not had it before) thereby deserved the stile of a Doctor'. Bull composed the anthem *God the father, God the son* (now lost) for the wedding. On 26 April 1613 he addressed a letter to Sir Michael Hicks (Kent County Archives, Maidstone) in which he asked for his letters-patent for £40 a year to be transferred to his child. (He had a daughter, not a son as used to be assumed.)

3. In the southern Netherlands, 1613–28. Bull now became involved in a serious scandal, and articles were laid against him in the Court of High Commission. The substance of the charge, which was of adultery, is described in a letter of December 1613 from George Abbott, Archbishop of Canterbury, to Sir William Trumbull, the English envoy at Brussels. Bull was charged to come into a church a little before the beginning of the prayer, and there 'as the minister was entering into service, in the sight of the congregation Bull pulled him violently out of his seat, and despitefully intreated him'. The archbishop concluded: 'The man hath more music than honesty and is as famous for marring of virginity as he is for fingering of organs and virginals'. The outlook for Bull was grim indeed, and in August 1613 he fled the country, never to return. He went to the southern Netherlands, where he had friends, and Archduke Albert employed him at Brussels from Michaelmas (24 September) 1613. Here Bull joined Peter Philips and the other three organists, one of whom was Pieter Cornet. Trumbull and others in the Netherlands knew of his arrival and employment by the archduke but kept silent for at least two months. By that time, however, James I had discovered the flight of his organist on whom he vented his wrath with a severity and hatred that were out of all proportion. Trumbull, now worried about his own position, gave the king many excuses for his long silence: he wrote that Bull had said that he had left England for reasons of religion, that he had at that time not yet made up his mind whether to remain in Brussels or to move on to Paris or Heidelberg and that it was only when he received Archbishop Abbott's letter that he realized the real reasons for his flight. The king insisted that Trumbull ask the archduke for an audience and give him a true report of Bull's behaviour. On 30 May 1614, in a well-known letter, Trumbull wrote

> that it was notorious to all the world, the said Bull did not leave your Majesties service for any wrong done unto him, or for matter of religion, under which fained pretext he now sought to wrong the reputation of your Majesties justice, but did in that dishonest matter steal out of England through the guilt of a corrupt conscience, to escape the punishment, which notoriously he had deserved, and was designed to have been inflicted on him by the hand of justice, for his incontinence, fornication, adultery, and other grievous crimes.

The king was still not satisfied and insisted on Bull's dismissal from the archduke's chapel. Trumbull told the king a month later that he had spoken accordingly to the archduke – successfully, since the archduke dismissed Bull for diplomatic reasons at the end of August 1614. Bull, who had been receiving an annual stipend of 750 florins, found that the archduke continued to support him with gratuities from his privy purse until April 1618; the first payment was made on 20 February 1615 and was followed by payments of 250 florins about twice a year.

Bull addressed a letter to the Mayor of Antwerp in which he set out his own case alleging that the real reason why he had been driven into exile was his adherence to the Catholic faith, describing his present great poverty and asking for a post as organist pensioner. From September 1615 he was in fact assistant organist at Antwerp Cathedral, but in 1616 he was still so poor that the city had to support him with alms. On 29 December 1617 he was appointed cathedral organist, with a salary of 80 florins a year plus a special supplement of 20 florins. He was also employed by the guilds and could count on a regular income of 150 florins for playing and tuning. He sometimes acted as organ consultant and examiner and on 9 December 1617 advised the churchwardens of St Janskathedraal, 's-Hertogenbosch, to have, on their new organ, keyboards that included all the semitones and that had 29 white keys and 20 black ones. He also advised them on the length of the resonators of the pedal reeds and wanted the eight bellows to be 7½′ × 3½′ and to be arranged in pairs. On 14 October 1624 his salary at the cathedral was increased to 160 florins. In 1626 he drew up a specification for a little one-manual organ for the Guild of the Holy Sacrament. According to a lease dated 15 March 1620 he lived in a house by the south door of the cathedral at a rent of 33 florins a year. On 2 December he sublet half of his house to the verger, and on Christmas Day he moved into rooms in the Papenhof (vicars' close). He stayed there until 25 May 1624, when he was granted new rooms in the Papenhof. In March 1626 a substitute organist was appointed to deputize for him because he was ill; he also had assistance from Guillaume Messaus, of Antwerp, who later copied some of his manuscripts. After his death he was buried, on 15 March 1628, in the South Cemetery, and his will was proved on 26 October. He was succeeded as organist by Hendrik Liberti.

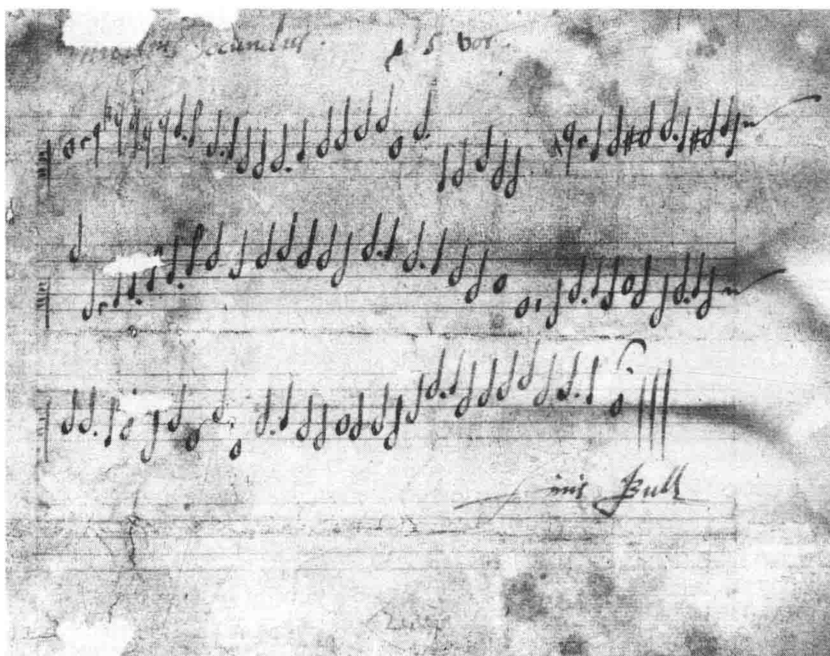
4. Library; portraits. Some sumptuously bound books which once belonged to Bull have survived. The most interesting is a manuscript in the Fitzwilliam Museum, Cambridge, dating from about 1600. The

stamped inscription on the front cover reads: 'JOHN BULL DOCTER OF MUSIQUE ORGANISTE AND GENTLEMAN OF HER MAIESTIES MOSTE HONORABLE CHAPELL'. The volume is not in Bull's hand, and the scribe has not yet been identified. It contains a large number of anonymous five-part pieces in score, without titles and texts, which Edwards has identified as transcriptions of madrigals by Giulio Eremita, Alfonso Ferrabosco (i), Marenzio, Lucrezio Quintiani and Pompilio Venturi. The manuscript also includes music by Diomedes Cato, the bass part of eight songs from Dowland's *First Booke of Songs or Ayres* (1597) and an interesting collection of virginal pieces by Byrd, Marchant, William Randall (i), William Tisdale and others. Another volume once owned by Bull is in the University Library, Cambridge, and contains Claudius Sebastiani's *Bellum musicale* (1563), Arbeau's *Orchésographie* (1596 edition) and Antony Holborne's *Cittharn Schoole* (1597). A third volume from Bull's library contains Boethius's *De musica* and (incomplete) Guido's *Micrologus* (*NZ-Wt*).

A fine portrait of Bull (fig.1) hangs in the library of the Faculty of Music at Oxford. It was painted in 1589 and bears the inscription 'anno aetatis suae, 27'. In one corner of the picture are a skull and crossbones and an hourglass. These are not symbols of mortality but the alchemist's symbols of victory of life over death: Bull may have been interested in the hermetic sciences (as were others with whom he came into contact, including Hunnis and the Elector Palatine). The following rhyme is painted round the frame:

> The Bull by force
> In field doth Raigne
> But Bull by Skill
> Good will doth Gayne.

Infra-red photography has revealed that Bull was not the sitter of a second portrait – the so-called Antwerp portrait – once thought to be of him.



1. John Bull: portrait by an unknown artist, 1589 (Faculty of Music, Oxford)

5. Works. It is perhaps not surprising that Bull, having been employed both at Hereford and in the Chapel Royal as an organist, should have written little vocal music. Even so the nine anthems of which there is some record seem a small harvest for three decades. The four for which music survives show that at his best he was able to sustain interest through a lengthy piece, but that sometimes, as in *Deliver me O God*, he could relapse into routine. In the songs for Sir William Leighton's *Teares or Lamentations of a Sorrowful Soule* (RISM1614^{7}) he likewise attempted very little.

The few textless consort pieces appear to be special exercises of one kind or another, the In Nomine a production of his apprenticeship, the three-part fantasia an essay in stretto imitation, the four-part fantasia a 'Doric' piece. 'Doric' music was invariably defined as solemn theatre music suitable for great personages; the consort piece, like the Doric keyboard preludes K57 and K58, fits this description, though the other Doric pieces are in a quite different, much less sober style. The chromatic Hexachord Fantasia (K17), which appears to have been composed originally for consort, is manifestly experimental, the only piece of its kind to include all twelve possible transpositions of the hexachord. It is unusual among Bull's compositions in giving scope to the side of his mentality that enjoyed constructing complex canons.

Bull's keyboard music forms by far the most important and extensive part of his output. A comprehensive assessment of it is difficult, however, for although most of the more substantial pieces from his English years are securely attributed to him, scarcely any of the sources are entirely trustworty in their ascriptions. Indeed, the most important source of all (*F-Pn* Rés. 1185, sometimes claimed as autograph), contains no ascriptions except some provided by Benjamin Cosyn, who acquired it and made additions and annotations. The great majority of the pieces can be shown to be by Bull, but a few are by other composers, so that Bull's authorship of those that lack ascribed concordances cannot be assumed. The Fitzwilliam Virginal Book (*GB-Cfm* Mu.Ms 168, strong in early pieces and versions) and Cosyn's own virginal book (*GB-Lbl* R.M.12.l.4, copied before he came into possession of Rés. 1185) are usually reliable, but such later English manuscripts as *GB-Lbl* Add.31403 (copied by Edward Bevin) and *GB-Och* Mus.1113 cannot always be trusted. The difficulties become still more acute for the Antwerp period. The surviving music is confined almost entirely to two manuscripts, one copied in Antwerp possibly by Guillaume Messaus (*GB-Lbl* Add.23623), the other a German organ tablature now in Vienna (*A-Wm* 17771). Both ascribe nearly everything to Bull, English or continental, genuine or spurious. Any list of Bull's works must therefore include anonymous pieces almost certainly by him and ascribed ones that may well not be. Uncertainty arises primarily in three categories: early works not yet fully representative of the composer, smaller dances and teaching pieces giving restricted scope for individuality of treatment, and late works adopting continental styles.

It seems that Bull studied with both Blitheman and Byrd. The epitaph of the former, who died in 1591, speaks of Bull as his pupil; at the beginning of his inaugural Gresham oration of 1597 Bull says that his master is still living and implies that he is referring to Byrd. Blitheman was presumably his earlier teacher and certainly the more

2. *'Medius secundus' part, perhaps autograph, from Bull's incomplete Fantasia a 5 (GB-Lpro SP46/162, f.244r)*

fundamental influence. He passed on to him his enthusiasm for the English tradition of elaborate figuration in plainsong settings for keyboard, and apparently introduced him as well, if only as an exercise, to the plainer three- and four-part styles of the mid-century. In the latter class the Antwerp manuscript contains a number of hymn verses and alleluias attributed to Bull which pose a peculiarly intractable problem of authenticity. One is known to be by Tallis, but the rest can scarcely be by him: they suggest the work of a somewhat later generation, for instance in their use of rhythmic ostinato, sequence, loosely spaced canonic writing and later styles of figuration. They could be by Blitheman, or by Bull himself, as *Vexilla regis* (K44) appears to be; if some at least were his own early efforts it might explain why he bothered to take arrangements of Sarum melodies abroad with him, where they could serve no practical purpose.

Another piece that at first sight raises doubts is Fantasia K15, from a fallible English source, an essay in the old three-part 'mean' style of Blitheman's *Felix namque*, but more consistently imitative. Yet such pieces cannot be dismissed out of hand, for there are well attested early works that stand quite as much apart, for instance the five-part consort In Nomine composed in the tradition of Parsons and Byrd, or the *Spanish Pavan*, based entirely on types of scalar figuration familiar from Byrd's big grounds of the 1570s. At this early date Bull could look a long way back: the beginning of the keyboard In Nomine K31 would be hard to accept as his were the continuation not such as to remove all doubt.

The relatively simple but already characteristic figuration in this In Nomine, and the exceptionally lively extension of a much earlier tradition in his two-part Fantasias K10 and K11, show the direction his music was to take. His rise to fame as a keyboard player brought a need for display pieces. The method he preferred was to develop patterns of figuration against an undecorated cantus firmus, writing bicinia with a single very active free part, three-part studies in which the predominant note-value of one free part is likely to be double that of the other, and, more rarely, quasi-imitative four-part textures; *Veni redemptor gentium* K43/2, *Miserere* K34 and *Salvator mundi* K37/3 are good examples of each. Here the patterns remain constant, but sometimes a series of them may succeed one another, notably in the large group of In Nomines. Precedents for all these techniques were to hand in mid-century composers such as Redford and Preston, in the Tallis of the two vast *Felix namque* settings and in Blitheman. Bull's contribution lay in the variety and profusion of his figurative detail and, where applicable, the motivic cogency with which one pattern led to the next.

In every way the eleven A minor In Nomines (K20–30) represent the furthest development of Bull's work in the genre. Yet they are problematical works. The moments of change between the various stages through which they pass are unsupported by any firm cadence structure or other means of measurement that might impart a real sense of direction to the music. The sources transmit the pieces for the most part in groups of three. Two groups (In Nomines K20–22 and K23–5) appear consistently together, and it is possible that they are intended to make up a group of six. If so they invite a comparison with Blitheman's smaller-scale set of six which they cannot sustain. Blitheman gives each piece its own character. Bull has a wider range of procedures at his disposal, but not wide enough to prevent each piece from sounding like a different but occasionally overlapping selection from the same general pool.

One In Nomine, K28, differs considerably from the rest. Each note of the cantus firmus, which is placed in the bass, is lengthened from the normal breve by three crotchets. The uneven pulse draws attention to the harmonic shifts in the unusually full four-part texture, so that to some extent the music moves as in a secular ground, though without the stability provided by a repeating pattern. Bull only once attempted a large-scale ground, in his Quadran settings. Something of their

history may be gleaned from their relation to Byrd's similar works, probably composed about 1590. Byrd picked up hints from Bull's first pavan and his galliard, but not from his second pavan, which is therefore likely to have been written a little later as a more elaborate substitute for the first. Certainly in the earlier work Bull's customary figurative exuberance seems cramped, perhaps because it had not yet developed fully, but more probably because the composer was inhibited by the demands of the harmonic scheme.

Among repeating formulae he took most readily to treble ostinatos, such as the hexachord or the four-note pattern of *God save the king*. These gave a little more definition than a chant but left his fingers equally free. In his 30 variations on *Walsingham* he shows the same preference, confining the tune to the treble almost throughout, and thereby inducing a structural monotony for which the extraordinary instrumental brilliance cannot entirely compensate. The definitive Quadran Pavan and Galliard, the Hexachord Fantasia K18 and *Walsingham* are by some way the longest pieces that Bull composed. Together they provide a compendium of his keyboard techniques. Tomkins, comparing Quadran settings and hexachord fantasias by Bull and Byrd, characterized Bull's as 'excellent for the hand' and Byrd's respectively as 'excellent for matter' and 'for substance'. That puts it in a nutshell; no doubt he would have drawn the same distinction between their *Walsingham* settings. Yet virtuosity has its place, and Bull's remorseless bravura establishes a special position for these pieces in the music of the time, even if his most imaginative strokes are to be sought elsewhere.

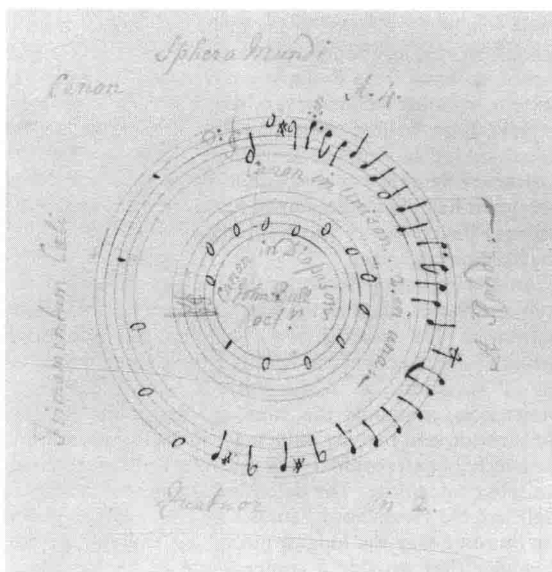
None of Bull's other grounds or variations approaches the scale or importance of the Quadran settings and *Walsingham*. Among the grounds *The King's Hunt* is a vigorous and original descriptive piece, but several of them seem to be teaching exercises, in some cases raising doubts about authenticity. A quite different side of his work is represented by *Bonny Peg of Ramsey* and *Why ask you* (K62 and K63). Like them, most of the variation sets draw on well-known tunes, though this does not appear to be true of the accomplished example called *Bull's Goodnight*. This belongs with a handful of attractive pieces claiming to depict the composer's character and moods: *My Self*, *My Grief* and so on. It resembles an alman; the others are in coranto style with varied repeats to each strain, and some have a complete variation of the whole as well. It seems fairly clear that they are original compositions.

The same cannot be said, however, of the numerous smaller dances associated with Bull's name. While many are no doubt his own, for instance the pieces made for the Duke and Duchess of Brunswick, he may sometimes, like Gibbons, have arranged popular dances or masque tunes, or elaborated a complete composition, such as John Johnson's in Galliard K70, or merely added decorated repeats, as in Coranto K105, where the original is by Edmund Hooper. In some cases the ascriptions may be wrong. The corantos especially need accepting with reserve: most occur only in the Antwerp manuscript, where the occasional English title may guarantee nothing more than provenance. Although the galliards are generally much more ambitious pieces than these, there are exceptions. The scribe of Rés.1185 grouped the lightweight Galliard K92 with four other dances in the same mode, labelling them German, Dutch, Italian, English and French. Similarly he transcribed Galliard in C, K103, as a pendant to the Dallying Alman and added purportedly French and Welsh dances also in C.

Many of the independent galliards, however, bear comparison with those accompanying the more important pavans, for instance the apparently early K72 and K73, the spirited Vaulting Galliard (K90), the two variant versions of the Regina Galliard (K132), and best of all the fine Prince's Galliard (K113). The last was almost certainly composed for Prince Henry not long before Bull left England: Byrd parodied some of its features in his Mary Brownlow Galliard, published in *Parthenia*. In the preface to this book the hope is expressed that the Bull's royal pupil will play the pieces in it. This may help to explain why his contributions are so disappointing. They are not teaching pieces like some of the preludes and grounds, nor even particularly easy. But they tend to play safe harmonically and preserve rather uniform textures, thereby throwing into relief Bull's weakness as a melodist. Three are slightly revised versions of older pieces that the princess may have known already. To four variations in galliard measure on *St. Thomas Wake*, very dull by comparison with, for instance, those on *Go from my window*, he added two equally dull new ones as a companion pavan. Another weak pavan and galliard (K131) waters down some of the best ideas from the far superior Lord Lumley pair (K129), and the inclusion of a galliard (K70) based quite exceptionally on another composer's work, John Johnson's *Jewel*, suggests that this may have been a favourite of the princess's. Several earlier pavans and galliards in the major G mode tend towards the limited style of the *Parthenia* pieces and thus may have been intended for pupils. In any case, among them only Lord Lumley's belong with Bull's more important pavans and galliards, the rest of which are all in minor modes: A (K86–8), D (K66–7) and G (Cunningham App.III and K78).

This is a group of works on which he appears to have expended much thought and effort. In the absence of a cantus firmus or a variation pattern his figuration could not proliferate so freely here. He needed to replace that kind of neutral framework with harmonic and cadential schemes strong enough to span the long pavan strains and support a variety of character and texture that he scarcely attempted elsewhere. He was not invariably successful: if the venture drew from him some of his most original ideas it also made demands on a purely technical level that he could not always meet.

Difficulties arose in two quite different ways. Whether he chose to work with strains of 8 or 16 bars or with less regular ones, he seems to have planned them to some extent in the abstract. Where the often rather characterless melodic lines receive insufficient support from the harmony, or where, especially in four-part textures, the harmonic direction itself becomes blurred by a need to maintain constant quaver movement among the parts, the defining cadences fail in their effect; strains I and III of Pavan K66a provide illustrations of such points. Then certain pavans contain strains in styles that endanger the continuity of the whole, for example the close imitations in strain III of the Pavan in G minor (paired with Galliard K78), or the chromatic middle strains of the Melancholy and Chromatic Pavans (K67a and K87a). In the Chromatic Pavan an outbreak of cantus firmus style in strain III compounds the weakness, though in the Melancholy Pavan the independent excellence of the corresponding strain may be felt to save the day. However, the Lord Lumley pair (K129) and the pair K88 each in their own



way achieves far greater consistency, and the Fantastic (K86) is altogether outstanding, remarkable for its arresting invention, assured decoration and motivic coherence. Any moments of harmonic slackness count for little in such a work, which would suffice by itself to give Bull a high place among keyboard composers of the time.

The surviving output of Bull's 14 or so years in Brussels and Antwerp is not large; in several categories it adds only one or two pieces. These are of unequal interest, but all show the impact of continental styles. The rather unadventurous Dutch carol settings make use of standard techniques of keyboard intabulation not much favoured in England, and the variation set on *Revenant* is a sober affair by comparison with its English counterparts. On the other had the fine *Salve regina* settings for alternatim use profit greatly from an almost total break with Bull's English chant settings and his absorption of local techniques, and, although their antecedents are less easily identified, the Symphony Pavan and Galliard (K68) and Pavan K77 add something distinctive in their quiet way to his already wide-ranging work in the genre.

It is the fantasias, however, that enter the newest territory, if the ascriptions to Bull of no fewer than eleven extremely heterogeneous examples from this period are to be trusted. The only guide here is style, and it proves an inadequate one. Bull's English fantasias give very little help. Apart from the early pieces in three or two parts (K15, K10–11) and the hexachord fantasias, all in their own ways special cases, Fantasia K12 is his only essay in the genre. It is a confident loose-limbed piece, not much concerned with imitation after the opening, and dependent on harmony to direct its succession of varying texures. It has little bearing on the later pieces.

Among these, and at the opposite extreme, are three relatively short, close-knit contrapuntal essays built on motifs from a canzona by Gioseffo Guami and Palestrina's madrigal *Vestivi i colli*. They belong to an entirely different category from any earlier work of Bull's, yet much of the detail seems acceptable as his. If they are genuine they show that he retained the adaptability observable from the very beginning of his career, and that none of the late fantasias can be rejected merely on the grounds of its wider conception. There is in any case a lack of consistency of thought even in his accredited works that makes his personal traits hard to pin down. These lie primarily in figuration, and in a certain restlessness or even lack of control where no ready-made structural formula is present. When he adopts Sweelinck-like augmentation, diminution or more sustained imitation in Fantasia K14, which is related to *God save the king* and the Hexachord Fantasia K18, and in the chromatic fantasias K4 and K5, he shows no interest in deploying them in the orderly fashion of Sweelinck and other continental composers. Thus it may be indicative that, among the at first sight more doubtful fantasias, the keyboard textures suggest Bull less in the structurally consistent works, K1 and K13, than in the less well thought through K2 and K6.

Even if all the music attributed to Bull in his years of exile could be proved authentic, it would not add greatly to his achievement. In emulating continental genres he never recaptured the originality of the pavans and galliards, the liveliness of some of the smaller works or the brilliance of the big display pieces composed in England. Nor does whatever influence he may have

3. *'Sphera mundi', puzzle canon by Bull in an 18th-century MS (GB-Lbl R.M.24.f.25, f.6r)*

exerted on continental keyboard styles date primarily from this time. Such influence must in any case be seen as part of a more general picture. It appears to have been largely through Sweelinck that elements of English keyboard writing gained wide currency abroad. The foundations of Sweelinck's style must have been laid well before the turn of the century. Many English musicians visited the Continent at that time and Peter Philips was resident in Antwerp from 1590, so English music could have reached him by various routes. He arranged English pieces, imitated English secular variations, and adopted patterns of figuration used in England since the middle of the century. How far his knowledge of these derived from Bull's music it is hard to say, but at least some passages suggest Bull rather than earlier music, and travellers from England are more likely to have brought the new with them than the old. In later times the sheer difficulty of Bull's music continued to attract the interest of historians (fig.3), but much of it remained unpublished till the appearance of the Musica Britannica edition. No comprehensively detailed study was undertaken until that of Cunningham (1984).

WORKS

Editions: *John Bull: Keyboard Music I*, ed. J. Steele, F. Cameron and T. Dart, MB, xiv (1960, rev. 2/1967) [K]
John Bull: Keyboard Music II, ed. T. Dart, MB, xix (1963, rev. 2/1970) [K]

works included in K are identified by edition number, not page number; for a more systematic numeration see Cunningham (1984)

KEYBOARD MUSIC

this list includes everything in MB xiv; xix; questions of authenticity are dicussed in the commentary to the edition and in Cunningham (1984); no attempt has been made here to distinguish degrees of doubt

Plainsong settings: Aeterne rerum conditor, K47/3–5; Alleluia: per te, K48; Alleluia: post partum, K49; Christe redemptor omnium, K33; 12 In nomine settings, K20–31; Jam lucis orto sidere 1, K45a; Jam lucis orto sidere 2, K45b; 3 Miserere, K34–36 (K36 anon.); 3 Salvator mundi, K37–39; 2 Salve regina, K40–41; Sermone blando (Aurora lucis rutilat), K47/1,6,7; Te lucis ante terminum, K46; Telluris ingens conditor, K47/2; 2 Veni redemptor gentium, K42–43; Vexilla regis prodeunt, K44

Preludes and Doric music: Doric music, 3 pts (? based on piece by Gibbons), K57; Doric music, 4pts, K58; D[oric], K61; Doric music (anon), K59; Dor[ic], K60 13 untitled preludes: K1–2, 16, 30, 43, 82–4, 117–121

Fantasias: On a theme of Sweelinck, K4; Quinti toni, K6; Sexti toni, K13; Octavi toni, sopra sol ut ♯ mi fa sol la, K2; Octavi toni, sopra re re re sol ut mi fa sol, K14; Duo, K10; Hexachord, K17; Hexachord, K18; God save the king, K32; 'La Guamina' (on a canzona by G. Guami), K3; 'A Leona', K7; 'Vestiva i colli' (i) (on Palestrina's madrigal), K8; 'Vestiva i colli' (ii) (on Palestrina's madrigal), K9; 5 untitled fantasias, K1, 5, 11, 12, 15

Grounds: A Battle and no battle (Phrygian music. The ground for a second player. anon.), K108; Boerendans (Country dance), K111; Bonny Peg of Ramsey, K75; Les Bouffons, K101; Dr. Bull's Ground (i), K102a; Dr. Bull's Ground (ii), K102b; The King's Hunt, K125; Het nieu bergomasco (The new bergomask), K124; 2 Quadran pavans, K127ab–c; Quadran galliard, K127d–f; Spanish pavan, K76; Why ask you (i), K62; Why ask you (ii), K63; Why ask you (iii), K64; Why ask you (anon), ed. in MB, lv (1989), 119

Variations: Bonny sweet Robin, K65 (?later revised by Farnaby); Bull's Goodnight, K143; Go from my window, K123; Revenant, K100; Rosasolis (?revision of a setting by Farnaby), K122; St. Thomas Wake pavan and galliard, K126a–b; St Thomas Wake galliard (anon.), K126c; Walsingham, K85

Pavan and galliard pairs: Fantastic, K86; Chromatic (Queen Elizabeth's), K87; Melancholy, K67; Symphony, K68; Battle (anon.), K109; Trumpet, K128; Lord Lumley's, K129; 5 untitled pairs, K66, 78 (galliard, paired with pavan in Cunningham, App. iii), 88, 130 (anon.), 131

Pavans: 2 untitled, K69 (anon., inc.), K77

Galliards: Vaulting, K90; Italian (anon.), K92; Piper's (2 arrs. from Dowland), K89a–b; 'Air', K91; The Prince's, K113; Lady Lucy's, K72; Lord Hudson's, K133; Regina, K132a; Regina, K132b–c; Galliard (arr. from J. Johnson's 'Jewel'), K70; 3 untitled, K71, 73, 103 (anon.)

Almans: Duke of Brunswick's, K93; German's, K94; French, K95; Dallying (Lydian music), K104; Ionic (Phrygian music), K110; Fantasia (Meridian) (also attrib. Farnaby), K134; 3 untitled, K114, 115 (anon.), 135

Corantos: The Prince's (anon.), K98; French (anon., arr. from E. Hooper), K105; Bataille, K106; Brigante, K74; Joyeuse, K136; A round, K137; Alarm, K80; Kingston, K81; 6 untitled, K79 and 5 in *GB-Lbl* Add.23623 ff.88–92

Other dances: Duchess of Brunswick's Toy (Most sweet and fair), K97; Dutch Dance (anon.), K99; English Toy, 96; Irish Toy (anon.), K112; Welsh Dance, K107; What care you? (anon.), K116

Various short pieces: Canon, 4 in 2, K50; My choice I will not change, K140; My grief, K139 (omitting the variation in *GB-Lbl* R.M.23.l.4); My Jewel (i), K141; My jewel (ii), K142; My self, K138; Den lustelijken Meij K52; 3 Een kindeken is ons geboren, K53–55; Prelude and Carol: Laet ons met herten reijne, K56

SUSI JEANS (1–4), O.W. NEIGHBOUR (5, work-list)

Bull, Ole (Bornemann) (*b* Bergen, 5 Feb 1810; *d* Lysøen, nr Bergen, 17 Aug 1880). Norwegian violinist and composer. He was one of the greatest 19th-century violinists and a central figure in Norwegian music.

1. Life. 2. Reputation, works.

1. LIFE. His father was an apothecary from a cultivated Bergen family of clergymen and military officers. At the age of five he was given a violin and made rapid progress; by the age of eight he could play in the weekly string quartet meetings at his home. The statutes of the Bergen Harmonic Society were altered to admit so young a musician to membership in the orchestra, and in 1819 he made his début as a soloist. He was first taught by the town musician Niels Eriksen, and then by leaders of the Harmonic Society orchestra, J.H. Poulsen (until 1820) and Mathias Lundholm (1820–27), pupils of Viotti and Baillot respectively, who provided a sound technical foundation on which he later superimposed a very personal manner. He also learnt much from the peasant fiddlers around Valestrand on Osterøy, north of Bergen. It was not however intended that he should follow a musical career. He went to Christiania in 1828 to read theology at the university, but failed the entrance examination. As his reputation as a violinist had already secured him a leading position in the city's musical life, he was invited to take over the conductorship of the Musical Lyceum and of the theatre orchestra during the illness of Waldemar Thrane; when Thrane died a few months later Bull was appointed to succeed him as conductor.

Bull now devoted himself to theory and composition. In a letter he mentioned work on a symphony; two settings in 1829 of poems by Henrik Wergeland, *Hymne til Friheden* ('Hymn to liberty') and *Tordenen* ('In the thunder'), significantly reveal what was to be a guiding principle of his career: to use his gifts in the service of his country and national independence. In Wergeland he encountered a dynamic spirit who had given expression to ideas with which Bull could identify. His exalted place in Norwegian history is due to the success with which, as the first really internationally famous Norwegian, he propagandized on his country's behalf.

In May 1829 Bull made his first trip abroad, to Copenhagen and Kassel. He wrote to his father that he intended to visit Spohr, then his favourite composer. It has often been said that Spohr was critical and discouraging, but it is unlikely that they met at that time (Spohr's description of Bull's playing in his autobiography dates from January 1839). Returning to Christiania in September, Bull resumed his musical activities and studies, making a short concert tour in Norway in summer 1830. In summer 1831 he met Torgeir Augundson, the most famous Norwegian peasant fiddler, known as 'Myllarguten', from whom he learnt a number of *slåtter* (folkdances) which he used later in his own compositions and as the basis for the improvisations that were a characteristic part of his concerts. When he left for Paris in August, he took with him a Hardanger fiddle, the Norwegian peasant violin with extra (sympathetic) strings.

In Paris Bull met and shared rooms with the brilliant young Austrian violinist H.W. Ernst, who introduced him to Paganini's style of playing. Unsuccessful in finding employment, he suffered serious privation and was nursed through a long illness by a kindly landlady, Mme Villeminot, whose granddaughter Félicie he married in 1836. In April 1833 he heard Paganini play and gave a concert at which he played his *Souvenirs de Norvège*, which used Norwegian *slåtter* and folksongs arranged for the Hardanger fiddle (then unknown in Paris), with the accompaniment of string quartet, double bass and flute. His performance got a good review, but in June he left Paris having attracted little significant attention.

Bull went first to Switzerland, where he visited his countryman, the pianist Hans Skramstad, in Lausanne, and then to Italy, where he intended to spend a year taking composition lessons and studying in the music library in Milan. He developed a new manner of holding the violin and experimented with modifications to his violin and bow, making the bridge flatter, after the fashion of the Hardanger fiddle, and the bow longer and heavier, like Myllarguten's. After concerts in Milan, Venice and Trieste, he appeared in Bologna, creating a sensation and receiving honorary membership in the Accademia Filarmonica. There he met the violinist Bériot and the singer Malibran (later Bériot's wife). From the account of their meeting it appears that Bull could now play only on his own instrument, the tone of which Malibran preferred to Bériot's. In Bologna Bull performed his first large composition with full orchestra, his Concerto in A, which Bériot said had so many difficulties of a type previously unknown that he doubted whether any other violinist could play it – even if he were in possession of Bull's violin and bow. In autumn 1834 in Naples he played his Quartet for solo violin, composed to outdo Paganini's famous Duo. Bull's remarkable ability to play polyphonically, made possible by the low bridge on his violin and his specially shaped bow, became a legendary feature of his technique (Albert Schweitzer credited it to the survival of Baroque practices in the conservative north and cited Bull on behalf of his efforts to encourage a round violin bow for the performance of Bach's music). In February 1835 he went to Rome, where he completed and performed his *Recitativo, adagio amorosa con polacca guerriera* for violin and orchestra (inspired, he said, by the sight of the smoking Vesuvius), which became his most frequently performed composition.

Returning to Paris, Bull gave a concert at the Opéra on 17 June, the only violinist other than Paganini ever to do so, describing himself on the programme simply as 'artiste norvégien'. It was a bold patriotic gesture that succeeded in putting Norway on the cultural map of Europe (a leading Paris critic, Jules Janin, took the point and began his enthusiastic and widely circulated review with a description of Norway itself). After further concerts in Paris and the provinces, Bull went to London (May 1836), where he had an overwhelming success at the Philharmonic Society and established himself as the greatest violin virtuoso of his time. He returned to Paris in July to be married, then embarked on a tour of the British Isles that included 274 concerts in 14 months. After two months' rest in Paris he toured with triumphant success

through Germany and Russia, then back to Stockholm and Norway, where he was welcomed in July 1838 as a national hero.

In 1839 Bull gave nearly 200 concerts in Germany and Austria (see illustration); in 1840 he was again in London, where he played Beethoven's Kreutzer Sonata with Liszt at a Philharmonic Society concert. In November he played in Leipzig, where Schumann, who had heard him the year before in Vienna, heard him again. He then learnt that a wealthy Viennese collector had bequeathed him a valuable Gasparo da Salò violin, the scroll of which was reputedly carved by Benvenuto Cellini; a chamber music concert, in which Bull was assisted by Mendelssohn and David, was held on 20 January 1841 to present the instrument to the public. The following month in Prague he composed his E minor Violin Concerto, then continued to Poland and Russia. In 1842 he was in Germany and the Netherlands, in 1843 in Sweden and Denmark, and in November 1843 he gave his first concert in the USA. Before sailing for America he arranged for the publication by Schuberth in Hamburg of some of his compositions, including the Bellini Variations approved by Liszt.

As a democrat and Romantic adventurer, Bull admired and enjoyed the USA, which in turn responded to him in a quite exceptional manner. 'My relationship to the Americans is that of an adopted son', he wrote. He was back in Paris for Christmas 1845 and for three months contented himself with private music-making with Liszt and T.D.A. Tellefsen, a Norwegian pupil of Chopin, before setting out again for southern France, Algeria, Spain and Portugal. He had reached Nantes on the return

Ole Bull: drawing by Josef Kriehuber, 1839 (private collection)

journey when he learnt of the February 1848 Revolution in Paris, where, on his return, he led a deputation to greet Lamartine on behalf of the Norwegian people, a characteristically flamboyant and presumptuous gesture that caused offence in official circles in Norway. At the end of the year he was back in Norway giving concerts and speaking on behalf of an independent Norwegian republic. After a particularly enthusiastic reception arranged by the Society of Students on 10 December Bull promised a composition to commemorate the occasion. The resulting fantasia, originally called *Den 10. December*, is a programmatic piece describing a summer visit to mountain pastures; under the title *Et saeterbesøg* ('A visit to the mountain pasture') it became Bull's most enduring composition. It contains one of the most beloved of all Norwegian melodies known as 'Saeterjentens Søndag', later sung to the words by J. Moe, 'Paa solen jeg ser' ('I gaze upon the sun').

At this meeting with the students Bull spoke of the need to appreciate and preserve true Norwegian art and to establish a Norwegian national theatre. These projects occupied him during the next two years. He invited Myllarguten to Christiania for a concert with him on 15 January 1849, the first of several appearances designed to make Norwegians aware of their national heritage of folk music. On 23 July he announced the establishment of the Norwegian Theatre in Bergen to encourage Norwegian dramatists and actors and through them the Norwegian language, which had traditionally been subjugated to Danish as the language of educated culture. The theatre opened on 2 January 1850 but despite acknowledged artistic success and public support Bull's application in 1851 for a state subsidy for the theatre was turned down and Bull was obliged to go on tour again. He installed the 23-year-old Henrik Ibsen at the theatre on a five-year contract with the stipulation that he write a play each year.

In January 1852 Bull was once again in the USA, where he became involved in the establishment of a colony, a New Norway centred round a town to be called Oleona. For this purpose he bought 11,144 acres in Potter County, Pennsylvania, and in September 1852 the first settlers moved in. Because of the condition of American citizenship required for the ownership of such a large tract of land, it has been assumed that Bull gave up his Norwegian citizenship, a supposition which aroused considerable resentment in Norway. However, he was given dispensation by the State of Pennsylvania, and did not take American citizenship. The widely held belief that Bull was sold land to which the sellers had no title is also incorrect. The undertaking had been entered into too hastily, and after a year it was evident that the land was better suited to timber and industry than to farming. In September 1853 Bull sold his holdings back to his partners for the same price he had paid, and the colonial scheme collapsed. His responsibilities to the immigrants cost him much money, and he was obliged to tour extensively, with Maurice Strakosch and his eight-year-old sister-in-law Adelina Patti, to meet his obligations. Back in New York at the beginning of 1855, he made an unsuccessful attempt to establish a permanent opera house at the Academy of Music in New York, which ended in an acrimonious dispute with Strakosch and his nephew Max Maretzek, the incident being reported in New York newspapers as 'the great Opera House war'.

Bull's return to Bergen in August 1857 was greeted by a newspaper article by Bjørnstjerne Bjørnson that led to his being invited by Bull to take over the position at the Bergen Theatre that had been held by Ibsen, who had now moved to the new Norwegian Theatre in Christiania. Thus Bull helped to initiate the careers of Norway's two great 19th-century dramatists. In 1858, after hearing Grieg play and seeing some of his compositions, he convinced the boy's parents to send him to the Leipzig Conservatory, and in 1859 he encouraged the young Rikard Nordraak by inviting him to accompany him in some concerts, Nordraak's first public appearances. Grieg's first set of folksong arrangements (op.17, 1869) is dedicated to Bull, who had himself, in 1852, published a little collection of folk melodies in piano arrangements as an appendix to Tønsberg's *Norske folkedragter*.

In 1859 Bull was one of the founders of the Norwegian Society for the Advancement of the National Element in Art and Literature. On his return to Norway in 1838 he had given a concert to start a fund to establish a conservatory. In 1862 he took up the idea again, but in spite of elaborate preparations and the promise of help from the king, his enemies in the government rejected his application for public support. This was the last scheme in which Bull tried to enlist government aid. But in 1872 he sponsored a fund for the purchase of a collection of Scandinavian literature for the University of Wisconsin, preliminary to the establishment of a professorship in Scandinavian languages and literature there, and during his last years he collected money for erecting a statue of Leif Erikson in Boston.

Bull made an extended tour of Germany, Poland and Russia in 1866–7, then again visited the USA. His first wife having died in 1862, in 1870 he married the 20-year-old daughter of a Wisconsin senator. During the last ten years of his life he spent the winters in the USA and the summers in Norway. He continued to perform with undiminished success until his death. The occasion of his 66th birthday, when he played his *Et saeterbesøg* from the top of Cheop's pyramid in fulfilment of a promise to King Oscar of Sweden and Norway, is worth mentioning as an example of the sort of extravagant gesture that made him a legend and his life a fairy story to enthral every Norwegian child.

2. Reputation, works. It is difficult to separate the impact of Bull's playing from that of his personality, or the musical value of his compositions from the impression created by his performance of them. Bjørnson said his personality was so powerful that when he entered a room he obliterated all others. He was a figure of fascination for writers: George Sand used him as the model for Abel in her novel *Malgrétout*, and Ibsen's Peer Gynt owes not a little to him (Peer's 'Gyntiana' is an obvious reference to Bull's 'Oleona'). Thackeray met him in Cambridge, Massachusetts, in 1852 and 1855, and wrote 'Last night ... at Longfellow's ... there was a mad-cap fiddler, Ole Bull, who played most wonderfully ... and charmed me still more by his oddities and character. Quite a figure for a book'. Indeed, he is easily recognized as the Musician in Longfellow's *Tales of a Wayside Inn* (1863), who, interspersed with playing his violin, tells a story from the Norse sagas. In 1880 Mark Twain wrote 'If Ole Bull had been born without arms, what a rank he would have taken among the poets – because it is in him, and if he couldn't violin it out, he would talk it out, since of course it would have to come out'. He had a lively, quick intelligence with an unlimited range of interests. He was a connoisseur and collector of violins and an expert in their construction and repair, often working with Vuillaume when in Paris. He designed and built a violin whose tone was much admired, and in the USA he collaborated with the engineer John Ericsson in building an improved piano, which he introduced into Norway at a concert played by Agathe Backer.

Schumann regarded Bull as at least Paganini's equal, and in technical feats, such as playing four parts at once, in a class by himself. He was struck by his unusually beautiful tone and by his playing of Mozart with German simplicity and intimacy; but he noticed too that he often played impulsively, in an almost improvisatory manner, dazzling and swaying his audience, which was not the German way. He regarded Bull's own compositions at that time as unfinished, but revealing flashes of inexplicable genius. Similar opinions, which praise the melody and harmony, but tend to criticize the form and coherence of his compositions as well as his performance, are echoed by many critics, but on the whole Bull's appearance, manner, presence and playing disarmed all popular criticism of his music. His genius for simple and touching melody is evident in two of his songs, *Saeterjentens Søndag* (from *Et saeterbesøg*) and *I ensomme stunde* ('In moments of solitude'), which have become part of the Norwegian national song repertory.

Bull's historical significance, however, derives from the fact that he was 'more than a fiddler'; as Bjørnson said at this funeral, 'Ole Bull was the first and the greatest celebration in the life of this people. He gave us self-confidence, the greatest gift that could be given us at that time', sentiments echoed by Grieg. Few of Bull's compositions were published, perhaps because of his predilection for improvisation or because of their virtuoso difficulties and personal idiosyncracies; they probably deserve more serious attention than they have received.

JOHN BERGSAGEL

Bull, William (*b* Pavenham, Beds., 1650; *d* Brasted, Kent, bur. 12 April 1712). English trumpeter and brass instrument maker. He was apprenticed to the widow of a member of the Haberdashers Company of London in 1664, presumably through a family connection. At the age of 16 he was appointed Trumpeter in Extraordinary to Charles II. He married at the age of 21 on taking his freedom of the Haberdashers and moving to Hatchett Alley on Tower Hill. In 1678 he was appointed Trumpeter in Ordinary and also became a trumpeter in the second Troop of Horse Guards. He moved to The Horne and Trumpet in Salisbury Street and advertised trumpets of silver and brass for sale. The surviving plate books of the Royal Jewel House show that Bull was also responsible for instrument repairs from at least 1685 until 1700. Bull moved from Salisbury Street to the Haymarket in 1682. He entered his mark (BV) as a large plate worker at Goldsmiths Hall in 1699. In 1700 he retired as a King's Trumpeter and moved to Hunt's Court off Castle Street by the Mews. He issued a trade card from this address (see illustration) in which he described himself as Trumpet Maker to His Majesty [William III] and advertised, as well as trumpets and horns, kettle drums, speaking trumpets, hearing horns for deaf people, along with powder horns and even air guns.

In 1705 Bull moved to Berwick Street to live with his elder daughter Denis who had married Bull's colleague, the King's Trumpeter John Stevenson. During his final months he lived in Brasted where his son Michael had been vicar since 1708. In his will, which shows that he had considerable property, he left his tools to John Stevenson (*d* before 1716).

The quality of Bull's surviving instruments establishes him as the finest English maker of his period. Four trumpets (two of silver and two of bronze with silver mounts) and a horn (dated 1699) survive; only the bell of this latter is original. The instruments are signed WILLIAM BVLL LONDINI FECIT. The silver is not hallmarked but appears to be of Sterling and Britannia standard. His instruments had a high reputation; for example in 1728

Trade card of William Bull, Castle Street by the Mews, London, c1700–05 (Banks Collection, British Museum, London)

John Baptist Grano was lent 'an excellent trumpet of old Bull's making'; one of the surviving bronze trumpets was raised in pitch and fitted with a slide, indicating that it was used well into the second half of the 18th century.

Bull's son-in-law John Harris and grandson William Bull Harris were both trumpet makers.

MAURICE BYRNE

Bullant [Bulant, Bullandt, Bullanto, Bulan, Byulan], **Antoine** [Antonín Štěpán, Anton, Antonio] (*b* Mělník, Bohemia, 9 Feb 1751; *d* St Petersburg 13/25 June 1821). Czech composer and bassoonist, active in France and Russia. All 18th-century printed and manuscript copies of his own works spell the name 'Bullant'. Confusion about his origins has been resolved by the discovery of his birth record in the Mělník register, confirming Dlabač's statement about his Bohemian origins. According to the register his parents were Josef Bulant from Mělník (Podolí quarter) and his wife Kateřina. The name Bulant occurs quite frequently in the Mělník register in the years 1742–1804, frequently spelt in different ways (Bulan, Bulanan, Bulanti, Belant). It is clearly of non-Czech origin (fuelling older musicological speculation about the composer's origin in northern France); it may have arrived in central Bohemia via the French army, for instance during the Silesian wars (Mělník lies on the direct path often taken by foreign armies). There is no record of Bullant's musical schooling or of when and why he went to France. Prince August Anton Joseph Lobkowitz maintained an orchestra and theatre on his Mělník estate, in which Bullant may have played. It is possible that Bullant's departure for Paris may have been connected with Prince Lobkowicz's departure for Madrid (1772–6) as the imperial ambassador at the royal court, where he may have taken some of his musicians.

Bullant went to Paris in about 1771 or 1772, and there published his first known works, the quartets op.2, in 1772. On the title-page of his *Quatre sinfonie a grand orchestro* op.5 (1773) he is identified as 'Virtuoso di Musica de S.E. il Sigr. Marchese di Brancas'; the opus is dedicated to the tsar's chamberlain, Count Stroganov, a well-known patron and lover of the arts, who was visiting Paris during this period. This connection with the Russian court may have led ultimately to Bullant's settling in St Petersburg in 1780, having left Paris in the late 1770s (possibly via Bohemia). In 1778 Ignác Řehoř Foyta (1748–1808, also from Mělník and Roudnice) also left Prague to work for 20 years in St Petersburg as violinist and double bass player. According to Dlabač both Czech musicians worked several years together in the service of the tsar. In St Petersburg, Bullant probably gave his first concert there as a virtuoso bassoonist on 20 November/1 December 1780 (*MGG1*; according to Findeyzen not until 21 February 1781), playing some of his own works; by January 1783 he had given at least four other concerts. In June 1783 he was engaged as a bassoonist at the court of Catherine II, and soon thereafter successfully produced the first comic opera that can be attributed to him with certainty, *Sbitenshchik* ('The Merchant of Mead'); this was followed by a number of other Russian-language operas in both St Petersburg and Moscow until 1799.

In 1784, having been ousted from his post as bassoonist, Bullant opened a shop for keyboard instruments imported from England; he later possibly sold music from this shop, as well as string and wind instruments. In 1785 he was re-engaged as bassoonist with the first orchestra of the imperial theatre, a post which he held until 1792 (according to *Bol'shaya sovetskaya entsiklopediya*), or until before his death, receiving an annual pay of 600 rubles, which was comparable to that received by other foreign musicians in the orchestra. In 1787 he wrote a prologue with choruses and ballets to celebrate the 25th anniversary of Empress Catherine's reign; he may have accompanied Catherine to Moscow for its first performance and remained there for a year or two, as four comic operas attributed to him were produced there in 1787–8. Bullant was a founder-director of the St Petersburg Philharmonic Society (1802), which granted him a small pension in 1821, shortly before his death.

Despite Bullant's small output of symphonies, he was listed by Sulzer (1777) among the 72 important symphonic composers of the time. His five extant symphonies (a sixth bearing his name is of questionable authenticity) are in three movements and are written in the international vernacular style common in Paris in the 1770s. In Russia Bullant played a significant role in the musical life of the two major cities. *The Merchant of Mead*, his only opera with extant music, was one of the most popular works of its kind in 18th- and early 19th-century Russia. The opera remained in the repertory of Russian theatres until 1853 and rivalled the popularity of the most successful Russian opera of the time, Solokovsky's *The Miller who was a Wizard, a Cheat and a Matchmaker*. In subject matter *The Merchant of Mead* is related to Molière (*L'école des femmes*) and Beaumarchais (*Le barbier de Seville*). It is possible, however, to see a more general relation to the tradition of *commedia dell'arte* and to home-grown Russian folk farce. Knyazhnin's libretto is attractive for its lively dialogue, satirical wit, humour and true to life Russian characters. Musically Bullant does not do anything new, but his music is lively, effective, reflective of the libretto's character and situations and deals sensitively with the Russian language. Bullant makes no use of Russian folksongs, but instead composes in the spirit of Russian folksong. The surviving material (four acts, two preludes, 16 sung numbers out of 21) gives no evidence for sung recitative, so the dialogue was probably spoken. The four-bar fragment from its fashionable prelude also adorns the title-page of the song collection *Noviy rossiyskiy pesennik* ('The New Russian Song-book'; St Petersburg, 1792) arranged for voice and various musical instruments, leading Findeyzen to conclude that Bullant could have compiled it.

WORKS

printed works published in Paris unless otherwise stated

STAGE

Sbitenshchik [The Merchant of Mead] (comic op, 3, I. Knyazhnin), St Petersburg, 1783 or 1784, *RUS-SPtob*

BARRY S. BROOK, RICHARD VIANO/JITKA BRABCOVÁ

Buller, John (*b* London, 7 Feb 1927). English composer. Although he showed musical talent as a child (he was a chorister at St Matthew's, Great Peter Street, London) and had already had a work accepted by the BBC by the time he was 19, he decided against a career in music and worked as an architectural surveyor until 1974, when he was appointed composer-in-residence at the University of Edinburgh (1975–6). He had meanwhile taken a part-time degree in music at the University of London (1959–64), where he studied composition with Milner. Apart from a second short-term appointment as composer-in-residence at the Queen's University of Belfast (1985–6), Buller was based in London until he moved to France in the late 1980s.

Always in search of a technical control that would be both absolute yet able to embrace certain freedoms, Buller has consistently chosen to pit himself against remorselessly difficult odds, particularly in relation to word-setting. The intellectual solemnity of the prose argument chosen for *The Melian Debate* (1972) is mirrored in a musical argument based entirely on two five-note groups, and although the speech rhythms employed here are set against a metrical pulse almost throughout, they seem already straining to be free of their enforced synchronization. *Two Night Pieces from Finnegans Wake* (1971) had already begun to engage with the Joycean possibility of free permutation of a limited number of ideas as a preliminary to the first of Buller's large-scale works: together with three associated pieces, it was *The Mime of Mick, Nick and the Maggies* that was to occupy him for the next four years. The work has an extraordinarily evocative flavour, casting long shadows in the mind of the listener and setting the scene for Buller's masterly orchestral works *Proença* (1977) and *The Theatre of Memory* (1980–81), both of which call upon echoes of the past, whether actual or imagined.

Proença is a breathtakingly lavish piece, rich in decorative effects, yet centred on a slowly evolving melody that is shaped and propelled by means of its own reflections; reinventing the long-forgotten language of the troubadours, its reflected melodic layers give *Proença* a three-dimensional harmonic background that can readily absorb Buller's unbarred rhythmic patterns. *The Theatre of Memory* is even more striking in respect of form, since its structure is entirely abstract: without a background of verbal imagery, the voices of seven solo instruments are used to focus attention on the many contrasting aspects of an orchestral fabric that expresses memory as a function of the collective subconscious.

Six years in the making, his full-length opera, *Bakxai/The Bacchae*, is by any standards a unique achievement. Set in the original Greek of Euripides, its rigorously selfless compositional restraints can seem both austere and overwhelming, expressively stark and intensely moving by turn. It is a crowning example of Buller's visionary ability to complete large-scale designs without blurring his initial inspiration.

SUSAN BRADSHAW

Bull horn. *See* STIERHORN.

Bullis, Thomas (i) (*b* Ely, bap. 26 Aug 1627; *d* Ely, bur. 23 Jan 1708). English composer. He was probably a chorister at Ely before the Civil War. In 1661 he was appointed a lay clerk at £10 p.a., serving first under John Ferrabosco and then under James Hawkins. During Ferrabosco's final illness (1677–82) he received a further £10 p.a. 'for teaching the Choristers' and shortly afterwards a testimonial of £5. In addition to his cathedral activities as lay clerk, *informator choristarum*, composer and organist, he was bailiff of the dean and chapter manor of Ely Porta and a churchwarden of Holy Trinity. In addition, he had a considerable family business as a cordwainer.

The Ely manuscripts (*GB-Cu*) contain a Service in G minor, a Sanctus and three anthems, unfortunately none complete. From organ scores which survive his style seems very much that of the earlier part of the century.

FREDERICK HUDSON/IAN SPINK

Bullis, Thomas (ii) (*b* Ely, bap. 8 Nov 1657; *d* Ely, bur. 24 Aug 1712). English organist and composer. He was the third child of Thomas Bullis (i) and his first wife, Sara. He served under John Ferrabosco as a chorister at Ely Cathedral and as a lay clerk at £10 p.a. from 1677 until his death. He acted as organist during the six months' interregnum between the death of John Ferrabosco and the appointment of James Hawkins, receiving £5, and it is probable that he had also acted thus during Ferrabosco's last illness between 1677 and 1682. From 1684, when the dean and chapter allowed Hawkins 'to be absent at Bury [St Edmunds] for ye teaching of children there in Musick three days in a fortnight and no more' if he filled 'his two places of Organist and Informator', it is likely that Bullis and his father assumed these offices, Hawkins being responsible for their salaries. Like his father, he was a churchwarden of Holy Trinity, Ely, but unlike him he was probably wholly engaged as a musician.

Three services (one including a setting of the *Benedicite*) and seven anthems by him are known. *O Clap your hands*, erroneously attributed to his father, is in score in the Ely manuscripts (*GB-Cu*), another is in a Tenbury manuscript (*Ob*) originally from Peterborough; otherwise, only incomplete parts survive. The style is much more up to date than his father's and, as might be expected, rather similar to that of James Hawkins.

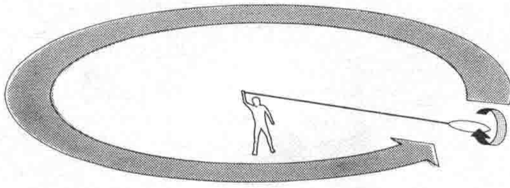
FREDERICK HUDSON/IAN SPINK

Bullock, Sir Ernest (*b* Wigan, 15 Sept 1890; *d* Aylesbury, 24 May 1979). English organist and educationist. He was a pupil of and assistant organist to Bairstow at Leeds (1907–12), and took the BMus (1908) and DMus (1914) degrees at Durham University, becoming a Fellow of the Royal College of Organists in 1909. His first important post, suborganist at Manchester Cathedral (1912–15), was interrupted by war service, after which he was organist at St Michael's College, Tenbury (1919), and organist and choirmaster of Exeter Cathedral (1919–27). On Nicholson's retirement from Westminster Abbey in 1928, Bullock succeeded him as organist and Master of the Choristers. In this post he was obliged to provide the music for several royal functions; for the coronation of King George VI (1937) he wrote the fanfares and conducted the choir and orchestra, in acknowledgment of which he was created CVO. He also provided all but one of the fanfares for the coronation of Queen Elizabeth II (1953).



In 1941 his career took a new turn when he became Gardiner Professor of Music at Glasgow University, an appointment which carried with it that of principal of the Scottish National Academy of Music. He was knighted in 1951, and in 1952 succeeded Sir George Dyson as director of the RCM, a post he held until his retirement in 1960. Bullock was essentially a church musician, as is evident from his published compositions: these include 12 anthems, among them *Give Us the Wings of Faith* (1925), two settings of the *Te Deum* and two of the *Magnificat*. Still, he was also widely influential as an administrator and as an adjudicator at many musical competitions. He served as president of the Royal College of Organists (1951–2), chairman of the music committee of the Scottish Arts Council (1943–50), a member of the music panel of the Arts Council of Great Britain (1945–7) and joint chairman of the Associated Board of the Royal Schools of Music (1952–60).

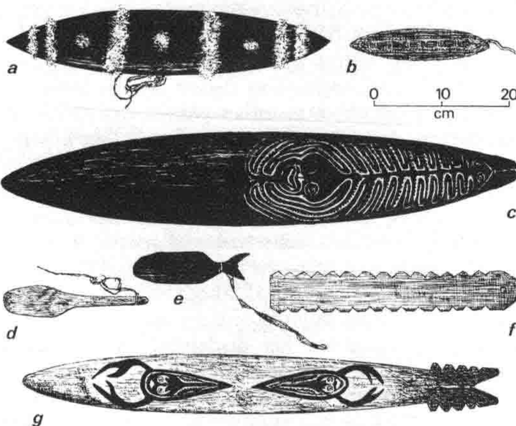
MALCOLM TURNER/R

Bullroarer (Fr. *rhombe*; Ger. *Schwirrholz*). An instrument made from a spatulate piece of wood tied to a string which is knotted into a hole close to one end. To produce sounds the player whirls the blade through the air, holding it by the free end of the string (fig.1). Blades vary in size (15 to 75 cm), shape, material and decoration. The shapes range from lanceolate to narrowly rectangular, with straight, sometimes waisted, or often serrated edges. One of the two surfaces is usually uneven as a result of patterns



1. *Spinning motion of a whirling bullroarer*

carved in relief; experiments have indicated that this one-sided unevenness may be essential to make the blade rotate around its axis when whirled through the air.

The most common material is wood, but stone, bone and similar materials (and very rarely iron) are also used. The acoustic functions of these manifold ergological elements have apparently not been studied comprehensively; many bullroarers simply serve as ritual objects, and are never used for sound. In general, smaller bullroarers give a high noise when whirled, while larger specimens sound low in pitch. The speed of rotation and length of the string also affect volume and pitch.

The oldest surviving specimen is presumably the prehistoric (Magdalenian) bullroarer from a site in the Dordogne, carved from a reindeer antler (fig.2*b* and see Schaeffner). Its edges are smooth, and one surface has an incised geometrical pattern. Prehistoric rock paintings from several parts of Africa show figures using bullroarers, presumably in ritual. The bullroarer's distribution has been described as 'confined to a few widely scattered localities' (see Sachs, 1929; Hornbostel, p.270), i.e. it has survived in a remarkable number of areas. The pattern suggests polygenesis rather than monogenesis of the instrument. Haddon reported that the word 'bullroarer' was itself of English folk origin. Other terms recorded by him in England and from various countries in Europe are 'bummer', 'buzzer', 'humming-buzzer', 'thunderbolt', 'thunder-spell' and 'swish'. The term 'bullroarer' was

2. *Bullroarers: (a) churinga of the Arunta people, Central Australia; (b) copy of the prehistoric example found in the Dordogne; (c) from Papua New Guinea; (d) ual ual of the Mohave Apache, Arizona; (e) peer boor egah, Victoria, Australia; (f) 'roaring bull' from Needworth, Huntingdon, England; (g) hevehe of the Western Elema people, Orokolo Bay, Papua New Guinea (all, except b, Pitt Rivers Museum, Oxford)*

universally adopted in 1880 as the technical term in English. In ancient Greece the bullroarer was used in the Dionysian mysteries. Its Greek name, *rombos*, possibly the source of the geometrical term 'rhombus', survives in the French term 'rhombe'.

Ethnologists have associated the bullroarer mainly with Oceanian specimens and Oceanian ritual practices. A function often referred to is that of frightening away women from ceremonies that are taboo for them. In many areas where bullroarers are still found the roaring noise serves to frighten away marauding animals from plantations; Haddon described this use by young herdsmen in Galicia, Poland: 'The noise excites pasturing cattle. As soon as the bullroarers are started, calves stretch out their tails into the air and kick out their hind legs as if they were dancing. After some time the old cattle follow the young ones, and there is a general stampede'. It is likely that bullroarers are still in use in many other regions besides those hitherto reported.

KLAUS WACHSMANN

Bülow, Hans (Guido) Freiherr von (*b* Dresden, 8 Jan 1830; *d* Cairo, 12 Feb 1894). German conductor, pianist and composer. His musical studies began at the age of nine with piano lessons from Friedrich Wieck. Further studies took him to Dresden (with Max Eberwein) and Leipzig (with Plaidy and Hauptmann); he also met Raff and other musicians at Stuttgart in 1846–8. After hearing Wagner conduct in Dresden in 1849 and the première of *Lohengrin* under Liszt at Weimar in 1850, he abandoned the law career chosen for him by his mother. He sought advice from Liszt and practical help from Wagner, by then in Zürich, who arranged for him to conduct Donizetti's *La fille du régiment*. Bülow's lack of tact soon led to his dismissal from Zürich, however, and he moved as musical director to the small opera house in St Gallen, where he began with *Der Freischütz*. It was well received, not least because he conducted it without the score, a feature of his working method that was to become renowned.

His conducting work was then interrupted by Liszt, who accepted him as a piano pupil in Weimar in 1851. He completely rethought his piano technique, embarking on a strict regimen of hard work; he also began to compose and wrote some reviews that both impressed and offended. Liszt regarded Bülow as one of the greatest musical phenomena he had encountered, assuring his parents that 'his talent will place him in the first rank of

the greatest pianists'. After teaching in Berlin (1855–64) and undertaking concert tours as a pianist, Bülow began an important phase in his career when he was appointed Hofkapellmeister in Munich. There he gave the premières of *Tristan und Isolde* (1865) and *Die Meistersinger von Nürnberg* (1868). In his meticulous preparation and rehearsal from memory of both operas (for five years he had been preparing a piano score of *Tristan*), Bülow virtually developed the procedure by which operas have since come to be staged in Germany and elsewhere. He began with individual coaching of his répétiteurs so that they in turn could prepare the singers to his satisfaction. He would then rehearse the singers both singly and in ensembles before they began production rehearsals with piano. This schedule of preparation was also used for the orchestra, with sectional and then full orchestral rehearsals before combining players and singers in *Sitzproben* and stage rehearsals (there were 11 pre-dress rehearsals for *Tristan* before the final dress rehearsal).

In 1869 Bülow resigned from Munich, unable to cope when his wife, Liszt's daughter Cosima, whom he had married in 1857, left him for Wagner and when he foresaw the problems of staging the première of *Das Rheingold* according to demands made by King Ludwig against the composer's wishes. Despite the humiliation of having been publicly cuckolded for so long by Wagner, Bülow remained remarkably loyal to him as a musician, though he never set foot in Bayreuth. When Wagner died in 1883 Bülow telegraphed his distraught widow, 'Soeur, il faut vivre'. He began to undertake concert tours from 1872, visiting England in 1873 and the USA in 1875–6, where he gave 139 concerts, including the première of Tchaikovsky's First Piano Concerto in Boston (a turbulent affair, according to James Huneker, in which conductor, orchestra and audience alike were subjected to advice and insults). Bülow was a fervent champion of Tchaikovsky, and was one of the first west European musicians to recognize the composer's talent; the concerto was dedicated to him.

Bülow spent the years 1878–80 as Hofkapellmeister in Hanover, but resigned after a quarrel with the tenor Anton Schott (whom he had described during *Lohengrin* as a Knight of the Swine rather than of the Swan). Bülow moved on to Meiningen as Hofmusikdirektor, where from 1880 to 1885 he moulded the orchestra into one of Germany's finest, insisting that they play standing up and from memory. On one occasion he included two performances in one evening of Beethoven's Ninth Symphony. He was an admirer and friend of Brahms, and with his 48-piece Meiningen orchestra gave the première of Brahms's Fourth Symphony in October 1885. He caused astonishment by conducting Brahms's First Piano Concerto from the keyboard, and by his performance with full strings of Beethoven's *Grosse Fuge* – innovations that bear witness to the orchestral discipline he had instilled. He also introduced five-string basses, the Ritter alto viola and pedal timpani into the orchestra. In 1882 he married the actress Marie Schanzer, who became his biographer and the editor of his letters. His last years were spent touring (including appearances in Glasgow in 1878 and London in 1888), teaching at Raff's Hoch Conservatory in Frankfurt and the Klavier-Schule Klindworth in Berlin, or guest conducting at the Berlin and Hamburg opera houses. His precarious mental state began to decline in the 1890s and he entered a private institution in 1893. Ill-health

Hans von Bülow

persuaded him the following year to seek the warmth and dry air of Egypt, but he died in a Cairo hotel.

Eduard Dannreuther described Bülow's pianism as possessing a 'passionate intellectuality' (his detractors preferred to omit the word 'passionate') with 'all effects analysed and calculated with the utmost subtlety, and yet the whole left an impression of warm spontaneity'. His physical and intellectual stamina is illustrated by his habit in the 1880s of performing Beethoven's last five sonatas in a single recital. In New York in 1889 he played 22 sonatas in 11 days. The critic Henry Krehbiel observed that 'those who wish to add intellectual enjoyment to the pleasures of the imagination derive a happiness from Bülow's playing which no other pianist can give to the same degree'. Yet Clara Schumann found him a 'wearisome player' (the dislike was mutual). Bruno Walter noted 'a certain didactic element which may have deprived it of some of the spontaneity manifested in his orchestral work'. Amy Fay called him a 'colossal artist', saying that 'he impresses you as using the instrument only to express ideas. With him you forget all about the piano, and are absorbed only in the thought or the passion of the piece'. She also remarked on his disdainful manner to his audiences, reporting that he liked to have two pianos on the stage at a recital so that he could present either his face or his back to the public. According to Richard Strauss, a Bülow protégé, he had small hands and could barely stretch an octave. Nevertheless, Bülow's technique was highly accomplished, even for an age of great pianists, although it declined in his later years.

As a composer Bülow naturally attached himself to the New German School. He never wrote an opera, despite considering the subjects of Tristram and Merlin. His

piano works are technically demanding, and reflect the manner of Liszt in their bravura and some of the thematic handling. He composed music for Shakespeare's *Julius Caesar* op.10, the orchestral ballad *Des Sängers Fluch* op.16, the symphonic poem *Nirwana* op.20, and *Vier Charakterstücke* for orchestra op.23. He also prepared editions of keyboard works by Bach, Beethoven, Chopin, Cramer, Domenico Scarlatti, Weber and others.

Bülow was a musician of formidable ability, with absolute self-command and an acute intellectual power of interpretation, notably of new German works. But he also possessed an irascible nature; he was quarrelsome, nervous, passionate and given to extremes of mood. As a conductor, Weingartner thought he lacked the necessary instinct for working in opera and that by devoting his entire attention to the orchestra he ignored his singers; Bülow's 1887 performance of *Carmen* in Hamburg horrified Weingartner with its musical aberrations and excessive rubato. Yet Richard Strauss had the highest regard for his intellect, analysis of phrasing and grasp of the psychological content of the music of Beethoven and Wagner.

CHRISTOPHER FIFIELD

Bulterijs, Nini (*b* Temse, 20 Nov 1929; *d* Wilrijk, 12 Dec 1989). Belgian composer. At the Antwerp Conservatory she studied the piano with Jozef D'Hooghe and harmony with Yvonne Van den Berghe; Later she studied counterpoint, fugue and composition with Louël and Absil at the Chapelle Musicale Reine Elisabeth. Placed second in the Prix de Rome contest (1963) and in the Queen Elisabeth International Composition Competition (1966), she won the Emile Doehaerd Prize in 1969. In 1970 she was appointed professor of counterpoint at the Antwerp Conservatory. She retired in 1988. Her works, rhythmically elaborate and solid in texture, have a dodecaphonic basis.

CORNEEL MERTENS/DIANA VON VOLBORTH-DANYS

Bultitude, Arthur R(ichard) (*b* London, 14 Jan 1908; *d* 20 March 1990). English maker of violin, viola and cello bows. He joined the firm of W.E. Hill & Sons in London as an apprentice bow maker under Retford in 1922, becoming manager of the workshops in 1945. He remained with Hill until 1961, when he moved to Hawkhurst, Kent, to begin making bows on his own account; he subsequently achieved worldwide recognition. In his first ten years at Hawkhurst he made more than 1200 bows, all branded 'A.R. BULTITUDE' and many inlaid on the frog with his individual Tudor rose design.

CHARLES BEARE/JOHN DILWORTH

BUMA [Bureau voor Muziek-Auteursrecht]. *See* COPYRIGHT, §VI (under Netherlands).

Bumbass (Fr. *basse de Flandre*; Ger. *Bumbass*). A bowed monochord consisting of a heavy gut string attached at each end to a long wooden pole and stretched over a pig's bladder. It is sounded with a notched stick or sometimes a horsehair bow and used in many parts of Europe to provide a droning rhythmic accompaniment to folksong or dance. Its name varies according to region, the German name *Bumbass* being commonly adopted in folk-instrument literature. In England the instrument was called the 'drone' or 'bladder and string', and was used by wandering musicians up to the early 19th century; L. Jewitt, in *Ballads and Songs of Derbyshire* (London, 1867), gave an illustration of 'Singing Sam' (1760) using it (see illustration overleaf). A form manufactured in Germany has the addition of bells and a pair of cymbals to the top end, which sound as the pole is struck on the ground in time with the music 'while the drawing of the bow across the string brings forth a sound similar to the roll of a Drum' (from a German exporter's catalogue of the 1890s).

For further information see M. Ehrenwerth: *Teufelsgeige und ländliche Musikkapellen in Westfalen* (Münster, 1992)

ANTHONY C. BAINES

Bumbry, Grace (Melzia Ann) (*b* St Louis, 4 Jan 1937). American mezzo-soprano and soprano. She studied at Boston and with Lotte Lehmann in Santa Barbara. A joint winner in 1958 of the Metropolitan Opera auditions, she made her début in 1960 at the Paris Opéra as Amneris, then joined Basle Opera for four seasons. In 1961 she sang Venus at Bayreuth, the first black artist to appear there. She made her Covent Garden (1963) and Metropolitan (1965) débuts as Eboli. At Salzburg she sang Lady Macbeth (1964) and Carmen. Her roles included Azucena,

Bumbass played by 'Singing Sam of Derbyshire': engraving after W. Williams, 1760, from L. Jewitt's 'Ballads and Songs of Derbyshire' (London, 1867)

Ulrica, Delilah, Fricka, Gluck's Orpheus and Santuzza, which she sang at the Vienna Staatsoper (1966). Taking on soprano roles, she sang Salome, Sélika (*L'Africaine*), Adalgisa and Norma at Covent Garden, while adding Tosca, La Gioconda, Leonora (*Trovatore* and *La forza del destino*) and Gershwin's Bess to her Metropolitan repertory. She sang Jenůfa at La Scala (1974) and Dukas' Ariane in Paris (1975), while continuing to sing mezzo roles. Her voice, particularly in the middle and lower registers, was warm and voluminous and she had a commanding presence on stage. In 1990 she sang Cassandra (*Prise de Troie*) at the opening of the Opéra Bastille in Paris, and in 1995 performed Cherubini's Medea for the first time.

ALAN BLYTH

Bümler [Bümmler, Bümmeler, Bühmler, Bimler, Bimbler], **Georg Heinrich** (*b* Berneck, Franconia, 10 Oct 1669; *d* Ansbach, 26 Aug 1745). German singer, composer and theorist. As a founder-member with Lorenz Mizler of the Leipzig Correspondierende Societät der Musicalischen Wissenschaften, he was accorded a detailed necrology in Mizler's *Neu eröffnete musicalische Bibliothek*, iv (1745). This states that he was born near Bayreuth in Berneck, where his father served as Kantor before moving to Naila as a manager of mines. At ten, on the death of his father, Bümler was sent to Münchberg to become a student in the Lateinschule. When he was about 13 he joined the Bayreuth court as a chamber discantist, where he studied singing and keyboard instruments with Ruggiero Fedeli. During the next two decades his exceptional talent as a singer made possible an extensive career at Wolfenbüttel, Hamburg, Berlin, and back again at Bayreuth. In 1698 he was appointed chamber musician and solo alto at the court of Ansbach, where in 1717 he succeeded Johann Christian Rau as Kapellmeister. In May 1722 he accompanied his first wife, the singer Dorothea Constantia Bauer, to Italy, but they were required to return to court in February 1723 for the funeral of Margrave Georg Friedrich. Following his release from court duties, he was briefly Kapellmeister to Queen Eberhardine of Poland and Saxony at Pretsch (on the Elbe), but for unknown reasons left for Hof (Saale). In 1726 he regained his post as Kapellmeister at Ansbach. His wife died in 1728 and he married the singer Sabina Sophia Schneider in 1729.

Bümler was a well-educated musician who not only worked as a composer and performer, but also had a lifelong interest in mathematics, astronomy, optics and chronometry. His method of equal temperament was reported in Mattheson's *Critica musica*, i (1722). Unfortunately much of his music seems to be lost, including a two-year cycle of church cantatas for Ansbach. In the funeral cantata text by Lorenz Mizler, published with the necrology, it says: 'In your church music, as in other music, you did much, and Ansbach still stirs pious souls with your devout music at every service for the Lord'.

GEORGE J. BUELOW

Bumpus, (Mary) Frances. *See* ALLITSEN, FRANCES.

Bumpus, John Skelton (*b* London, 6 Aug 1861; *d* Stoke Newington, London, 10 April 1913). English antiquarian and writer on cathedral music and ecclesiology. He was the son of Benjamin Bumpus, a London bookseller, and the twin brother of Thomas Francis Bumpus (*d* Stoke Newington, 11 Nov 1916), a noted writer on cathedral architecture.

J.S. Bumpus was deeply influenced by the ecclesiological movement in the Church of England, and was a member of the St Paul's Ecclesiological Society. Watkins Shaw observed that 'it does not seem to be known whether J.S. Bumpus followed any profession or occupation', but that 'he seems to have enjoyed ample leisure to indulge his

interconnected passions for ecclesiology and cathedral music'. In 1901 he was appointed honorary librarian of St Michael's College, Tenbury, a post he held until his death. In this capacity he was in charge of the large and important collection of manuscripts and early printed editions assembled by Sir Frederick Ouseley, the founder and first warden of the college. In addition, Bumpus compiled a considerable collection of his own (described in 'Libraries and Collections of Music', *Grove 2*), that furnished important source material for his writings on cathedral music. The collection was broken up after his death. His burial service was held at the noted Tractarian parish church of St Matthias, Stoke Newington.

Bumpus is probably best known as the author of *A Dictionary of Ecclesiastical Terms* (London, 1910) and a two-volume *History of English Cathedral Music, 1549–1889* (London, 1908). The latter was at that time the most ambitious work on its subject. By later scholarly standards the book is flawed by the author's limited knowledge of musical technique, some misunderstandings of his sources, the transmission of inaccurate second-hand information and some questionable critical judgments. On the other hand, the book retains its vitality and continuing interest for the sheer volume and variety of its detail while remaining eminently readable. Watkins Shaw especially commends Bumpus's treatment of early printed sources. Considering the connection with St Michael's College, it is noteworthy that Bumpus chose to end his history with the death of Ouseley in 1889.

Bunbury Virginal Book [Priscilla Burbury's Virginal Book]. *See* SOURCES OF KEYBOARD MUSIC TO 1660, §2(vi).

Bund (Ger.). *See* FRET.

Bunde. A circle-dance performed by couples among Afro-Hispanic communities of the Pacific lowlands of Colombia and Ecuador, often in the context of the *currulao* or *chigualo* rituals. Secular and Afro-Christian religious themes are sung in responsorial style by an *entonadora* (female leader) and *respondedoras* (female chorus). Instrumental accompaniment is played on reed flutes, *cununas* (conical drums) and *guasas* (rattles). Early reference to the BAMBUCO identify it with the *bunde*: individuals who participated in *bundes* in the mid-1700s (when the term was used as a generic name for African dance) were often censured. Its 19th-century relationship with the *bambuco* identified it as being played in a major mode without the melancholy character ascribed to the *bambuco*. Popular *bunde* found its way as a form into classical composition when Alberto Castilla (1830–1938), who founded the Ibagué Conservatory, composed *Bunde Tolimense* (*Bunde* of Tolima), with words by Cesáreo Rocha Castilla.

WILLIAM GRADANTE/R

Bungert, (Friedrich) August (*b* Mülheim an der Ruhr, 14 March 1845; *d* Leutesdorf, 26 Oct 1915). German composer. After studies in piano, organ and violin at the Cologne Conservatory he went to Paris in 1866, sponsored by the first of several benefactors. Returning to Germany in 1868, he worked in Königswinter and Düsseldorf before becoming music director in Kreuznach, where his developing commitment to German nationalism bore fruit in a patriotic historical festival play, *Hutten und Sickingen*. Joseph Joachim, whose wife Amalie had sung some of Bungert's songs in 1873, became interested in his work and arranged for him to continue his compositional studies with Friedrich Kiel in Berlin from 1874. A period of European travel, financed in part by a composition prize for his E♭ Piano Quartet (Brahms had been a judge), took him to Italy for the first time in 1878, where he became interested in Homer and Greek mythology. When Bungert met Nietzsche in Genoa in 1883 he had already begun work on *Die Homerische Welt*, a projected multi-cycle opera series whose completed parts comprise the tetralogy *Die Odyssee*. His association with the most significant of his benefactors, Queen Elizabeth of Romania, began in 1889. Her friendship and support later ensured his security and might have financed a planned Bayreuth-style theatre at Godesberg to house his *Homerische Welt* operas; his songs include many settings of poems written by her under the name of Carmen Sylva.

The first opera of the *Odyssee* tetralogy, the 'Musik-Tragödie' *Odysseus' Heimkehr*, received its première in Dresden in 1896, achieving some success and inspiring debate about his status as either a true or apostate Wagnerian. Dismissed by such critical historians as Rudolf Louis and Walter Niemann (in 1909 Louis described the *Homerische Welt* project as an 'audacious artistic confidence-trick' in which Bungert relied upon 'a parterre full of Gymnasium graduates in every city of his beloved German Fatherland'), he was most enthusiastically championed by Max Chop, a founder-member of the 'Bungert Bund' and editor of its journal (*Der Bund*). In his 1915 study of the composer, Chop hailed Bungert as an exemplary idealist in times of decadent and directionless modernism. *Die Homerische Welt* was to some extent intended as an alternative to Wagner's *Ring* cycle, expressing its Germanness in a manner both more 'universal' and more conservative; it demonstrated stylistic affinities with the German Romantic tradition (some critics also detected the influence of Meyerbeer) in a way that anticipated the nationalist conservatism of Pfitzner and others. *Odysseus' Heimkehr* was given 16 times in Berlin in 1898, establishing Bungert's reputation there, but none of the other operas of the cycle (*Hofkirke*, *Nausikaa* and *Odysseus' Tod*) moved far from Dresden. His later works included two grandiose oratorios and a programme symphony celebrating Zeppelin's invention of the airship. Bungert eventually retired to his Wahnfried-like house in Leutesdorf and was rapidly forgotten, save as the composer of songs favoured by Lilli Lehmann.

PETER FRANKLIN

Bunin, Revol' Samuilovich (*b* Moscow, 6 April 1924; *d* Moscow, 3 July 1976). Russian composer. He graduated in 1945 from the Moscow Conservatory, where his composition teachers were Litinsky, Shebalin and Shostakovich. In 1947 he was an assistant teacher in Shostakovich's composition class at the Leningrad Conservatory, and then became an editor at the state music publishers Muzgiz in Moscow (1948–53).

Although Bunin worked in many genres, the core of his output lies in orchestral and chamber music. This music possesses links with Russian 19th-century traditions and folk-music (Musorgsky in particular) and also with 20th-century composers such as Shostakovich, Stravinsky, Prokofiev and Sviridov. Bunin attempted to reinterpret past experience in his renewal of classical genres, forms and harmonic and modal resources, and in his creation of a fresh orchestral palette. Contrasts of genre and style abound in his work: the oratorio *Vedi nas, doroga* ('Lead Us, Road'), juxtaposes diatonic passages, folksong motifs and depictions of Russian antiquity with the angular rhythms and modal specificity of traditional jazz. In his largest-scale symphony, the seventh, lyrical forms are contrasted with dramatic, grotesque and tragic elements. An elevated and tragic current runs through much of Bunin's music.

Bunin's works have been performed by the conductors Mravinsky, Rozhdestvensky and Svetlanov, the pianists Lyubimov and Nikolayeva; Bunin's close friend Rudol'f Barshay gave the first performances of the Viola Sonata and the Viola Concerto, as well as conducting the premières of *Music for Strings*, the Concerto for piano and chamber orchestra, *Vedi nas, doroga* and the fifth, sixth, seventh and eighth symphonies.

ALLA VLADIMIROVNA GRIGOR'YEVA

Bunn, Alfred (*b* London, 8 April *c*1797; *d* Boulogne, 20 Dec 1860). English librettist and theatre manager. He became stage manager at Drury Lane in 1823 and manager of the Theatre Royal, Birmingham, in 1826. In 1833 circumstances combined to make him joint manager at Drury Lane and Covent Garden, and from 1835 onwards he attempted to establish English opera, relying heavily on the popularity of Balfe's works. His highly stylized librettos, set mainly by Balfe and Benedict, were carefully tailored to middle-class tastes. In lyrics such as 'The light of other days' (*Maid of Artois*) and 'When other lips' (*Bohemian Girl*) there is no doubt, however, that Bunn unerringly touched on a vein of plaintive nostalgia which lies at the heart of early Victorian opera.

As a manager Bunn has been accused of 'cheeseparing methods' (Rosenthal) because the artists he engaged (principals, chorus and *corps de ballet*) often found themselves appearing at both his theatres on the same evening. Yet he was a shrewd and energetic businessman who did not stint to pay an artist of Malibran's calibre £125 a night. Declared bankrupt in 1840, he had extricated himself by 1843, and in 1848 retired from the management of Drury Lane.

WORKS

The Maid of Artois, Balfe, 1836; *Guillaume Tell*, Bishop, 1838; *The Bohemian Girl*, Balfe, 1843; *The Brides of Venice*, Benedict, 1844; *The Daughter of St Mark* (drama), Balfe, 1844; *The Enchantress*, Balfe, 1845; *The Crusaders*, Benedict, 1846; *Loretta, a Tale of Seville* (drama), L.H. Lavenu, 1846; *The Bondman*, Balfe, 1846; *Matilda of Hungary*, Wallace, 1847; *The Sicilian Bride*, Balfe, 1852; *The Devil's In It*, Balfe, 1852

NIGEL BURTON

Bunney, Herrick (Cyril William) (*b* London, 12 May 1915; *d* Edinburgh, 17 Dec 1997). English organist. He was a leading figure in the postwar revival and development of musical life in Edinburgh. He studied the organ and piano at the RCM (1932–9), where his organ tutor was Sir Walter Alcock. He was organist of All Souls, Langham Place, London (1938–40), then served with the Royal Signals until he was demobbed in 1946. That year he was appointed organist and master of the music at St Giles's Cathedral, Edinburgh, where he nurtured and developed the choral contribution for 50 years, retiring in 1996. He was on the council and programme panel of the Edinburgh International Festival. As director of the Edinburgh Choral Union (1947–67) he rehearsed the choir for Edinburgh Festival performances conducted by Walter, Beecham and Klemperer. He gave four complete cycles of Bach's organ works at the festival, and for 30 years conducted Easter performances of the *St Matthew Passion*, communicating an intimate relationship with Bach's music. He founded the Edinburgh Youth Orchestra (1964) and the Tudor Hall summer school (1972). Bunney conducted the Elizabethan Singers (1967–76) in London, as well as the Edinburgh University Singers (1952–82). He gave the premières of several sacred works by Kenneth Leighton and was made an honorary fellow of the Royal Scottish Academy of Music and Drama (1986), Edinburgh University (1990) and the RCM (1996).

Bunting, Christopher (Evelyn) (*b* London, 8 Aug 1924). English cellist and composer. He studied composition with Thurston Dart at Cambridge, and also studied with Maurice Eisenberg in the USA and with Casals at Prades. He made his recital début with Gerald Moore at the Wigmore Hall in 1952 and subsequently performed with leading orchestras and conductors, and appeared regularly at the Proms. He gave recitals with Peter Wallfisch and Yonty Solomon, and formed trios with William Glock and Olive Zorian and also with Franz Reizenstein and Maria Lidka. Bunting gave the first performances of the cello concertos of Finzi (1955, under Barbirolli) and Rawsthorne (1966, under Sargent), and broadcast the premières of the Concerto, Sonata and Solo Sonata of Francis Routh (dedicated to him). He is also a distinguished teacher, and has given masterclasses internationally. He made a notable recording of *Kol nidrei* (with the LPO under Boult), and has published *Essay on the Craft of Cello Playing* (Cambridge, 1982) and *Cello Technique 'from One Note to the Next'* (with Dorothy Churchill Pratt, Cambridge, 1987); of his compositions, the Concerto for cello and strings (1989) is outstanding. He plays a Grancino cello of 1695.

MARGARET CAMPBELL

Bunting, Edward (*b* Armagh, Feb 1773; *d* Dublin, 21 Dec 1843). Irish folksong collector. He was the son of a Derby mining engineer who had settled near Dungannon and married Mary O'Quin; he studied music with his brother Anthony. In 1784 he was invited by William Ware to take over his duties as piano teacher and organist at St Anne's, Belfast, in which town his other brother, John, was already established as a teacher and pianist. He became articled to Ware and soon rose to prominence in Belfast's musical life; in 1806 he was appointed organist of the Second Presbyterian Church, Rosemary Street, and St George's, High Street. He became the best-known Belfast piano teacher of his day and was the chief driving force behind the organization of such events as the visit of Catalani in 1809 and the Belfast Music Festival of 1813, in which he took a prominent part as a pianist, playing a Mozart concerto. He was a founder of the Belfast Harp Society (1808–13) and the Irish Harp Society (1819–39). In 1819 he married Marianne Chapman, moving to Dublin where his brother Anthony was a piano teacher. There he was appointed organist of St Stephen's, and was for a short time (1825–7) a partner in a music warehouse.

Bunting was the first systematic collector of Irish folksongs; of particular significance in his career was the meeting of harpers in Belfast in July 1792. On this occasion he acted as scribe, notating the performances of Hempson, O'Neill, Fanning and seven others who remained from the rapidly declining class of traditional players. He was thus only just in time to preserve the melodies from oblivion, and became virtually the only source for the manners and customs of the ancient tradition, which he described in the preface to his third publication. He embarked upon a systematic collection of further material, and travelled through the countryside where he was assisted by Patrick Lynch, an Irish scholar, who collected the Gaelic texts. Apart from his notebooks, which are extant (in the library of Queen's University, Belfast), his publication *A General Collection of Ancient Irish Music* appeared in three volumes: the first containing 66 tunes (London, 1797), the second having 75 additional airs (with English words by Campbell and others) and a dissertation on Egyptian, British and Irish harps (London, 1809), and the third with over 150 airs and a 100-page dissertation on the history of music in Ireland (Dublin, 1840). Valuable as these publications are, it should be realized that Bunting was limited by the ignorance of his time concerning the characteristics of traditional Irish music, by the limitations of orthodox notation in coping with melismatic decorations, and by the demands of his day to provide the melodies with inappropriate words and unsuitable harmonies in the form of piano arrangements.

Bunting's collection (containing the original source of many of Thomas Moore's *Irish Melodies*) has been re-edited, restoring the appropriate Gaelic verses collected by Lynch, as *Bunting's Ancient Music of Ireland: Edited from the Original Manuscripts by Donal O'Sullivan with Mícheál O Súilleabháin* (Cork, 1983).

Buona, Valerio. *See* BONA, VALERIO.

Buonamente, Giovanni Battista (*b* Mantua, late 16th century; *d* Assisi, 29 Aug 1642). Italian composer, choirmaster, violinist and singer. He was a member of the Franciscan order. His Mantuan origins are apparent from documents at Bergamo. He was first active at the Gonzaga court in Mantua, where he may have worked under Monteverdi. He was perhaps among the musicians accompanying Princess Eleonora Gonzaga to Vienna for her wedding in 1622 to the Emperor Ferdinand II. From at least 1626 to 1629 he was in Vienna as *musicista da camera* to the emperor and in that post played an active role in the festivities in Prague for the coronation of the emperor's son, Ferdinand III, as King of Bohemia in 1627. It is likely that he remained in the emperor's service until early 1631, as can again be seen from documents at Bergamo.

On 13 July 1631 he was in Bergamo to take part in a Vespers service at S Maria Maggiore as a trial for an appointment there. He was accepted and on 17 July signed a three-year contract to serve as contralto and violinist at an annual salary of 840 lire – a figure surpassed only by the salaries of the *maestro di cappella* Tarquinio Merula and the organist Benedetto Fontana. However, he left Bergamo abruptly on 30 September 1631. The stated reason for his departure, given later by an officer of the Franciscan order to placate the irate governing body of S Maria Maggiore, was that the head of the order had revoked permission for his service; it was implied that Buonamente had sought release from the emperor's service for the sole purpose of going to Assisi and that if he were to remain in Bergamo the emperor might discover the breach of faith. Notwithstanding this he was appointed violinist at the ducal church, the Madonna della Steccata, of Parma on 2 July 1632, but there is no subsequent record of his service in Parma. His next and final post was at the Basilica di S Francesco, Assisi. On his arrival there from Parma about 15 February 1633 he was listed as a violinist, but later that year he was appointed *maestro di cappella*. He served as such until his death but from 1635 on was increasingly incapacitated by illness and his obligations were taken over by Felice Cinaglia.

Buonamente is remembered today as a composer of violin music. But from an inventory of 1647 (at *I-Af*) it is evident that he wrote over 160 sacred vocal works as well, ranging from motets for up to three voices to settings of the Offices and Mass for four to 17 voices, some with violins. Of these works one collection of motets for four voices was published but appears to be no longer extant. All the rest are apparently lost except for a few in two manuscripts.

Along with G.P. Cima, Salamone Rossi, Carlo Farina and G.B. Fontana, Buonamente was one of the earliest composers to cultivate the violin and with Farina, Biagio Marini and Giovanni Valentini was one of those who introduced the new violin style north of the Alps. His role in the development of violin style and the sonata is, however, difficult to assess since only the last four of his

Ex.1 Buonamente: *Sonata Ottava sopra la Romanesca* (*Il quarto libro de varie sonate*, 1626)

seven books of instrumental music survive, the earliest of them dating from 1626. Like Rossi, with whom he appears to have worked at Mantua, he favoured the new three-part scoring borrowed from vocal collections such as Monteverdi's *Canzonette* (1584) and *Scherzi musicali* (1607). However, his sixth book includes pieces for two to six parts. His surviving works include sinfonias, sonatas, canzonas and dances. There is little difference between the canzonas and the sonatas. The sonatas, following Crocker's classification, comprise three types – variation sonata, canzona-sonata and real sonata – of which Buonamente favoured the first two. His variation sonatas appeared during the height of the form's popularity in the third decade of the century. Like those of his contemporaries Rossi, Marini and Francesco Turini they are based on melodies such as the romanesca and Ruggiero and on popular tunes such as *Tanto tempo ormai* and *Questo è quel luoco*. They explore the possibilities of abstract figuration and display a careful concern for overall rhythmic organization. His canzona-sonatas represent an adaptation of the three-part texture to the ensemble canzona and show the influence of both Giovanni Gabrieli and Frescobaldi. His few real sonatas open with a non-fugal section and are more concerned with the exploitation of violin techniques: he ventures on occasion as high as *e‴*. The level of sophistication of his violin writing is shown in ex.1.

STEPHEN BONTA

Buonamici, Giuseppe (*b* Florence, 12 Feb 1846; *d* Florence, 17 March 1914). Italian pianist and composer. He studied first with his mother, then with his uncle Giuseppe Ceccherini and with Laussot. Following the latter's advice he went to Munich, where he completed his studies at the conservatory (1868–70) with Bülow (piano) and Rheinberger (composition). He then took over von Bülow's post there (1870–73). On his return to Italy in 1873 he founded the Società del Trio Fiorentino, following the disbanding of the Florence Società del Quartetto. In 1875 he was conductor of the Cherubini Choral Society in Florence; he also taught at the Conservatory (then the Istituto Musicale), and was appointed professor of piano there in 1893. A fine concert artist (whom Liszt regarded highly), he trained some excellent pianists at his school. He performed several times in Italy, Germany and England, where he was made an honorary member of the London Philharmonic Society. He was a fine contrapuntist and composed a string quartet (Wilhelmshaven, 1965), a concert overture, some piano pieces, and vocal and chamber music. He also wrote pedagogical works for piano, including *The Art of Scale Study* (London, 1903) and some preparatory studies for Beethoven's piano sonatas, and he made an edition of selected studies by Bertini. He edited Beethoven's sonatas as well as works by Handel, Haydn, Schumann, Czerny, Dussek, Kuhlau and others.

Buonavita, Antonio ['Il Bientina'] (*b* Bientina, nr Pisa, 28 March 1548; *d* Pisa, 16 Aug 1618). Italian organist and composer. He was ordained a priest in 1574 and was a *cavaliere* of the Order of S Stefano from 1577. He was a member of the nobility and in 1566, while still a seminarian, he received a benefice in Pisa. In 1571 he became assistant to the *maestro di cappella*, his teacher Bocchini, as well as an organist at the cathedral of Pisa. In 1574 he substituted for Bocchini as *maestro di cappella* at the cathedral and served again as *maestro* from 1581 until 1584; when the organist Alessandro Sassi died, Buonavita abandoned his position as *maestro* for that of organist. He played an important role at the cathedral: organising concerts, undertaking trips to Lucca and Florence to choose musicians and choristers, and introducing the practice of having four choirs positioned around the church.

The little of his music that survives shows a competent (if conservative) contrapuntist. He was chosen to compose the music of the intermedi for two famous events: the entry into Pisa of the Grand Duke of Tuscany, Ferdinando I de' Medici, in 1588, and the visit of Ferdinando and his new wife, Christine de Lorraine, in 1589. According to a description by Giovanni Cervoni da Colle the 'eccellentissima' music for the former event displayed skill not only in composition but also in the quality of sound obtained by Buonavita. The music was for 64 voices with 'two Gravicembali, four cornetts, four trombones, organ, two gambas and four lutes'. Similarly, for the latter event, he recounted that 'Arabs' sang three octave stanzas of poetry with 'the most sweet' music: the first octave was a solo aria, the second was for ten voices, sung by '52 people with six trombones, four cornetts' and organ, played by Buonavita himself; the third was for 20 voices with the same instruments. Later, a five-voice madrigal was performed, with Buonavita singing one part and playing the spinet.

In 1595 the cathedral organ was destroyed by fire and Buonavita, together with Emilio de' Cavalieri, took charge of the construction of a new organ. On his death he was accorded a solemn mass and was buried in the Camposanto Monumentale in Pisa.

JAMES HAAR/FRANCESCA IACOPONI

Buoni, Giorgio (*b* Bologna, mid-17th century; *d* ?Bologna, after 1693). Italian teacher and composer. For 16 years he was a priest at S Petronio, Bologna, and for a further 16 years held the position of *vicemaestro di cappella* and teacher of grammar there. In fact he was principally concerned with teaching music in the so-called Concerto de' Putti, a music school for boys, which, among other activities, gave concerts, directed by him, in Cremona, Lucca, Milan and Prato. Giovanni Bononcini was among his pupils. Buoni composed for his pupils three volumes of music, published in Bologna in 1693: *Divertimenti per camera* op.1, for two violins and cello; *Suonate* op.2, for two violins, cello and organ; and *Allettamenti per camera* op.3, for two violins and bass. Each volume contains 12 works comprising a short sinfonia and three dances. The simplicity of all of them betrays their didactic purpose.

Buontalenti, Bernardo [Bernardo delle Girandole] (*b* Florence, *c*1531; *d* Florence, 6 June 1608). Italian architect, stage designer, engineer and painter. He studied with Vasari and in 1574 succeeded him as director of all the elaborate productions staged at the Florentine court; the theatre that he built in 1586 in a hall in the Uffizi became the centre of all such festivities. For the Medicis he designed palaces, villas (including Pratolino, outside Florence), fortresses, canals and harbour installations in Florence and Tuscany.

Buontalenti had worked for the court before his appointment as director, designing costumes and special machines for transformation scenes in intermedi directed by Vasari in 1565 and Lanci in 1569. He gave the new theatre in the Uffizi an advanced system of revolving *periaktoi* that were a great improvement on the clumsy machinery of his predecessors, enabling the scenery to be changed virtually as often as wanted. The capabilities of the stage were demonstrated by the productions of the comedies *L'amico fido* (1586) and *La pellegrina* (1589), each accompanied by six intermedi and involving respectively six and seven different sets, changed in front of the audience (*see* INTERMEDIO, figs.2, 3, 4 and 5). The purpose of these court festivities was to glorify the prince by ostentation and splendour, and Buontalenti created a form of production that was equal to the task. Visual splendour based on machinery became obligatory in all later musico-dramatic enterprises in every court in Europe, especially in opera, the new musical genre that evolved in Florence. The earliest opera productions at the Florentine court, for which Buontalenti was still at hand to design the sets (e.g. Caccini's *Il rapimento di Cefalo*, 1600), not only took advantage of the mechanics of stage transformation, but also retained the cycle of mythological settings (Helicon, the Underworld, pastoral scenery, the sea, etc.) developed in the intermedi of 1586 and 1589, which were to set their seal on the visual conventions of opera for decades.

Būq (Iran. *bāq*). Generic term of the Arab world denoting an aerophone. It is used in written records but unknown in oral transmission. In modern Iraq, the horn is called *ṭūaṭa*, a word with which *būq* is associated (see Qassim Hassan, 1980, p.50). The instrument has been much modified. From being crescent-shaped, it became straight or coiled; it was originally of animal horn, but was later made of wood, metal or ivory. The determining factors are that the instrument ends in a bell and that the longer the pipe, the more powerful the sound. In Islam, the word was first used in the sayings of Mohammed, whose 9th-century biographer, Ibn Hishām, compared the *būq* of the 7th century to 'the *būq* of the Jews, which was used to call them to prayer'.

The use of the instrument by Jews and Christians was inspired by emergent Islam. Like the *zūrnā* (oboe), the *būq* was used, at an early stage of its development, to lead the singing in responsories. Subsequently it was played in military bands and its function changed. It is referred to in literary sources in company with various other instruments: with the *dohol* (double-headed drum) and *surnā* (Cairo band, 11th century), the *ṭabl* (double-headed drum) and the *nafīr* (long trumpet) (Mogadishu band, 14th century), *ṭabl*, *nafīr* and the *ṣornā* (south Yemen band, 14th century) – a remarkable progression, recording an instrumental vocabulary of increasing richness in less than three centuries.

It is hard to establish whether the *būq* should be classified as a trumpet (straight or curved) or an oboe; students of Arab music now restrict the term *būq* to the trumpet (*nafīr*), while *qarn* denotes the horn. The following terms may be derived from *būq*: *albogón* (Spanish: hornpipe), *alboka* (Basque), *bānkiā* (Indian: trumpet), *buki* (Georgian: trumpet) and *buçalla* (Albanian: the drone pipe of the *gajdë*). These instruments have no organological connection with each other, still less with the *būq*, which has never been precisely defined.

CHRISTIAN POCHÉ

Burada, Teodor T(eodor) (*b* Iaşi, 3 Oct 1839; *d* Iaşi, 17 Feb 1923). Romanian writer on music, folklorist and violinist. He studied music in Iaşi (1855–60) and at the Paris Conservatoire with Reber, Clapisson and Alard (1861–5). At the Iaşi Conservatory he held posts as professor of violin (1860–61) and of music theory (1893–

1903). He undertook concert tours in Russia, Poland, Bulgaria, Turkey, Croatia, Italy, Asia Minor and elsewhere, and collected folklore material of various peoples, particularly of the Romanians in Moldavia, Dobruja and Transylvania. The published results concerned wedding and burial customs (including remarkable studies on dirges), and Romanian folk music instruments. He was a founder of Romanian musicology, and published research on music education, the musical theatre, military songs and church choirs. He was also the founder of Romanian music lexicography: he edited the first Romanian dictionary of music (*Dicţionar muzical*, MS, *c*1862–75) and provided a great number of articles for encyclopedias and dictionaries. He published a periodical review *Almanach muzical* (Iaşi, 1875–7), and was the first musician elected a member of the Romanian Academy (1878).

VIOREL COSMA

Burbure (de Wesembeek), Léon-Philippe-Marie, Chevalier de (*b* Dendermonde, 16 Aug 1812; *d* Antwerp, 8 Dec 1889). Belgian music historian. He studied music from the age of seven under the direction of the choirmaster Troch of Onze-Lieve Vrouwkerk, Dendermonde, and was later a cello pupil of François Devigne. He completed his humanistic studies at the Royal College of Ghent and graduated as a doctor of law at Ghent University in 1832, all the while maintaining his interest in music. He began composing when he was 18, and shortly after his arrival at the university founded a symphonic society, the Lyre Académique. In 1836 his services to music brought him membership of the state jury for the Prix de Rome.

Upon his appointment as churchwarden at Onze-Lieve-Vrouwkerk, Dendermonde, he undertook a catalogue of the old church archives, and this project initiated his career of historical study. He next occupied himself with cataloguing the archives of St Lambert's Cathedral, Liège, and of Antwerp Cathedral, thus acquiring a unique source of information about the golden age of Flemish music. He wrote several valuable monographs, of which *Les oeuvres des anciens musiciens belges* (1882) is perhaps the most important. He also continued to compose throughout his career, and besides his 30 books and smaller studies, he left 168 musical works. In his will he left to Antwerp ten indexed volumes of notes dealing with the city's history, as well as a volume relating to the cathedral's choir school and three volumes relating to the church's archives. He was awarded many honours, including election to the Classe des Beaux-Arts of the Belgian Royal Academy in 1862; in 1879 he became director.

MARIE-THÉRÈSE BUYSSENS

Burchard, Johannes. *See* BURKARD, JOHANNES.

Burchardi, Udalricus [Borckhart, Burchard, Burckhart, Burgardus, Purckhart; Ulrich] (*b* Waischenfeld, *c*1484). German music theorist and theologian. He attended the cathedral school in Bamberg and in 1500 entered Leipzig University where he became Bachelor of Arts in 1507, Master of Arts in 1511 and from 1513 until 1515 taught as Master of Law. In 1515 he joined the theology faculty, but left Leipzig in 1516 and returned to Bamberg, where he was court chaplain until 1527 and served the prince-bishops Georg III of Limburg and Weigand von Redwitz. In Bamberg he got to know Tilman Riemenschneider and Albrecht Dürer and in 1517, 1518 and 1520 had contact with von Hutten. The publication of Burchardi's *Ein schöner Dialog von dem christlichen Glauben* (Bamberg, 1527), in which he presented a German translation of his treatise *Dialogus de fide christiana* (Bamberg, 1522), a work in the spirit of Erasmus's reforming zeal, led to his dismissal from the service of the prince-bishops. He resumed his teaching at Leipzig University and in 1531 became a Licentiate of Theology.

Burchardi's treatise *Hortulus musices practicae omnibus divino gregoriani concentus modulo se oblectaturis tam jucundus quam proficuus* (Leipzig, 1514) contains in seven chapters a description of *musica plana*. The chapters follow the same order as in the treatises of Michael Keinspeck and Balthasar Prasperg, and the work has the character of an elementary music primer. With this treatise Burchardi attempted to make good the obvious lack of books on music at Leipzig University, as Michael Koswick, Ornithoparchus and Rhau later did.

HEINRICH HÜSCHEN

Burchiella. *See* MOLINO, ANTONIO.

Burchuladze, Paata (*b* Tbilisi, 12 Feb 1955). Georgian bass. He studied in Tbilisi, making his student début there in 1976 as Gounod's Méphistophélès, then becoming a member of the Georgian State Opera, for whom he sang Leporello, Prince Gremin and King René (*Iolanta*). He studied further in Milan (1978–81), where he sang Banquo, Pagano (*I Lombardi*), Walter (*Luisa Miller*) and Zaccaria (*Nabucco*) at La Scala. He made his Covent Garden début in 1984 as Ramfis, returning as Rossini's Don Basilio, Khan Konchak, Boris Godunov and the Inquisitor (*Fiery Angel*). Having made his US début at Philadelphia (1987) as Boris, he sang Basilio at the Metropolitan (1989), followed by Boris and the Commendatore (1995–6). His other roles include Silva (*Ernani*), Fiesco (*Simon Boccanegra*), Philip II, Boito's *Mefistofele* and Dosifey (*Khovanshchina*), of which he has made an impressive recording. His magnificent dark-toned voice and imposing stature are ideal for both the Russian repertory and Verdi's bass roles.

ELIZABETH FORBES

Burck [Burgk], **Joachim a** [à] [Moller, Joachim] (*b* Burg, nr Magdeburg, 1546; *d* Mühlhausen, 24 May 1610). German composer, organist and public official. His surname was Moller, but he always called himself after his place of birth. He attended the grammar school at Magdeburg, where he must have been taught by Martin Agricola and then probably by Gallus Dressler. He next spent some time at Leipzig, Dresden, Jena, Erfurt and Schwarzburg. In 1563, in only his 17th year, he was appointed Kantor of the newly founded grammar school at Mühlhausen, and by the end of 1566 he was also organist of St Blasius there. In order to augment his income he took an additional post as a clerk at the law courts and also performed clerical duties for the consistory. He later became public notary and in 1583 a town councillor. He remained at Mühlhausen until his death. His reputation eventually reached beyond the town: for example, in 1596, together with many of the leading musicians in Germany, he took part in the famous organ trials at Gröningen, near Halberstadt, and in 1603 he acted as an organ consultant at Sondershausen and in 1604 at Hersfeld. As a musician, he may have been largely self-taught, but in the preface to his *Sacrae cantiones* (1573) he acknowledged a debt to the example of Johann Herrmann, as well as of Cipriano de Rore, Alexander Utendal, Jacobus Vaet, Giaches de Wert and especially Lassus, whom he extolled as 'princeps artis Musicae'. He was closely associated at Mühlhausen with the theologian and hymn writer Ludwig Helmbold, and at the grammar school he must have taught Johannes Eccard, with whom he shared two volumes of Helmbold settings (1574–8; Herrmann also appears in the second). The high regard in which he was held at Mühlhausen can be inferred from the decision taken by the town councillors in 1626 to bring out his works in a complete edition. This was, however, abandoned after the first volume, *Odarum sacrarum ... pars prima* (Mühlhausen, 1626[10]), which contained six collections.

Burck's first published work, the *Harmoniae sacrae* (1566), comprises motets composed in a late Netherlandish idiom, and closely based on Gregorian chant. The madrigalian motets of the *Sacrae cantiones* show his interest in concepts of *musica reservata*; individual words are emphasized by melismas, expressive chromaticisms and clear, harmonically orientated textures. With the through-composed four-part *Deutsche Passion* (1568) – allegedly according to St John though in fact a compilation from all four evangelists – Burck realized to the full his ideal of textural lucidity. The work is freely based on the style of the liturgical Passion, characterization being secured by a variety of vocal groupings: the words of Christ, for instance, are generally sung by the lower voices. In the mid-1570s Burck finally and decisively abandoned the polyphonic motet in favour of the homophonic song and ode. Among the earliest of these pieces, many of which draw on the poetry of Helmbold, are those in the four-part *XX Odae sacrae* (1572), which, as the title-page indicates, is unequivocally Italianate in its simplicity. With this volume and the series of collections of odes and songs that followed up to 1599, Burck established himself as a notable and prolific composer of up-to-date sacred songs. In some of them it is difficult to decide which vocal part (descant or tenor) carries the 'melody'.

Burck was a minor master in a period of transition. He saw it as his task 'to meet the demands of my calling by using such gifts as I have received from God' in the service of Christian teaching in church and school, for which reason, as he said in the preface to his *Deutsche Passion*, 'I have endeavoured to avoid setting to music any songs other than those that occur in Holy Writ or stem from it and which can be sung to the glory of God and for the purpose of self-improvement'.

ADAM ADRIO/CLYTUS GOTTWALD

Burdach, Konrad (*b* Königsberg [now Kaliningrad], 29 May 1859; *d* Berlin, 18 Sept 1936). German philologist. He studied piano and music theory with Constanz Berneker, and considered musicology as a career before choosing German philology. He taught in Halle, where he became reader in 1897, became professor in Berlin in 1900 and was finally appointed general secretary of the Prussian Academy of Sciences. His musical interests led him, in his chosen field of medieval humanism, to devote particular attention to the Minnesinger; in addition to his valuable work on the origin and decline of the Minnesang he was the first to place the study of Walther von der Vogelweide on a sound historical basis.

MALCOLM TURNER

Burden [burthen, burdoun]. (1) A refrain. This is the standard modern English word for any repeated sections in hymns and songs of the 15th and 16th centuries. In particular, the presence of a burden structurally independent of the verse is the prime distinguishing characteristic of the CAROL (see Bukofzer, 153ff). The medieval term, according to Richard Hill's Commonplace-book (Balliol College, Oxford, MS 354), seems to have been 'fote' (foot).

(2) A drone or pedal note, particularly on a bagpipe. This usage is found in both English and French music from the 13th century onwards.

(3) A shawm. Presumably this meaning is related to the preceding one: the 15th-century chronicle of St Albans describes the reception of a new abbot to the *Te Deum* with bells and 'shawms which we call burdones' (*sonantis chalamis quos burdones appellamus*; see *HarrisonMMB*, 206).

(4) In 1338 Robert Manning of Brunne used the word to describe the bottom line of a three-voice texture in his *Rimed Story of England*: 'Of tho clerkes that best couthe synge, Wyth treble, mene, & burdoun'. Many later English references define burden as a deep bass.

(5) A special type of burden may have been called FABURDEN, as suggested by Besseler.

DAVID FALLOWS

Burdet, Jacques (*b* Lutry, Lausanne, 19 June 1905; *d* Lausanne, 13 Sept 1984). Swiss musicologist. He received his first music lessons from his father Louis Burdet, a music teacher; later teachers included Denéréaz, Fornerod, Bamboni, Haug and Klecki. In addition to his musicological research and choir conducting, he taught music in Lausanne at the Collège Scientifique Cantonal (1941–57) and the Ecole Normale (1958–72). For ten years he was president of the Association Vaudoise des Directeurs de Chant and collaborated regularly with Radio Lausanne for its school music transmissions as well as with the music chronicle of the *Feuille d'avis de Lausanne*. With his untiring, detailed research Burdet neatly contributed to the knowledge of the musical past of the French community in Switzerland. He is known primarily for his main books, *La musique dans le pays de Vaud sous le régime bernois, 1536–1798*, *La musique dans le canton de Vaud au XIXe siècle* and *La musique dans le canton de Vaud, 1904–1939*, works which go beyond mere local research.

ETIENNE DARBELLAY

Burdoun. *See* BURDEN.

Bureau Central de Musique. *See* ESCUDIER.

Bureau d'Abonnement Musical. French firm of publishers. It was founded in Paris on 22 July 1765 by Antoine de Peters, a Flemish artist, with the violinist and composer Jean-Baptiste Miroglio. De Peters was granted a privilege for the publication of music in September 1765, but a group of influential publishers, including La Chevardière, Bailleux, Le Clerc and Venier, tried to stop his venture in a court battle which lasted two years; their efforts were unsuccessful and De Peters continued to issue new works. In 1783 the firm advertised G.J. Vogler's *La kermesse ou La fête flamande*. The firm continued to appear in trade directories until 1789, though De Peters died about 1779 and Miroglio about 1785. Early catalogues of the firm include instrumental works by Wagenseil, J.P.E. Martini and Jommelli. Its most important publications were the first editions of Gluck's *Alceste* (second version, 1776) and *La Cythère assiégée* (second version, 1775) and the second edition of *Iphigénie en Aulide*, all in full scores.

Burell [Burrell], **John** (*d* before 5 Feb 1423). English composer. He is known from a Gloria and a Credo in the second layer of the Old Hall Manuscript which are ascribed simply to 'Burell'. A royal chaplain of this name appears in the wardrobe lists of 1413, 1415 (when he was on the sick-list at Harfleur) and 1421. He held canonries at Chichester, Hereford and York (where he was precentor for a mere ten days in 1410) and a corrody at Meaux Abbey from 1416. He is mentioned as deceased in a warrant, dated 5 February 1423, to present one John Hunt, also a clerk of the royal chapel, to his Meaux corrody. This reference to his death eliminates other candidates reported in *Grove6* and elsewhere.

His Gloria and Credo (ed. in CMM, xlvi, 1969–73, nos.12 and 65) are both written in three-part score and neither is based on chant. Both alternate sections in contrasting mensurations, the Gloria Ͼ C Ͼ C Ͼ and the Credo O C O C O. The part-ranges are virtually identical, but there are no strong grounds for suggesting a pairing between them. The musical style is plain and the compositions are not known from any other source.

MARGARET BENT

Burette. French family of musicians.

(1) Claude Burette (*b* Nuits, Burgundy; *fl* 2nd half of the 17th century). Composer and harpist. After an unsuccessful career in medicine in Burgundy he left first for Lyons and then for Paris, where he settled, establishing a fine reputation as harpist and teacher. He ultimately became *musicien du roi*. His compositions for harpsichord and harp were collected into two manuscript volumes by his son (2) Pierre-Jean in 1695 but are not extant.

(2) Pierre-Jean Burette (*b* Paris, 21 Nov 1665; *d* Paris, 19 May 1747). Musician and scholar, son of (1) Claude Burette. Because of delicate health as a child he received

no formal schooling. Instead his father gave him lessons in music, for which he revealed such talent that at the age of eight or nine he performed at court, playing the harpsichord while his father played the harp. Despite his musical precocity he was gradually drawn to the pursuits of scholarship and medicine, and through intensive study equipped himself to become one of the most erudite men of his time. His knowledge of languages is said to have embraced Latin, Greek, Hebrew, Syrian, Arabic, Italian, Spanish, English and German, and his library contained some 15,000 volumes. He was a member of the Académie des Inscriptions et Belles Lettres from 1705 and the following year became an editor of the *Journal des savants*. His output includes important writings dealing with aspects of ancient Greek music: although his ideas did not go unchallenged even in his own day, his works remained the standard ones on the subject for many years. Several cantatas were ascribed to him by Fétis but they are more likely to be by (3) Bernard Burette.

THEORETICAL WORKS

15 essays in *Mémoires de littérature ... de l'Académie des inscriptions et belles lettres*, i–xvii (Paris, 1717–51):

'Dissertation sur la symphonie des anciens', iv (1723), 116–31; 'Dissertation où l'on fait voir que les merveilleux effets attribuez à la musique des Anciens, ne prouvent point qu'elle fût aussi parfaite que la nôtre', v (1729), 133–51; 'Dissertation sur le rythme de l'ancienne musique', v (1729), 152–68; 'Dissertation sur la mélopée de l'ancienne musique', v (1729), 169–99; 'Addition à la dissertation sur la mélopée de l'ancienne musique', v (1729), 200–06; 'Discours dans lequel on rend compte de divers ouvrages modernes touchant l'ancienne musique', viii (1733), 1–27; 'Examen du traité de Plutarque sur la musique', viii (1733), 27–44; 'Observations touchant l'histoire littéraire du dialogue de Plutarque sur la musique', viii (1733), 44–62; 'Nouvelles réflexions sur la symphonie de l'ancienne musique', viii (1733), 63–80; 'Analyse du dialogue de Plutarque sur la musique', viii (1733), 80–96; 'Dialogue de Plutarque sur la musique: traduit en François avec des remarques', x (1736), 111–80 (orig. pubd separately, Paris, 1735); 'Remarques sur le dialogue de Plutarque', x (1736), 180–310; 'Suite des remarques sur le dialogue de Plutarque', xiii (1739), 173 only; xv (1743), 293–394; xvii (1751), 31–60; 'Dissertation servant d'épilogue et de conclusion aux remarques sur le traité de Plutarque touchant la musique, dans laquelle on compare la théorie de l'ancienne musique avec celle de la musique moderne', xvii (1751), 61–106; 'Supplément à la dissertation sur la théorie de l'ancienne musique comparée avec celle de la musique moderne', xvii (1751), 107–26

Paragon dell'antica colla moderna musica: dissertazione del Signor Burette, in qui si dimastro che i maravigioli effetti attribuiti alla musica degli antichi nonprovano niun modo ch'essa fosse più perfetta della nostra (Venice, 1748)

'Petri Joh. Buretti Dissertation musicam veterum', *Thesaurus antiquitatum*, xxxii, ed. B. Ugolinus (Venice, 1767)

(3) **Bernard Burette** (*fl* 1702–29). His relationship to (1) Claude and (2) Pierre-Jean Burette is not clear. He was harpsichord master to Mlle de Charolais. As a composer he is known to have written only vocal music, notably cantatas.

WORKS

all published in Paris

Bacchus; L'Isle de Delos: Cantates françoises, 1v, insts (n.d.)
Daphné, cantate, 1v, insts (n.d.)
Le bal, cantate, 1v, insts (1723)

DAVID TUNLEY/PHILIPPE VENDRIX

Burgas. City on the Black Sea coast of Bulgaria. It is the second largest city in the country. The first evidence of opera performances in the city dates from 1901. In 1954 a permanent opera company, Burgaska Samodeyna Opera (Burgas Amateur Opera), was formed, consisting predominantly of instrumentalists from the State SO and singers from the Naroden Khor (Folk Choir) and the Rodna Pesen (Homeland Song) choir. Its first production, *La traviata*, in 1955 was followed mainly by Italian operas and operas by Mozart and by Bulgarian composers. The Burgas Amateur Opera became the State (National) Opera on 2 March 1972 when it opened with Krasimir Kyurkchiyski's *Yula*. Its notable conductors have included Nevin Mikhalev, Ivan Vulpe, Stoyan Kralev and Romeo Raychev, and it has engaged Dragan Kardzhiyev and Nikolay Nikolov (as guest directors) and the baritone Stoyan Popov. The opera's repertory is influenced by the summer resort character of the city and by the opportunities offered by the open-air stage at the Sunny Beach resort. Until the early 1980s the opera performed in the 670-seat hall of the Culture Club of a petrochemical plant; since 1983 a new building, the Burgas Opera House (800 seats), intended for drama, opera and ballet, has been used for two or three opera performances a week.

MAGDALENA MANOLOVA

Burgate [Burg], **R. de** (*fl* late 13th century). English composer. He is probably to be identified with the R. de Burgate who was abbot of Reading from 1268 to 1290, and who apparently resigned because of his inability to cope with the abbey's financial difficulties. His name occurs in the first item of the list of compositions contained in a book, now lost, which was owned in the later 13th century by W. DE WINTONIA: 'Spiritus et alme. R. de Burg'. Fragments of a four-voice setting of the *Spiritus et alme* trope of the Gloria exist in the manuscript *GB-Omc* 60, ff.84*v*–85. If, as is likely, this is R. de Burgate's composition, it is understandable that it was given pride of place in the manuscript; not only was it written by a prominent man, but it also reveals such first-rate craftsmanship and imagination as to indicate the work of a superior composer. In view of its advanced style he probably composed the piece in the late years of the century, perhaps after his abbacy, rather than before 1268, as Handschin assumed.

ERNEST H. SANDERS

Burge, David (Russell) (*b* Evanston, IL, 25 March 1930). American composer and pianist. He received the BM (1951) and MM (1952) from Northwestern University, the DMA and artist's diploma (1956) from the Eastman School of Music, where he later served as professor of music (1975–93) and chairman of the piano department (1975–87). He has also taught at the University of California at Davis (1975), the University of Pennsylvania (1977), the universities of Gothenburg (1980, 1981, 1992), Stockholm (1981, 1992), Alberta (1983), Auckland (1988), the Banff Centre (1983, 1984, 1986) and the Chautauqua Institution (1986–90). As a pianist noted for his support of the music of the second half of the 20th century he has given over one thousand concerts throughout the USA, Europe, Asia and Australia. These have included numerous first performances, including works by Berio, Crumb, Albright, Krenek and Persichetti; he has regularly recorded for Nonesuch, Candide, Vox, Musical Heritage Society and CRI. He has also written *Twentieth Century Piano Music* (New York, 1990) as well as many articles and reviews for, among other journals, *Keyboard, Clavier, Piano Quarterly* and *PNM*. He received the Deems Taylor Award for music journalism in 1978 and 1979 for articles in *Keyboard*. He was national chairman of the American Society of University Composers and chairman of the National Association for Advancement in the Arts (1989–94), after which he left academia to devote himself more fully to composing and performing. As a composer he moves easily and effectively between several 20th-century styles.

WORKS
(selective list)

Stage: Blood Wedding (incid music, F. García Lorca), 1951; Popoff (musical comedy, R. Alexander and N. Jackson, after A. Chekhov), 1961; Intervals (chbr op, P. Jackson), 1961; Twone in Sunshine, an Entertainment for Theater, 1969; Liana's Song (ballet, 6 parts), pf 4 hands, 1995; Luna Lunera (ballet, 12 parts, F. García Lorca), 1996

JOHN HOLZAEPFEL

Burge, John [Byson, David] (*b* Dryden, ON, 2 Jan 1961). Canadian composer. He studied the piano at the Royal Conservatory of Music, Toronto (diploma, 1979), and composition with John Beckwith, Walter Buczynski, Derek Holman and John Hawkins at the University of Toronto (BMus 1983, MMus 1984), then with Stephen Chatman and Wallace Berry at the University of British Columbia (DMA). In 1987 he became a professor of composition and theory at Queen's University in Kingston, Ontario. Burge has based his large and diverse output on an eclectic mix of styles, from the neoclassical idioms of Britten and Stravinsky to the theatrical gestures of Maxwell Davies. His choral music, for which he has increasingly become known, resembles oratorio in scope and intent, and is often based on religious or philosophical ideas with links to contemporary issues. In *Divinum mysterium* (1995) he integrates a plainchant melody, in choral and instrumental combinations, into four of the seven movements. His four-movement Symphony no.1 (1997) demonstrates further his interest in innovative structural features and instrumental texture. The recipient of many commissions in Canada and the USA, Burge serves as president of the Canadian League of Composers. His work places him at the forefront of his generation of Canadian composers.

GORDON E. SMITH

Burgess [Wilson], [John] **Anthony** (*b* Manchester, 25 Feb 1917; *d* London, 22 Nov 1993). English writer and composer. Widely known as a novelist, especially for *A Clockwork Orange* (London, 1962), he was also a talented and prolific composer. Essentially self-taught in music, he had composed his first symphony by the time he graduated from the University of Manchester in 1940. As musical director of the 54th Division Entertainment Section (1940–43) during World War II, he composed and arranged extensively for dance band. He was subsequently stationed in Gibraltar (1943–6), and his first novel, *A Vision of Battlements*, written in 1949, is a fictionalized account of his experiences there. After holding various teaching posts in England (1946–54), Burgess worked from 1954 to 1959 as an Education Officer in Malaya and Borneo. A number of compositions written during that time, including his Second Symphony 'Sinfoni Malaya', reflect the influence of traditional Malayan music. With his first major publication, the novel *Time for a Tiger* (London, 1956), he adopted the pseudonym Anthony Burgess, a combination of his confirmation name Anthony and his given name John Burgess Wilson. A physical collapse forced his return to England in 1959, where he was diagnosed with an inoperable brain tumour and given less than a year to live. Determined to provide an income for his first wife, he wrote furiously, producing five novels in 12 months. By the end of that year, showing no signs of ill health, he had become an established author.

Beginning in the late 1960s, Burgess wrote scripts and music for a number of film, television, video and theatre projects. One of these, a production of *Cyrano de Bergerac*

in his translation and featuring his own incidental music, was performed at the Tyrone Guthrie Theatre, Minneapolis (1971) to high acclaim. The success of that production led to the Broadway musical *Cyrano*, with the book and lyrics by Burgess and music by Michael Lewis. The Symphony no.3 (1974–5), the first of Burgess's orchestral compositions to be performed in public, dispelled many of his own doubts about his musical competence, marking a turning point in his musical career. From then on, in addition to writing, he composed prolifically.

In 1971 Burgess began a collaboration with composer Stanley Silverman, who wrote the music for the Guthrie production of *Oedipus the King* in Burgess's translation. The two subsequently turned the work into the cantata *King Oedipus*. They also planned an off-Broadway show called *Trotsky's in New York!*, for which Burgess wrote the text in 1975; in the end, however, Burgess composed the music himself, completing the score around 1980. The libretto of *Trotsky* was eventually published as one of three intertwined plots in *The End of the World News* (New York, 1982). *Blooms of Dublin*, a two-act musical based on Joyce's *Ulysses*, was completed by Burgess in 1982. The music hall style of the show may have been influenced by Burgess's memories of his mother, the 'Beautiful Belle Burgess', a music hall performer who died before he reached the age of two.

In 1985, Burgess was commissioned by Scottish Opera to write a new libretto for Weber's *Oberon* (1826), replacing J.R. Planché's text with an updated story about hijackers and hostages set in the contemporary Middle East. In 1986 he completed a translation of *Carmen* for the ENO and rewrote *A Clockwork Orange* as 'a play with music', restoring the original ending of the novel, which had been omitted from Stanley Kubrick's film (1971). As in the case of *Trotsky's in New York!*, he wrote two versions of the score for *A Clockwork Orange*. At the time of his death in 1993, he was at work on an Italian version of *Blooms of Dublin* (*Ulyssea*).

Burgess composed in an angular, vigorous, often dissonant style that can be described as a hybrid of Holst and Hindemith. Much of his music is contrapuntal; few of his large-scale works do not contain a fugal section. (An abundance of extant fugues and contrapuntal sketches support his claim that he wrote at least the exposition of a fugue every morning.) Harmonically, his music tends towards dense sonorities built on 4ths; melodically, 4ths and 2nds predominate. Rhythmic vitality and metric ambiguity are characteristic as well. He wrote quickly, completing works such as *Master Coale's Pieces* (1978) and the Guitar Quartet no.1 (1986) within a few days. His talent as a parodist is evident in his Elizabethan ballet score *Mr W.S.* (1979) and the Beethovenian score to the Singspiel version of *A Clockwork Orange* (1986). Music figures prominently in many of his books. *Napoleon Symphony* (London and New York, 1974), for example, follows the structure of Beethoven's Symphony no.3 'Eroica'. *The Pianoplayers* (New York, 1986) is a tribute to his father Joe Wilson, who played the piano professionally in British pubs and silent movie houses.

WORKS
(*selective list*)

most compositions before 1970 are lost

Dramatic: Will! (film score, Burgess: *Nothing Like the Sun*), 1968 [film never produced]; Cyrano de Bergerac (incid music, E. Rostand, trans. Burgess), 1971, Minneapolis, 1971; Moses the Lawgiver (TV score), 1973; The Eyes of New York (video score), 1975; Trotsky's in New York! (musical, Burgess), *c*1979–80; Blooms of Dublin (musical, Burgess, after J. Joyce: *Ulysses*), 1982, RTÉ and BBC, 2 Feb 1982; A.D. (film score), 1983; A Clockwork Orange (Singspiel, Burgess), 1986; incid music for works by T.S. Eliot, W.H. Auden, J. Osborne

PAUL SCHUYLER PHILLIPS

Burgess, Sally (*b* Durban, 9 Oct 1953). British mezzo-soprano of South African birth. She studied in London at the RCM, then joined the ENO in 1978 as a soprano, singing Zerlina, Pamina, Cherubino, Martinů's Julietta, Jenny (Bennett's *The Mines of Sulphur*), Marzelline and Mimì. By 1981 her voice had deepened, and she took on mezzo travesty roles such as the Composer, Octavian, Orlovsky, Nicklausse and Handel's Sextus, as well as Charlotte, Pauline (*The Gambler*), Nefertiti in the British première of *Akhnaten* (1985), Sonetka (*Lady Macbeth of the Mtsensk District*), Laura in the British stage première of Dargomïzhsky's *The Stone Guest* (1987), Carmen, Judith (*Bluebeard's Castle*), the Witch (*Die Königskinder*) and Dulcinea (*Don Quichotte*). In 1983 she sang Siébel (*Faust*) at her Covent Garden début and Smeraldina (*The Love for Three Oranges*) at Glyndebourne. For Opera North she has appeared as Berlioz's Dido, Amneris, Laura (*La Gioconda*) and Azucena, all parts which, like Carmen,

are particularly well suited to her vibrant voice and dramatic temperament. Having made her US début in 1994 at Portland, Oregon, as Carmen, Burgess sang the same role for her Metropolitan début the following year. In 1997 she sang in the first performance of Mark Anthony Turnage's *Twice Through the Heart* at Aldeburgh. She also enjoys a considerable career as a jazz singer, and has recorded Paul McCartney's *Liverpool Oratorio* and Julie LaVerne in *Show Boat*.

ELIZABETH FORBES

Burghauser [Mokrý], **Jarmil** (*b* Písek, 21 Oct 1921; *d* Prague, 19 Feb 1997). Czech composer and musicologist. He studied composition with Křička (1933–7) and Jeremiáš (1937–41) and conducting at the Prague Conservatory with Pavel Dědeček, Method Doležil and Talich (1941–46). Between 1945 and 1948 he continued his training at the University of Prague. He held appointments with the Prague National Theatre as Dramaturg for chamber opera (1943–4) and then choirmaster and conductor (1946–53), also lecturing at the Academy of Music (1946–9). After 1953 he worked freelance, as a composer and as an editor for the complete editions of Dvořák, Fibich and Janáček. In 1991 he was awarded a doctorate on the basis of his book (1959) on the orchestration of Dvořák's Slavonic Dances. The stimulus for his compositions came first from the music of Dvořák and Novák, and at the same time he made considerable use of stylized Czech folk music (for example, in the ballet *Honza a čert*, 'Honza and the Devil'). However, he then moved towards neo-classicism in the ballet *Sluha dvou pánů* ('The Servant of Two Masters', 1958) and other works, and at the beginning of the 1960s he began to seek an original means of expression using techniques including serialism (*Sedm reliéfů*, 'Seven Reliefs', for large orchestra), aleatory music (*Cesty*, 'The Ways') and unconventional colour combinations (*Barvy v čase*, 'Colours in Time').

Burghauser was one of the most accomplished all-round Czech musicians and scholars of his generation. A successful career as a composer was halted by the 1970s' 'normalization' in Czechoslovakia. Performances of his works were discouraged and he stopped composing, apart from a brief flourish in the late 1970s and early 1980s. But composition was only one of his many talents. With his Dvořák thematic catalogue (1960, 2/1996) he provided one of his fundamental tools for studying the composer. His thorough scholarship and broad grasp of his subject matter are evident in the extensive prefaces he wrote for critical editions of Dvořák librettos (*Dimitrij*, *King and Charcoal Burner*). He was a hugely experienced music editor. His skills as a composer, arranger and scholar came together in his reconstruction of Janáček's sketches for his incidental music to *Schluck und Jau*. His writings include popular books and practical manuals as well as detailed large-scale evalutations, e.g. of Janáček's entire instrumental oeuvre. Burghauser's most controversial legacy is the Janáček collected edition, whose detailed guidelines (a book of over 200 pages) he published in 1979 as a model for all future critical editions of 20th-century composers. His approach was disputed from the outset. Many scholars as well as performing musicians with Janáček connections (Firkušný, Mackerras) were dismayed at the obliteration of Janáček's distinctive *Notenbild* and by the extensive renotation, which affected pitch classes, metres, rhythms and even barring. Such were Burghauser's force of personality and debating skills that he successfully defended his guidelines from all attacks and the Janáček collected edition has continued to appear according to his original vision.

WORKS

(*selective list*)

Ops: Lakomec [The Miser] (3, L. Mandaus, after Molière), 1950, Liberec, North Bohemian, 20 May 1950; Karolinka a lhář [Caroline and the Liar] (lyrical comedy, 3, Mandaus, after C. Goldoni), 1955, Olomouc, Great, 13 March 1955; Most [The Bridge] (anti-op, 2, J. Pávek), 1967, Prague, National, 31 March 1967

Ballets: Honza a čert [Honza and the Devil] (J. Rey), 1954; Sluha dvou pánů [The Servant of Two Masters] (Rey, after Goldoni), 1958; Tristram a Izalda (ballet-saga, after V. Vašut), 1969

OLDŘICH PUKL/JOHN TYRRELL

Burghersh, Lord [Fane, John; later 11th Earl of Westmorland] (*b* London, 3 Feb 1784; *d* Wansford, Northants., 16 Oct 1859). English amateur musician. He was the eldest son of the 10th Earl of Westmorland, a Tory politician, and was educated at Harrow and at Trinity College, Cambridge (MA 1808), where he studied music under Charles Hague. His career was political, military and diplomatic. He was MP for Lyme Regis (1806–16). From 1803 to 1815 he served in various campaigns in the Napoleonic wars, at one time as aide-de-camp to the Duke of Wellington (his wife's uncle). He became a privy councillor in 1822, a major-general in 1825, lieutenant-general in 1838 and full general in 1854. He was British envoy at Florence from 1814 to 1830, resident minister at Berlin from 1841 to 1851 (acting as mediator between Prussia and Denmark in the Schleswig-Holstein dispute), and ambassador to the imperial court at Vienna from 1851 to 1855. He received many British and foreign decorations and distinctions; he succeeded to the earldom in 1841. In 1855 he retired to his country residence at Apthorpe House, Wansford, where he died.

Burghersh devoted most of his leisure hours to the study of music. Wherever his career took him, he brought together local professional musicians and profited from their instruction and entertainment. He was a good violinist and a remarkably prolific composer: this fact helped to improve the standing of the musical profession in England. But (like many aristocrats) he regarded Italy as the only source of good music. His compositions, which include seven full-length operas, are entirely in the older Italian style, and show no trace of individuality. It is their existence, rather than their quality, that is remarkable.

His most important achievement was the foundation of the Royal Academy of Music. Though several proposals for a national school of music had been put forward, it was Burghersh's energy and determination, as well as his political influence, that made the scheme a reality in 1822. As president of the RAM for its first 37 years he was tireless in raising funds for its support; he also took far more interest in the details of its administration than was expected of a gentleman amateur. His autocratic rule at times irritated the professional staff, from whom he expected obsequious obedience. He kept control of the RAM concerts, insisting on programmes of Italian operatic music and allowing no English compositions but his own. *The Times* in 1837 complained of these programmes scathingly:

> Above all, we would exclude all the compositions to which the name of Lord Burghersh is attached. They belong to no school, have no sort of merit, and can only serve to pervert the taste, such as it is, of the pupils … . As he is known to be absolute dictator in the affairs of the Academy, the making himself judge of his own merit, is what any man of refined feeling would avoid … . The institution has degenerated into a job of Lord Burghersh, or is made to administer to his vanity and conceit.

Near the end of his life, Burghersh had an unfortunate quarrel with Sterndale Bennett on a similar issue. Bennett felt, with some justice, that he regarded the RAM students only as an object of charity, and did nothing to encourage their efforts at composition. On the whole, however, the professors submitted to the annoyance of their president's overbearing ways, and they were wise to do so, for it is unlikely that the RAM would have survived without him.

WORKS
